Enheat Gets Contract For Overhaul Of 'Lanks'

By JOHN BOND
Guardian-Patriot Staff Writer

The Charlottetown plant of Enamel and Heating Products Ltd. has been awarded a contract for the complete overhaul and maintenance of four-engined Lancaster aircraft, the famed bombing planes of the Second World War.

The announcement for the contract was confirmed yesterday by Hon. J. Angus MacLean and Heath Macquarrie, PC candidate for Queens. It was let by the department of defence production.

"The first 'Lank' will arrive in Charlottetown on July 15, and a second a short time later," an Enheat spokesman said. The contract calls for six or seven of the famous aircraft to be overhauled here by the end of 1963.

NOT IN GOOD SHAPE

Considerable work is to be done on the planes. The Enheat spokesman said they are generally not in good shape and will require a lot of work. In addition to their overhaul, they are to be modified for use in Canada's northland. Research has shown that the "Lanks" are the best aircraft suited for the research and survey work that is to be done in the north.

No date has been set for the completion of the first plane. Parts will be arriving shortly from an RCAF supply depot.

"No additional personnel or hangar space will be immediately required," the Enheat spokesman said. Overhaul work on Sabre jet fighters will go on unaffected, he continued.

Earlier speculation had forecast the need for a new hangar valued at near $1,000,000 if the Lancaster contract was obtained, but Enheat officials said that existing facilities will be adequate for the present.

CONTRACT 'SIZABLE'

Mr. Macquarrie said today the contract indicated the continued usefulness of the old warriors of the air. He said it also showed the capabilities of the Enheat plant here, and stated it was the aim of his party to obtain as much work as possible for the plant. He said the new bomber contract was "sizable."

He said that the department of defence production was well satisfied with the work that had been done on Sabre jet fighters and this had been pointed out to plant officials by Defence Production Minister Raymond O'Hurley, when he visited the plant last fall.

Weather In May Was Cold, Dry

An alltime record low temperature for late May was recorded this year, and the rainfall of 1.36 inches was less than one-half of the alltime average.

This was learned yesterday from Warren Burns, official weather observer at the experimental farm here.

The record low came on May 11 with an air temperature of 27 degrees and a grass level, or "grass minimum" reading of 11 degrees. It had never been that low so late in the month before, Mr. Burns said.

FROZE PIPES

The low grass level temperature froze water pipes which run on the ground and cracked connections, though strangely enough that sort of temperature doesn't freeze the ground, Mr. Burns stated. The wide variation of 16 degrees between air and grass temperature was caused by the heavy white frost, it was explained.

Some crop damage was recorded, it was explained. One man said, for example, he lost all of the first cuttings of asparagus.

There was frost on the ground on May 29 when the grass level reading was 29 degrees, though the air reading was 40, Mr. Burns said.

The average temperature of 45.6 degrees for last month was exactly three degrees below the alltime average for May.

The rainfall of 1.37 compares with the average of 2.86. It compares with precipitation of 5.98 inches the previous month, the wettest April on record.

Mr. Burns said that the few snow flakes that fell May 18 was the latest for snow to be recorded since 1936, when one-half inch was recorded on May 16.

Work Slated On Bridge

Work on completing the Hillsboro Bridge is expected to start immediately, according to department of highways officials, who have asked contractors on the remaining jobs to start work at the first of this month.

Still to be done is the installation of steel protection plates on the bridge piers. The plates will protect the concrete piers from ice damage. Contractor for this job is Maritime Steel and Foundries Limited, New Glasgow, N.S.

The Summerside firm of Morrison and MacRae will put a final coat of pavement on the bridge and its approaches. This firm will also complete installation of bridge guard rails.

Former President Of Cunard Dies

MONTREAL (CP) — Funeral services will be held today for Thomas C. Lockwood, 79, former president of Cunard Steamship Company Limited of Canada.

He died in hospital Thursday.

