Charlottetown, June 4, 1889—2aw wky

Mr. Carney in the Lyceum.

A LARGE audience assembled in the Lyceum, yesterday afternoon, to listen to the Rev. Mr. Carney defining the reasons for his exit from the otherdox fold. Mr. Carney prefaced his sermon with a few brief remarks explanatory of the many misconceptions that were being circulated, assuring his hearers that he did not boast of superior ability, nor pose as the apostle of a new theology, but simply endeavoring to expound the Gospel according to his God-given conception of Revealed Truths. He then selected as the basis of his discourse, John 3rd chapter and the 16th verse. Exalting the fatherhood of God and the universal brotherhood of humanity above all human organizations. Mr. Carney abjured his belief in the finite personality of the Deity, the personality of evil, and the existence of an endless lake of material fire and brimstone as punishment for evil doers, showing his hearers that Love is the only power by which men are brought to repentance. He dwelt at length on the fall of man and the erroneous ideas contingent thereon, saying the fall was not literally the result of one single act of disobedience to the divine law, such as the eating of forbidden fruit, but rather the gradual descent in the scale of life, and thought, from a scriptural plane of existence, into a condition of bondage to the external senses, and the limitations of time and space. The redemption of man was the reversion of this order, for which purpose Christ was manifested in the flesh to destroy sin and reconcile the world unto God. Mr. Carney declared himself a strong believer in the fundamental doctrines of christianity, recognizing only the spiritual interpretation of Holy Writ and no Hell but that of the human heart. The meeting closed with an address from the well-known evangelist Mr. McKinley. —COM.

The Johnstown Disaster.

LATE NEWS FROM THE SCENE OF DESOLATION.

JOHNSTOWN, Pa., June 7.— To-day opened warm and almost sultry, and the stench encountered throughout Johnstown is almost overpowering. Sickness, in spite of the precautions of the sanitary authorities is on the increase, and fears of an epidemic are hourly growing. Five cases of malignant diphtheria were discovered in Bedford street. The cool weather so far is a great benefit to the people, but now summer weather has come on and no one knows what the next few days will bring forth. Twenty more physicians arrived from Pittsburg to-day. One great danger is the overcrowding of the houses and hovels, and this is being prevented as much as possible by the free use of tents upon the mountain side.

A. M. Wellington with F. P. Burt, associate editor of the *Engineer News*, of New York, have completed their examination of the dam which caused the great disaster here. Wellington states that the dam was in every respect very inferior. The construction was of a kind wholly unwarranted by good engineering practices of thirty years ago. Both the original and the reconstructed dams were of earth only, with no heart wall, and only rip rapped on the slopes. The reconstructed dam bears marks of great ignorance or carelessness in having been made nearly two feet lower in the middle than at the ends. Had the break begun at the ends the cut of the water would have been so gradual that little or no harm might have resulted. The destruction came from the water flowing over the top.

BELLEFONTE, Pa., June 7.—The flood of Friday night and last Saturday played terrible havoc in the centre of the county in both loss of life and damage to property. At Makeysville fifteen lives were lost. At Salona ten lives were lost. The total damage in the county will be between two and three million dollars.

JOHNSTOWN, Pa., June 7.—Up to to-day the relief committee received in actual cash contributions $2,579,615, with $5,711,543 promised in addition. To-day J. D. Roberts stated that Philadelphia promised $300,000 which was now at the disposal of the committee. Governor Beaver reported $100,000 at hand. Pittsburg has about $300,000 in reserve. Capt. A. J. Logan, at Morrellville, unloaded 30 cars of relief goods yesterday.

PLYMOUTH, Eng., June 7.—The calamity in Pennsylvania has caused the greatest alarm and anxiety among the people of West Cornwall, large numbers from all parts of the county having emigrated to Johnstown and formed quite a Cornish colony there, and there is but little doubt that the majority of them, if not all, are victims of the disaster. No information has been received, but several young men from here were known to have been employed in the iron works which were swept away by the flood. On receipt of news of the catastrophe, Mr. Harry, of Penzance, who recently returned from Johnstown, leaving his married sister with six children there, expired yesterday. It is calculated that 500 families in Cornwall have relatives in Johnstown.

ADVICE TO MOTHERS.— Mrs. Winslow's Soothing Syrup should always be used when children are cutting teeth. It relieves the little sufferer at once; it produces natural quiet sleep by relieving the child from pain; and the little cherub awakes as "bright as a button." It is very pleasant to taste. It soothes the child, softens the gums, allays all pain, relieves wind, regulates the bowels, and is the best known remedy for diarrhœa, whether arising from teething or other causes. Twenty-five cents a bottle. Be sure and ask for Mrs. Winslow's Soothing Syrup, and take no other kind. [April 1 '88

Great bargains in mens' and boys' clothing this evening at J. B. Macdonald's.

Boston Markets.

BOSTON, June 6.

