

THE DAILY EXAMINER.

AT 11:45 AM, 1895.

NOT LIKELY!

In view of (1) improvements and changes rendering probable a heavy loss on account of plant; (2) risk of loss in the operation of machinery by mere employees; (3) the undoubted fact that public governments and corporations cannot, as a rule, conduct business as economically as private individuals or companies; (4) the enlarged opportunities for municipal hoodlumism and corruption; (5) the doubt which exists as to the right of the corporation to interfere and take away the business of the companies now supplying our citizens; and (6) the fact that so far as the corporation is concerned it would, at the best, be taking a "leap in the dark" for the sake of trying to save an unknown fraction of \$4,500 a year, we think it unlikely that the City Council will, this evening, or in the near future, venture to enter upon the manufacture, sale and supply of electric light.

REMEDIES FOR THE HORN FLY.

The "Horn Fly" is not too familiar to our farmers. How to get rid of it—that is the question.

Professor Fletcher, our Canadian Entomologist, writes:

"Almost any greasy substance rubbed on the animals will keep the flies away for several days. A number of experiments were tried in the field, with the result that train oil, kerosene, tar or carbolic acid added, will keep the flies away for five to six days, while with a small proportion of carbolic acid it will have a healing effect upon any sores which may have formed. Asepsis, talcum, and any such greasy substance can be used to advantage, but train oil or fish oil seem to be more lasting in their effects than any others experimented with.

"An effective and undoubtedly the easiest remedy to apply, if a small spray pump be used, is the Kerosene emulsion; which consists of the following:—Kerosene (coal oil), 2 quarts; rain water, 1 quart; common hard soap, 2 oz. Boil the soap in the water till it is dissolved in them, while boiling hot, turn it into the coal oil, and churn it constantly and forcibly with a syringe or force pump for five minutes, when it will be of a smooth creamy nature. If the emulsion be perfect, it will adhere to the surface of glass without oiliness. As it cools it thickens into a jelly-like mass. This gives the stock emulsion, which must be diluted before using with nine times its measure; that is, twenty-seven quarts of water, if it will be found to mix much more easily if done at once, before it cools. The above proportion gives three quarts of the stock emulsion, which with twenty-seven quarts of water will make up thirty quarts of the mixture ready for use. This may be applied to the animals either by means of a sponge or, what will be found most convenient where there are many animals to treat, by means of a force pump and spray nozzle. The emulsion thus made and sprayed over the cattle kills all the flies it reaches, and if repeated twice a week will almost entirely relieve cattle from annoyance. Another method of diluting the coal oil is to make the emulsion with milk instead of soap and water. Take sour milk, one part; coal oil, two parts. Mix the two thoroughly, as described above for the soap emulsion. Then dilute with water, so that one part in ten will be coal oil.

"A good way to fight this pest will doubtless be to prevent it from breeding and increasing. As stated above, the maggots can live only in the moist droppings of cattle. Any manure, therefore, which will ensure the drying up of these before they are full grown, will destroy them. This can be done most easily by spreading the dung out in the pastures regularly and at short intervals. Twice a week would be sufficient, and it would be most effective in wet weather when the substance would be washed away, as in hot weather, when it dries up.

"Where the flies gather in large numbers, on the ceilings and walls of stables in cool weather, or when driven from the cattle by applications, they can be destroyed either by spraying them with the Kerosene emulsion or a strong decoction of Pyrethrum Insect Powder. Dusting them with Pyrethrum powder by means of an "insect gun" would also be effective."

The above is republished in THE EXAMINER by request. Enquiry among farmers who have used the kerosene emulsion results in the information that it has not been found to be uniformly satisfactory. One farmer informs THE EXAMINER that he has applied an infusion of tobacco, "tobacco water" with success. Another states that he has found a mixture of cod liver oil and carbolic acid put on with a brush to be very effective. A dairyman who has perhaps the largest herd of cattle in the Province declares that he dilutes sheep-dip with water and finds its application a perfect protection against the flies. Whether or not the sheep dip used by him is arsenical, he forgot to state. But if so, a good deal of care must necessarily be taken in the application. Mr. Watson informs THE EXAMINER that Terrell's non-poisonous sheep dip applied in the proportion of one part to forty parts of water is reported to be a specific for this latest pest.

