TORONTO

TORONTO (CP) — Western oils provided the only bright spot in the stock market Tuesday, as they showed an almost unbroken string of gains.

Spurred by news and rumors of takeovers, the group reacted strongly, with four oil companies ending among the five most active industrial issues.

BA Oil, which recently made shareholders of Royalite a takeover bid, gained fractionally. Royalite remained unchanged, although it churned through more than 17,000 shares.

Canadian Oil, again the centre of takeover whispers, dropped ½ to 41¾ on heavy volume.

Among industrials, losses of ½ went to Abitibi and Aluminium, while Walker-Gooderham and CPR both slipped ¼. International Nickel, listed on both the base metal and industrial indexes, dropped 1¼ to 65¼.

Banks resisted the general industrial weakness, as Montreal, Nova Scotia, Toronto-Dominion, Royal and Canadian Imperial Bank of Commerce all showed gains ranging to one point.

On the exchange index, industrials dropped .23 to 546.96, golds .45 at 92.21 and base metals 1.40 at 181.62. Western oils climbed 1.98 to 110.70. Final volume was 4,665,000 shares compared with Monday's 4,350,000.

Among base metals, Noranda fell ½ and Hudson Bay Mining ⅛, while Falconbridge advance ⅛.

STUDIES INDIAN SILVER

Walter Kenyon, assistant curator of the department of ethnology at Toronto's Royal Ontario Museum, examines bits of silver found on a 2,000-year-old Indian burial mound near Campbellford, Ont. The silver, identified as having come from the Cobalt area 250 miles north, is the first known to have been mined by Indians in the northern part of the continent.

High Productivity Study Expected To Give Results

By ED WALTERS

HALIFAX (CP)—George De Young, hairman of the National Productivity Council, said here effects of a Canadian study of the reasons for Europe's high productivity will be felt in Canada "fairly soon."

Mr. De Young, here to attend a two-day seminar of labor and management which begins today, said in an interview the effects will not be felt immediately.

Describing it as a "step by step progress" he said results of the study will help create a better atmosphere for co-operation between managment and labor.

He said details of the study mission's report will be released Thursday after it is presented to the seminar.

The study group, a top team from the council, representing labor, management, government and education visited Sweden, Belgium, The Netherlands and the United Kingdom in August.

Mr. De Young said they studied methods used in negotiations between labor and management which avoided labor strife in Europe and their report will likely give guidance to Canadian management and labor on how to adjust to a more co-operative atmosphere in negotiations.

The council's work will not be changed by the resignation from the council of Claude Jodoin, president of the Canadian Labor Congress, Mr. De Young said.

Mr. Jodoin, who claimed the council is a barrier to labor-management co-operation, resigned Sept. 11.

Commenting on Prime Minister Diefenbaker's suggestion in London Monday that a world wide trading conference be set up, Mr. De Young said more "liberalized trade" is bound to come regardless of what government is in power.

He said Canadian industry must make preparations if it intends to compete with the European Common Market.

The council is working to better the "climate" of labor-management relations in preparation for greater competition, he said.

Economic co-operation and development will be the theme of the seminar. Some 60 high-level representatives of labor, management, education and government are expected to attend.

The seminar, to be held at Dalhousie University, was arranged by the National Productivity Council and the Dalhousie Institute of Public Affairs.
