

ONE MINUTE NEWS
ABOUT
JOHNS-MANVILLE
MAKE YOUR HOME
"FUEL-THRIFTY"

With today's high cost of living, everyone's counting coppers and trying to save. That's why so many homeowners are insulating with Johns-Manville Rock Wool—they know they'll save up to thirty per cent on fuel—not only this year, but as long as their house stands!

You can cash in on this huge saving in fuel, by insulating with J-M Rock Wool. You see, J-M Rock Wool gives you full benefit from the fuel you burn—it forms a barrier to stop heat loss—keeps your home snug and warm—free from draughts. And in summer-time keeps indoor temperatures cooler by as much as fifteen degrees. Find out now about J-M Rock Wool. For free folder, write Johns-Manville, Sun Life Bldg., Montreal, or see your nearest J-M dealer.

AGREEMENT IS
Continued from page 1

device for calling strikes.

The contract runs to July 1, 1952, but can be opened for wage discussions after April 1, 1951.

All payments withheld from the welfare fund since expiration of the last contract must be paid by March 15. This applies to southern operators said to have held back an estimated \$5,000,000.

Lewis also won an agreement that all attachments of union funds and damage suits filed in Ohio, Kentucky and other states against the union during the bitter contract struggle will be dropped.

The end of the long coal conflict was announced by Lewis and the leading operators under floodlights and cameras.

The 28-month agreement was immediately hailed as a tremendous factor toward stabilizing the industry. It was the biggest news in the contract terms as far as the miners were concerned.

It also was highly interesting to other unions, because this was the first major union break through the general barrier to a "fourth round" of increases. Other labor leaders are expected to take the cue.

ONTARIO COMPARED
Ontario is about equal in size to the combined areas of the States of New York, Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New Jersey, Pennsylvania, Ohio, Michigan, Indiana, Illinois and Wisconsin.

DEATHS

BANAHAN—At her home in Kinkora on Sunday, March 5, Mrs. Jerome Banahan, aged 73 years. Funeral Tuesday, March 7, at St. Malachy's Church, Kinkora, for Requiem Mass at 9 o'clock. Interment in the adjoining cemetery.

MACKIE—At the Prince Edward Island Hospital at an early hour Saturday morning, March 4th, 1950. Mrs. Harold Mackie, Keppoch. The funeral took place from the MacLean Funeral Home on Sunday, March 5th. Interment was in the family plot, People's Cemetery.

CONDON—At the Charlottetown Hospital on Saturday, March 4, William Condon in his 80th year. His remains are resting at the home of his son, Louis Condon, 82 Weymouth St., City, from where the funeral will take place on Tuesday morning at 9:45 to St. Dunstan's Basilica. Interment in the Catholic Cemetery.

MITCH—At Rocky Point on Saturday, March 4, Mrs. William Mitch in her 76th year. Funeral tomorrow (Tuesday) with a short service at the residence at 2 o'clock, then to New Dominion Church for service at 3 o'clock. Interment New Dominion Cemetery.

HAUGHEY—Suddenly in Charlottetown on March 3rd, Anthony Haughey in his 58th year. His remains are resting at his late residence, 64 Dorchester Street, from where the funeral will take place Tuesday morning at 8:50 to St. Dunstan's Basilica for Requiem High Mass. Burial in the Roman Catholic Cemetery.

WHEATLEY—At the P. E. I. Hospital, March 4, Mrs. George Wheatley of 332 Euston Street. Her remains are resting at the Cutcliffe Funeral Home where funeral services will be held this afternoon; service will start at 7:30. The interment in Sherwood Cemetery.

LANE—At her home in Mount Melick, March 5th, Mrs. Samuel Lane in her 69th year. Funeral from her late residence Tuesday, service at the home at 2 p.m. Interment in Pownal Cemetery.

Seeking Maritime Seed

"Today the Ontario growers are looking to the Maritime Provinces for their seed supply," Dr. Clark says. One group has been offered two different top grades of Laurentian seed from New Brunswick at \$1.40 per pound. Tests have shown that large seed gives a more uniform and larger yield of table turnips than smaller seed. To secure these results, some growers are sifting out 10 per cent of the seed received, and sowing only the larger seed. These growers are willing to pay well for what they want, and suggested they would pay up to \$2.50 per pound for large seed of Laurentian treated with Semesan. They would like to place orders one or more years ahead, if they could get seed according to their specifications.

