MUNYON'S FEMALE CURE

Munyon's Female Remedies are a boon to womankind. They are positively effectual in establishing a free, natural and painless flow, and in stopping unnatural losses of blood. They cure leucorrhoea, prolapsus or falling of the womb and backache, bearing down pains, tired feeling, soreness and dragging in the hips and loins, painful menses scanty menses, suppressed menses and regulate menstrual periods that come too often. Price 25c.

Wanted by Pain, Bed-Ridden, Life Despaired of—South American Rheumatic Cure was the Good Angel Which Stilled the Tempest and Piloted Safely Into the Harbor of Health.

"I was so troubled with sciatica that at times the pain and suffering I experienced was excruciating. I failed in flesh to almost a shadow. I was almost continuously in bed for over a year, and I had spent hundreds of dollars in doctoring. I had almost given up hope of a cure. A relative who had been cured of the same disease by South American Rheumatic Cure induced me to try it. The first dose gave me instant relief. After using three bottles I was completely cured."—William Marshall, Varney P. O., Ont. For sale at Dodd's Medical Hall and by Geo. E. Hughes.

Pleasant View House

HAMPTON P. E. I. Will be open for tourists and others on Thursday, June 1st. Rates moderate. Telephone connection with the entire province. Persons coming by Str. Jacques Cartier on Friday or Saturday will be met at Victoria. M. SMITH, Proprietor

THIS HOT WEATHER

YOU ARE PHYSICALLY AND MENTALLY EXHAUSTED. Paine's Celery Compound is the Great Builder and Recuperator.

As a rule there is no pain following physical and mental exhaustion and debility. You know you are weak, faint, languid, have loss of memory, depression of spirits, with a wasting of flesh. Your troubles proceed simply from nervous exhaustion, and though you are not suffering pain and agony, be assured your condition is extremely perilous, and demands immediate attention.

That wonderful stream (the blood) that runs to every part of the body, supplying the most minute nerves and tissues, is foul and poisoned. In your present condition your blood is not a life stream; it is a stagnant pool of disease and death. The healthy, hale and strong, that bear up during the hottest weather, and that are blessed with clean, pure blood and steady nerves, are the people who make use of Paine's Celery Compound, the only medicine that revitalizes the blood, that fortifies the nervous system, that gives perfect digestive power, sound sleep, and a new lease of life to those advanced in years.

Paine's Celery Compound is truly the great modern elixir of life and no wonder that doctors approve of it and strongly recommend it.

Why go on in wretchedness and misery when such a medicine promises health, vigor and new life? We recommend you no untired remedy. Every bottle of Paine's Celery Compound is warranted to do the work it promises. There is health and life in every drop.

THE FIRST BALLOON.

How the Wonderful Airship Came to Be Invented. The word balloon means "a large ball." To Montgolfier of Annonay, France, the invention of the balloon is credited. It is said that he was led to turn his attention to balloon making from the following incident:

A French laundress, wishing to dry a petticoat quickly, placed it on a basket work frame over a stove. To prevent the heat from escaping by the opening at the top of the petticoat she drew the belt strings closely together and tied them. Gradually the garment dried and became lighter, and as the stove continued to give out heat and rarely the air concentrated under the basket work frame, the petticoat began to move, and finally rose in the air.

This so astonished the laundress that she ran to her neighbors and asked them to come and witness the strange sight. Montgolfier was among those that came in. The petticoat suspended in midair suggested greater things to him, and he returned home with "something to think about."

He at once began studying works on different kinds of atmosphere, and the invention of the balloon was the result.

The first public ascent by the Montgolfier balloon was made June 5, 1783. It was a spherical bag, consisting of pieces of linen buttoned together, suspended from cross poles. A fire was kindled under it, and the flames were fed with bundles of chopped straw. The loose bag filled out, assumed a graceful form, and in a short time was completely distended. At a given signal the stays were slipped and the balloon instantly ascended. Its velocity accelerated until it reached some height, then became uniform and carried it to an elevation of more than a mile. For ten minutes it remained suspended, then fell gently in a vineyard nearly two miles distant from the place of its ascension.

The first adventurers to make an ascent in a balloon were M. Pilatre de Rozier and the Marquis L'Aerides. In the basket of a balloon they, on Nov. 21, 1783, rose to a height of about 3,000 feet.—Philadelphia Times.

Workmen as Contractors.

A system of public work that has much to commend it is that of "co-operative contract," in vogue in New Zealand. Under that system a public work is divided into small sections by the engineer in charge, and an estimate is made of its cost. Each section is then let out to a group of workmen, who do the work under a foreman of their own choosing, but who receives no more than his fellows. They obtain the full profit which would otherwise go to professional contractors, and they share the payment equally.

