24 Scotch, and 181 Irish. To Victoria two ships, containing 522 steerage and 25 cabin passengers, of whom 176 were English, 61 Scotch, and 227 Irish. To New South Wales one ship, carrying 17 English, 10 Scotch, and 77 Irish. One feature worthy of notice in connection with the civil commotion in the United States is the increase which has taken place in the emigration to Canada. Mr. Buchanan, the emigration Commissioner for Canada, informed our Liverpool correspondent yesterday, that the influx of emigrants to Canada had been greater by 700 during the months of April and May than in the previous year. Upon the general returns, as compared with the five months of last year, there is a decrease in the present year of 7,622. The Mormon emigration appears to have revived this year, for on the 15th of last month the United States' ship Monarch of the Seas, 2,040 tons left the Mersey with 545 passengers, of whom 275 were English, and the remainder were all foreigners, there being no Scotch or Irish.

Major Norton, the United States Consul at this Port, has received from the President a box containing a Gold Chronometer and Chain, which he is instructed to present to Capt James Lawrence, master of Brig Ellsworth, of Windsor, N. S. as an acknowledgment of his exertions in saving the crew of the American Brig Rainbow, of Boothbay, (Me.) N. S., Stiles, master, wrecked near Cardenas in March last. The present is valued at $325, and will be presented by the Consul at an early day. The matter was brought to the notice of the Government by the Consul at Matanzas.—*Eastern Chronicle.*—

A Fearful Leap.—Colonel Moore, while commanding the troops in Dominica, lost his way one evening after sunset. As in utter darkness, he was endeavouring to get home, he came to several imperceptible objects, which he forced his horse to cross. Shortly afterwards the animal stopped at one which he seemed particularly afraid of. The soldier, unwilling to halt between two opinions, but, on the contrary, determined to proceed, as he thought, straight towards his home, at almost full speed rode at the unknown impediment several times in vain, until the animal, surrendering his instinctive fears and possible knowledge to the spurs that were propelling him, with a violent jump into the air cleared the little low hedge, for such it proved to be, bounding that awful precipice which, like a wall, connected the upper story or tableland of the ocean which in solemn darkness reigned beneath it. Colonel Moore states that during his passage on horseback through the air almost every event of his life, large as well as small, at about the rate of the electric telegraph, which transmits its ideas one hundred and eighty thousand miles in a second, flashed across his mind as distinctly and as vividly as if they were recurring. By a sort of clairvoyance, of which in medical annals there exist recorded several similar instances, he saw all that in his lifetime he had done or left undone, and was thinking, *seriatim*, of almost every friend and relative, when, *in an instant*, all those bright fiery thoughts on the past, present, or future tenses of his existence became extinguished by a concussion, which, depriving him of his senses, left him with his legs in the sea, and his body on the rocks, apparently dead.—*Sir F. Head.*

NEW BRUNSWICK.

THE NEW HOUSE.

For the information of the reader we give below a list of the names of the members returned to the House of Assembly. We shall not pretend to class them, as some of our contemporaries have done, for we are apprehensive we should, like them, make sad blunders We question if all the gentlemen returned have themselves made up their minds which way they will vote, even those who have decided on becoming party men.

Restigouche—Montgomery and McMillan.
Gloucester—Young and Meahan.
Northumberland—Johnson, Kerr, Williston, Crocker.
Kent—McPhelim and DesBrisay.
Sunbury—W. E. Perley, Glasier.
York—Fisher, Hatheway, Allan, Dow.
Saint John—Cudlip, Anglin, Jordan, Skinner, Watters, Tilley.
Albert—M'Clellan, Stiles
Carleton—Munro, Lindsay.
Westmorland—Smith, Steadman, Landry, W. J. Gilbert.
Victoria—Raymond, Costigan.
Kings—Ryan, Vail, Scovil.
Queens—Ferris, S. H. Gilbert.
Charlotte—Gilmor, Grimmer, Boyd, Stevens.—*Gleaner.*

"Excursion to Prince Edward Island.—The season for excursionists and pleasure parties has now opened; and though we may not, in the nature of events, expect the great rush of previous years to the several watering places and mountain retreats; still there will be no doubt a considerable amount of pleasure travel, and to those who seek a week's recreation, we can recommend attention to the advertisement of the International Steamship Company for an excursion to Prince Edward Island. This is a new point of attraction for excursionists from this vicinity, and we have no doubt that the promised novelty of trip and scenery will induce many to avail themselves of the opportunity offered.

