

APPOINT PROVINCIAL DENTAL HYGIENISTS

Dr. Lorne Bonnell, Minister of Health, announced last night that three more Dental Hygienists, have just been appointed to the Division of Public Health, after completing a two-year course of training.

Miss Frances Campbell, of Souris, took her training at the Dental School of the University of Toronto. Miss Virginia Coffin of Rollo Bay West and Miss Jean Campbell of Brooklyn both studied at the Forsyth School for Dental Hygienists in Boston. All three were outstanding in their course of study the minister added. These appointments have increased the number of dental hygienists in the Department of Health to five.

During the summer months, these hygienists will be occupied mainly in operating clinics for sodium fluoride applications. This simple treatment reduces the risk of future tooth decay by about 40 per cent, the Minister explained. There is no charge for the treatment and any child between the ages of 3 and 13 is eligible. However a child of school age must have had all necessary dental treatment carried out first. These clinics have already commenced in Charlottetown and also in Mount Stewart, Alberton and Tignish. Other centres will be included later.

Dr. Bonnell concluded by saying that the Dental Division here now compared very favourably with that of any provincial Department of Health in Canada.

purpose bacteria that will take care of both diseases.

WEED KILLERS

Use chemical weed killers safely. In view of the extensive damage that could be done by the careless use of chemical weed killers, we hear about surprisingly few cases of crop injury that are actually caused by herbicides. Although there may be many instances on injury that we do not hear about these need not occur if the recommendations are carefully followed.

Practically every case of injury can be traced to careless spraying or failure to follow the recommendations exactly as they are given either on the label on the container or in the circulars prepared and distributed.

The safe use of herbicides involves having the sprayer accurately calibrated so that the operator knows exactly how much water is being applied per acre. This amount will vary with the speed the sprayer travels and the pressure of the liquid at the nozzles. Therefore, once the sprayer is calibrated, the speed and pressure should be kept constant.

Spray drift is one of the great hazards in the use of herbicides and for this reason sprayer operators should be particularly careful to avoid having their spray material drift onto susceptible crops. In so far as possible, herbicides should not be applied on a windy day. The droplet size coming from a fine nozzle is so fine that it will drift up to 60 feet even on a relatively calm day and up to 300 ft or more with a wind of 12 to 15 miles per hour. If it is absolutely necessary to spray when there is some wind, the pressure should be decreased — say from 40 down to 30 pounds per square inch. In this case it will be necessary to travel at a lower rate of speed to apply the same amount of material per acre.

Ester form of 2,4-D or of M.C.P. rather than the amine, will each cause severe injury to legume seedlings. Alfalfa and sweet clover are especially susceptible. Red Clover and alsike are fairly tolerant of the low rates. Birds-foot trefoil is more susceptible to M.C.P. than it is to 2,4-D, whereas in the case of the other legumes the reverse is true.

The best safety precaution to follow in spraying grain seeded down with legumes is to wait until the grain and weed sere thick enough

World Conference Of Girl Guides, Girl Scouts

Canada's delegates to the 16th World Conference of the World Association Girl Guides and Girl Scouts, to be held in Petropolis in Brazil from July 8 to 19, will be Mrs. W.J. Hyde, of Montreal, Deputy Chief Commissioner of the Canadian Girl Guides, and Mrs. D. Bruce Wilson of Toronto, Honorary Treasurer of the Canadian Girl Guides. The world Conference, which assembles every three years, considers applications for membership from countries applying to join, appoints a World Committee to administer the Association, and settles points of policy concerning Girl Guides in the world during the ensuing three years.

In addition to the delegates, there will be two visitors going from Canada to the World Conference—Mrs. J.W. Hamilton, of Toronto, Honorary Secretary of the Canadian Girl Guides and Mrs. William Sims, of Waterloo, Commissioner for Uniform of the Canadian Girl Guides. Miss Henrietta Osler, International Commissioner of the Canadian Girl Guides, will attend the conference as Vice-Chairman of the Western Hemisphere Committee. Miss Osler and Mrs. Hamilton will be Canada's representatives at an International Commissioner's Conference to be held in Rio de Janeiro on June 27 and 28. Mrs. W. Rankine Nesbitt, Chief Commissioner of the Canadian Girl Guides, has been appointed Chairman of the World Conference. She will be assisted by three Vice-Chairmen from the United States, Brazil and Greece. Mrs. Nesbitt will attend a meeting of the World Committee of Girl Guides to be held from July 1 to 6, prior to the World Conference.