No Storage Warehouses

Dr. Clark found that storage warehouses for holding turnips were not located in the United States. Many shippers, wholesale and retail dealers and warehouse men at the terminal markets in Buffalo, Boston and Charleston were contacted. They buy to meet their requirements, and want supplies at regular intervals as ordered.

"There was a general complaint," he adds, "that they did not get car lots from Prince Edward Island at intervals as ordered. They ordered cars for delivery at certain dates. Frequently the cars were delayed, then two or more cars would arrive at the same time.

"The same condition was reported in Ontario. A Toronto shipper had an order from Florida for a car of Prince Edward Island turnips. He had a car on the way to Ontario from Prince Edward Island and sold it to his Florida customer, reshipping it on its arrival in Ontario. The Florida customer, however, was in a hurry for the turnips, and wired to have another car shipped direct from Prince Edward Island. This was done, but great was his disappointment when both cars arrived by the same train in Florida.

"This shipper claimed that 50 per cent of the cars he had ordered from Prince Edward Island had not arrived on time. He had two waxing plants, with a capacity of about two cars per day. He thought better shipping arrangements should be made. A storage and waxing plant at Aris, Ontario,

CRASWELL for Photographs.

HEAR W. Chester S. McLure from Parliament Hill over CFCY at 8:45 p.m. March 7.

HEAR W. Chester S. McLure from Parliament Hill over CFCY at 8:45 p.m. March 7.

EDUCATION WEEK BROADCAST—Hear The Honourable F. A. Large over CFCY to-day at 12:00 o'clock noon.

CHARLOTTETOWN Credit Union office open for business every Monday, 5:00 p.m. to 8:00 p.m.

THE ANNUAL MEETING of the Charlottetown Women's Liberal Club will be held in the Legion building Tuesday, March 7 at 3 p.m. All friends welcome. Speakers Hon. Walter Darby and Hon. F. A. Large.

NAMES OMITTED—The names of 20 surviving sisters of Mr. Anthony Haughey who died Friday night, were inadvertently omitted in Saturday's issue. The two sisters are Mrs. James McKenna and Mrs. Howard Molyneux, Charlottetown.

OMITTED—The following was omitted from the Bedeque "World Day of Prayer" Service. Misses George Doull and Pauline Johnson, members of the C. G. I. T. group, received the offering, which was dedicated by the leader.

SERVICE STATION DAMAGED—City firemen were called out about 7:30 last night to a fire at Murphy's service station, corner of Euston and Upper Queen Streets. The blaze was confined to the building and considerable damage was done to the interior.

COLD SNAP EASES—Last week's cold snap eased up Saturday and moved out of the picture yesterday as the weather took a turn for the warmer. The thermometer reached 14 below Saturday morning at 7:30 and then started its upward climb to read four above at noon. At 5:30 Saturday evening it was ten above.

FUNERAL SATURDAY—The funeral of the late John J. Beaton of 12 Upper Queen Street was held Saturday afternoon from the Cutcliffe Funeral Home. The service at the home and grave was conducted by Rev. J. T. Ibbott assisted by the Rev. Harvey Bishop. Pallbearers were Stephen Thorne, Lester Beaton, Gordon Maitlow, William Dinkel, Jack MacRae and Ralph Jackson. Interment was in the People's Cemetery.

REPORT SUGGESTS
Continued from page 1

Ontario were seen in Boston, but Prince Edward Island and New Brunswick turnips were in greatest demand. With careful grading, this market should be held.

"There does not seem to be any reason why culls, oversize or wrong roots should ever be permitted to leave Prince Edward Island and reach this market," the report adds.

Turnip Pests

The growers and shippers of table turnips in Western Ontario and the wholesale and retail dealers in Buffalo and Boston that were contacted seemed well satisfied with the regulations and standards set by the Dominion

PRISON EDUCATION

The adult education scheme for prisons was instituted in Britain in 1928 and provides libraries, periodical lectures, debates, and concerts of good music.

