DR. WILLIAMS' PINK PILLS FOR PALE PEOPLE
ARE NOT A Pur-
gative Medi-
cine. They are a
BLOOD BUILDER,
Tonic and RECON-
STRUCTIVE, as they
supply in a condensed
form the substances
actually needed to en-
rich the blood, curing
all diseases coming
from Poor and WAT-
ERY BLOOD, or from
WETTED MEMORS in
the BLOOD, and also
invigorate and BUILD
UP the BLOOD and
SYSTEM, when broken
down by overwork,
mental worry, disease,
excesses and indiscre-
tions. They have a
SPECIFIC ACTION ON
THE SEXUAL SYSTEM OF
both men and women,
restoring LOST VIGOR
and correcting all
IRREGULARITIES and
SUPPRESSIONS.
EVERY MAN Who finds his mental fac-
ulty failing, or his physical powers flagging, should take these
Pills. They will restore his lost energies, both
physical and mental.
EVERY WOMAN should take them. They cure all sup-
pressions and irregularities, which inevitably
lead to sickness when neglected.
YOUNG MEN should take these PILLS, as
they will cure the re-
sults of youthful bad habits, and strengthen the
system.
YOUNG WOMEN should take them.
These PILLS will
make them regular.
For sale by all druggists, or will be sent upon
receipt of price (25¢ per box), by mail, to
THE DR. WILLIAMS' MED. CO.,
Brookville, Ont.

MCGILL UNIVERSITY, MONTREAL.
SPECIAL ANNOUNCEMENT of the
Faculty of Applied Science has been
prepared, stating the details of the new
Chambers Laboratories, Workshops, Apparatus
and other improvements in its several Depart-
ments of Civil, Mining, Mechanical and Elec-
trical Engineering and Practical Chemistry,
which will be held in the Session of 1891-2
advantage not hitherto accessible to Students
in this country.
Copies may be had on application to the
undergraduates, who can also supply detailed
specimens of the other Faculties of the
University, viz. Law, Medicine, Arts (in-
cluding the Dental Course for Women), and
Veterinary Science.
J. W. BRAKENRIDGE, B. C. L.,
106-25 St. James Street,
Acting Secretary.

We keep the best assorted stock of Plain and Fancy Stationery in Charlottetown, and aim to supply the best class of goods at the lowest possible price.

Steel Engravings, Artotypes, Ideal Heads, Artotype Etchings, Steel Etchings.

Printing and Bookbinding in all branches a specialty.

TAYLOR & GILLESPIE.

We are making Special Reductions during this month on the binding of Magazines, Illustrated Papers, Periodicals, etc.

TAYLOR & GILLESPIE,

Sign of the Big Book, J. D. McLeod's Corner.

3 PRACTICAL POINTS.

One of the most successful German physicians gave as the secret of his wonder-ful success these three important points:—

1. Keep the Head Cool.
2. Keep the Bowels Open.
3. Keep the Feet Warm.

These conditions are not so easily obtained as one would think. Why? Because without pure and healthy blood a vigorous circulation cannot be kept up, and because the food and occupation of most people tends to clog up the bowels and produce constipation. The success of B. B. B., like that of the German physician, lies in so purifying the blood and regulating the bowels, liver and stomach, that these three conditions are fulfilled easily, and disease can find no lodgment in the body.

THE BEST SPRING MEDICINE.

This medicine does purify the blood and cure all diseases arising from impure or unhealthy blood. It does regulate the entire system and cure constipation, dyspepsia, biliousness, sick headache, scrofula, skin diseases, rheumatism, and all disorders of the stomach, liver and bowels. During the past ten years over one million bottles have been sold in Canada, and, although we guarantee every bottle to do all we claim, we have not received a single complaint.

Scientific Miscellany.

DECORATING BY HEAT.—A new decorative art of French origin, is pyrogravure which consists in engraving upon wood, leather, fabrics, etc., by means of a heated tracing point. By its extremely varied and remarkable effects may be produced. The apparatus consists of three principal parts, viz: an air reservoir in which the air is slightly compressed by the weight of a cylinder, which is raised once an hour, a carburetter, containing a sponge saturated with alcohol, naphtha or other hydrocarbon, and a thermo-tracer, which has a platinum tube, whose previous heating to a certain temperature causes the stream of air and hydrocarbon to combine on entering it, and thus maintain a steady heat. Only a portion of the air from the reservoir passes to the carburetter and through a flexible tube to the thermo-tracer, while the rest is forced to the handle attached to the tracer, and serves to keep it cool. Tracing points of different sizes and shapes may be screwed into the handle. Pyrogravure may be practiced without a knowledge of drawing, and offers great possibilities in the ornamentation of mouldings, panels, furniture, boxes, books, leather for chairs, etc., and as an accomplishment for young people and amateurs.

