Potato Bulletin Warns Of Danger Now Of Late Blight

"In last week's bulletin we advised that there should be no relaxation in the late blight spray schedule, and the weather conditions—since recorded at Charlottetown have shown the value of this warning, the Weekly Potato Bulletin for P.E.I. and N.S. said Monday. "The humidity rose to the danger point at 6 p.m. on Saturday, August 16, and at the time of writing (Monday, 10 a.m.) it is still high. Rain began to fall late Saturday night and showers occurred through Sunday. This rain, and the high humidity have kept the foliage wet. Consequently the fungus is now fruiting and considerable spread may be expected in fields where inadequate spraying has been given. "The second brood of potato flea beetles which usually appears early in August has not shown up yet. This is probably due to the dry weather however they may start coming after the rain over the week-end. Aphids are still increasing in many potato fields. Malathion if applied properly and at the recommended rate should give good control. Reports have come in that Malathion was not giving a satisfactory control of aphids but on investigation it was found that they were using much less than the recommended rate. Malathion emulsifiable liquid should be used at the rate of 1 pint per acre; 25 per cent wettable powder 2-2 1/2 lbs. per acre or 4 per cent dust 30-40 lbs. per acre. "The Bulletin is prepared by F. M. Cannon, Crop Insect Section and L. C. Calbeck, Plant Pathology Section of the Science Service Laboratory in Charlottetown.

Contract Is Let For New Arena At St. Dunstan's

The contract for the construction of the new St. Dunstan's University Arena has been awarded to County Construction Company. The announcement came from the office of Rev. Edmund Roche of St. Dunstan's yesterday. Father Roche said that the construction of the new ice plant was to offset the inadequacies that the present day structure offers. Included in these inadequacies are the lack of natural ice from mid-November to Christmas and during the months of March and April and the ever increasing student enrollment at the university. Dismantling of the old rink will get underway immediately. Some of the material will be used in the new building but the major portion will be sold to interested parties. The new arena will be built on the present site and will have an overall length of 217 feet with a 107 foot width. The artificially frozen ice surface will be 190' x 85' with seating capacity for 1,200. The usual dressing room facilities will be at one end of the building. A balcony at the same end will also be used to handle spectator interests. The arena, a standard pattern steel-framed structure designed by Atkinson Buildings Limited of Toronto, is used extensively throughout Canada. The walls are concrete blocks with a galvanized steel roof. With work getting underway immediately, University officials are hopeful that the building will be completed by mid-November. The facilities are expected to be put into use by the first of December.

Tito Asks U.S. For Huge Loan

BELGRADE (Reuters)—President Tito has asked the United States for a new long-term industrial loan of more than \$300,000,000, officials said Monday. They expressed confidence there would be an affirmative reply from Washington within 60 days for at least part of the amount. Russia suspended a long-term loan worth \$285,000,000 in May during a dispute with Tito over his "separate road" to communism. The request for credits, now under consideration in Washington, the informants said, totals between \$300,000,000 and \$350,000,000. Additional cash also is being sought in Western Europe to finance industrial projects. Some of the schemes were included in the Soviet agreement. Others are new. Yugoslavia is also angling for military spare parts from the United States. They are needed for equipment provided before Tito renounced U.S. military aid last December. ENVOYS SEEKING PARTS A Yugoslav Army purchasing mission is in Washington negotiating long-term loans for the parts. There is speculation that Tito eventually may request some form of military aid, especially if his relations with the Soviet bloc deteriorate further. Informants said the outlook is good for receiving loans on three major projects: 1. Construction of an artificial fertilizer factory near Belgrade with an annual capacity of 100,000 tons. Russia's loan was intended to include such a factory. 2. A power station, one of a network that eventually may enable Yugoslavia to export 5,000,000 kilowatt hours of electricity annually. 3. New rolling stock to modernize the railroad. TWO BILLION FOR TITO Since Tito's first break with the Kremlin in 1948, Western aid to Yugoslavia is estimated at about \$2,000,000,000. The United States contributed the lion's share but Britain and France helped. Diplomats here believe France, Italy and West Germany may make small loans to Yugoslavia. It was learned that a general approach was made to Britain last week for equipment. Financial aid from the British government, however, is considered doubtful.

