ROBERT YOUNG wants a smart man to sell Sewing Machines.

THE Montreal Cotton Company are enlarging their mill at a cost of \$300,000.

A YOKOHAMA despatch says that rumors of war between China and Japan multiply.

A QUEBEC company with \$2,000,000 capital are going to build elevators at that port.

A MAN who canvassed against the League candidate in a poor-law guardian election, had his ears cut off.

BANK of Prince Edward Island notes taken for tea and general groceries, this evening, by GEORGE CARTER, Great George Street.

SAUCES.—Worcestershire, Chutney, Harvey's, Reading, John Bull, Soho, Yorkshire Relish, India Soy, Mushroom and Walnut Catsup, at WATSON'S Drug Store.

LIEUT.-COLONEL CHARLES LEONIDAS DE SALABERRY, last surviving son of Colonel De Salaberry, hero of Chateaugay, died at Quebec, on the 25th inst., at the age of 61 years.

PER noon train, to-day, L. E. Prowse received seven cases of Christy's Hats. They will be marked and ready for sale on Monday.

A DUBLIN despatch reports that dynamite was used to blow up the house of the agent of Lord Clonbrock, on Sunday, the result being injury to the inmates and the partial demolition of the house.

THE date of the coronation of the Czar of Russia has been put back, so as not to take place at the same time as the Moscow Exhibition. A scheme is on foot to enroll a number of the inhabitants to act as constables during the coronation.

ABOUT one hundred and sixty immigrants arrived at Quebec on the 25th ult. They were for the most part English, and proceeded west, intending to settle in Ontario and Manitoba. Another party of immigrants will arrive during the night and proceed west.

A FEW days ago, for the first time in the history of British Columbia, a large shipment of live beavers was made from Victoria to the United States. British Columbians are jubilant over the prospect. Not long since American cattle were imported to supply the Provincial demand for beef.

A YOUNG man in Dartmouth, N. S., was engaged to marry a young lady of the same place. The banns were called about a month ago, and the next day the young man cleared out for the States. A few days ago he came back to attend a funeral, and has now an action for breach of promise, with damages of \$1,000, hanging over his head.

HEAVY ICE.—The steamer "Newfoundland" which arrived at St. John's Newfoundland, on the 25th ult., reports heavy ice everywhere. Her captain thinks the movements of the sealers will be much restricted. The Harbor Grace fleet is jammed, but there is a strong westerly gale to-day. The captain of the "Newfoundland" reports two brigantines jammed in the ice yesterday, thirty miles southwest of Cape Pine; could not ascertain their names.

THE mysterious fish, which so many vessels recently reported floating dead in the North Atlantic, over an area of many hundreds of square miles, proves to be the tile fish, a new species found by the United States Fish Commission to occur in incredible quantities along the Gulf Stream in seventy-five to one hundred fathoms. Professor Baird thinks they have been killed by the recent terrific storm along the coast of New England. Those who ate the fish found dead pronounced them excellent.

FENIANS.—A London despatch of the 23rd ult. says:—"It is stated that the police force around the docks now numbers 600 men every night. It is believed that, previous to the recent fire at the Royal Albert Docks, the authorities had anonymous information that the Fenians intended to blow up the tunnel to North Woolwich, which passes under the docks. A party of Fenians were lately discovered by constables while drilling and executing military evolutions in a wood within a mile of Swinford, County Mayo, Ireland. Twelve arrests were made.

ANOTHER voluntary witness to the success of the Government's financial and railway policy has risen in the person of the United States Consul at Goderich, who writes to his Government a glowing account of the progress made by the Dominion within the last few years, and of the unprecedented development of the North-West since the Syndicate took the Pacific Railway in hand. He also points to the fact that notwithstanding the high tariff on the other side of the frontier, Canadian exports to the United States are steadily on the increase, and American capital is being largely employed in the country. Sir Richard Cartwright will be delighted to have such testimony from his own constituency as to the success of the N. P.—Toronto Mail.

SOME very interesting manuscripts were sold a few weeks ago in Paris. One of them was the will of Voltaire, the other the manuscript of the canonization of St. Vincent Paul, each of which brought an even \$1,000. For \$400 a large number of decrees of the Commune relating to the execution of Louis XVI. were purchased, while for \$610 three letters of Genetz describing the events of 1805 were obtained by the King of Holland. A letter from Mme. de Maintenon was sold for \$250, while a letter from Voltaire to Rousseau, asking his opinion of the plan of the "Heraclide," went for \$300—so little does the average collector of autographs distinguish in his purchases between the real worth of one writer and the questionable worth of another.

