

THE DAILY EXAMINER, JUNE 13, 1881.

WATER.

It is understood that at their meeting this evening the City Council will discuss a proposition relating to the introduction of a supply of water. We beg to suggest that before proceeding to do so, they make some adequate arrangement for the cleansing of "Government Pond." The pond, just now, betokens serious evil. It is instinct with putrid matter; and if left as it is, there will arise from it, in the heat of the present summer, as deadly airs as were ever wafted "o'er the red desert's sands of flame." We deem it our duty, in the interest of the people of this town, whose lives are endangered, to formally direct the attention of the Council to the state of the pond. It is bad enough to be living on a dunghill without having a cesspool at our doors. As the time is short, we would further suggest that a sum sufficient be placed at the disposal of Councillor Smith, and that he be directed to have the pond cleaned at all hazards.

After this matter has been disposed of, the Council may, with clear consciences, proceed to discuss the question of "Water Works." The writer, having resided several years in a city possessed of the advantage of a water supply, is prepared to advocate the adoption of any feasible scheme by which a good supply of good water may be obtained. Such a water supply would lessen the danger from fire and disease, perhaps, fifty per cent; it would certainly be the means of materially lowering the cost of insurance; and it would be of incalculable advantage in promoting the labors of our wives, mothers, sisters, cousins, aunts—those whom we hold most dear, whom we are, therefore, desirous to help in every way we can, and upon whom is thrown the grand work of providing for our comfort in this life. On the other hand, water works would have the effect of saving the large amount of money which citizens now pay the watermen for their "daily bucketful." Their construction will necessarily involve the expenditure of a large amount of ready capital which, disbursed among our mechanics and laborers, will be of indefinite advantage to them and to all with whom they do business—in a word, to the whole community; and by adding to the conveniences of the city and the safety, comfort and pleasure of living in it, a water supply must permanently increase the value of property in the city. In short, the introduction of good water works would be the greatest measure of economy ever carried in Charlottetown.

There is, however, no necessity to discuss the question in detail; for a Water Company has, we believe, offered to give us all the advantages of Water Works, just as the Gas Company gives us gas, and take the risk. If this offer be accepted, and reasonable guarantees and provisions are obtained and made in the interest of the city, citizens will have all the advantages accruing—the expenditure of large sums of money in their midst, the value added to their property, the additional security and the comfort—without any outlay or hazard whatever on their part. We think this offer should not be lightly thrown away and our mechanics and laborers deprived of remunerative employment, our land owners deprived of a means of raising the value of their property, and citizens generally deprived of the many innumerable advantages possessed by a community enjoying the safety and comfort which spring from Water Works.

The only objection to the offer of the Company which we have heard urged is that if Water Works are set up by a Company the city will have to provide sewers as an outlet for the water. In our opinion, all the water consumed will easily flow off in the gutters. But suppose that it will not, and that the refuse water will make a nuisance in our midst, all the citizens will have to do is to refuse to take the water, and the Company will be obliged, at their own expense, to make the sewers required—or do no business.

In fact, there can be no greater objection to granting a Water Company power to do business in this city than to granting a like power to a Cloth Company; and we earnestly hope the citizens and their representatives in the Council will not fail, while carefully guarding their own interests, to improve the opportunity now presented to them.

The Management of the Hospital for the Insane.

The Patriot of Saturday evening has a proper, fair and timely criticism of the management of our Hospital for the Insane. How it could be possible in a well managed Asylum, for an outrage such as the one on Manson, to be committed, and nothing to be known about it by the Superintendent or the Trustees, is emphatically a question to be asked. We are glad to learn that Dr. Blanchard has been communicated with, and that he left Montreal for home on Saturday. Till he arrives, judgment should be suspended.

PARAENALIS.—Sir Leonard Tilley has gone back to Ottawa. Sir Duncan McGregor, who was Inspector General of Constabulary in Ireland in 1848, is dead. Admiral James Heppel, is dead. Louis Gaston de Segur, French Prelate and author of many religious works, is dead.

