

OFFICIAL OPENING BATHURST MARINE LIMITED SHIPYARD AT GEORGETOWN P.E.I.

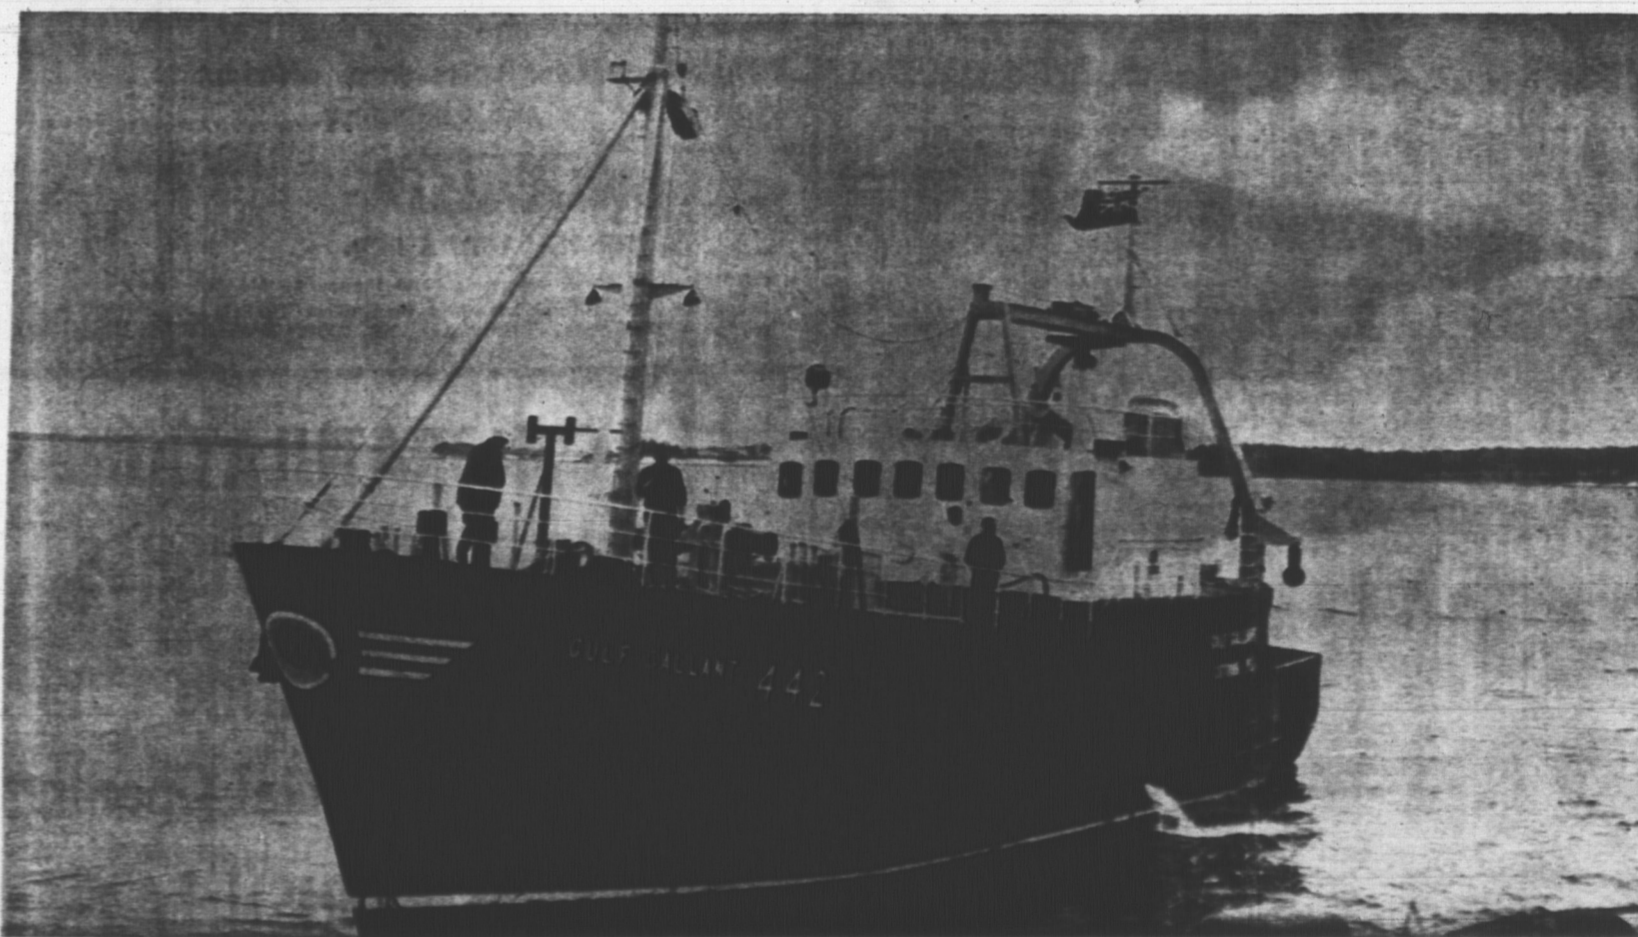

Pictured Above Is The New Bathurst Marine Building

Pictured at the left is a view of the new shipyard buildings at Georgetown, in which vessels are constructed to an advanced stage entirely under cover in an insulated and heated building. The main fabricating shop is equipped with two 10 ton overhead traveling cranes making possible fabrications up to twenty tons in weight, and with modern welding, cutting and plate forming machinery. The machine shop to the left of the picture is equipped with a five ton overhead traveling crane, a large and small lathe, large and small drilling machines and shaping machines.

The building to the right of the picture is in two floors, the lower one being equipped with modern woodworking machinery, the top floor being used as a mold loft.

Pictured to the right is the most recently completed steel stern trawler to be delivered from Georgetown for owners Gulf Garden Foods Ltd., Georgetown.

BATHURST MARINE LTD.

Designers and builders of steel fishing vessels of advanced design, specializing in stern trawlers with the latest improvements for rapid and hygienic catching and transporting of fish and with improved habitability and working conditions for the fishermen of today and tomorrow.