POTATOES.—Receipts of old potatoes past six days, 24,500 bush.; previous six days, 42,500 bush. There has been a sharp advance in old potatoes this week. Receipts have been light, and for the past day or so good hard stock has been scarce. No Rose or Hebrons of consequence here. Burbanks are scarce, and some are held above quotations. Chenangoes also closely sold up at 65 cents. The market closes firm, but how long it will hold is uncertain. There is plenty of stock in the country, and another week the market may be overstocked again.

EGGS.—Receipts for the week 21 boxes, 79 bbls., 10,003 cases; last week 267 boxes, 74 bbls., 13,937 cases. The offerings have been lighter this week and demand generally more active, with prices for choice fresh stock ruling a shade stronger. As the season advances buyers become more particular about quality, and prices takes a wider range. P. E. Island stock has been selling well since Monday at 14c. Western range from 13 to 13½c as to grade, must be strictly extra to bring over 14c, and some ordinary marks go slow at 13c. Eastern extras scarce and in demand at 15 to 16c.

FISH.—There is no change worthy of special mention in the market.

Fisheries Synopsis.

HALIFAX, June 4.—The mackerel catch is increasing at Cape Island, where 270 barrels were iced for the Boston market. Port La Tour report of mackerel also encouraging—the report indicating a larger catch than previously and fish of better size. Total catch of mackerel and herring in 2,000 nets at White Head for month of May, 200 barrels. Mackerel scarce at St. Peter's Bay—only small catch this morning. No catches except by schooners Helen Crosby and Ceylon, of Port Hawkesbury, 100 and 90 barrels of mackerel respectively. Bankers arrived at Canso from Cape North and Western and Grand Banks, say the scarcity of fish is unexampled. The general opinion of Yankee skippers is that the mackerel have passed north, as latest arrivals say that schools seen by them were mixed fish. Traps at Dover took 9 barrels of mixed fish yesterday, 25 barrels of large mackerel taken in traps at Tignish yesterday. Codfish being caught in considerable quantities at Cape George. Bait reported scarce everywhere.

Elementary Education in England.

A return was recently brought down in the British House of Commons showing how much of the annual grant made by parliament for education was spent during the year 1888 upon elementary schools. From the *Times* summary of the return we learn that the total grant for education last year was £3,599,390, an increase of £85,317 over the grant voted in 1887. The grant was distributed as follows, and the increase or decrease is noted in each case: Church of England, £1,523,373 increase of £31,420; British and undenominational, £248,128, decrease of £3,902; Wesleyan, £128,158, increase of £4,618; Roman Catholic, £168,178, increase of £1,736; Board schools, £1,269,923, increase of £45,288. The other items except the cost of administration, £214,667, increase of £4,345, are comparatively trifling. In the fifty years from 1839 to 1888 a sum of £52,738,586 has been expended by Parliament on elementary education, and the following are the chief totals: Church of England, £27,858,583; British, undenominational, and Wesleyan, £7,203,194; Roman Catholic, £2,523,807; Board Schools, £10,551,183. The cost of administration in the fifty years has been £4,387,231. Thus the cost of administration, which has been on a general estimate of the fifty years, 8 per cent, is only 6 per cent in 1888; while the expenditure for the year shows an increase of 250 per cent. on the half-century. As to the number of schools and scholars, the National Society of Church of England's schools were 11,890, with a total registered number of scholars of 2,162,414, and an average attendance of 1,669,222; Wesleyan, 555 schools, 174,356 registered, 131,067 average; Roman Catholic, 917 schools, 249,125 registered, 188,592 average; British, undenominational and others, 1,376 schools, 331,438 registered, 255,023 average while at the School Board schools, 4,590 in number, the average attendance was 1,389,208 out of a total register of 1,795,686 scholars.

DIED.

At Souris on the 31st of May, of congestion of the brain, Harold, youngest child of William and Margaret Jane Wood, in the fourth year of his age.

It is thy care and love, mother, would keep
me here below,
But do not chide thy weary child, who longs
to rise and go;
Here death reigns all around us, comes in at
every door,
And through the darkened windows casts his
shadows on the floor.

You tell me it is summer: I can feel its
balmy air;
The birds are singing sweetly, there is sunshine everywhere;
O, yes! I love the sunshine, with its pretty
birds and flowers,
But the land that I am going to is fairer far
than ours.

Through all these nights of tossing, and days
of wasting pain,
Would you keep me weary waiting till winter
comes again?
I would rather go, dear mother, when earth
is fair and bright,
To where the eternal sunshine shall chase
away the night.

O! dry your tears, dear mother, for my
shepherd leads the way,
To some the valley may be dark, to me it's
light as day;
Then will you kiss your darling son, say good
bye and let me go,
Not long shall we be parted,—but a little
while, you know.

ESTHER WOOD.

A BOX of Ayer's Pills has saved many a fit of sickness. When a remedy does not happen to be within reach, people are liable to neglect slight ailments, and, of course, if serious illness follows they have to suffer the consequences. "A stitch in time saves nine."

Local and Other Items.

