A shediac correspondent of the Moncton *Transcript* writes: "A large coal field has been found upon the farm of the late B. C. The seam was two inches thick at the bank, and 18 inches at the distance of twelve feet."

By looking at the quotations of the Virginia tobacco markets, it will be found that the highest price paid for 'fillers'—which is the tobacco which forms the body of the plug—very closely corresponds with the invoiced price of tobacco leaf imported into Ontario As over four-fifths of all the leaf imported into the province is for "Myrtle Navy" stock, this fact is official proof of the claim that the "Myrtle Navy" is made of the finest Virginia leaf.

Launched.—There was launched at Souris, on Saturday last, a very fine two-topmast schooner of 80 tons register, named the "General Middleton," and belonging to the enterprising firm of Messrs. McDonald, McDonald & Co. The Middleton was built under the superintendence of Mr. William Chaisson, of Rollo Bay, who is well known to be one of the most capable shipwrights in the Province. This handsome schooner, under command of Capt. Bernard McIsaac, is going into the Bay on a seining trip. We congratulate the builder upon his skill and handiwork, and trust that the crew of this new seiner may be successful in capturing mackerel as was her gallant namesake in capturing redskins.

Texas must be a nice place to live in. A week or two ago a number of frisky citizens entered, uninvited, the house of a wealthy Mexican, who was entertaining a number of his fellow-countrymen at a banquet. They mingled with the gay and festive revellers, and attempted to take possession of the house, entertainment and wine cellar. A mild remonstrance from the host resulted in the besieging party drawing their revolvers and filling the air with gunpowder and the cries of dismayed women. The Mexicans not unnaturally took umbrage at this treatment. They were willing to yield anything reasonable but drew the line at being shot. As a result of the discussion about half-a-dozen bodies were perforated and the doctors declare there will be at least four funerals.

"An ounce of prevention worth a pound o cure" is an old adage but true. In view of predictions that this country is liable to be visited by more than an ordinary amount of contagious disease this year, it behoves all to inquire about and practice every sanitary measure, especially cleanliness, which as a preventive, offers some one means of escape at least; and in this how important the article of Soap as to quality fit for use; certainly all inferior grades made so by foreign substances and adulterations of a questionable charactar, should be rejected, that there may be no taint left on the person or clothes which might in any way invite the germs of these various diseases. A first-class article, made by known reliable manufacturers, is the only kind that can be safely used or recommended. In the use of a standard soap, like the "Welcome," made by Curtis, Davis & Co., there can be no risk, being the goods of a firm whose name on soap is a sufficient guarantee of its purity.

WOODILL'S GERMAN BAKING POWDER,

F. L Bartlett, State Chemist of Maine, says of a Baking Powder (sold only in tins) now being pushed into this city:—

It contains *one ingredient* that should not enter into the composition of any Baking Powder, namely, Carbonate of Ammonia, (A POISONOUS CHEMICAL) This is a strong Alkali, *unfit for human consumption*, and I am surprised that this *chemical* should be used when it is so well known to be *injurious to health, in anything* used for food.

Ask your grocer for WOODILL'S GERMAN BAKING POWDER, in paper or in tins 8 cents; quarter and half pounds.
