

Society Directory, Charlottetown.

FREE AND ACCEPTED MASONS. St. John's Lodge, No. 1, meets 2nd Tuesday, Water Street.

An Undeniable Truth.

You deserve to suffer, and if you lead a miserable, unsatisfactory life in this beautiful world, it is entirely your own fault and there is only one excuse for you—your unreasonably prejudiced and skeptical, which has killed thousands.

MORE LIGHT!

THE Charlottetown Gas Light Company have imported some of "Bair's Burners," which they will supply and fit on Gas Brackets, etc., at a moderate cost to consumers.

These Burners are reported to be the best Flat Flame Burner yet produced, and will give a far greater amount of light than any other burner with the same consumption of Gas.

The Report of the Committee of the British Association of Science to enquire as to the best means for the development of light from Coal Gas of different qualities—comprising Dr. William Wallace, Professor Dittmar, and Mr. Thomas Willis, F. C. S., F. I. C. E., showed that Bair's Burner yielded the greatest amount of light of all the two or three scores of Burners reported upon, which included the Burners of repute in the market.

In a pamphlet upon Light and Heat, published by R. B. Tabor, A. M., he says: "The cost of Gas as compared with other illuminants is much more economical when rightly used, than many suppose. From experiments made for this purpose, the following results have been obtained. They were made by burning samples of Devoe's Brilliant Oil and ordinary Oil, and testing their illuminating power. It was found that Coal Gas costing one cent at \$3 per thousand feet, gave a light equal to 18 candles, while Devoe's Brilliant Oil consuming 27.4 grammes costing half a cent, gave a light equal to 9 candles."

As the above experiments were made with Gas at \$3 per 1000 feet, and not consumed through Bair's Burners, it will readily be seen how much more economical it is to consume Gas instead of Oil, when its price is only \$2.93 per 1000 feet as now charged here when consumed, more especially through Bair's Burners.

Messrs. Goodwin & Co., of Philadelphia, the well-known manufacturers of Scientific Instruments for testing the illuminating power of Coal Gas, etc., say in their Circular to Gas Companies: "In presenting the Bair's Standard Patent Silt Union Burners and Lanterns, for which we are the sole Agents in the United States, to the attention of the public, we are convinced that we are filling a want long felt." They further add: "The yield of light from these Burners is 12 to 20 per cent. greater per cubic foot of Gas consumed than from any flat flame burner hitherto introduced."

LIBERAL CONSERVATIVE MEETING
