Old Time Firemen.

Fifty years and more ago, when New York and many other cities relied upon the members of their volunteer fire department to put out fires, the ambition of each company was to be first at a fire and most efficient in subduing the flames.

One old time fireman says that nothing now can rouse in him the excitement which never failed to come at the sound of the fire alarm.

"Business, meals and health were of small account compared to a call to join the fire engine," this veteran says, with a retrospective sigh. "The night of my wedding there was a fire, but it came right in the middle of the marriage service and I had to miss it. However, there was one early the next morning while we were eating breakfast, and I went. No bride was so exacting as to expect to keep her husband at her side when the fire department had use for him."

There were no salaries in those days save those paid to chief engineers. The firemen paid for the painting and decorating of their honored engines and for such repairs as were needed from time to time. In the days before cities were divided into districts the volunteer firemen, added to active service on the field of the conflagration, frequently had a good deal of preliminary exercise in the way of running before they discovered where their services were needed.—Youth's Companion.

A Vegetable Caterpillar.

The most extraordinary object I have ever seen is the New Zealand vegetable caterpillar. The rana is a parasite creep which first destroys its forest host and then crushes it to death and, usurping its skeleton, becomes a tree itself. If the rana seedling is dug up, it is found to be springing not from a seed, but from the head of a perfectly formed caterpillar.

It is supposed by some that the caterpillar, which on dissection proves to be internally the exact counterpart of its living insect relative, swallows the tiny rana seed while living, and burrowing into the ground becomes, instead of a chrysalis, the germinating home of the seed, which by some agency turns its unfortunate foster mother into wood.

Others, however, contend the caterpillar itself is produced by the rana, urging in support of their theory that if springing from a seed the shoot would grow out of different parts of the caterpillar instead of invariably growing out of the head.

The insect vegetable is yellowish, about four inches long, and is fully extended. I have seen them freshly dug up, and others that had been kept for years, and all had the appearance of a perfect insect carved in wood.—Pearson's Weekly.

Tanning by Electricity.

By the introduction of electricity into the process the period required for the tanning of leathers has been very materially reduced. In the final process of unhairing the pelts and skins it has been demonstrated that if a current of small density be passed through the solution of lime and arsenic in which they are usually soaked the process is so hastened that the skins are ready for the mechanical removal of the hair in several hours, whereas in the ordinary way it would require several days. The passage of the electric current appears to carry the solution into the pores of the hide in a very remarkable manner. After the hair is removed and the skins placed in the proper tan-

Rained by Mules.
M. P. Le Grand, an Alabama farmer, says that many negroes in the south are ruined by mules, and he thinks he has proved it. He owns a great deal of farm land, which he rents to negroes on condition that they shall do their work with an ox instead of a mule. As a result, all his tenants are prosperous and pay their rent promptly. The ox, he explains, is entirely capable in all the requirements of the cotton patch, but he has his limitations, and his colored master does not think of mounting him and riding off on useless errands or pleasure trips. As the negro cannot ride to distant churches, cake walks or "hoe downs," and as he will not walk, he goes to bed and is rested and ready for labor in the morning.

So far as the inference from this experiment goes, the negro, plus a mule, is a shiftless and unreliable citizen, but eliminate the mule and substitute an ox, and he becomes regular in his habits, businesslike and prosperous.—New York Tribune.

An Appreciative Reader.

Thomas Scott, the celebrated commentator on the Bible, published an edition of Bunyan's "Pilgrim's Progress" with explanatory notes. A copy of this work he benevolently presented to one of his poor parishioners. Meeting him soon after, Mr. Scott inquired whether he had read it.

"Yes, sir," was the enthusiastic reply. "Do you think you understand it?"

"Oh, yes, sir," the parishioner answered, with the unexpected and disappointing addition, "and I hope before long I shall understand the notes."

A German Death Notice.

Under the "collective mourner" system in Germany all the relatives of the deceased bind themselves together to mourn his loss and to defray collectively the cost of advertisement. The case of Mrs. Regina Werschau is an instance in point. She lived to the age of 111 and left behind her many relatives, whose testimony, quoted textually from the Werschau Gazette, reads as follows: "Filled with sorrow we announce to all our relations and acquaintances the Departure of our inmost loved Mother, Mother-in-law, Grandmother, Great-Grandmother, Great-Great-Grandmother and Great-Great-Great-Grandmother, who departed this life on August 22, 1898." The signatures of the parties affected follow. The German for the last title is "Urururgrossmutter."

DR. CLIFT cures Chronic Diseases and Rupture in Charlottetown, Friday, Saturday, and Sunday. Call or send stamp for information.

Attend Patons Remnant Sale. Best bargains in cotton and washing goods.

Rheumatic Torture

South American Rheumatic Cure Cures in 1 to 3 Days.

Solomon Woodworth, of Hopewell Hill, N.B., is rescued from a deplorably helpless condition, induced by the agonies of rheumatism. Mr. Woodworth had contracted rheumatism of the severest form and in a very short time was incapacitated for work—for weeks he could get no rest—suffered the most violent pains in his arms and shoulders—grew worse and felt he could not live, so terrible were his sufferings—his arms became perfectly helpless. He began taking South American Rheumatic Cure—after the second dose he experienced great relief and at the end of three hours every vestige of the pain was gone—the use of his hand and arm returned gradually and he feels altogether like a new man and to-day rejoices in a cure which he proclaims almost a miracle. South American Rheumatic Cure cures in 1 to 3 days every form of rheumatism and neuralgia. Do not suffer longer—it will relieve in six hours.

South American Nerve soothes the nerves and cures all forms of nervousness.

South American Kidney Cure cures only kidney diseases—relieves in a few hours.

CARTER'S LITTLE LIVER PILLS

SICK HEADACHE

Positively cured by these Little Pills.

ARE YOUR Artificial Teeth... Giving Satisfaction

Many persons who are compelled to wear Artificial Teeth on Plates, find that the Rubber or Vulcanite plate causes heating of the mouth, bad taste, shrinkage of the gum etc, finally causing the plate to get loose. Sometimes sore lips, sore mouths and sore throats are caused directly from the wearing of a rubber or Vulcanite plate. While it is true that a majority of persons can wear rubber or vulcanite plates with satisfaction, yet it is a fact that to a large percentage the same material is poisonous.

We have seen many cases where people who had rubber or vulcanite plates were continually suffering from the above causes, and came to us for relief. In case of that kind we always recommend a metal plate, either of

Gold, Platinum, Aluminum

Our reason for recommending a metal plate is that it is a conductor of heat and cold, thereby keeping the mouth cool, and it is non irritating, and is thinner, lighter and stronger than any other plate. It is clean in every particular, and is enjoyment to the wearer. You can have your impression taken and have a Gold, Platinum or Aluminum plate made same day, fully guaranteed because we make them ourselves and know all about the material used. We also make the famous THURLO PLATE, noted for its thinness, coolness and durability.

We would like you to call and see specimens of all our different lines of work including our Continuous Gum Plates—the very finest plate work known to Dental Science. Every piece of work done by us must give entire satisfaction to the patient else we will not allow it to leave our office.