MICROCIDINE.—A new antiseptic agent called microcidine, which is composed of 75 per cent of naphtholate of sodium and 25 per cent of naphthol and phenyl compounds, has been tried in France. It is a white powder, soluble in three parts of water. The solution, which is cheap, is said to be a very effective antiseptic, without being poisonous or caustic, or injurious to instruments or linen. Its antiseptic properties are inferior to those of corrosive sublimate or naphthol, but surpass those of carbolic and boracic acids ten and twenty times respectively. The solution has given excellent results in dressing wounds.

A great increase in eye disease in Brussels has been traced to a visit of an Asiatic quack who has treated many eyes with a weak boracic acid solution applied with the same brush to all. Virus of serious disease has been conveyed by the brush to eyes which before had only unimportant inflammation.

MUSICAL SANDS.—The phenomenon of musical sands, which has only attracted the scientific attention during the last few years, is found to be very common. Drs. H. C. Bolton and A. A. Jolien, who have given especial attention to the subject, have now collected 610 samples of such sands from different parts of the world, while reports from 85 beaches in the United States have shown them that 65 are famous for musical sands. To the eye a patch of this sand is like any other, yet a blind man who is deaf and dumb can easily distinguish it by a distinct vibration, or tickling sensation, communicated to hands or feet. From an analysis of 590 samples examined, it appears that the sounds—which are produced by friction, and vary in pitch with the amount of sand acted upon—do not depend upon a particular variety of sand, but upon a condition into which the sand gets. Rolled in a bag, one specimen of musical sand gave a whoop-like sound audible for about 420 feet. Yet this sand—unless bottled—lost its power in a few hours after being taken from the beach, and also became soundless on the slightest admixture of fine powder or of moisture.

THE ELECTRICAL GIANTS.—The 10,000 horse power dynamos of the Deptford Central Station, London, are being made on the premises by some of the largest machines in England, including a planing machine giving a vertical cut of 20 feet and a horizontal cut of 22 feet, and a lathe with a capacity of 11 feet in diameter and 25 feet in length. There are to be five of these great dynamos each supplying 20,000 lights. The armature ring for each measures 35 feet in diameter, and the armature and shaft will weigh 225 tons, and the field magnets 350 tons more, this being exclusive of the massive bed-plates on which both engines and field magnets will stand. The height of the completed dynamo will be 45 feet. An engine of 5,000 horse power will be attached to each end of the armature shaft, and will reach to a height of 48 feet.

It has been shown that the climate of many Italian provinces has been changed by the steady destruction of the forests. The government is seeking to remedy the matter by offering valuable prizes for tree planting.

ODOR AND FOULNESS.—The odor of the sewer exaggerates its dangers. Dr. E. Duncan, of Glasgow, finds that plumbers are not more liable than other persons to that class of zymotic diseases—including typhoid fever, diphtheria, diarrhoea and sore throat—supposed to be due to exposure to the offensive emanations from choked drains and soil pipes. There is no gas in the sewer that may not be encountered outside of it, and neither typhoid excreta nor tuberculous sputum give forth more dangerous emanations in decomposing than any other organic substance. The air of a well-ventilated sewer, in fact, is far less unwholesome than that of crowded choirs or churches, or even of the houses of half of Glasgow's population.

LOCUSTS IN AFRICA.—Though mankind may avoid a repetition of the great locust plagues of history—such, for instance, as that, near the close of the last century, in which the locusts drowned on one part of the African coast were washed up in a bank fifty miles long and four or five feet high, or that early in the Christian era, which resulted in the death of 800,000 persons—such plagues have not yet entirely lost their terrors. Recent alarm has therefore been caused in Egypt by the most serious visitation recorded for forty years, and has been increased by the fact that the swarms of locusts, instead of being migratory, seem to have developed from eggs laid in the country last year. Every effort will be made to exterminate the creatures before great damage is done. While investigating the locust plague in Algeria, a member of the French Academy, M. Kuncel Herculis,

is reported to have fallen asleep from exhaustion, when he was attacked by a swarm of locusts from which he was unable to escape. When his corpse was found the insects had completely devoured his hair, beard and necktie.

A woman in one of the London Hospitals is afflicted with an ovarian cyst weighing more than 151 lbs.—much more than the patient herself. Such morbid growths of great size are not rare, but this is the largest on record. In more than 1000 cases known to Sir Spencer Wells, none had exceeded 125 lbs. in weight.

LETTERS TO THE EDITOR.

License vs. Free Rum.

Sir,—The Guardian will, no doubt, be gratified to observe that a new first-class saloon is being opened on Water Street by a Halifax brewer; a new saloon also in Cameron Block by Mr. Byrnes, and others in other places of lesser note. It seems the city is looked upon as an El Dorado by the liquor trade, and we may expect to see the dealers therein flocking to us from all parts during the "three years of plenty." We think a license law necessary if the city is to be habitable for church-going men and women. Let sickly sentimentalists in morality dream if they will, but gentlemen of the Legislature, give us a LICENSE.

