THESE ARE BIG DAYS AT ALBERTON

Both the old and the young shows a gentle Oxford lamb for tenant-Governor F. Walter Hyndman. Another big program is planned for today. (For story and additional pictures see page 19).

Recommendations Made At 2nd Potato Conference

FREDERICTON. — (CP) — The second Canadian potato industry conference recommended Wednesday that wholesalers pay for potatoes on delivery, rather than at the shipping point, to assure acceptance and marketing of only good quality stock. Another recommendation was for uniform, compulsory shipping point inspection and federal grade certification of all inter-provincial shipments.

Princess Is 28 Years Old Today

BALLATER Scotland (Reuters) — Princess Margaret 28 today and still unmarried will celebrate her birthday quietly with the Royal Family at Balmoral Castle here. If the weather is fine the Queen, the Queen Mother, the Duke of Edinburgh, the Prince of Wales and Princess Anne will have a picnic on the moors. Otherwise it will be an indoor party. There are no other guests at Balmoral the Queen's Scottish home. Margaret who travelled from London to Scotland by train Tuesday night saw the Queen Wednesday for the first time since returning from her five-week Canadian tour.

Strike Ties Up Two Breweries

HALIFAX (CP) — Employees of two Halifax breweries struck for higher wages Wednesday and cut off the source of more than 50 per cent of the beer purchased in Nova Scotia. About 150 workers at A. Keith and Son Limited and Oland and Son Limited struck at 5 p.m. A.D.T. normal shutdown hour for the commonly-owned breweries. A company spokesman said production and distribution stopped immediately. The strike deadline was set Monday after Local 361 of the United Brewery and Distillery Workers (CLC) refused to accept a conciliation board's majority report recommending a 15-cent hourly wage increase and fringe benefits asked by the union. The minority report of the union representative urged a 20-cent hourly increase now and a further 10 cents next year in a two-year contract. The present basic wage is \$13.33.

Like Ready To Call Troops Again On Integration Issue

WASHINGTON (AP) — President Eisenhower indicated Wednesday he would again call out troops if he felt a state failed to suppress unlawful opposition to school integration ordered by the courts. Anarchy will result if persons, communities or states continue to defy court decrees, he said. "My feelings are exactly as they were a year ago." Last September Eisenhower ordered federal paratroopers into Little Rock, Ark., saying the state administration of Governor Orval Faubus was obstructing court orders for racial integration. Faubus replied Wednesday that Eisenhower and those who agree

Three Die On Rail Crossing

DIGBY, N.S. (CP) — Three teenagers were killed and two injured Wednesday when their car slammed into a CPR Dayliner 30 miles southwest of here. RCMP identified the dead as Elizabeth Marie Mallet, 18, St. Martin's; Ann Marie Comeau, 19, Meteghan and Oviata Comeau, Cape St. Mary. Delbert Deveau, of Cape St. Mary, driver of the car, and Marsha Juliana Deveau, 12, of Meteghan, were in hospital with undetermined injuries. Delbert was said to be in serious condition. Authorities said Marsha's condition was "satisfactory". RCMP said the Deveau car slammed into the Dayliner about 17 feet from the front of the self-propelled car. The auto was dragged 55 feet. Oviata Comeau was killed instantly. The comeau and Mallet girls died shortly afterward in hospital. Relationships of the dead and injured could not be determined immediately. The mishap occurred at Little Brook Station, about midway between here and Yarmouth, N.S. The diesel-powered Dayliner was on its daily trip to Yarmouth from Halifax.

Says Potato Industry Must Do Its Own Research Work

FREDERICTON (CP) — The potato industry must "depend on itself for the major effort in exploiting research findings and keeping in tune with the changing social and economic environment," Dr. J. C. Woodward, associate director of the experimental farm in Ottawa, told the second Canadian Potato Industry Conference Wednesday. "It should expect some research on its product and research assistance on particular problems which become limiting factors in economic production. In the normal course of events, each segment of the agricultural industry will have to stand on its own feet in relation to other segments of the economy and any one crop will be subjected to direct competition from other crops." Potato sprouting while the tuber is in storage had been a problem to growers, shippers and

