No smoker who has ever used the Myrtle Navy tobacco for, say a month, ever relinquishes it for any other brand. Its flavor is rich and full, and it never burns the tongue or parches the palate. It is, in fact, the ne plus ultra of smoking tobacco.

The programme included some excellent trapeze performances by Mendoza and Maynard, and daring leaps through the air by Chas. and Ben Vernon. There was also a very fine contortion act, some first-class horizontal bar work, dancing, barrel act and dog circus. The slack wire performance was one of the best ever seen here. General Telegraphic News.

OTTAWA, Aug. 10.—Sir George Dibbs, premier of New South Wales, says the World's Fair directorate treated Australia in a scurvy manner. They promised space for the special building to contain the Australian exhibits, and having committed the colonies then repudiated the agreement. Had not New South Wales spent one hundred thousand dollars already in collecting exhibits, the government would wash its hands of the whole business.

FREDERICTON, Aug. 11.—The success of the Kungiclear creamery has already caused the farmers of other districts in the country to think about the establishment of creameries or cheese factories. In Prince William and Southampton, Stanley and St. Mary's, there is talk of building factories. A number of farmers have now under consideration the erection of a large creamery and cheese factory at Barker's Point, in Lower St. Mary's. It is said that Thomas Becher has offered the grounds necessary for the buildings.

NEW YORK, Aug. 10.—Professor Pickering, of Harvard, telegraphs from Arequipa, Peru, that he has observed two large permanently blue areas near the equator of Mars, or one-half a million square miles in area, or one-half the size of the Mediterranean sea. On June 23rd, a small dark spot appeared in the southern snow cap, lengthened rapidly, and early in July was one thousand miles long, dividing the snow in halves. Sixteen hundred thousand square miles of snow melted during the past thirty days, being apparently transferred to the seas across the land. Many other changes were noted, including rapidly changing white areas and green areas near the poles.

CAMPBELLTON, Aug. 10.—Early yesterday as a picnic party was crossing the river Restigouche to Oak Point, Willie Johnson, a bright little boy of 12 years, suddenly pulled up a boat towing behind the steamer and sprang in. When the line again became taut it snapped and the boat capsized, and poor Willie was thrown out and almost immediately drowned. About twenty boats, including two tugs, have been employed in dragging the river for the body, but without success up to nine o'clock to-night.

TOPEKA, Kan., Aug. 10.—Since issuing his regular July crop report, Secretary Mohler, of the state board of agriculture, has received advices that a large part of the corn crop in the central and western parts of the State is in so critical a condition that it will be almost a complete failure unless copious rains fall within 48 hours. Abundant rains fell the latter part of July, which it was presumed at the time would insure the crop against danger from drought. Since that time, however, no rain has fallen, and the weather has been intensely hot. In addition the hot winds have been blowing with their usual deadly effect upon corn. Secretary Mohler says the crop shows a strong vigorous growth, but that the ears cannot mature under the present conditions.

Eminent scientists have been investigating the cause of the recent avalanche in Switzerland, which destroyed three villages. They have agreed that it was not owing to the falling away of a glacier, but having located the first break of the disaster they differ as to the motive power which set it going. Some hold it was the accumulation of water in a concavity of the ice; others, that the origin was of a volcanic nature. These latter say that the earth oscillating on its axis has caused all of the long series of disturbances which have been witnessed lately in various quarters of the globe. If this theory be not accurate it is at all events interesting.