An English commercial journal remarks: "The conditions that have governed our trade during the last forty years have been and are rapidly changing. In many of our staple articles those who were once our customers are now our competitors, and also for others of our customers. We must rely more closely than in the past upon those who are more closely akin to us, and it is fairly certain that colonial trade will year by year assume more important dimensions. The growth would be accelerated if some practical means of establishing a customs union were devised. Moreover, there is a growing uncertainty about our foreign trade, of which we have had experience in the tariff changes of the States, in which direction it is not by any means impossible we may have further unpleasant experience in the near future. Some limitation of the claims of our trade might be faced with equanimity were we sure that the remainder would be less exposed to the vicissitudes due to the whims and political economical vagaries of our customers." It is evident that public opinion in England is looking towards a Commercial Union of the British Empire.

NOTES AND COMMENTS.

Senator Wolcott, of Colorado, says the free silver movement in the United States is suffering from having too much said about it. Whereupon the Montreal Gazette remarks that the plan of making a hundred cent dollar out of fifty cents worth of material is not one that is calculated to stand talking about.

The rain falls upon the just and the unjust, and our improved communications are an advantage to the grubs as well as to the toadies. For example, the Treasurer of the "Liberal Fund" and the Treasurer of the "Liberal Party" and the Treasurer of the "Liberal Association" crossed to Montreal on Friday and returned to Charlottetown the same evening.

The Pioneer unites with its confederates of the Opposition in shouting "the C. P. R. has been bought up." As the consideration is to be only a hundred thousand dollars additional mail subsidy, it will be admitted that the C. P. R. has been bought up cheap.

The Dominion statistician has analyzed the revised voters' lists of 1894 for this year's book. The result shows that 1,353,735 persons are entitled to vote at the next general election, a gain of 221,498 over the revision of 1891. Twenty-seven per cent of the population of the dominion are qualified voters by revision. Ontario gains 81,322; Quebec, 49,418; Nova Scotia, 21,079; New Brunswick, 21,176; P. E. Island, 1,180; Manitoba, 18,979; Territories, 4,834; British Columbia, 23,610. These figures prove that Canada under the N. P. is gaining in Manhood.

Mr. M. J. McDonald has his valencies in today's issue of the Guardian. Under Mr. McDonald's editorship the Guardian has been distinguished by its promotion of the theories of Henry George and other notions. Apart from these it has been lively and readable. Mr. McDonald has a keen eye for a sensational news item, and long for the world's eye.

Small brothers be, and a that." We reciprocate this sentiment, and heartily wish Mr. McDonald success in the future.

The disappearance from the Toronto Globe of the long standing question, "Has the National Policy 'made you rich?'" is attributed by the Hamilton Spectator to the publication of the savings bank returns. It seems that in 1873, 5 per cent of the people were \$3,207,000, and that in 1874, when the McKenzie Administration went out, they had fallen to \$2,754,000. On June 30, 1895, the amount to the credit of depositors was \$26,808,000, an increase of a thousand per cent over the total in 1878. No doubt facts and figures such as these tend to render the question ridiculous and to necessitate its withdrawal.

Montreal Gazette: "Those western Liberal papers who think a Liberal candidate had no chance in Westmoreland evidently let their funk get the better of their judgment. The St. John Telegraph, which is also a Liberal paper, points out that in the election to the legislature in 1892 Mr. Kilian, the present Liberal nominee, beat Mr. Powell, the Conservative candidate, by 3,480 votes to 3,262. The Telegraph thinks Mr. Powell is no stronger now than he was three years ago. His majority over Mr. Kilian, when he gets it, will therefore, on this hypothesis, be due to the superior popularity of his platform. His platform is the N. P."

In Rhoads Island, a few days ago, the Honorable Charles Langelier (one of Mr. Laurier's right hand men) enlarged upon the virtues and abilities of the late Mr. Mercier, who had been "treated as a criminal," but confessed himself and his hearers with the reflection that "as the last of the Graecis was followed by a Marinus so Mercier had left behind him in Mr. Laurier a grand Canadian of the same type as himself." This latter is the gentleman who is making trouble about the Manitoba Question in order that he may split the Conservative vote and obtain power to bring about "Commercial Union" which "leads on to Annexation!"

We regret to have to record the sudden death of Mrs. P. C. Kelly, who departed this life at Tracadie, on the 10th inst., after a short illness of twelve hours. Mrs. Kelly was attended in her illness by the Rev. Pastor of Tracadie, who administered the last rites of Holy Church. The funeral, which was very largely attended, took place at Tracadie, where a solemn Requiem Mass was chanted by the Rev. F. C. Kelly, of La Piere, Michigan, a nephew of Mr. P. C. Kelly. The Rev. Pastor of Tracadie, Father R. Curran, and Rev. Father Boyd officiated at the Mass as deacon and sub-deacon respectively. The deceased was beloved and respected by all who knew her. She leaves four small children and a sorrowing husband to mourn their loss. To them we extend our sympathy in their sad bereavement.