Extend Repayment Period For Federal Loan To Dosco

OTTAWA (CP)—The Commons Monday night unanimously approved a bill extending the repayment period for a \$7,500,000 federal loan to Dominion Coal Company Limited of Sydney, N.S. Mines Minister Comtois said the company has missed making the last two payments, one due Dec. 31, 1957, and the other June 30, 1958. Because the mechanization program for which the loan was granted was running behind schedule, the government had decided to extend the repayment period. The company started repaying the loan in 1955 and had repaid about \$1,200,000. Original interest rate was 3 1/2 per cent but under the loan extension it would be raised to four and repaid within 15 years. H. J. Robichaud (L.-Gloucester) asked whether the company's default of its payments was a result of the fact it has a large stockpile of coal on hand—about 1,400,000 tons on which federal aid in carrying the storage costs also was being paid. COULDN'T SELL COAL Mr. Comtois said that was so. The 1,400,000 tons of coal had been sold, but it could not be delivered for some time. It was expected to be reduced to about 1,250,000 tons by the end of this year. "But wouldn't the stockpile continue to grow?" asked Mr. Robichaud. "Obviously," replied Mr. Comtois, because the company was continuing to extract coal. The minister said efficiency in the company's operations is expected to increase to about 90 per cent from 50 to 60 as a result of the mechanization program. Mr. Robichaud said he had heard this would result in a rise in production to about 7,000,000 tons a year. What were the prospects of disposing of this? Mr. Comtois said the company has told the government it expects to increase its sales "considerably" in future.

Moderator Speaks At Youth Assembly

Guest speaker Rt. Rev. J. S. Thompson, M. A., LL. D., F.R.S.C., (left) being introduced by His Worship Mayor Edwin C. Johnson, chairman at the Rotary Civic luncheon for the International Youth Assembly at the Charlottetown Hotel yesterday.

Potato Conference Delegates See Five New Spud Varieties

FREDERICTON (CP)—Delegates to the second Canadian potato industry conference here toured Southern New Brunswick Monday, visiting the Saint John area and Fundy National Park. The conference opens today. (Tuesday). The Fundy Park program included a luncheon, visit to the national potato breeding unit at Alma and a buffet supper. Delegates then returned to the University of New Brunswick in preparation for the conference. Directing the tour was Scott F. Clarkson, Fredericton, conference committee secretary. The committee chairman, H.C. Greenlaw of Millville, and William Daman, Winnipeg, president of the Canadian Horticultural Council, accompanied the group. Agriculture Minister C.G. Sherwood and Mayor W.T. Walker will welcome the visitors today. The two-day session will be followed Thursday by a tour of the upper St. John River valley. L.C. Young, director of the project at Fundy Park, described five new varieties of potatoes developed by this project, which was "working on a national scale for all provinces, and for the good of the country as a whole. The potatoes grown at this station are specialized—each grown for a special purpose and area of the country—resistant to diseases in a given locality. We can only keep one step ahead of blight, rot virus, and other diseases because as soon as we breed a potato that is resistant to one race of the disease, another race develops which will kill the plant in a matter of days. At present there are 16 races of the blight organism and this is expected to increase—while there are four factors called genes in potato plants which make them resistant to the disease." Fundy potatoes will be licensed before harvest time this fall and be made available to certified growers. They are early to mid-season in maturity and have the advantage of a smooth tuber and good cooking quality. Avon Variety will also be released to growers this fall, having been developed for the Nova Scotia market for scab resistance and good cooking.

CITY AND CENTRAL

DR. J. C. Gallant's Dental Office will be closed until September 2. MENS ASBESTOS work gloves \$2.39. Moore and MacLeod's basement. PIANO LESSONS given by experienced teacher. Dial 5955 after 5:30 p.m. WE TREAT the sick well, Giggley's Pharmacy open 8:30 a.m. to 8 p.m. BOYS CARDIGAN sweaters, assorted colors, 8 to 12, \$2.99. Moore and MacLeod's basement. Seamen Reject Conciliation Board Report

MONTREAL (CP)—The Seafarers' International Union said Monday the majority of the 3,000 seamen working on the Great Lakes have rejected a conciliation board's recommendations for settling an eight-month-old dispute with nine Great Lakes shipping companies. The SIU publication, The Canadian Sailor, reported the board report was not favored by "a substantial majority" of the lake seamen affected. "In the event of a rejection," the publication said, "the elected SIU negotiating committee would again petition the Canadian minister of labor for further efforts to find a settlement satisfactory to the membership." The Association of Lake Carriers met with the union last Thursday. At that time spokesmen for both groups said "there may, or may not be another meeting."

