The last our informant saw of the runaway horse he was going at the top of his speed along Richmond Street, and the driver doing all in his power to induce him to stop.

The president, Mr. Fleming reported that copies of the petition sent out to be signed, had been returned from the P. E. I. Railway, Truro, River du Loup, St. John and Moncton. Those sent to Campbellton and Halifax had not yet been returned. The signatures to the petition so far received totalled about 1200. The P. E. I. petition was signed by 175. St. John, 102, and Truro, 152.—Moncton Times.

The Money in Cheese.—There are 325 cheese factories in the district within the jurisdiction of the Dairyman's Association of Western Ontario and about 152,000 cows are drawn upon for the milk supplied to these factories. In 1893 the product of each cow, on the average, yielded a little over \$34, and in some cases as high as \$65 was obtained from one animal. When such returns as these can be obtained as the result of intelligent effort there is no reason why dairying should not be made the greatest and most profitable industry in the Province.—Toronto News.

Has Returned Home.—Mr. John P. Murphy, who suffered such severe injuries in Scott's Mill, Gyle River, on Nov. 25th, as to necessitate the amputation of a leg, has so far recovered as to be able to return to his home. During the nearly eight weeks he had been in the Charlottetown Hospital his wife was constantly in attendance on him, not having visited her home during that time. On Sunday afternoon last several of Mr. Murphy's friends came with sleighs, and having wrapped him warmly and placed him in a comfortable sleigh, and having bid adieu to the good wishes of the hospital, the party started across the ice, and were soon at his home at South Shore. His friends and neighbors were delighted to see him home once more and gave him a most hearty welcome.—Herald.

In the recent article on Coffee and Cocoa the eminent German Chemist, Professor Sutzer, speaking of the Dutch process of preparing Cocoa by the addition of potash, as one of the processes common in Germany in which ammonia is added, says: "The only result of these processes is to make the liquid appear turbid to the eye of the consumer, without effecting a real solution of the Cocoa substance. This artificial manipulation for the purpose of so-called solubility is, therefore, more or less inspired by deception, and always takes place at the cost of purity, pleasant taste, useful action, and aromatic flavor. The treatment of cocoa by such chemical means is entirely objectionable. Cocoa treated with potash or ammonia would be entirely unsuitable but for the supplementary addition of artificial flavors by which a poor substitute for the aroma driven out into the air is offered to the consumer." The delicious Breakfast Cocoa made by Walter Baker & Co., of Dorchester, Mass., is absolutely pure and soluble. No chemicals, or dyes or artificial flavors are used in it.

This is a woman's natural waist, which corset never yet disgraced. Inside it is a mine of health. Outside of charms it has a wealth.

It is a thing of beauty true, and a sweet joy forever new. It needs no artificial padding vile or bustle big to give it style.

It's strong and solid, plump and sound, and hard to get one arm around. Alas! If women only knew the mischief that these corsets do, they'd let Dame Nature have her way, and never try her waist to "stay."

Lord Randolph Churchill Dead.

LONDON, Jan. 24. Lord Randolph Churchill died this morning.

[Lord Randolph Churchill was born at Blenheim Palace on February 13th, 1818, and was the second son of the sixth Duke of Marlborough and of Lady Frances, daughter of the Marquis of Londonderry. He graduated from Merton College, Oxford, in 1841, and in 1842 he married Jennie, daughter of the late L. Jeron, of New York. In the same year he entered parliament as the Conservative member for Woodstock, and represented that borough until it was abolished by the Reform Bill, when he was returned for South Paddington. His political career was brilliant and rapid. His speeches both in the House and on the platform were of a decidedly aggressive character. Lord Randolph was made Leader of the House of Commons and Chancellor of the Exchequer in July, 1886, but resigned in December of the same year, taking both friends and opponents by surprise. After his retirement from office, Lord Randolph travelled for some time on the continent. His subsequent return and the course pursued by him need not be dealt with at length here.]
