

THE DAILY EXAMINER

JULY 10, 1895.

THE BRITISH ELECTIONS.

The dissolution of Parliament was sudden, and the contest will be short. Most of the provincial elections will take place on Saturday next, and the elections in London on Monday.

There are nine members of the Salisbury family or their marital connections in the new British administration. Mr. Clans Spreckels, the great sugar king, is reported to be about starting a beet sugar enterprise at Edmonton.

The Duke of Aosta and his Duchess are in Rome, to which place they were warmly welcomed on Saturday, the streets through which they passed being profusely decorated.

That in the opinion of this House the manufacture, importation and sale of intoxicating liquors in Canada, except for medicinal purposes, should be prohibited by law.

PROHIBITION IN PARLIAMENT.

The Temple, of the 6th inst., publishes full lists of the test vote recently taken on prohibition. The resolution of Mr. Flint, of Yarmouth, read:

That in the opinion of this House the manufacture, importation and sale of intoxicating liquors in Canada, except for medicinal purposes, should be prohibited by law.

Mr. Guillet's amendment was as follows: "That whereas there is now before the Judicial Committee of the Imperial Privy Council an appeal against the decision of the Supreme Court of Canada on the jurisdiction of provincial legislation prohibiting the manufacture and sale of intoxicating liquors, the further consideration of this question be deferred until this appeal shall have been decided and the report of the Judicial Committee shall have been received."

Commenting upon the vote, the Templar says: "Our readers will clearly understand that those who voted for Guillet's amendment voted against prohibition, and negative Flint's resolution. This division showed 68 for and 57 against, defeating the prohibition resolution by only eleven votes."

Among those who voted for the amendment were Mr. L. H. Davies, of Queen's, P. E. Island, Messrs. McDonald, of Kings, and Perry and Yeo, of Prince, voted against the amendment; Mr. McLean was absent at Souris when the vote was taken, and Mr. Welsh shirked the vote. It is noted by the Templar that "the Dominion plebiscite out to figure in the debate. It was not proposed as an amendment, or even referred to. It was as dead as the Royal Commission."

NOTES AND COMMENTS. "The ministerial crisis has not yet materialized. It is stated that the United States cruiser Columbia will go for repairs to the Halifax dock."

There is trouble ahead. A Patron-Prohibition candidate, Mr. T. R. Marberry, has been brought out to oppose Sir Richard Cartwright in South Oxford. Look out for squalls.

The Canada Presbyterian thinks it should be easy to get common ground on which sensible, reasonable people would find means or materials for religious instruction in the common school.

In the House of Commons a few days ago on the vote for the national art gallery Mr. Davies said he had been inspecting the works of art recently and did not notice any additions since last year. He hoped the government would encourage Canadian artists by purchasing their works and treated that before long that a special building would be erected in Ottawa for the purpose of a national gallery.

St. John Sun: It will be observed that despite the neighborhood of the crisis, the House of Commons found sufficient composure to discuss the Thousand Island park, and to debate such matters as bills for the incorporation of railway companies. Our old friend, the crisis, has lost its terrors for members who are continually hearing about him, but who never see any ghastly results from his presence.

Ottawa Citizen: It would surely become a patriotic Government of Manitoba to accept the announcement made by Mr. Quimet in the Citizen a few days ago and set upon it. Mr. Quimet says that all that Catholics desire "is to be at liberty to add to the secular education required in the public schools such religious teaching as will meet their views." Nothing could be more reasonable and more moderate, and Mr. Joseph Martin has declared that in his opinion the people of Manitoba would willingly grant such an arrangement. There is here the ground prepared for a simple and easy compromise. All that is required is the eschewing of heat and passion and the prevalence of good-will.

Nearly 4,500 head is a goodly showing for the export trade in horses from the one port of Montreal up to the end of June. The London correspondent of the Montreal Trade Bulletin points out that the British market for Canadian horses is a growing one, and that there is a good demand there for animals suitable for medium to rough work, and that will sell from \$125 to \$150. He adds that care should be taken in shipping, as it is possible to lose from \$15 to \$20 on a horse on the voyage.

Still a few of those cheap parrots left. Better call now and secure yours.—Moore & McLeod.