Department. There was objection to overtrimming when it was used to remove surface blemishes before waxing. The turnip (cabbage) root maggots, *Hylemya brassicae* (Bouche) and *Hylemya floralis* (Fall), the most serious pests of turnips, were responsible for most of the rejections of shipments in 1948.

There appears at present to be no effective, cheap and safe means of control of these pests. Dr. Clark notes that "at a conference of entomologists in Baltimore in the autumn, the head of the Charlottetown Entomology Laboratory was surprised to learn that our laboratory had made more progress than any other in this work. This was confirmed by the officers in Ottawa, Toronto and Guelph."

Dust Of Doom

Map illustrates theory of Harrison S. Brown, atomic scientist of the University of Chicago, who recently described how radioactivity from hydrogen bomb blasts could be made to kill every living thing in an area 3000 miles wide and 1500 miles deep. A series of H-bomb explosions, along a north-south line at about the longitude of Prague, Czechoslovakia, would produce great clouds of radioactive dust. These would be carried eastward by prevailing winds, destroying all life from Leningrad to Odesa and from Prague to the Ural mountains, he said. Taking about three days to reach the Ural, the deadly cloud would begin losing in tens and by the time it crossed the Pacific to the west coast of North America, it would be harm less. Brown pointed out that the process could be reversed. H-bombs set off along a north-south line in the Pacific, 1000 miles west of California, would produce a radioactive cloud that would hit California in about a day and New York in four or five days, as shown on inset map.

Abandon Search For Missing Plane

EDMONTON, March 5 — (CP) — Concentrated search for a U. S. army transport, missing since Jan. 28 with 44 aboard has been discontinued but the R. C. A. F.'s Search and Rescue Division will continue to check any new leads. The plane disappeared after making a routine radio report to the weather station at Spang, Yukon Territory, 1,300 miles northwest of here, and the greatest aerial search in Canadian history was carried out, centred at Whitehorse, Y. T.

Canadian Tourists Spend Money Too

OTTAWA, March 5 — (CP) — Tourists spent a record \$288,000,000 in Canada in 1949 but Canadians went on a record travelling spree of their own. The Bureau of Statistics said Saturday the \$288,000,000 spent by tourists in 1949 was \$8,000,000 above the 1948 total. Canadians spent \$191,000,000 in other countries, chiefly the U. S. or \$57,000,000 more than in 1948.

Is Transferred To Bank In St. John

TORONTO, March 5 — Red Cross blood today flows in the veins of more than 100,000 Canadian civilians who have been transfused with free blood or blood plasma since the beginning of the national Blood Transfusion Service in 1947.

More than 173,000 Canadians, in this peacetime period, have given one or more donations of their own blood that their friends and neighbours and strangers they have never seen might have a better chance for life.

This is the "heartening record of the Canadian Red Cross Society's Blood Transfusion Service," announced today by Dr. W. S. Stanbury, national director, in the second week of the Society's annual appeal for \$5,000,000.

Canada's Governor-General has characterized this service, now operating in eight provinces and soon to be extended, as "one of the greatest health ventures ever undertaken by a voluntary organization."

In the first 10 months of 1949 alone, 50,000 patients in Canadian hospitals received free transfusions of whole blood or plasma, Dr. Stanbury said.

"The Red Cross Rh ante-natal investigation service is greatly appreciated by the medical profession, judging from the increased use of Rh clinical tests and the number of requests from physicians for consultative advice from Red Cross medical officers."

Another advantage of blood transfusion therapy, he pointed out, is that it shortens the period of hospitalization, increasing hospital capacity and reducing the cost of hospital care.

The service, first begun in British Columbia and Alberta in 1947, now operates in Nova Scotia, Prince Edward Island, New Brunswick, Manitoba and portions of Ontario and Quebec.

For maintaining and expanding this life-giving service, Red Cross has budgeted for \$1,831,603 of its \$5,000,000 campaign in 1950.

WINS REPORTING AWARD

WASHINGTON, March 5 — (AP) — Jack Steele of the New York Herald Tribune Saturday was named winner of the Raymond Clapper Memorial Award for distinguished Washington reporting. The \$500 cash award, made annually in memory of Raymond Clapper, noted correspondent killed during the Second World War, was given to Steele for his series of stories on "Five Per Centers" — people who purportedly use their influence to obtain government contracts.