"Leaving Portland on Monday night, on board the Eastern City, the party will arrive at St. John about Tuesday noon. The remainder of the day can be profitably spent in rambling in and around this pleasant city, and after a good night's rest, passengers will take the cars on the St. John and Shediac R. R. (E. & N. A. R R.) for Shediac. 110 miles distant—through a romantic and beautiful country. With good luck, the tourist may embark on board the steamer from the latter place about noon for Cascumpec, on the north-east side of P. E. Island. Here, a day and a half will be allowed the pleasure seeker. The whole will cost but a trifling sum comparatively, and certainly it seems to be one of the most desirable routes which can be found."—*Ib.*

Excursion to P. E. Island.—We regret that other engagements, which could not well be neglected this week, prevented us from accepting the very courteous invitation to participate with the excursionists in the enjoyment of the pleasure trip from St. John to Shediac by rail, and thence to Rustico, Richmond Bay and Cascumpec, P. E. Island, by the steamer "Princess Royal." There were among the excursionists, we understand, several members of the American Press, Mr. Oglevie, of the U S. Survey, the Railway Commissioners and Superintendent and Captain Coyle of the International Steamboat Company. These excursions should be extensively patronized, as no more delightful or better means of recreation can be affording those who are compelled to endure the din, dust and confusion of city life. The cost is comparatively trifling, while the places visited will, no doubt, appear to many exceedingly attractive and picturesque.

We understand that other excursions of a similar character, (when the various places of note on the North Shore will be visited,) are in contemplation, and we trust that our pleasure seeking citizens will not fail to avail themselves of the opportunity when they occur.—*St John Courier.*

GIANT STRIDES IN THE NINETEENTH CENTURY.

It is a world of wonders nobody can deny; we take up the periodical of the day with the expectancy of reading some new theory or discovery, as well as seeing news in the abstract. The transatlantic electric cable, at the time we write, is fast expanding from its central point in mid-ocean to its two "termini" on land to link the hemispheres! but at the same time that we justly look upon this as a convincing proof of the great "march of intellect," we must not lose sight of another and no less great palpable evidence of what a giant intellect, single handed, can accomplish. Thomas Holloway, whose name (as the great medical dictator of the present age) it needs no sub-marine telegraph to herald from one clime to another, has, by means of his two remedies, a *Pill* and an *Ointment*, long established a chain of communicating agencies around the globe, without having recourse however to the aid of electricity or a metal wire. As the poet has designated man to be but "*a link in the great chain of causation*," so may Holloway be said, through the instrumentality of his all-powerful remedies, to have organized a *Universal Dispensary* for the sick of all nations without regard to creed or color, whether civilized or savage, simple in their all-sufficiency, and within the reach of all.

What has led to these remarks at the present was a visit we paid some time since to Dr. Holloway's establishment, and the inspection with which we were then favored of some of the innumerable proofs of his vast enterprise, from which we deduced the almost inconceivable extent to which his labors have extended, and the consequent universal acceptation of his twin-remedies as specifics for internal and external diseases—pages might be written in adducing proofs of this, but one will serve to elucidate the fact in the present instance sufficient to convince the most sceptic. In proportion as countries are distinct and diversified, so are the means of reaching all the scattered members of the human family difficult to accomplish. To do this, it would be necessary to employ an almost "Penticostal" array of different tongues. Accordingly, in almost every living language has this enterprising man made known his mission to suffering humanity, and in no less than thirty distinct dialects have the wondrous properties of his medicines been actually printed, thus in their own tongue enabling millions to apply to their own peculiar cases these all powerful curatives.