"If You should Die To-night!" Well, it would be your own fault, if it was consumption that took you off, and you refused to take Miller's Emulsion of Cod Liver Oil, which has been pronounced by scientists to be a positive cure for that dread disease. If you have any lung trouble, if you are threatened with consumption, lose not an hour in obtaining a supply of Miller's Emulsion of Cod Liver Oil. It is the great blood maker, and blood is what is needed by the consumptive. Miller's Emulsion is the great nerve strengthener and blood-maker, and cures Coughs, Colds, Bronchitis, Scrofula and Lung affections. In big bottles, 50c. and \$1, at all drug stores.

Advices received at Port Louis, Island of Mauritius, from Majunga, Island of Madagascar, dated August 5, say that the Hova are entrenched at Kinjaly, on the Ambrohinena mountains, between Andriba and Antananarivo. General Duchesne is now advancing upon this position, and another Hova force, consisting of 4,000 men is pushing forward with the intent of cutting off the French supplies near Marovasy. There has been heavy mortality among the French troops on account of malaria, dysentery, etc.

The Salisbury Government has reversed the policy of Lord Rosebery by retaining Chitral, from which post the late government had decided to withdraw. Lord Salisbury concludes that it is easier to hold the place than to defend the adjacent country in case an enemy is allowed to lodge in the hills. The experience of last year shows that the region about Chitral, when left in the possession of hostile tribesmen, is a menace to peaceful districts. The natives in the hill country are good fighting men and it will probably be found cheaper and better to convert them into good British subjects than to leave them dangerous enemies. In Chitral it was demonstrated that tribesmen formerly hostile have become a most useful element of the British army in India. The change is a good thing for the natives and good for the empire.

Druggists say that their superior Hood's Sarsaparilla exceeds those of all others. There is no substitute for Hood's.

NEWS NOTES.

There are now on the market in the central portion of Philadelphia at least half a dozen church editions, from which the congregations have departed or want to depart.

In Cuba a few days ago the insurgents placed dynamite on the railway track at Bolandron bridge. The entire train was destroyed, and only a few volunteers escaped death.

The Governor-General, accompanied by Lady Aberdeen and suite, are at Victoria, B. C. His Excellency will spend the fall and part of the winter in Victoria and at his farm in Okanagan, B. C.

It has been practically decided that M. H. Holmes, under arrest at Philadelphia, and suspected of having killed about a dozen people, will be taken to Chicago to stand trial for the murder of the Williams girls.

Paris Figaro says that in consequence of the advice received from certain French sources the Pope has definitely abandoned his policy of advising the Catholics of the Franco-Italian to the support of the republic.

The question of establishing the authority of Canada in the country surrounding the great Northern Sea at Hudson's Bay has been under the consideration of the Department of the Interior, and it may act in conjunction with the proposed expedition to Hudson's Bay.

The Novosti, of St. Petersburg, recommends that Russia, France, and Germany unite with the United States and Great Britain, with a view of obtaining satisfaction for the outrages committed by the Chinese upon the different missions, and in order to obtain substantial guarantees against their repetition.

Prime Minister Ito, of Japan, wanted to resign because of the war with China, the Emperor made him a marquis and did not confer the same honor on his colleagues. The theory that the Japs are a simple, child-minded people has really something in it. No western statesman would think of giving up his job for such a cause.

The consolidation of the largest milling industries in Western Ontario is almost accomplished. The mills interested are the Kent Mills, Chatham; the St. Thomas mills, the Aylmer mills, and the Blenheim mills. The deal involves property to the value of \$250,000, and contemplates an investment of capital stock to the amount of \$500,000.

The Manitoba Government's official crop bulletin was issued a few days ago. It shows that the estimated yield of the province will be as follows:—Wheat, 25.5 bushels per acre, or a total of 29,139,415 bushels; oats, 45.3 bushels per acre, total 21,887,416 bushels; barley, 36.8 bushels per acre; total, 5,507,310 bushels; flax, total 1,124,000 bushels; rye, total 62,810 bushels; peas, total 24,250 bushels. The total grain yield for the province is placed at 57,961,921 bushels. It is computed from the returns that 5,700 extra agricultural laborers will be wanted to handle the crop in time to escape the frost.