Ward Meeting.

A MEETING which was largely attended by the civic electors of Ward 4, was held in McPhail's Hall, on Saturday evening, at 8 o'clock, to take into consideration the question of water works.

On motion, Mr. John Jury was called to the Chair, and the undersigned Secretary. Moved by J. P. Tanton, and seconded by Mr. R. Percival, and unanimously

Resolved, That the electors of this ward call upon their representatives at the Council Board to vote against any measure for the introduction of water works into this city until the question is first submitted to the people at the polls. It was

Further Resolved, that a committee of three be appointed to call upon his Worship the Mayor, to call a public meeting of the electors in the Market Hall, on Monday evening, the 13th inst., at 6 o'clock, p. m., for discussing the question.

The following gentlemen were then appointed: Messrs. H. Beer, Charles Heartz, and M. P. Hegan.

J. PHILLIPS, Sec'y.

Bible Christian Conference.

The Conference, this year, was held at London, Ontario. The Annual Report submitted shows that the society's receipts were this year \$1,414.66 in advance of last year's, while the disbursements were \$893.02 above last year, which shows a marked improvement in the society's financial position. The statistics also were encouraging, showing that on and connected with the missions, there are 33 ministers, 84 churches, 35 other preaching places, 464 admitted into the societies, 2,830 members of the church, 498 Sunday-School Scholars. After allowing for some hundreds lost through deaths and removals, still there is an increase of members, and there is a marked increase in S. S. teachers and scholars. The following appointments to circuits were made for the P. E. Island district: Charlottetown, John Harris Union, J. M. Tredrea, Wheatley River, J. Ball, Murray Harbor, E. A. Tonkin, Sturgeon and Montague, S. Maxworthy, West Cape, W. Bryenton, Summerside, J. H. Collins.

A Remarkable Statement.

Sir Charles Tupper made a remarkable statement in his speech at West Branch, River John, on Tuesday, to the effect that every leading liberal in public life when he first entered the political arena as a Conservative, still living, is his personal and political friend; and that those of that number who have passed away died his personal and political friends. The statement is, we believe, literally true. The names of the men who, after fiercely fighting him, joined hands with him, are numerous. They include Howe, Young, Archibald, McCully, Elmhurst, Creelman and McLellan, not to speak of others somewhat less distinguished. The odd thing in connection with these facts is, that the present leader of the Nova Scotia Liberals is an old Conservative Lieutenant of Dr. Tupper, Mr. A. G. Jones, who abandoned the Doctor, not an Liberal but an Anti-Confederate ground.—News.

The Visit of Mr. Blake.

The Hon. Mr. Blake, leader of the Liberal party in Canada, will begin his tour of the Maritime Provinces in about a month. The following is his programme for New Brunswick: He will speak in St. John, on Friday, July 15th; in Gagetown, on Monday, July 18th; in Fredericton, on Wednesday, July 20th; in Woodstock, on Friday, July 22nd; in St. Stephen, on Monday, July 25th; and in Sussex, on Wednesday, July 27th. After this he will go to Nova Scotia and Prince Edward Island, and will visit the North Shores of the Provinces on his return. Arrangements will be made to give Mr. Blake a good reception wherever he goes. He will probably be entertained at a dinner in this city.—Capital, Fredericton, N. B.

The Nova Scotia Railway Syndicate.

An Ottawa despatch to the Halifax Chronicle (not the most valuable source of information on the subject) says:—"Information has been received in this city from a reliable source to the effect that a wealthy English corporation has tendered for the acquisition of the whole Nova Scotia railway system, including roads now in operation, and those contemplated, and that their representative will leave England for Nova Scotia by the next Allan steamer. It is also understood that the Nova Scotian Government has received several other offers. It is stated that the Provincial Legislature will be called together within six weeks to take action in the matter."

Orangemen in Council.

