The day's most active stock was Standard Oil (New Jersey) up 1½ at 55⅝ on 25,400 shares.

Feed Live Polio Virus To Babies

CLINTON, N.J. (AP) — Newborn infants are being fed live polio virus in their bottles at the state reformatory for women here to trace their hereditary resistance to the crippling disease.

The tests, the first ever given children under six months of age, are being conducted on children of prisoners by the Lederle laboratories, American Cyanamid Co.

None of the children has contracted the disease.

Some 34 mothers volunteered their children to be given the live virus, mixed in their formula by an eydropper.

The studies are trying to determine the active antibody response of infants while still possesssing immunity inherited from their mothers.

Lederle announced Tuesday that it had given live virus to 600 volunteers over the last six years. Lederle is trying to perfect a long-lasting vaccine that can be taken by mouth.

Salk vaccine, currently in use, must be administered by a hypodermic.

Lederle's research parallels that of Dr. Albert R. Sabin, professor of research pediatrics at the University of Cincinnati. Two weeks ago Sabin announced results of his work on a live virus capsule that may be taken orally to give perhaps lifetime immunization.

Model Of Raft L'Ezare Wins Prizes

AXMINISTER, England (CP)—A Devonshire scoutmaster has built a model of the raft l'Egare II which carried three adventurers across the Atlantic from Halifax to Cornwall.

The model, two-thirds the size of the original, has a working radio and a cooking stove, and is complete even to the tattered flags that flew from the rough timber mast.

It was built in two months by Oliver Chapple, who consulted Canada House in London for details of the flags. He has entered his raft, called the Lost One which is the English translation of l'Egare, in four carnivals in Devon, and each time emerged with first prize.
