

Urges Diversification Of Canada's World Trade

By FORBES RHUDE
Canadian Press Business Editor
TORONTO (CP)—Canada cannot, with its present population nor any anticipated future population; consume at a rate even approaching her production possibilities, Gerald G. Fisch of Toronto said Monday in an address to the Canadian Club.

In this situation, he urged expansion and diversification of the country's world trading and financial relations, though not expressly at the expense of such relations with the United States.

Mr. Fisch—executive vice-president of Payne-Ross Ltd., management consultants—spoke on Canadian-United States business. **ACCEPT BAD WITH GOOD**

"As long as we expand our industrial potential we must probably be prepared to accept some unbalance of trade with the

United States—at least until our machine-tool and similar industries are adequate in size and competitive position.

"A very substantial quantity of Canada's exports to the United States are stimulated by American investment, including aluminum, iron ore, petroleum, pulp and paper and chemicals.

"To what extent are Canadians, temperamentally or otherwise willing or able to develop our resources and our own manufacturing facilities unaided?

"If we recognize that we are a free and independent nation, and as long as we maintain our record of reliability, consistency of policy and continuity of supply, we can probably make more stringent demands in terms of Canadian participation in foreign investment without too much difficulty in gaining acceptance.

POSITIVE APPROACH

Mr. Fisch said he believes Canada's approach to the various problems must be positive rather than restrictive.

"We should emphasize the expansion and diversification of Canada's exports and imports in the world market, not expressly at the expense of U.S.-Canadian business relations, but simply by expanding our over-all import and export role in total.

"A second positive step is to encourage foreign investment of all types in addition to United States investment, but increasingly on terms which while allowing foreign investors to participate in Canada's growth, still leaves much of the control and management of the growth in Canadian hands.

IN MEMORIAM

LAWRENCE HERON

The death occurred on Feb. 27, 1958 of Lawrence Heron of Charlottetown, formerly of Donagh, aged 69 years.

The deceased, who was the son of the late Mr. and Mrs. Peter Heron, was born at Webster's Corner, P.E.I. on Feb. 18th, 1889, where he received his early education, later attending Prince of Wales College. He taught school for some time before going to the United States, where he remained for a few years.

Upon his return to P.E.I. he purchased a farm in Donagh and carried on farming quite successfully for a number of years. Some time after the death of his wife, he disposed of his farm and resided with his adopted daughter Mrs. Clifford McGuirk in Charlottetown.

Almost two years ago, he suffered a stroke from which he did not recover. He bore his sufferings patiently, and was frequently visited by Rev. Francis Corcoran, who administered to him the last rites of the Roman Catholic Church.

He leaves to mourn his passing, besides his adopted daughter Mary, Mrs. Clifford McGuirk, one brother John of Webster's Corner, two sisters, Mrs. Leo Trainor, Donagh, and Mrs. Joseph Hughes, Gloucester, Mass. His wife the former Agathe Koughan of Donagh predeceased him fourteen years ago.

The large number of people who paid their last respects to the deceased, bears testimony to the esteem in which he was held. His remains were conveyed from the Hennessey Funeral Home, on Sunday, March 2nd to the home of his brother John Heron from where the funeral took place on Monday morning to St. Patrick's Church, Fort Augustus, where requiem high mass was celebrated by Rev. T. P. Butler, who also performed the services at the grave. Rev. William Simpson was present in the sanctuary.

The honorary pall bearers were Thomas McAvinn, Eugene Kelly, Francis Koughan, John Beagan, Patrick Duffy and Philip Smith.

Active bearers were: Howard and Louis Heron, William, Victor and Elmer Koughan and Joseph Murnaghan.

May his soul rest in peace.

MASSES
Mary and Clifford (4)
Frances, Leona, Diane and Arlene McGuirk.
Mr. and Mrs. John Heron and Ivan, (High).
Mrs. Annie Hughes, (2) Gloucester, Mass.