MUSIC AWARD

MONTREAL (CP) — Alexander Brott, noted Montreal conductor, has been awarded first prize in a competition in Mexico City sponsored by the Pan-American School of Orchestration. Mr. Brott, concert master of the Montreal Symphony Orchestra and professor, was chosen over 50 other conductors.

P.E.I. Yorkshires Brandon Bound

A carload of top quality pigs owned by farmers on Prince Edward Island are making a 4,000-mile cross-country trip by Canadian National Railways to compete in the first All-Canada Swine Show being held in Brandon, Man., in conjunction with that city's 75th anniversary celebrations.

Agriculturists regard it as significant that the Prince Edward

Island exhibits should make the long trip to compete in the Brandon show. Swine breeders on the Island have attained an enviable record for the quality of pigs produced in their province, and on several occasions they have taken all the major awards at the Royal Agricultural Winter Fair in Toronto for the highest bacon quality.

The prize pigs are being given special attention on their journey by CNR employees who have been instructed in the proper methods of feeding and watering the animals.

COLLECTED BY BALLOONS

TOKYO (Reuters)—A Japanese scientist said Thursday he has collected radioactive dust particles 40,000 feet in the air from recent U.S. nuclear tests in the Nevada desert. Dr. Chihiro Ishi of the Central Meteorological Institute said he sent two balloons high over Tokyo to collect the dust samples.

COMING EVENTS

- Corran Ban Picnic, July 31.
- Cardigan Tea Party, July 31.

SHORTHORN FIELD DAY

According to a recent report in the paper a Shorthorn Field Day is being held tomorrow, Thursday, July 4 in the North River Rink. There will be showing and there will also be calf club classes. This is your opportunity to see some of the Island's best Shorthorns. Why not make it a family day.

HOLSTEIN FIELD DAY

B. B. Jones, President of the Holstein Friesian Association for P.E.I. announced that a Field Day will be held this Friday at Falconwood Farm Charlottetown. E. P. Jarvis, Holstein Fieldman for New Brunswick will be one of the featured speakers. There will be judging classes and demonstrations. All activities are to get underway at 11.06 in the morning.

All Holstein breeders, their families and all others who are interested are urged to attend this event. Bring your lunch and enjoy a day of good fellowship at the Holstein Field Day, July 5 at Falconwood Farm.

JR FARMERS FIELD DAY

The Provincial President, Mr. Eddie Clark, Belmont Lot 16, has announced the Junior Farmers Field Day will be held at the Experimental Farm Saturday commencing at 1 o'clock p.m. July 6.

The events will start by a conducting Fiddle and Organ music. This will be a hum digre come one, come all.

Dance Millview Hall every Friday night.

ted tour of the Experimental Farm. This will afford an opportunity to learn firsthand something about the experiments being conducted. Immediately following there will be a softball game and tug-of-war and other sports events. The various demonstrations will include one of highway safety by the Royal Canadian Mounted Police and ring rot by Mr. H. L. MacLaren. Following the sports each of the Junior Farmers Groups will have a playlet and skit then the entire group will move on to the New Glasgow where the Junior Farmers in that area are holding a square dance and will be hosts to the other Junior Farmer Groups.

PREVENTION BEST

Blackleg and its twin Malignant Edema, are cattle diseases that are probably as old as the hills. Only in the lab can they be accurately differentiated. Dr. George C. Fisher, Director of Veterinary Services, P.E.I. Department of Agriculture reports that to the end of July 1957 at the Veterinary Laboratory that several cases from various parts of the Province have been found.

Characteristic of Blackleg and Malignant Edema is lameness and swellings that, crackle on pressure due to gas under the hide. Death may appear to be due to bloat. With these diseases, however, bloat occurs after death. Stricken carcasses should be burnt or buried to prevent further spread of these highly resistant spores. The best preventative is having the cattle vaccinated with a dual

HOLSTEIN FIELD DAY

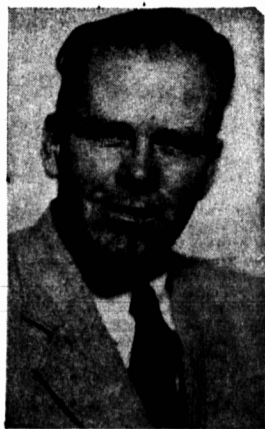

A Holstein Breeders field day will be held at Falconwood Farm on Friday, July 5th, with the program beginning at 11:00 o'clock in the forenoon.

Judging competitions with cash prizes will be provided for both Juniors and Seniors and a sports' program for all who wish to participate.

Mr. E. P. Jarvis, Holstein Fieldman for New Brunswick, will place the classes and speak to the group.

Bring your noon lunch and get acquainted with your fellow breeders.

Canteen services will be available