Crowds of people are daily taking advantage of the big discount sale going on at D. A. Bruce's. 25 to 40 per cent discount July 9-31.

White vests and summer coats and vests very cheap at Prowse Bros.

LETTERS TO THE EDITOR.

THE HORN FLY.

Sir,—This fly is now causing much loss to farmers. It is generally known as the "Horn fly," from its habit of resting in large numbers upon the horns of cattle. It is also for some unaccountable reason often referred to as the "Texas fly." This is only the fourth year since it first appeared in Canada, but it has increased and spread so quickly that it has produced great consternation among cattle owners. The frequent assertion that the flies or maggots have caused the death of cattle by boring into the horns, head or body, is entirely inaccurate; the whole injury is due to the bites of the fly; however, the irritation from this cause in many cases so great that animals fall off rapidly in flesh and loss of milk.

The life history is briefly as follows: The mature flies appear early in spring and lay their eggs upon the fresh droppings of cattle. These soon hatch, and the maggots live in the dung while it is in a moist condition. Then they turn to the pupa state, and the flies again appear within two or three weeks from the time the eggs were laid. There can thus be several broods in a season.

REMEDIES. Almost any greasy substance rubbed on the animals will keep the flies away for several days. A number of experiments were tried in the field, with the result that train-oil, kerosene, and turpentine, with a little sulphur, oil of tar or carbolic acid added, will keep the flies away for from five to six days, while with a small proportion of carbolic acid it will have a lasting effect upon any insect which may be formed. Kerosene, kerosene, kerosene, and any such greasy substance can be used to advantage, but train-oil or fish-oil seem to be more lasting in their effects than any other experiment made. An effective and the easiest remedy to apply, if a small spray pump be used, is the Kerosene emulsion, which consists of the following: Kerosene (coal oil) 2 quarts; rain water, 1 quart; common household soap, 2 cents. Boil the soap in the water till it is dissolved; then while boiling turn it into the coal oil, and churn it constantly and forcibly with a spring or force pump for five minutes, when it will be of a smooth, creamy nature. If the emulsion be perfect it will adhere to the surface of glass without oiliness. As it cools it thickens into a jelly-like mass. This gives the stock emulsion, which must be diluted before using with one times its measure that is, twenty-seven quarts of water. It will be found to mix much more easily if done at once, before it cools. The above proportions give three quarts of the stock emulsion, which will treat seven quarts of water and make up twenty quarts of the mixture ready for use. This may be applied to the animals either by means of a sponge, or what will certainly be found most convenient where there are many animals to treat, by means of a force pump and spray nozzle. The emulsion thus made and sprayed over the cattle kills all the flies it reaches, and if repeated twice a week will almost entirely free cattle from annoyance. Another method of diluting the coal oil is to make the emulsion with milk instead of soap and water. Take sour milk, one part; coal oil, two parts. Mix the two thoroughly, as described above, for the soap emulsion. Then dilute with water, so that one part in ten will be coal oil.

A good way to fight this pest will doubtless be to prevent it from breeding and increasing. As stated above, the maggots can live only in the moist droppings of cattle. Any means, therefore, which will ensure the drying up of these before they are full grown, will destroy them. This can be done most easily by spreading the dung on the pasture regularly and at short intervals. Twice a week would be sufficient, and it would be equally effective in wet weather when the substance would be washed away, as in hot weather, when it would be dried up.

Where the flies gather in large numbers on the ceilings and walls of stables in cool weather, or when driven from the cattle by applications, they can be destroyed either by spraying them with the Kerosene emulsion, or by means of a strong solution of Pyrethrum Insect Powder. Dusting them with dry Pyrethrum powder by means of an "insect gun" would also be effective.

Hopeing that the above will be of service to your readers, believe me to be Yours very truly, J. FLETCHER, Entomologist and Botanist, Dominion Experimental Farm.

SUPREME COURT.

WE WEDNESDAY, July 10. The Queen vs. Donald McPherson.—Indictment for housebreaking in law. This case has been before the Court all day and was given to the jury about 3 o'clock this afternoon.

Attorney General for Crown; Stewart, Q. C., for the prisoner.