Death Of Mrs. Harold Mackie

There passed away in the Prince Edward Island Hospital at an early hour Saturday morning March 4th, 1950, Mrs. Harold Mackie, Keppoch, after a lengthy illness.

She leaves to mourn her passing, her husband and two little daughters, Joyce and Bonny. Also surviving are her father and stepmother, Mr. and Mrs. Ewen Cameron, Charlottetown, and one brother, Robby, of Halifax, N.S.

The funeral took place from the MacLean Funeral Home on Sunday, March 5th. Services at the Funeral Home and at the grave were conducted by Rev. Mr. Somers and Rev. Mr. Ashford. Interment was in the People's Cemetery.

The pallbearers were as follows: Hugh MacKay, Allison Tate, Dr. Trevor Wray, Walter Gill, Bruce MacLean, Joseph Hayley.

Mary beautiful flowers testified to the esteem in which the deceased was held by relatives and friends.

Serious Handicap

"This is a problem to be taken up with the transportation companies. At present it is a real handicap to our Island shippers."

The plant at Aris was the largest storage plant visited by Dr. Clark in the course of his investigations. Electric motors were used for transporting the roots from the basement to the waxing plant and other stories. The turnips were regraded, trimmed, washed and dried before being waxed and bagged for shipment.

Noting a growing demand for Canadian Swede turnips (rutabagas) in the Atlantic and South-eastern States, Dr. Clark says there may be an opportunity for warehousing turnips at Newark, N. J., Norfolk, Va., Charleston, South Carolina, or Jacksonville, Florida. Shipment by water to these points should reduce transportation charges.

Canadian Tourists Spend Money Too

Teachers' Federation Executive Meets

The finalizing of plans for the Teachers' Federation Easter convention was the main business of the teachers' executive meeting in the Federation office on Saturday, March 4.

Reporting for the Easter convention program committee, Miss Vera Simpson, chairman, indicated that instruction groups will be conducted in methods, literature, remedial work, a day in a rural school, arithmetic, and federation business. Inspector Silver of Halifax County will instruct in music at several periods during the convention. The general secretary of the Canadian Teachers' Federation, George Croskery, and Dr. Coady of St. Francis Xavier University will be guests of the teachers.

Federation fees were discussed at some length, and Mr. Claude Wood, chairman of the finance committee, will be asked to lead a discussion relative to the fee situation.

The general secretary reported that the way matters stand, at present it looks fairly hopeful that a Summer School for teachers will be conducted this coming summer, 1950. The type has not yet been decided upon.

At a recent conference with President MacKinnon of P. W. C., the general secretary indicated the support of the teachers to assist the College in securing information relative to former students of the institution. The general secretary also reported to the executive that all teachers of the Island are given a most cordial invitation to the Memorial Lecture for Dr. S. N. Robertson on the evening of March 22, in Prince of Wales College.

On behalf of the pension commissioners, a report was given dealing with the recent meeting of the pension commission.

Editor of the Educational Horizon, Mr. Millar MacFadyen, was given the responsibility of arranging for the month of March a meeting with the executives of Farmers' Federation, Legion, and the Women's Institutes. At this meeting it is planned to discuss informally the various fields of education in P. E. I.

The executive decided to ask the board of governors to consider setting up a committee to make a thorough study of the several professional acts of incorporation, so as to improve in any way possible our constitution.

In conclusion, the general secretary gave an outline of the agenda for the meeting in Montreal on March 18 of all teachers' general secretaries east of Manitoba. There will be dealt with such matters as the C. T. F. and the Provincial associations; professional status of teachers; financial support of education; trends in teacher education; miscellaneous matters as time permits, pensions, magazines, etc.

QUEEN SQUARE SCHOOL

Honor Roll for month of February.

Grade X.—1, Clifford Gillis; 2, Richard Carroll; 3, Edward Mullins and Charles Weatherbe.

Grade IX.—1, Joseph Revell; 2, Billy MacDonnell; 3, Leo Doherty.

Grade VIII.—(Mr. Callaghan's Dept.)—1, Norman Kane; 2, Eugene Wynne; 3, Kenneth MacDonnell.