MORE CATTLE.—The schr. Twilight sailed from Souris on Saturday last, with a cargo of cattle, sheep and pigs, for French St. Peter's.

IT IS a great misfortune for the young and middle-aged to be gray. To overcome this and appear young, use Hall's Hair Renewer, a reliable panacea.

IN GOOD CONDITION.—We learn that the steamer Worcester had her machinery inspected in Boston on Tuesday last, by Dominion inspectors, and everything was found in good condition.

PEDESTRIANISM.—There will be a twenty-mile go-as-you-please race in the skating rink at Souris, on Monday evening next. There are quite a number of entries, and the race will be very interesting.

QUICK PASSAGE.—The schr. Morell, Capt. DeLorey, left Georgetown for Pictou, unloaded and loaded at last mentioned place and returned in the quick time of twenty-two hours and fifteen minutes.

I. O. O. F.—Regular session of St. Lawrence Lodge to night at 8 o'clock. Nomination of officers. On account of the room undergoing repairs, the conferring of degrees is deferred until next meeting.

THE BEAVER DISABLED.—The steamer Beaver, which lost her rudder and stern post as the result of grounding off All Right Island (Magdalen's) during a thick fog on Tuesday night last, is now on the slip at Pictou undergoing repairs.

VALUABLE DISCOVERY.—A most valuable discovery of Anthracite coal has been made in the vicinity of Cheticamp, Inverness County, C. B., Samples of the coal have been sent to Jersey for analysis. Captain LeMaistre, of the Beaver, pronounces it full equal to any anthracite he ever used.

GETTING BETTER.—It is pleasing to learn from the Halifax papers that the lad Gage, recently badly injured at the cotton factory there, is doing remarkably well under the circumstances. It is now thought by the doctors that inflammation will be prevented. The doctors are somewhat surprised that the lad lived after such a terrible accident.

FIRST TO RETURN.—The schooner Althaea, Capt. Paul Paoli, arrived from St. John's Newfoundland via Sydney, this morning. We are given to understand that she is the first to return of the produce fleet which left here about the first of May. This speaks well for the sailing qualities of the Althaea, which is only two years old. The Captain is looking well after his trip.

BIG DAMAGES.—The Boston *Post* of Thursday last says: "The jury has returned a verdict of $2,500 for the plaintiff in the case of William Purcell vs. the Boston, Halifax and Prince Edward Island Steamship Company, which was an action to recover $4,000 for damages for injuries received by plaintiff from falling down a hatchway on one of defendant's steamers which he was assisting in loading."

ASHORE.—The schooner St. Martin's Packet, Captain Bourgeois, loaded with lumber for Messrs. Poole & Lewis, of this city, ran ashore on St. Peter's Island bar last Thursday at midnight, during the prevalence of a heavy fog. The deck cargo had to be thrown overboard to lighten her. She is as yet sound with the cargo between decks all right. We understand that Mr. Poole will go out to her in one of the tugs this evening, when it is probable that she will be towed off.

FROM BOSTON.—The steamer Worcester, Capt. Nickerson, arrived early on Sunday morning with the usual cargo of flour and sundries, and the following passengers: C. R. Wood and wife, Mr. Fitz, Miss Laura Docherty, Miss Alice Docherty, Miss May Page, Mrs. Margason, Miss Lizzie Flanaghan, Mrs. McDonald, Miss Biggdon, Miss Cheverie, Miss Davies, Miss Mullen, Miss McKenna, Miss Campbell, Miss Eva Walsh, Miss Andrews, Miss Gillis, Miss Campbell, Miss S. Auld, Mr. P. Casey.—21

THE SUMMER TIME TABLE.—For the convenience of the public we condense the hours of departure and arrival of trains (local time):

FOR THE WEST.

7 and 9.45 a. m.; 4.30 p. m.

FROM THE WEST.

10.35 a. m.; 4 and 8.10 p. m.

FOR THE EAST.

7.30 a. m. and 4.15 p. m.

FROM THE EAST.

10.20 a. m. and 7.15 p. m.

The New York Trade of Electrical Plumber.

The extensive adoption of lead-coated cables for subway electrical lines has given birth to an occupation which is in some sense a new trade—the electricial plumber. The subway cables have to be joined at frequent intervels, at the least at every second manhole. In uniting the ends, the skill of both electric lineman and plumber is required. A cable may contain a hundred or more wires, which may be grouped in pairs to add to the complexity. To join such a cable the wires have to be properly connected with each other, each splice must be carefully insulated with tape or equivalent wrapping, and finally a sleeve is slipped over the joint and secured by two wiped joints. At this point the lineman has to change his trade and become a plumber, when he "wipes" the joints at each end of the sleeve, so as to protect the wires perfectly from moisture. Much other work falls within his scope. Lateral connections have to be made. One or more wires have to be picked out and led to one side or the other or new routes. As the system grows in extent, so will his work increase in complexity. In fact, what is to some extent a new trade has been cremated. It is said that there are now about one hundred skilled electrical plumbers in the United States and that the best men are all known and are in constant demand.