A question of great interest to Canada was asked in the house of commons on Friday last by Mr. Price, who inquired if the government was aware that the present exclusion of Canadian store cattle had caused and was causing severe loss in some of the agricultural districts and whether the restriction can be removed. The president of the board of agriculture, Walter Long, replied that as late as July 1st, cases of cattle suffering from pleuropneumonia had been found among the herds in the agricultural districts, and the government, in consequence, must maintain the restrictions placed upon such cattle. Mr. Long added that the government was communicating with the government of the Dominion of Canada on the subject.

Not only in France and Germany, but in certain parts of the United States, horse-meat factories are in operation, and an extensive business is carried on. Within the past few weeks 7,000 horses have been brought in from the United States to the Portland Horse Meat Canning Company at \$3 a head, the animals to be taken to Portland as soon as required. The agent of the company, who is travelling through the range country, says that the horse meat trade alone of each horse will bring \$2.50, leaving the entire carcass a clear profit. The growth of this industry is a fruitful subject of philosophical comment. Side by side through the ages man and horse have gone but as soon as rapid transit became essential to man's prosperity and happiness, the human being begins eating his companion.

FORCE OF HABIT. London People Have Become USED TO THE Great Specific Remedy.

LONDON, Aug. 19.—The despatch from Detroit with reference to the cure from Bright's disease and blood poisoning of Mr. Langley, of this city, by the use of Dodd's Kidney Pills, has recalled the wonderful facts of the case to the citizens, among Mr. Langley is well known. It has reminded them that Mrs. Langley, among others also made an equally wonderful recovery. The use of the pills however has become so universal here, and there have been so many instances in which they have been used with successful results that a similar case would hardly excite as much interest now as it did then when the medicine was less known.

Remember the S. O. E. picnic at Halliday's Wharf to-morrow. Boat leaves the Steam Navigation Wharf at 9.30, weather favorable.

SHIP NEWS. Port of Charlottetown.

ENTERED. Aug. 17—Lizzie C. Anderson, Port Hawkesbury; A. C. Langley, Wallace, N. S.; Julia C. Finlayson, Pinette, P. E. I.; Hydra, Bandra; Port Hawkesbury.

CLEARED. Aug. 17—George Harold, Bonnell, Sydney; Warrior, Jackson, Sydney.

Make a note of it—Read the story of Mr. Arthur Reddin of the Central Drug Store. The sale there announced will be continued until Wednesday.

TEA AT CAMPBELL'S COVE. Tuesday, Aug. 20th

The Parishioners of St. Columba's Church, Lot 47, intend having a tea party at Campbell's Cove, in aid of their church fund. The committee of management will spare no pains to make this tea one of the places than to defend the adjacent country in case an enemy is allowed to lodge in the hills. The experience of last year shows that the region about Chitral, when left in the possession of hostile tribesmen, is a menace to peaceful districts. The natives in the hill country are good fighting men and it will probably be found cheaper and better to convert them into good British subjects than to leave them dangerous enemies. In Chitral it was demonstrated that tribesmen formerly hostile have become a most useful element of the British army in India. The change is a good thing for the natives and good for the empire.

SPECIAL DESPATCHES TO THE EXAMINER

Notes at Montreal.

MONTREAL, Aug. 19. It has transpired that W. B. McDonough, Accountant of the City Treasurer's office, is a defaulter to the extent of \$30,000. McDonough is dying. His relatives offer the Finance Committee \$10,000. A young Englishman named Dudley Stewart landed yesterday from the steamer Labrador, and last night was suffocated to death by gas in his room at the Richelieu Hotel.

Important Publication.

OTTAWA, Aug. 19. Joseph Pope, to whom Sir John Macdonald confided his private papers, is compiling a book giving the original reports of the Quebec and London conferences. It will contain drafts of the resolutions and various proposals in regard to the educational clauses of the British North American Act.

A Fatal Collision.

CHATHAM, Aug. 19. While on an excursion, the steamer Miramich and the Halifax schooner Oscola collided on the Miramich river on Saturday. Miss Lobbman and Rhoda Stewart were drowned. Miss Maggie Stewart and Miss McLeod were rescued and may recover.

Arrival of the Valkyrie.

NEW YORK, Aug. 19. The yacht Valkyrie arrived last night. Her daily average run was 168 miles. There were no mishaps on the voyage.