A native of Colborne, Ont., he worked in Brighton, Ont., before serving with the British ministry of shipping during the First World War.

During the Second World War, he served as transport controller for the federal transport department and then became president of Cunard.

He retired five years ago after acting as a consultant to the Aluminum Company of Canada.

Queens YPCs Hold Supper At Bonshaw

A lobster supper in Bonshaw Wednesday night, sponsored by the YPCs for Queens County was termed highly successful by Gerald Driscoll, president of the Queens County YPC organization.

Guest speaker was Heath Macquarrie, Progressive Conservative candidate for Queens.

Other guests were: Frank Myers, MLA; Lloyd MacPhail, MLA; Hon. Philip Matheson, minister of highways and public works; Reagh Bagnall, president of the Queen County Conservative Association; Mrs. Ireta Sutherland, president of the Queens County PC Women's organization.

Over 200 people attended the supper in the Bonshaw Hall, prepared by the YPC and assisted by Mr. and Mrs. L.T. Beaton, Bonshaw. Entertainment was provided by Athol Buell and his daughters. Dance music following the supper was by Oliver Ross, Ambie Gauthier and Athol Buell.

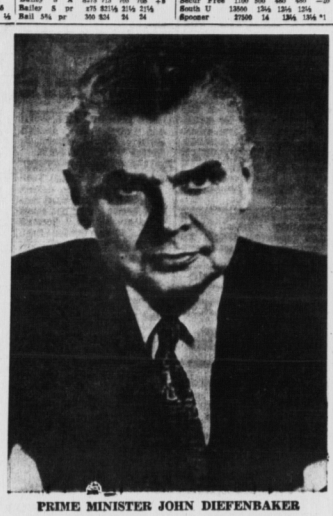
ANGUS MACLEAN



PRIME MINISTER JOHN DIEFENBAKER

HEATH MACQUARRIE

Great Advancement . . . in Transportation

When the Liberals came into office in 1935, they found at Borden two ferries, one twenty-two years old and one about four years old. When they left office after twenty-two long years, there were at Borden two ferries, one now forty-two years old and another ten years old. No plans had been made, nothing done, for any additional ferries despite the great increase in traffic which was clearly in evidence. This was the Liberal way of helping (?) the Island . . .

ACTION AND ACHIEVEMENT IN TRANSPORTATION

HERE IS THE CONSERVATIVE RECORD OF PROGRESS DURING A FEW SHORT YEARS:

- in 1957, after taking office, the Conservatives immediately planked the Scotia II
- later, they proceeded to build a NEW car ferry, instead of purchasing a second hand boat as requested by the Liberal Legislature of P.E.I.
- this boat, the MV Confederation allows for the fastest trips in the long history of Island transportation; and this year will make more trips than ever before in history
- a new ferry is to be built for Wood Islands, comparable to the Lord Selkirk—and the federal government will pay 40% of the cost
- a million and a half dollars has been spent by the Diefenbaker government on terminal facilities at Wood Islands
- under the Roads to Resources program the Diefenbaker government has contributed seven and a half million dollars to a paving program for 450 miles of new highways in P.E.I.
- for a decade a new runway at the Charlottetown Airport was denied by the Liberal government; today, built by the Diefenbaker government, the new runway allows larger aircraft to land here and makes it possible for farm produce to be shipped quickly to growing markets
- great improvements have been made at the Charlottetown Harbour—the most spectacular of these being the million and a half dollar construction of the new transport wharf
- a Trans Canada highway built by Liberals ran only from one ferry to another; the second Trans Canada Highway, projected by Mr. Diefenbaker, would run from one end of the Island to the other
- the airport terminal building at Charlottetown has been enlarged to double its size by a Diefenbaker government
- additional subsidies, instituted by the Diefenbaker government, allows for the sale of Island produce by regular steamship service to various parts of Canada.

THIS . . . Is the Conservative Record of Progress in Transportation!