The New Time Table.

Sir,—The people west of Summerside were anxiously awaiting the appearance of the summer time-table of the P. E. I. R. in hopes that the petition sent to the Superintendent, and by him forwarded to Ottawa, in regard to the change of time, would be granted. But I find, on comparing the new and old, that they are the same, with one or two trifling exceptions.

As the Steam Nav. Co. have placed a fast steamer on the route between Summerside and Point du Chene, I would think the travelling public west of Summerside should now be accommodated by our railway system. If the express that leaves Charlottetown to connect with the boats, would wait at Summerside until her arrival from Point du Chene, and then taking the mails and passengers, run right through to Tignish, it would be an immense benefit to the business men of the west.

The express should leave Tignish in time to connect with the boat at Summerside, thus saving people travelling to the mainland the loss of time and expense of staying in Summerside overnight. Again, trading people might leave Tignish in the morning, go to Summerside, have five or six hours to do their business, and be able to return home the same evening. Under the present arrangement we have to remain overnight at Summerside, and cannot get back to Alberton or Tignish until the following day, thus causing considerable loss of time and expense. I trust the Superintendent will interest himself in our behalf by granting this change of time.

Thanking you, Mr. Editor, for your valuable space, I am yours truly,
TIGNISH.

Tignish, June 4, 1891.

Will Asiatic Cholera Follow?

Mr. Joe Howard's theory that, one horror of a similar nature follows another to the number of three, has a chance for confirmation this coming summer if certain predictions prove true. First it was La Grippe; "A Whim" the French define it. Second came deaths by scores from its after-effects, or from the many atmospheric changes of the past few months. Severe cases of pneumonia, bronchitis, intense catarrh and general loss of strength were the results, until death was almost welcomed as a relief to the sufferers. So that this epidemic and its sequence has proven to be the most terribly realistic "whim" that ever infested this country. And now for number three; the theory is said to be advanced that the cholera is very likely to find fertile soil in the generally debilitated constitutions of our people resulting from the effects of such a winter and spring as has just past. Whether the theory of three will be confirmed in this case or not, remains to be seen. At any rate it behooves every person still affected by any of the complaints due to these climatic changes and epidemics, such as catarrh or bronchial troubles, to look well to themselves and see that every trace of the trouble is removed this present month; before the heat of summer still more debilitates their system. For years we have found that simple old remedy, Johnson's Anodyne Liniment has done, used as directed, to be the most certain remedy for all forms of lingering summer colds, catarrh or bronchial affections, as well as colic, preventive and cure for all kinds of summer complaints. It is absolutely certain that a remedy that has survived for eighty years as Johnson's Anodyne Liniment has done, must have more than average merit. We suppose there is not a family in this country but what has this good old fashioned remedy in the house. If there is, we advise them to get it at once or write the manufacturer, U. S. Johnson & Co., Boston, Mass., for a pamphlet describing its various uses for the last eighty years. Now is the time. Delays are dangerous, and an ounce of prevention is worth many pounds of cure.

If you want a standard bred stallion, mare or filly, you can get it by attending the sale of royally bred horses at Parkside Farm, Summerside, on Dominion Day. Every brood animal offered is standard and registered under Rule 5-X—the highest rule in breeding—and there is not a poor individual in the lot. Drop a post card to W. A. Brennan, Summerside, for a sale list. j6 5t s&w

FOR OVER FIFTY YEARS Mrs. Winsloe's Soothing Syrup has been used by millions of mothers for their children while cutting teeth. It relieves the little sufferer at once; it produces natural, quiet sleep by relieving the child from pain, and the little cherub awakes as "bright as a button." It is very pleasant to taste. It soothes the child, softens the gums, allays all pain, relieves wind, regulates the bowels, and is the best-known remedy for diarrhoea, whether arising from teething or other causes. Twenty-five cents a bottle. Be sure and ask for "Mrs. Winsloe's Soothing Syrup," and take no other kind. mar 23i eod & wky lyr

MONEY ORDERS.

ARRANGEMENTS have been completed for selling this Company's Money Orders in Charlottetown.

For convenience, this system does not require writing out an application by purchaser of order.

RATES. The rates charged for these Orders are less than by any other means of making remittances when perfect safety is afforded.

For Security a Receipt, bearing duplicate number, is given with every Order purchased, so that in the event of delay or any other cause an order fails to reach payee, the amount will be refunded either to remitter or payee on presentation of receipt, thereby avoiding the delay and annoyance incident to the duplication of orders when no receipts are given. These orders will be paid at all principal points on our line; also over 10,000 places in the United States.

Any further information will be freely given on application to