Such "Giant Strides" as these show the possibility of *one* master mind successfully competing with the capacities of hundreds backed by science itself. We then say to such of our readers as may be labouring from weakness and debility, or whose liver and stomachs are disordered, or those whose blood is impure, go and procure some of the Pills,—as by their means, there will be found health for all.—*Temperance Courier.*

Patent Newspaper Folder.—Mr. G. L. Bailey, an ingenious mechanic of our city, has invented a machine for folding newspapers, which is one of the simplest and most complete contrivances that we have ever seen. It takes the papers from the table of the press as fast as they are printed, and delivers them altogether of its own motion, ready for direction or the news boys, more neatly and evenly folded than is usually done by hand. This saves the entire expense of folding. The machine is so simple that it is not likely to get out of order, and we see no reason why it should not run for years without need of any repairs. The power required is very slight, and the price will be very much less than that of any machine for this purpose that we have seen or heard of after having watched its operations, we make the prediction that it will distance all competitors, and will be so cheap and useful that the proprietors of newspapers cannot afford to do without it. Mr. Bailey has, of course, taken steps to secure a patent for his invention, and will soon have the machines in the market. It has been suggested that he should add to this an apparatus for directing the papers as they come of the folder. He thinks the thing practicable, and we should not be surprised if, ere long, the whole business off folding and directing newspapers should be done by machinery. Bailey can invent and apply the other part of the apparatus, we guess, if the thing be inventable.—*Portland Argus.*

Fugitive Slaves.—The statistics of the fugitive slaves for the last twenty years may be considered a subject rather out of date at present, but instructive facts are always worthy of attention. We have, therefore, from the census returns of 1850 and 1860 the following figures, showing the number of slaves that have escaped from each of the Southern States during the last twenty years:—

	From 1840 to '50.	From 1850 to '60.
Alabama	29	36
Arkansas	21	38
Delaware	26	12
Florida	18	11
Georgia	89	23
Kentucky	95	119
Louisiana	90	46
Maryland	279	115
Mississippi	41	63
Missouri	60	99
North Carolina	64	61
South Carolina	16	23
Tennessee	70	39
Texas	28	16
Virginia	83	117
Total	1011	803
Whole number in twenty years		1814

It will be seen that this table effectually explodes one of the "grievances" set up by the secessionists, viz: the increasing insecurity of their slave property. Notwithstanding the great increase of slaves—nearly 800 000—between the years 1850 and 1860, the number of fugitives appear to have been diminished by over 200 It will also be worth observing that the seven States which first seceded and formed the Southern Confederacy, have lost during the last ten years only 218 slaves, while three of the slave States that still remain loyal, Maryland, Kentucky and Missouri, have lost 333. The per centage of these respective losses, to the amount of property undisturbed, would of course present the pretext of the Gulf States in a far more ridiculous light. Finally, it is apparent from an inspection of the table that all of the above fugitives ran through, on an average, more than two slave States before they could get into any free State. If they could not, therefore, be intercepted there, where there are peculiar facilities for detecting and arresting runaways, how could it be expected that they would be caught in the free States?

Wistar's Balsam of Wild Cherry is a pleasant remedy for every kind of cough, cold and irritation of the breathing apparatus; it is a safe remedy; it is a powerful remedy; it is a speedy remedy; it is a remedy that *cures.*

The New York *Examiner* says "I have long used Perry Davis Pain Killer and consider it an indispensable article in the family medicine box, for cuts and bruises it is invaluable."

The *Christian Advocate* "It is valuable not only for colds but for the summer complaints, and should be kept in every family."

The Herald of Gospel Liberty "It surpasses any other remedy we have ever known."

The Montreal *Transcript* "No family should be without it, in case of sudden attack of Dysentery, Diarhae or Cholera."

Charlottetown, July 8, 1861.

Valuable Real Estate at Summerside for Sale!

THE SUBSCRIBER hereby offers for sale his property at Summerside, consisting of two Town Lots each 80 × 100 feet, together with Dwelling House, 28½ × 23 feet, 13 feet post, nearly finished; a Kitchen attached, 20½ × 13 feet, and a good Cellar under the House 7 feet deep, perfectly dry at all seasons. This property is pleasantly situated, and commands a splendid prospect of the fine Harbor of Bedeque and the Straits of Northumberland in the distance. As a business stand, being located near the public Wharf, or as a private residence, it is unsurpassed by any that may be offered for some time.

