CO-OP UNIVERSAL MILK COOLER
Front-Opening

The CO-OP UNIVERSAL COOLER IS -
FASTER
EASIER
THRIFTIER

FASTER because a constant flow of icy water sprayed at the cream line lowers milk temperature of a capacity load to a safe 46 degrees in 60 minutes. Keeps it safe for a 12 hour holding period. Exclusive air injection system plus rapid water circulation assures you of faster, safer cooling.

EASIER because low front-opening eliminates heavy lifting. Makes your boy a full-fledged dairy hand. Removable rack and water distribution pan makes cleaning easier, more thorough.

THRIFTIER on your electric meter because it requires only 1.25 K.W. to cool a 10-gallon can. Air space between ice bank and interior walls lowers heat loss. . . less chance of doors freezing. Rugged cabinet gives years of service. Drop-in refrigeration unit protected by 5-year warranty. Available in 4, 6 and 8-can sizes.

Also Immersion-Type COOLERS: 4, 6, 8 and 10-can sizes
