OUTPUT OF THE YUKON.

The total mining output of this territory for the past year is in the close neighborhood of twenty-five million. The pulse of Yukon mining activities is centred in the Recording Office at Dawson, and here the stimulus given by the recent changes in regulations is most clearly indicated. The office is thronged with men anxious to record discoveries or first locations, and an increased clerical staff can hardly keep pace with the work. The office receipts, which fell off markedly in the early months of the year, are swelling to their old-time bulk. Prospectors are out everywhere. New "finds" are posted every day; and stamped up and down the creeks are numerous. In fact, something of the spirit and rush of 97-98 has returned. The miners of the Yukon are jubilant and the city is born anew. Among the new creeks recently stamped are Moosehide, five miles below Dawson Chicken and Goring Creeks, with several in the Stewart River district. Not much reliance can be placed on any stampeding reports, but sufficient assured data has been gathered during the past few months to indicate that the gold bearing section of the territory is of considerable extent. Interesting results may be looked for from the work of prospectors during the coming year.

Anarchist Activity.

The woman who threw an axe at Emperor William at Breslau on Friday is a tradeswoman of that city. A provisional medical examination of the prisoner has been made and she has been pronounced to be insane. While Emperor William was returning from the barracks to the railway station he was cheered by immense crowds of people gathered along the route. While the attack upon the Kaiser may not have formed any part of an international plot, there is no doubt that unusual anarchist activity is developing in various countries of Europe, and that the police are taking exceptional precautions against it. The entire line of railway from Buda Pesth to Goebelloo, where is situated the palace of Emperor Francis Joseph, is guarded by special police, a thing which was never done before.

Mr. Kruger's Movements.

New York, November 20.—In his special cable letter from London to the New York Tribune, this morning, Mr. I. N. Ford says, regarding the arrival of Mr. Kruger at Marseilles: "There is a broad streak of slack water in foreign and political affairs. There would be almost a dead continent if the expected arrival of Mr. Kruger at Marseilles were not causing a ripple of excitement. The English press is wisely adopting a course which tends to minimize this source of disturbance. One journal has foolishly published a cartoon of Mr Kruger as a muzzled dog—this being designed as a hint to the French Government. That Government, however, does not need to muzzle Mr. Kruger, but to repress the ardor of the excitable French sympathizers standing around the dog pit. Otherwise the English press regards the reception of Mr. Kruger with good natured indifference and refuses to take a serious view of the affair. French nagging and pin-pricking will cease to be good sport if the English keep their temper and this they can afford to do since Mr. Kruger as a

political refugee in Marseilles and Paris is a less picturesque figure than he would be as a prisoner, smoking his pipe and reading his Bible at St. Helena.

Dr. Leyds and Delegates Wolmarans, Fisher and Wessels reached Paris today. This morning they held a conference at Hotel Scribe, where ex-President Kruger will stop. They leave in the morning for Marseilles. Mr. Kruger, they say, will land at 10 o'clock in the morning and will arrive in Paris next Friday.

A New Loan.

LONDON, Nov. 21.—Financiers are less positive than they were a week ago that the American bankers will not be allowed to supply a portion of the money which the British treasury requires. They admit that the Chancellor of the Exchequer will probably look to the cheapest market, and as rates are higher in London than in New York and Chicago he may find it convenient to obtain accommodation where the terms are more favorable. While national pride would be gratified by placing the new loan entirely in England, 'business is business.' The financiers also admit that there is an advantage in allowing Americans to take a good portion of the new loan. These operations will depend upon the methods of borrowing and the extent to which the resources of the Dutch territories are mortgaged in payment of the debt.

"I lingered between life and death."

"I think Dr. Pierce's Favorite Prescription or 'Golden Medical Discovery' the best medicines in the world," writes Mrs. Amelia Dougherty, of Kerrigan, Wayne Co., Mo. "I gave birth to a baby last summer. After confinement I became very ill, had the best physician that could be got, and he diagnosed my case as uterine trouble tending to dropsy. Medicine seemed to do me no good. I lingered between life and death for quite a while, every day growing weaker until I could not walk across the room. My friends were looking for my death every minute. A friend wrote and told me about Dr. R. V. Pierce, and I at once wrote to him for medical advice. He replied immediately, giving me full instructions as to what to do. I at once followed his advice, and when I had taken his medicine about a week I felt a good deal stronger. When I had taken it about one month I felt as strong as I do to-day. I took four bottles of each kind and two vials of 'Pleasant Pellets.' Many thanks for the medicine, it has permanently cured me."

Rev. Mr. Almond.

The Toronto Globe, speaking of the news that the Rev. Mr. Almond, B. A., Anglican chaplain of the Royal Canadian Regiment, has decided to enter the Imperial service, remarks that his career has been marked by many sensational incidents. His steady adherence to duty, self-sacrificing performance of work of an arduous nature, and a constant and cheerful zeal which have marked his connection with the regiment, have lifted it above the commonplace compliance with regulations, and entitles him to an honorable place in the annals of the first contingent. The Globe goes on to describe Mr. Almond's work among the enteric fever patients at Bloemfontein, the executive ability which he showed when alleviating the condition of the soldiers along the lines of communication, and in all conditions of danger from the enemy, danger more imminent from disease and discomfort of infinite variety. 'A knack for executive work, zeal, practical piety, and unselfishness make an excellent equipment,' says the Globe, 'for labors such as those to which Mr. Almond has devoted himself, and he will be followed in his career by the good wishes of his fellow-country men to whom he has been of service.'

C. C. RICHARDS & CO.

Dear Sirs,—A few days ago I was taken ill with a severe pain and contraction of the cords of my leg, and had to be taken home in a rig. I could not sleep for the pain, and was unable to put my foot to the floor. A friend told me of your MINARD'S LINIMENT, and one hour from the first application, I was able to walk, and the pain entirely disappeared.

You can use my name as freely as you like, as I consider it the best remedy I have ever used.