The Grand Orange Lodge of British America met at Port Hope, Ont., on the 8th inst. The delegates present from this Island were Messrs. Richard Wise, Joseph Wise, and M. McLeod. On the evening of the 8th the Orangemen of Port Hope District gave a grand banquet in the Town Hall. By a unanimous vote Sherbrooke, Province of Quebec, was selected as the next place of meeting.

DURING the present trouble in the Republic an interesting secret has been brought to light by the disclosure of the fact that Mr. Conkling holds, and held at the time of the counting in of President Hayes, that Mr. Tilden was robbed of his right by that act, and that Mr. Hayes knew at the time that the chief man in the Republican party entertained that view strongly. This being so, it is not creditable to Mr. Conkling that he allowed such a fraud to be perpetrated without lifting up his voice boldly in public against such a wrongful and dangerous proceeding.

Remedy for Hard Times.

Stop spending so much on fine clothes, rich food and style. Buy good, healthy food, cheaper and better clothing; get more real and substantial things of life every way, and especially stop the foolish habit of running after expensive and quack doctors or using so much of the vile humbug medicine that does you only harm, and makes the proprietors rich, but put your trust in the greatest of all simple pure remedies, Hop Bitters that cures away at a trifling cost, and you will see better times and good health. Try it once. Read of it in another column.

Water Works.

A LETTER FROM COUNCILLOR CHAPPELLE.

To the Editor of the Examiner.

SIR,—It may be fairly presumed that many persons in this city do not understand, even in a general way, in what manner water would be conveyed to our houses, or how the city would be drained. The water brought from Winter River, (or elsewhere) would, before reaching our dwellings, be subjected to a purifying process analogous to that employed by nature. Spring water is rain water, which, having passed through strata of earth or sand, becomes pure, and receives additions of mineral substances from the soil through which it has passed. Now the water of Winter River is rain water, containing probably more or less organic or vegetable matter, received from dead plants, wood, &c., and is at present unfit for use for culinary purposes. But the process similar to that used in all places where water is supplied to cities, would render it fit for use. The water, after being conveyed from the river, and before reaching the city would be filtered—that is, would be passed through proper screens and large quantities of sand, by which all its impurities would be removed. It would then be better for drinking than spring water, and more healthy, according to the best medical testimony, while admirably suited for cooking and washing purposes. The water would be led in iron pipes, laid five or six feet deep, through all the principal streets; but no one would be charged water rates unless he would choose to use it in his house. Each house would be supplied with as many taps as would be desired.

The sewers would be eight or nine feet deep and two or three feet in diameter, arched over and built with brick—sufficiently deep to allow an inclined plane from the bottom of the deepest cellars. Pipes connecting each dwelling with the drains, would be laid, by which all kitchen refuse water, the contents of water closets, &c., would be conducted to the sewer. These pipes and the sewers also would be kept clean and free by pure water flowing into them from the various taps; that is, the work of carrying off all filth would be self-acting.

I will now briefly note some of the certain advantages to our city of the introduction of proper water supply and sewerage systems:—

1. Health would be promoted. The streams of poisonous flowing into our wells would be diverted. I do not but that medical testimony would show that a large percentage of the mortality here results from a want of proper drainage. At present water closets are detached from dwellings for the most part, and access to them at all seasons of the year must be attended with inconvenience, discomfort, and consequences fatal to health. In places with a water supply and sewerage, bath-rooms and water closets are inside, and placed in the parts of the dwellings most convenient for use. With a full supply of good soft water cleanliness in every respect and consequently health would be promoted.

2. Economy of time, labor, and money, in housekeeping would be promoted. A considerable part of the household time is now given to procuring water. This would be saved. Those who do not keep servants have to exhibit themselves at our pumps, or resort to some stragem in order to get the water they need, while the abominations of snow water, and rain water from our roof coverl roofs are too well known. What a boon to every housekeeper in the town, a constant supply of good pure water in her kitchen would be! Many who now feel themselves obliged to keep servants would be able to do without them; while the oppressive labor of those who do their own work, would be much lessened.