THE Buffalo (N. Y.) News says of Canada's Canal expenditure:—"The time was when commerce naturally, as it were, flowed to New York, but such is not the case to-day, for on one side we have Canada as a competitor, and on the other we find Baltimore, Philadelphia, and New Orleans bidding for business. Our neighbors across the border who unwillingly took upon their shoulders a debt of quite \$8,000,000 to construct a new canal from Lake Erie to Lake Ontario, are not idle and disheartened simply because they have received no return from their immense outlay, but rather are quite active and sanguine of conquering success. In the House of Commons at Ottawa, last Friday night, a resolution was adopted providing for the issuance of bonds in the sum of \$250,000 for deepening and dredging the channel between Montreal and Quebec to 25 feet. If anything were needed to satisfy the people of New York State that Canada is determined if possible to wrest commerce from this quarter, this contemplated expenditure of a quarter of a million of dollars ought to supply it.

ALL FOOL'S DAY—to day.

THE "Northern Light" will not leave Georgetown for Pictou until Monday.

AN assault case at the Stipendiary Magistrate's Court this forenoon was adjourned.

THE mail couriers left Cape Tormentine at eight o'clock this morning. They will arrive late this evening.

Darnley Farm for Sale.

TO be Sold by PUBLIC AUCTION, at Summerside, on WEDNESDAY, 19th April, at 12.30 p.m., (if not previously disposed of by private sale) either in one lot or divided to suit purchasers, that well-known Darnley Farm, lately occupied by Hon. J. C. Pope.

The farm consists of about 300 acres, all cleared, well fenced, and in good condition, watered by a spring and running brook, and with never failing wells of good water. There are on the farm a large and commodious dwelling house, with good barns and out-buildings of all kinds. On the shore fronts of the farm are abundant supplies of mussel mud and a shipping place.

Terms 25 per cent of the purchase money, cash on execution of the deed; 50 per cent may remain secured on the farm; for the remaining 25 per cent approved security on real estate will be taken.

Also at the same time and place, about 67 acres of wood land on Lot 29, near Mr. James Sutherland's. Terms easy.

For further particulars apply to RODGSON & McLEOD, Charlottetown and Summerside. March 2, 1882—law-wklly, wklly pat, sj

MORE LIGHT!

THE Charlottetown Gas Light Company have imported some of "BAY'S PATENT" which they will supply and fit on Gas Brackets, etc., at a moderate cost to consumers.

These Burners are reported to be the best Flat Flame Burner yet produced, and will give a far greater amount of light than any other burner with the same consumption of Gas.

Dr. Wallace, F. R. S. E., F. C. S., Gas Examiner to the City of Glasgow, in a lecture delivered by him, calculated that £130,000 (\$650,000) a year are thrown away in Glasgow by the use of imperfect fittings. On the subject of Gas Burners he says: "Another and as I think a better burner is that called Bray's regulator, and as I consider these the best union burners attainable at moderate cost, I have selected them for a series of experiments.

The Report of the Committee of the British Association of Science to enquire as to the best means for the development of light from Coal Gas of different qualities—comprising Dr. William Wallace, Professor Dittmar, and Mr. Thomas Wills, F. C. S., F. I. G. E., showed that Bray's Burner yielded the greatest amount of light of all the two or three score of Burners reported upon which included all the Burners of repute in the market.

In a pamphlet upon Light and Heat, published by R. B. Tait, A. M., he says: "The cost of Gas as compared with other illuminants is much more economical when rightly used, than many suppose. From experiments made for this purpose, the following results have been obtained. They were made by burning samples of Devos's Brilliant Oil and ordinary Oils, and testing their illuminating power. It was found that Coal Gas costing one cent at \$3 per thousand feet, gave a light equal to 18 candles, while Devos's Brilliant Oil consuming 27.4 grammes costing half a cent, gave a light equal to 9 candles. "A good Argand or Johnson's Burner, the Burner used in the last experiment will therefore give the light of 2 ordinary Oil Burners in direct comparison, at no greater expense in the case of the finer and safer grades of Oil. Lights, however, on the authority of Scientists, are not to be compared in direct proportion, but in proportion to the squares of their powers, and such a comparison with the case of the use of Gas, its cleanliness, freedom from odor and dangers, renders its use desirable wherever it can be introduced."

As the above experiments were made with Gas at \$3 per 1000 feet, and not consumed through Bray's Burners, it will readily be seen how much more economical it is to consume Gas instead of Oil, when its price is only \$2.63 per 10.0 feet as now charged here when consumed, more especially through Bray's Burners. Messrs. Goodwin & Co., of Philadelphia, the well-known manufacturers of Scientific instruments for testing the illuminating power of Coal Gas, etc., say in their Circular to Gas Companies: "In presenting the Bray's Standard Patent Silt Union Burners and Lanterns, for which we are the sole Agents in the United States, to the attention of the public, we are convinced that we are filling a want long felt." They further add: "The yield of light from these Burners is 12 to 20 per cent greater per cubic foot of Gas consumed than that from any flat flame Burner hitherto introduced." [no 4 eod