The casket that Nasrulla Khan presented to the Queen from the Amir of Afghanistan is a marvel of art. It is 18 inches long, by 15 inches high, and is cut from a block of lapis lazuli, and is encrusted with large diamonds, rubies and emeralds. From the four top corners spring stars containing 612 diamonds. The value of the casket is \$47,000. The Queen in return sent a gold plate service and other presents of equal value. Nasrulla Khan will leave England on July 15th.

Most of the United States papers now date their new correspondence about China and Japan via Victoria, B. C. This is a gratifying tribute to Canadian pride, because the average American is apt to ask, Can any good thing come out of Canada? Perhaps the tribute has its drawbacks, however, as the Japanese news in question occasionally rivals the achievements of the late lamented Baron Munchausen.

One of the few extant manuscript copies of Wycliffe's Bible, illuminated on vellum, was sold at Sotheby's last week for \$1150, which is said to be a record price.

The Queen and Prince of Wales warmly welcomed the International Railway Convention delegates to Windsor Castle on Saturday, and a garden party was given in their honor.

Both London and Paris are deluged over with Americans. The occupation of two of the old world capitals by friendly New York invaders never before took place in such imposing force.

Germany's right to levy tolls on all vessels passing through the Kaiser Wilhelm canal forms the subject of diplomatic correspondence upon the part of Great Britain, Russia, Denmark, Sweden and Norway.

Tired women need to have their blood purified and enriched by Hood's Sarsaparilla. It will give them strength and health.

Hot weather underclothing from 45c a suit up at Prowse Bros. Straw hats at cost to clear. Don't pass the Wonderful Cheap Store for children's clothing.

PARLIAMENT OF CANADA.

Question of the Ministers' Resignation. No Resignation Received by the Governor General. Confidence Voted in the Government.

OTTAWA, July 10. On the orders of the day being called yesterday in the House of Commons, Mr. Laurier rose and said: "I now renew the question which I put last evening with regard to the resignation of certain members of the administration."

Mr. Foster replied: "All I can say to the House is this, that I have not any authority from the Governor-General to make a statement other than this, that no resignations have as yet been received by him."

Mr. Laurier then spoke for some time, making a motion that the House adjourn. He was replied to by Mr. Foster, who stated that Mr. Laurier had made a grave charge, and followed that up by a serious motion on a mere rumor. He closed as follows: "In due course of time I shall be able to make another statement to the House, and when I make that statement I shall be in a position to say whether, possessing his soul in patience in the meantime, to accept the situation as he has so often had to do on previous occasions."

Sir Hector Langevin also spoke. He said: "For my part, I am not disposed on a motion to adjourn the House to vote want of confidence in the Government which I have supported since the beginning of the session. If the Leader of the House comes down with his statement about those vacant seats, and gives a reason why they are vacant that is not acceptable, I am not the man to say 'yes' to the Government under such circumstances. If we vote of non-confidence it is then required, of course I shall give it. But I certainly shall not support the motion made by the hon. Leader of the Opposition (Conservative cheer) The House divided on Laurier's motion to adjourn, and it was negatived by 111 to 72. Mr. Lepine, member for Montreal East, was the only Conservative who voted against the Government."

SCOTTISH GATHERING.

The Great Annual Scottish Gathering of the Clans of P. E. Island, under the auspices of the Canadian Club, will be held at Charlottetown on WEDNESDAY, July 31st, 1895, on the Driving Park and Exhibition Grounds, commencing at 11 o'clock, sharp.

TRAIN ARRANGEMENTS.

(Standard Time). A Special Train will leave Summerside at 7:15 a. m., Emerald 7:40 a. m., Free-town 7:55 a. m., Emerald 8:15 a. m., Bradalbane 8:31 a. m., Hunter River 8:45 a. m., North Wilshire 8:55 a. m., Royal Junction, 9:30 a. m., arrive at Charlottetown at 9:45 a. m. Returning, will leave Charlottetown at 5:15 p. m.

The following regular trains will leave as follows:—Leave Cape Traverse at 7:25 a. m., and connect with special at Emerald, returning, will leave Emerald at 8:50 p. m. Leave Souris for Charlottetown at 6:15 a. m.; returning, will leave Charlottetown at 5 p. m. Leave Georgetown for Charlottetown at 7 a. m.; returning, will leave Charlottetown at 5 p. m.