3. The value of property would be largely increased. It may be fairly assumed that all real estate would go up ten or fifteen per cent in value. Persons from abroad would be more desirous to settle or invest in our thriving town, while, with proper hotel accommodation, we could attract larger numbers of our wealthy Upper Province neighbors to spend their time with us in summer.

Yours truly, THEO. L. CHAPPELLE.

To the Editor of the Examiner.

DEAR SIR,—The cruelties inflicted upon Mr. Manson, whose friends, on the derangement of his intellect, placed him where they had a right to believe he would have been kindly cared for, excites the strongest feeling of indignation throughout the community, and awakens the gravest apprehensions on the part of those who have relatives and friends in the institution.

Just prior to the removal of the patients to the new Asylum, and at a time when an experienced officer was most needed Mr. Waller was dismissed. Under his charge the old Asylum, with all its inconveniences, assumed an orderly and cheerful aspect, and it seemed providential that the services of one so skilled in the treatment of the insane could be secured. No reason was ever given for the dismissal of Mr. Waller, and the result of it is this fearful reign of terror over the most helpless of God's creatures, and the perpetration upon them of atrocities which must bring the blush of shame to the face of every P. E. Islander.

Mr. Martin, the successor of Waller, was a mild, estimable farmer, without experience and destitute of every qualification for the office; and what sort of training has the present incumbent had for the responsible duties which belong to his charge? It is an outrage which cannot be tolerated that, through party politics, our insane relatives and friends should be put under the control of incompetent and cruel men, and the public has a right to demand the reinstatement of Mr. Waller, who has experience and every other quality essential to the office.

HUMANITY.

To the Editor of the Examiner.

DEAR SIR,—I can readily understand why any man would contest the payment of an amount which he was not justly liable for or did not owe. But I cannot understand how any man, with a particle of manliness or common honesty, would endeavour to shirk the payment of his just tax for city improvement. Judge Alley receives all the

benefit that any other citizen receives. He has all the protection that the fire department can give him, all the benefits of good platforms around his property, the benefit of good streets which he makes use of, and he holds a position in this County today, which he may thank his admirers here for, who were so because they found him manly and honest when young, and comparatively poor to what he is at present. I shall believe the report which is abroad when I see Judge Alley refusing to pay his tax.

Such selfishness as "Citizen" is guilty of and of which he accuses Judge Alley, will be met by right thinking people with scorn and contempt that will make him feel an alien from this country—a trickster whom it will not be safe to deal with for fear that some technicality might arise which an unprincipled man might take advantage of,—such actions, worthy only of New York sharpers or blacklegs. This exhibition, over what he supposes to be a checkmate of the City Fathers, shows plainly the bent of the man's mind. The man whom only law makes honest, should be branded on the forehead in capital letters, so that all honest men might beware of him. SAM.

ONE case of drunkenness at the Stipendiary Magistrate's Court this forenoon.

JAMES RICHARDS, Esq., M. P. P., is in the city. He is at the Revere.

SCALE OF PRICES: Reserved Seats, 75 cents; Parquette, 50 cents; Gallery, 35 cents.

Ch'town, June 9, 1881.

Valuable Residence! For Sale by Auction.

I HAVE been instructed by the Bank of Prince Edward Island to sell by Public Auction, on the premises, on TUESDAY, the 21st JUNE, inst., at three o'clock, p. m., that valuable residence known as "Fernwood," fronting on the Saint Eleanor's Road, formerly owned by the late Judge Pope, together with 19 acres of land attached.

The Dwelling House, Wood House, Ice House, Barns, Stables, Pump and everything about the premises are now in a thorough state of repair. This is one of the most beautiful situated residences in the Lower Provinces, and is too well known to require further description.

It has only been built a few years, is fitted up with all the modern conveniences, and cost the late owner sixteen thousand dollars in construction, and will now be sold without reserve.

Intending purchasers can inspect the House any time before the sale by applying to the Keeper in charge or to the subscriber. Terms easy and made known at sale.

RICHARD HUNT, Auctioneer.