Changes

(Continued from Page 1) came Rector of the Basilica Parish in 1907 and held the position until his appointment as Rector of St. Dunstan's University in 1915 where he was stationed until his appointment to Tignish parish in 1923. In 1935, following his appointment to Summerside, he was honoured by the Holy Father with the rank of Prothotary Apostolic. ORDAINED IN 1919 Monsignor J. A. Murphy, appointed to the Vicar-Generalship of the Diocese, was ordained in 1919, and after serving on the staff of St. Dunstan's University, was appointed Rector in 1926. After serving in this office for 17 years, he was appointed as Parish Priest at Kinkora in 1943 and in 1946 was transferred to Souris. In 1939 he was honoured by the Holy Father with the rank of Domestic Prelate. Rev. J.P.E. O'Hanley, born at St. Peters Bay, was ordained in 1932 and joined the Staff of St. Dunstan's Basilica from where he was transferred to Summerside in 1934. From 1935 to 1937, he attended Angelicum College in Rome where he obtained his Doctorate in Philosophy. He joined the staff at St. Dunstan's University until 1951 when he was appointed Chaplain of the R.C.A.F., and in 1953 he received his appointment to the parish at Cardigan. Father Corcoran, who was born at St. Theresa's, was ordained in 1950, and has been stationed at St. Dunstan's Basilica. Father E. Steele was ordained in 1953, Father MacDonald and Father MacIntyre in 1956 and Father G. Steele and Father Pendergast in 1958. "won't be inconvenient," an army spokesman said. Absence of hot water until Aug. 31 has been caused by shutdown of the central coal-burning heating plant for inspection of boilers. The shutdown was described by an army spokesman as "normal maintenance."

No Hot Water In Big Camp

OTTAWA (CP)—Troops stationed at Camp Gagetown, N.B., will have to shave and wash in cold water for the next two weeks, it was learned Monday. However, most of the troops are on leave and "too many

THE PROVINCIAL VOCATIONAL SCHOOL, CHARLOTTETOWN

Re-opens September 2, 1958
TRAINING COURSES AVAILABLE
One Year Day Courses are offered in the following:
Automotive Mechanics Home Economics (two month course)
Bricklaying and Plastering Plumbing and Sheet Metal
Carpentry Practical Electricity
Drafting Welding (two four month courses)
Students so desiring may take two year courses in Automotive Mechanics and Plumbing and Sheet Metal. The attention of young women is called to the two month DAY course in Home Economics beginning October 27, 1958. Night courses commencing October 1 are available in the above trades as well as in the following:
Accounting and Bookkeeping Sewing
Cooking Short-hand (Pitman, refresher)
Crocheting, knitting, Smocking Typing
Leatherwork Weaving
Full information on courses may be obtained by writing to, or calling on, the Principal, Provincial Vocational School, Charlottetown, P.E.I., or dial 4647 or 3774.
EDUCATION FOR LIVING

IN MEMORIAM

In Loving Memory of
MRS. LOTTIE J. MacEWEN
who passed away Aug. 18th, 1948.
All her dear and kindly ways
In thoughts are with us still;
For in the hearts of those she loved
She lives, and always will.
Ever remembered and sadly missed by
Edith and Sterling.

British Gunboats To Guard Trawlers In Iceland Waters

LONDON (AP)—Britain reminded Iceland Monday that gunboats will guard British trawlers against interference inside Iceland's new 12-mile fishing limits. A foreign office spokesman said Britain still hopes "for an agreed solution" to the quarrel. Iceland extends to enforce a new law extending her sea limits to 12 miles from four on Sept. 1 and British fishing trawlers, protected by naval vessels, intend to defy the new limits. Iceland's minister of fisheries, Ludvik Josefsson, a Communist, said Sunday the use of force by Britain will be regarded as an armed attack. He expressed the view Britain hardly would take that sort of action against a defenceless state. Iceland wants to preserve her fishing grounds which are used by trawlers of Britain, West Germany, France and Holland. BRITISH POLICY The foreign office spokesman said British policy was set forth June 4 when the government announced: "1. Britain's duty would be to prevent any unlawful attempt to interfere with British fishing vessels on the high seas. One government official reported privately, Britain may yet decide upon a surprise move in an effort to avert the crisis threatened for Sept. 1. The move being considered centres on an undertaking by Iceland in 1955 to take no new action to extend her sea limits pending a full examination of the law of the sea by the United Nations. A UN conference on sea laws broke down in Geneva earlier this year. Immediately afterwards Iceland moved to extend her territorial waters.

Attention Carpenters

Local 1338 will hold their regular monthly meeting at Labour Hall, Queen St., on Wednesday, Aug. 20th at 8 p.m. All members please attend.

Notice To Students

The Province of Prince Edward Island through the Department of Agriculture will grant assistance to students in Agriculture preparing for Degrees of B.Sc. (Agri.), B.Sc. (Home Ec.) and Veterinary Medicine, to not more than eight (8) students, and not more than \$200.00 per year to each under the following conditions:
(1) That the applicant is approved by the Minister of Agriculture;
(2) That the student has completed Grade XII;
(3) That the student is attending a University approved by the Minister of Agriculture;
(4) That the student agrees that the Province of Prince Edward Island has first option on his services for summer holidays, and
(5) That the Province of Prince Edward Island has an option on the services of the student after graduation for one year for each year that the student received the grant.
Interested students should apply immediately to the—