Drift 7 Days On Stormy Georgian Bay

MIDLAND, Ont. (CP) — An elderly couple who drifted helplessly for seven days in storm-whipped Georgian Bay were rescued six miles from here Tuesday. The couple, C. S. Carter, 73, and his wife, 64, of Lion's Head, near Owen Sound, were found aboard their cruiser Karen with their collie, Rover. Both were well in spite of their ordeal. Mr. and Mrs. Carter, who had rationed their food, were spotted off Balm Beach by Fred Conroy of Port Credit. He said he saw a distress signal made out of a white sheet flying from the bow of the 27-foot craft. He went out to the Karen and when he found the Carters in good condition, returned to shore for five gallons of gasoline to start the engine. "WONDERFUL" ASHORE Once ashore, Mr. Carter said: "It's a wonderful feeling to be tied up to something solid." The Carters left Monday, Aug. 11 for a trip to Kingston, intending to go via the Trent canal system. First stop was to be Port Severn, on Georgian Bay. They were headed for Western Island, a craggy rock with few trees, but missed it because of a fog and a miscalculation of "only a half degree," said Mr. Carter. Because of rocky shoals they couldn't get to the mainland and, with visibility still limited by fog and haze, they decided to head for home.

Former Sydney Mayor Charged

SYDNEY (CP) — Former mayor of Sydney was charged by RCMP Wednesday with illegal possession of narcotics. Mr. Gallagher, elected five times to the mayoralty before his resignation last year, was remanded in custody until Aug. 26. He is 54.

GOOD HARVEST

LONDON (Reuters) — This year's grain harvest in the Soviet Union is "good or satisfactory" everywhere, the Soviet news agency Tass reported Wednesday.

Arab Delegates Agree On Mid-East Settlement Plan

Claim CF-105 May Cost 2 Billion In Three Years

By DAVE MCINTOSH Canadian Press Staff Writer OTTAWA (CP) — The supersonic CF-105 jet interceptor program will cost in the neighborhood of \$2,000,000,000 in the next three years if the government orders the plane into full production, informants said Wednesday. Such outlays would mean defence budgets of more than \$2,000,000,000 in each of the next three fiscal years and, the informants added, a possible consequent increase in taxes. The defence budget in the current fiscal year ending next March 31 is \$1,686,000,000. One authoritative source said the government decision whether to order the CF-105 into full production is one of the most crucial ever faced by a Canadian administration in peacetime. This source said the time is drawing close when the cabinet will have to make its decision, certainly within the next four months and probably sooner.