Each worker is interested in seeing that his companions do their full amount of work, and the sooner the job is performed the greater the return for a day's work. If any tools are needed which the men do not own, the government supplies them at a moderate rental. The adoption of this system should provide a method whereby direct employment by the government would be consistent with a full return for the money expended, giving to the community an advantage in the economical execution of public enterprises equal to that enjoyed by private employers.—Review of Reviews.

Revolution.

"I tell you," said the man who is always excited, "the world is on the verge of another revolution." "That's true," replied his friend who keeps cool. "And there's no telling when it will end."

"Oh, yes, there is. It will end in 24 hours and start right over again the same as usual."—Washington Star.

Keenly Realized.

"How time flies as one gets older!" "Yes; when I was a clerk on salary the time did not pass half so rapidly as it does now that I am in business with notes to meet."—Indianapolis Journal.

Government Crockery.

All crockery ware and glass furnished to the government must be severely tested. One test consists in boiling the ware from 10 to 15 minutes, or until it is as hot as boiling water can make it. It is then instantly removed and plunged into water as near the freezing point as possible and be liquid. No crazing or cracks must show after the test. The tumblers are put into water at 192.4 degrees for one minute. They are then dropped into water at 42.44 degrees F. If they show the least imperfection under this test, they will not be accepted.—New York Ledger.

His Charges.

"When you were in the war, did you ever take part in a charge?" "Frequently." "And what were your thoughts at the time?" "That the beans would be all gone before I got there. The charges were invariably upon the cookhouse, you know."—Boston Transcript

An Ontario Lady Had Her Hands Poisoned

Ladies should remember that the Diamond Dyes are the only pure, true and unadulterated dyes in the world. The imitation dyes sold under various names have bulk enough, but three fourths of the contents is composed of cheap and worthless ingredients most dangerous to use and handle. Diamond Dyes prepared according to scientific principles, are always the same in color and strength; these great advantages the women of Canada fully appreciate.

Ontario woman writing about Diamond Dyes says:

"Your Diamond Dyes are the best I have ever used; they are quite beautiful. I had with and never irritate the skin. On occasion to use a package of common cheap dye that was sold me as being equal to the 'Diamond,' but it proved a source of great trouble. After using it a severe rash appeared on my hands, showing it contained poisonous matter."

Nautical.

Lesson—That sailors' chorus was awful. What was the matter? Stage Manager—The tars couldn't get the right pitch.—Pick Me Up.

The oleander has a deadly poison in its leaves and flowers, and should not be where young children are. It is too dangerous, beautiful though it is.

Trolley cars are now running in the streets of Cairo, Egypt.

Drunkenness a Disease.

Drunkenness is a disease, not a weakness, and by treating it as a disease is the only way to cure it. Exhortations, prayers and pledges are powerless to cure the curse of intemperance. It can be conquered however. Anti-Booze will is the stronger and will kill the dread disease. You can administer it without the patient's knowledge in his food or drink, and in a short time his desire for drink will be subdued. We will send a box of Anti-Booze in plain sealed wrapper to any address on receipt of \$1.00. Cure guaranteed. Oriental Chemical Co, 20 St. Alexis St., Montreal. 36 w &

QUEEN STREET

SPECTACLES.

Over twenty-five years I have been in the Spectacle business and during that time have fitted hundreds and hundreds of persons. Some had put off getting glasses so long that they could not see a large 4 inch letter A without going within 2 or 3 feet of it, and might have gone blind if they had put off getting glasses much longer. Others have been fitted or rather misfitted, with wrong glasses by travellers, and charged a great deal more than they ought to have been. This year our traveller, Mr. C. H. White, intends calling on parties at their homes in the country, to test eyes and show samples of our goods. Should he call on you I bespeak for him your favorable consideration, and any order you may give him will be filled as soon as possible and guaranteed by me. Glasses can also be exchanged at the store, CAMERON BLOCK, City, if after a trial they do not prove as satisfactory as you wish.

E. W. TAYLOR, City

TO LET

The house and premises now occupied by John Coombs, Esq., known as "Marine Villa," possession given the first of October. Rent \$200.00 a year, paid quarterly.

This place is beautifully situated, facing the harbor, adjoining Dundas Esplanade, the most beautiful site in the city.

The house has recently undergone a thorough repair, having hot and cold water bath, with a lift from the kitchen to the dining and breakfast rooms.