Summerside is connected with Shediac, the terminus of the E. and N. A. Railway, and Charlottetown and Pictou, by means of a good Steamer plying regularly twice a week, carrying mails, passengers, and freight each way; and will early this season be connected with the New York and Newfoundland Electric Telegraph line—a double line of wires being now in course of erection from this port to Cape Traverse to connect with the submarine cable there. The above described Lots will be sold in one, two, or three portions, to suit purchasers. Part of the purchase money required down, the balance on time as may be agreed on. Early application necessary to ensure good bargains. Titles good. For further particulars enquire of the Subscriber.

Plan of the above described Property:

No diseases are more frequent, few more dangerous, than affections of the respiratory organs. The first symptoms of catarrh, bronchitis, and influenza, may always be radically removed by Holloway's renowned Pills. They quickly remedy any temporary stagnation of blood, relieve any overgorged veins, moderate the hurried breathing and enable the lungs to do their office with ease and regularity These Pills, by their purifying powers, cleanse the blood from all impurities, and fortify the system against consumption, asthma and similar complaints.

Stomach, Liver, Kidneys, and Bowels.

From various causes these organs are frequently getting out of order and require some suitable medicine to regulate them. Holloway's Pills effect this object with wonderful celerity and certainty. They do not distress the system or weaken the frame; they thoroughly invigorate the digestive organs. They gently excite the stomach and liver, stimulate the kidneys to perform their functions efficiently, and act upon the bowels without griping or any other annoyance; again, taken an hour before dinner, they cannot be equalled as a "Dinner Pill" as they entirely prevent acidity, flatulency, nausea and biliousness.

Windy or Watery Dropsy.

Whoever is afflicted with these complaints should at once have recourse to Holloway's Pills. They act most energetically on the glandular and absorbent system, purify the blood, and impart a vigour which age or other causes may have temporarily taken away. They excite the kidneys to increased activity, and thereby stimulate the absorbents to remove the fluid already collected.

Disorders Peculiar to Women.

There is no medicine equal to Holloway's Pills for correcting the ailments incidental to females. They may be taken with safety for any irregularity of the system. As they remove all cause of maladies, and so restore, by their grand purifying properties, females of all ages to robust health.

Influenza, Diptheria and Sore Throat.

How all important it is to check the first departure from health! all may do so by taking Holloway's Pills, without risk or restriction. In all diseases affecting the blood, nerves, and muscles, or in cases of fever, sore throat, colds, cough, asthma and shortness of breath the earlier they are taken the better.

Children's Complaints.

Diseases incidental to children, such as feverish attacks, scarlet fever, measles and all diseases of the skin, may be immediately checked, and soon cured by these purifying Pills, which may be reduced to a powder, and given in doses of one two or three nightly, according to the age of the sufferer. Holloway's Ointment is soothing, cooling and healing, and is better adapted than any other remedy for all external ailments.

Indigestion, Bile and Sick Headaches.

No organ in the human body is so liable to disorder as the liver, and none is more apt, when neglected to become seriously diseased When nausea, flatulency or acidity on the stomach, warns us that digestion is not proceeding properly, Holloway's Pills regulate every function, give strength to every organ, speedily remove all causes of indigestion, bile and sick headaches, and effect a permanent cure.

Lumbago, Rheumatism and Gout.

In these diseases, the blood is always in a highly inflammatory state; the stomach is also disordered, and the liver and kidneys unnaturally torpid. A few doses of these Pills, taken in time, will rectify all these symptoms by their cooling and purifying properties.

Holloway's Pills are the best remedy known in the world for the following diseases:—

Ague	Dysentery	Liver complaints	toms
Asthma	Erysipelas	Lumbago	Tic-Doloureux
Bili's Complaints	Female Irregularities	Piles	Tumours
Blotches on Skin	Fevers, all kinds	Rheumatism	Ulcers
Bowel complaints	Fits	Retention of Urine	Venereal Affections
Colics	Gout	Scrofula, or King's Evil	Worms, all kinds
Constipation of the Bowels	Head-ache	Sore Throats	Weakness, from whatever cause
Consumption	Indigestion	Stone and Gravel	&c., &c.
Debility	Inflammation	Secondary Symp-	
Dropsy	Jaundice
