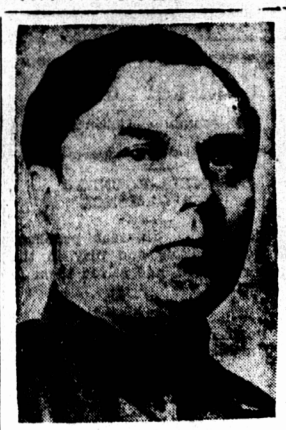
ANCIENT MAP

The National Library in Vienna holds a 13th century copy of a road map originally made in the fourth century.



BELIEVED SLATED AS SUCCESSOR TO STALIN

A new Stalin appears to be emerging today, in many respects an image of the old. As matters stand now, George Maxmilianovitch Malenkov appears to be the boss of the Politburo with the blessing of the fading dictator himself. Presently deputy premier of the USSR, the 50-year-old "adviser" to Stalin is being given a build-up by the government-controlled press, which observers believe is in preparation for succession to the crown. While leadership in Moscow is often far from permanent and sometimes highly dangerous, the pugnacious Malenkov, who clawed his way to the top under political wing of Stalin, gives every evidence of being determined to stay there.

How To Store Fertilizer

In view of a possible shortage of certain fertilizers in 1952, many farmers will be placing their orders early so they won't be caught short in the spring. Fertilizer obtained now is well cured, dry and free-running, and will remain so if properly stored. The following storage rules are offered by C-I-L's agricultural chemicals department:

Store fertilizer in a dry, well-ventilated building. Keep windows and doors closed during damp weather and open when dry. Never pile wet or damaged bags with sound ones. Bags must not rest on bare ground, concrete, metal or against the side of the building, but should be piled on skids at least four inches off the ground. The pile should not be more than seven bags high. A space should be left between piles for circulation of air. A few inches of straw on top of the pile will prevent moisture from settling on the bags.

FIGURING COSTS

WINNIPEG—(CP) — City Engineer W. D. Hurst has been asked to make a report on the probable cost of fluorinating Winnipeg's water supply. An estimate last year was $32,720, or 11 cents per capita, but equipment has risen in price since then.
