

KHRUSHCHEV VIEWS ASWAN DAM PROJECT

Soviet Premier Nikita Khrushchev, in white straw hat, leans on railing as a Russian dam engineer explains features of the giant Aswan Dam project — the

Soviet Union's biggest aid program on the African continent — during visit Wednesday at the site in the United Arab Republic. It was Khrushchev's first view of the dam. At right in U.A.R. President Gamel Abdel Nasser, the Soviet leader's host. (AP Wirephoto via cable from Rome)

MINISTER RESIGNS

TORONTO (CP) — Premier Robert's office said Tuesday it has accepted the resignation of former cabinet minister Robert William Macaulay from his legislative seat of Toronto Riverdale. Mr. Macaulay's resignation was effective immediately. He was forced by ill health last October to give up his dual portfolios of minister for economic and development and minister for energy resources.

Talbot Sentence To Be Appealed

QUEBEC (CP) — Antonio Talbot, 65, fined \$1,200 Wednesday after being found guilty of influence-peddling while he was Quebec roads minister, said the judgment may be appealed. Meanwhile there was no question of his resigning from the Legislature as member for Chicoutimi, a seat he has held since 1958 for the Union Nationale. He was roads minister from 1944 to 1960 and was briefly leader of the party in 1961. The 7 1/2 p.m. trial found him guilty of using his influence to have Canadian Bitumuls Limited pay unnamed commissions on its contracts with the roads department to 13 persons he designated. The amount involved totalled about \$47,000. Four other men are before the courts on similar charges, all placed last fall as a result of a recommendation in the report of the Salvas royal commission on Union Nationale purchasing practices. The report found Union Nationale purchasing practices "scandalous, immoral and alarming." Chief Judge Thomas Tremblay of session court said he was not giving Mr. Talbot a jail sentence because the former cabinet member had not benefited personally from the commissions, and there was no evidence the government had been defrauded. It was also possible, he said, that Mr. Talbot had been ignorant of a 1955 law—Article 102

Four British Byelections Are Scheduled For Today

By DOUG MARSHALL LONDON (CP) — The government is putting its current popularity to the test today with four byelections in scattered parts of Britain. All four were formerly Conservative seats. Recent voting trends in local government elections indicate the Tories will almost certainly hold Winchester — a majority of 12,792 in the last election — and probably lose the Glasgow industrial riding of Rutherglen. They held Rutherglen by a slender 1,522 majority in 1958. The big guns of all three parties are thus out in force in the two remaining byelections — Bury St. Edmunds in Suffolk and the Withshire constituency of Devizes. In Bury St. Edmunds, Conservative candidate Eldon Griffiths, a former Journalist who now writes speeches for Tory MPs, is defending a 7,962 majority. The real doorstep-to-doorstep contest is in Devizes, a peaceful market town where the constituency boundaries embrace both rich Tory farming country and a chunk of the industrial centre of Swindon. The government's 1959 majority of 3,628 in Devizes could be erased by a swing of about five per cent and recent national opinion polls give Labor's lead

Britain Ratifies Accord On Shelf

LONDON (AP) — Britain has ratified the international convention on the continental shelf, bringing the total of ratifying countries to 24. Britain's instrument of ratification, deposited with the United Nations Secretary, brings the convention into effect, a foreign office spokesman said. The continental shelf which the submerged platform upon which the continental areas of the world rest. It is the transitional area between the coast and the great ocean depths. The convention basically grants exploitation rights on this shelf to the coastal state from its shores to the point where the continental shelf is at a maximum depth of 650 feet from the surface. Main interest behind the convention is the exploitation of natural gas and oil reserves beneath the seas in coastal areas.