Support Price Called For 560 Cars Potatoes

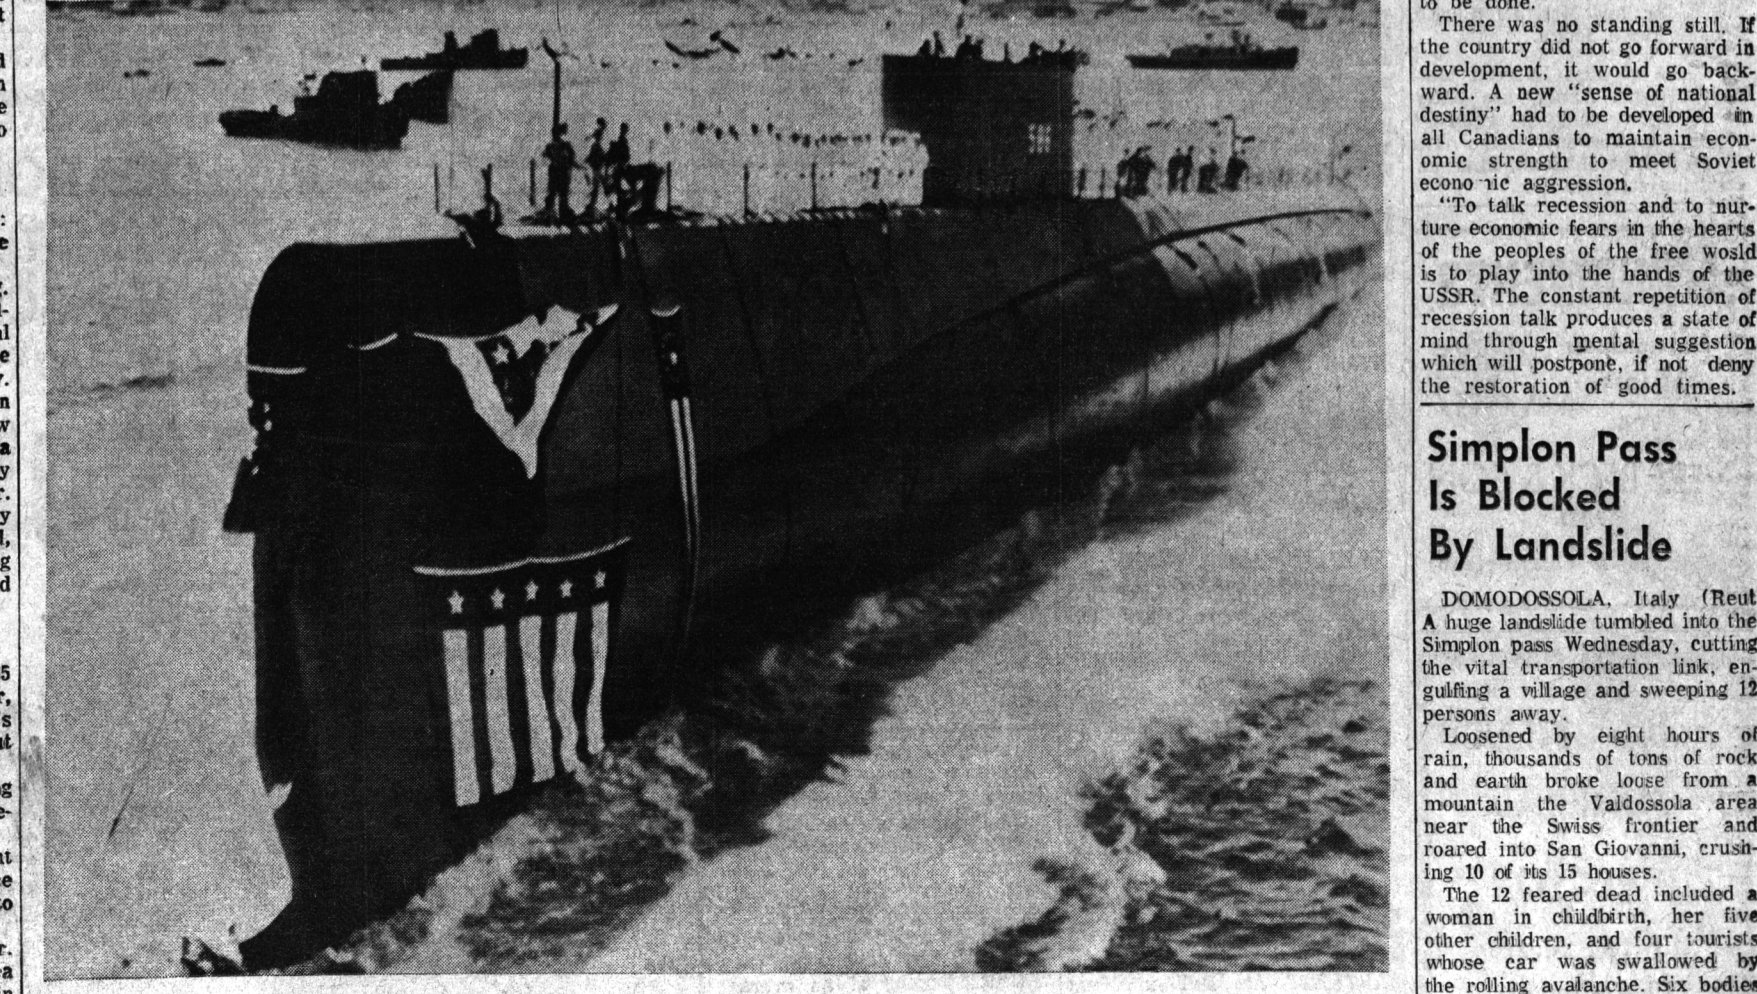

Potato inspectors on Prince Edward Island have approved about 560 carlots of potatoes as eligible to receive support price under the Agricultural Stabilization Act. The inspectors started their chore of measuring potato bins and estimating stock piles on or about the middle of July. With the exceptions of a few straggling applications which went astray in the mail, the main task was completed during the first week in August. Altogether some 35 inspectors were employed at one time or another. PRINCE COUNTY HEAVY The Prince Edward Island Potato Marketing Board, which has been assigned the task of tabulating the applications and certificates of inspection, states that about 56 per cent of the applications for support price came from Prince County. Under the support price as agreed to by order-in-council of the Federal Cabinet, growers are to get 36 cents per bushel for 75 per cent of the estimated quantity of potatoes they have on hand as of July 15. It is understood that the Federal Government has limited the amount of the total payment to \$105,000. A rough estimate of the amount required to pay for the 560 carloads would come to about \$130,000. It has been learned unofficially that an attempt is being made at Ottawa to have the total increased so as to retain the 6 cents per bushel price. It is pointed out that adherence to the original total of \$105,000 would result in a lower price per bushel being paid.