Mr. and Mrs. Edward Jackman, St. Catherine's, Ont.

Mrs. Jennie McKenna, Lynn, Mass.

Mr. and Mrs. Norman Telfer, Crystal Beach, Ont.

CARD OF THANKS

The family of the late Lawrence Heron wish to thank all those who sent mass cards, enrollments, spiritual offerings, and sympathy cards, and who helped in any way during our recent sad-bereavement.

See Need For Way To Destroy Old Satellites

WASHINGTON (AP)—Dr. John Hagen, director of the Vanguard project, told Congress Monday scientists now must consider ways to destroy satellites as well as to get them into space.

Hagen, a native of Amherst, N.S., told the House of Representatives space committee that satellites can be expected to multiply more and more in orbits around the earth and that they "might be a menace in more ways than one."

The scientist said a host of satellites would create difficulty in detecting hostile intercontinental ballistic missiles.

The devices being developed to warn of ICBM attacks, Hagen said, would be greatly handicapped if there were many satellites within their range.

HOLD CONFERENCE
Hagen said the time is about here for an international conference to set rules on what kinds of satellites may be put into the sky and especially what radio transmitting equipment they should carry.

Hagen said the Vanguard satellite will continue to be useful for scientific studies but he indicated that many more such satellites with continuing radio voices might cause serious communications tangles.

Hagen said he is convinced the Russians now have a master plan for further space research, including development of a manned satellite or vehicle.

Inspect Piers For New Bridge

CORNWALL, Ont. (CP)—Top Canadian and United States seaway engineers met Monday in nearby Cornwall Island to decide whether concrete piers for a new \$7,000,000 high-level bridge are in suitable condition to carry the superstructure.

The four piers, built by Canada's St. Lawrence Seaway Authority under private contract, have been the subject of controversy for some time. The new bridge between Cornwall Island and the U.S. mainland is to replace the old three-span Roosevelt Bridge which must be removed so ships can use the south river channel.

Officials said Monday's closed meeting may determine whether superstructure work to be carried out by the U.S. Seaway Development Corporation will proceed.

The meeting took place on the Canadian pier site.

Heading the Canadian delegation was A. G. Murphy of Montreal, chief engineer of the St. Lawrence Seaway Authority, deputy administrator of the St. Lawrence Seaway Development Corporation and Col. Loren Olmstead, chief of Eufaulo district, U.S. Army Corps of Engineers.

HABIT BLAMED

HARTFORD, Conn. (AP)—A nun's headress was blamed in part Wednesday for a traffic accident in which she and two other Sisters of Mercy died March 15.

Coroner Louis W. Schaefer said he has recommended that the commissioner of motor vehicles give careful consideration to the licensing of drivers whose "headress . . . might interfere with maintaining a proper lookout on the highways."

HIGH-CLIMBERS HURT

PHILADELPHIA (AP)—Rescue workers climbed a 135-foot water tower Tuesday to bring down two steeplejacks injured in a fall inside the empty tank.

You'll never really know how well your car can run until you try new WHITE ROSE GOLDEN JUBILEE GASOLINES

Tailor-made to provide the high octane plus the high energy necessary to make your car run as it should!

Canadian Oil, in celebration of its 50th birthday, takes a major forward step in the manufacture of gasolines with the introduction of two new motor fuels that offer you a new high in octane plus a new high in usable energy in both premium and regular priced gasolines.

We believe these new gasolines are the finest ever made in Canada. They are certainly the finest we've made in 50 years. We are sure you will agree after you test a tankful—and see how well new White Rose gasolines make your car run.

Try new White Rose Ultra: for highest compression cars. Combines unsurpassed octane with liquid energy to release peak performance from your car.

Try new White Rose: for the majority of today's cars. Only regular priced gasoline to offer the high octane plus the high energy necessary for responsive, economical engine performance.

Let your car be the judge. It is the only way you'll really know how well your car can run.