Two Resignations In Quebec, Byelections Called Oct. 15

QUEBEC (CP) — Quebec's veteran minister of health and a relative newcomer to the provincial legislature resigned Wednesday and autumn byelections were called to fill the vacancies. Dr. Albiny Paquette, member of the Legislative Assembly for Labelle constituency since 1935 and health minister for the last 14 years, and Paul Spence, member for Roberval since 1956, both resigned. Premier Duplessis announced byelections will be held Oct. 1. The premier made the announcement at a surprise press conference following the second meeting of the provincial cabinet in two days. Neither the conference nor the cabinet meeting had been anticipated. Mr. Duplessis said both Dr. Paquette, 68 and the 51-year-old Union Nationale member for Roberval resigned for health reasons. No further appointments for the two men were announced but speculation ran high in legislative circles that Dr. Paquette will be called to fill one of the three vacancies in the Legislative Council — the provincial upper House.

Red Subs Pass Down Channel

LONDON (Reuters) — Five Russian submarines passed down the English Channel Wednesday, the Admiralty said Wednesday night. Four of them are believed to be of the latest Russian type. They were accompanied by a larger submarine. They were on the surface, heading west, and were sighted by freighters in mid-channel.

GROTON, Conn. — The USS submarine in the World, slides launching here Tuesday. The twin nuclear power plants, is 447 feet long and weighs 5,900 tons.

Hope Is Held U.N. Meeting May Be Concluded Friday

By LLOYD McDONALD Canadian Press Staff Writer UNITED NATIONS, N.Y. (CP) — An apparent unanimous agreement among the Arab states on a Middle East settlement plan bringing the United Nations into the picture aroused immediate hope Wednesday night that the UN emergency assembly session may wind up by Friday with a definite accomplishment. The chief point being hailed was an understanding that all the Arab states would subscribe in a resolution backed by all 81 members of the UN assembly, to a renewed pledge of mutual non-aggression in the troubled area. Should Jordan and Lebanon accept this assurance, it was felt there would be no further block to a withdrawal of the British and American forces from those countries within the next month. Lebanon apparently was willing at the outset to accept such assurances if and when they are put into formal wording for voting in the assembly. The reaction of King Hussein's Jordan government was still not known Wednesday, but it was felt that pressure by Britain might bring the monarch around to accepting the solution as a means of justifying the emergency UN meeting.

Zone North Part Of City

The zoning of part of Ward 3 and Ward 6 for various types of residential, business and industrial development has been adopted by the Charlottetown City Council. At a special meeting on Monday the area was divided into five zones. Zone 1 is from North River Road to the river. Zone 2 extends 250 feet on each side of the Malpeque Road. Zone 3 is from North River Road to within 500 feet of the Malpeque Road. Zone 4 is from 250 feet to 500 feet west of the Malpeque Road. Zone 5 is from 250 feet east of the Malpeque Road to within 500 feet of the eastern boundary of Ward 6. There is to be an area for heavy industry in the vicinity of the railway. The other areas are subject to varying restrictions, from single family occupancy to commercial and light industry. The space and frontage requirements for single and multiple dwellings are specified as is the purpose to which land in the various zones may be put.

PM Considers Economic Picture 'Most Hopeful'

TORONTO (CP) — Prime Minister Diefenbaker said Wednesday there is increasing evidence of a new rise in the Canadian economy and while some "weaknesses" still exist, the overall picture is "most hopeful." "Canada's future promises tremendous expansion and in my opinion, greater than any other nation in the world in the next quarter-century," he said in opening the 80th Canadian National Exhibition. "Behind us is a record of nation-building unmatched in history; before us a future of almost limitless grandeur."

Only a small part of Canada had been developed. Of Canada's 4,000,000 square miles of territory, only 10 per cent was in private hands. Government enterprise had to form a "necessary catalyst" to make private enterprise functionally. GROWTH IS URGENT The "urgency of getting on with our national development is a matter of vital public interest to the welfare of this country," Mr. Diefenbaker added. "It is something which just has to be done." There was no standing still. If the country did not go forward in development, it would go backward. A new "sense of national destiny" had to be developed in all Canadians to maintain economic strength to meet Soviet economic aggression. "To talk recession and to nurture economic fears in the hearts of the peoples of the free world is to play into the hands of the USSR. The constant repetition of recession talk produces a state of mind through mental suggestion which will postpone, if not deny the restoration of good times."

Simplon Pass Is Blocked By Landslide

DOMODOSSOLA, Italy (Reut) A huge landslide tumbled into the Simplon pass Wednesday, cutting the vital transportation link, engulfing a village and sweeping 12 persons away. Loosened by eight hours of rain, thousands of tons of rock and earth broke loose from a mountain the Valdossola area near the Swiss frontier and roared into San Giovanni, crushing 10 of its 15 houses. The 12 feared dead included a woman in childbirth, her five other children, and four tourists whose car was swallowed by the rolling avalanche. Six bodies have been recovered. Huge piles of debris covered 300 yards of the railroad line to the Simplon tunnel, the rail link between Italy and Switzerland.
