

Saving Herself and Her Children.

A WOMAN HANGS FROM A TRESTLE WHILE A TRAIN PASSES BY.

BALTIMORE, August 9.—A few miles south of Marlborough is a chasm which is spanned by an open trestle bridge. To the bottom of the chasm at the deepest point is perhaps sixty feet. The railroad approaches this bridge around a sharp curve, and the engineer of a train cannot see the bridge until near it. Yesterday afternoon as the Pope's Creek, south bound passenger train sped round the curve nearing the bridge, the engineer was horrified to see a woman crossing the bridge on the railroad track, carrying in her arm an infant and leading by the hand a child of perhaps three years of age. The engineer at once applied the air brake and blew the danger signal, but he saw it was impossible to stop the train before it reached the point where the woman was. She heard the train approaching, turned and looked at it, saw the horrors of her situation in one quick, intense glance. Below the heavy rains had filled the chasm until it had become a torrent. To jump from the bridge would be to find death in the water; to remain where she was to meet instant death. Several persons who were near the track at the time and who saw her situation, made signs to the engineer to stop, but he was powerless, although he struggled until his sweat stood out in great drops from every pore. Then he rushed forward toward the front of the locomotive with the intention of essaying the daring feat of seizing the woman and dragging her to the cow catcher. At this the woman caught both children in one arm, with the other she firmly seized one of the ties on which the track is laid and swung herself between the ties and below the bridge and the train passed over her. It was so quickly done that the spectators supposed she had jumped from the bridge. As soon as the train could be stopped, conductor C. A. Haverstick and brakeman Honeyman rushed back to the spot where the woman was seen to disappear. They found her clinging to the tie with one arm and holding her two little ones with the other. From this perilous position they were soon rescued, the woman much exhausted, but all of them without a bruise or scratch.

The Small Boy Says His Say.

Said an exasperated Texas father at the dinner table: "You children turn up your noses at everything on the table. When I was a boy I was glad to get enough dry bread to eat." "I say, pa, you are having a much better time of it now you are living with us, ain't you?" remarked little Tommy. --Texas Siftings.

—TO—  
Purchasers of Cotton Warp.

WE find it necessary to call the attention of those who USE COTTON YARN OR WARP to the fact that the yarn made by us is the ONLY REAL

Water-Twist Yarn

Made in the Dominion—no other mill having the machinery on which to make it.  
Our Yarn is, consequently, very much superior for weaving purposes to any other in the market—a fact which is well known to those who have used it for the past TWENTY YEARS.  
All our Yarns have our name upon the label, and none other are genuine.  
For sale by all Wholesale Houses.

New and Original Departure in Coal Cooking Stoves  
COMBINING  
DURABILITY, HEAT AND ECONOMY.

This Cut represents my Patent Fire King Cooking Stove, with the oven, end and lining partially drawn out,

as it appears while being cleaned, or when a new lining is being replaced.

THE ABOVE STOVE I invented and patented in 1876, and at the present time HUNDREDS ARE IN USE, giving perfect satisfaction. A large number have been in constant use for eight years, and the repairs have been very trifling, in many instances none have been required. This valuable experience should be sufficient evidence of their durability, which is accounted for in the following:—It has, instead of a Lined Fire Box, two heavy Curved Cylinders, which obviate the expense connected with all Square Cooking Stoves of being compelled to renew Linings and Grates, at least once or twice every year. The heat being radiated from the Cylinders to the floor, where most needed, overcomes a serious objection to all kinds of ordinary Coal Cooking Stoves. The Cylinders are situated directly under the cover holes, and a fire may be made in one or both, thus adapting it for use either in winter or summer, with equal satisfaction, besides effecting a great saving in fuel. I have also attached the PATENT TELESCOPE OVEN to all my Elevated Oven Wood Stoves, such as the Waterloo, Niagara, Star, &c., causing the thousands using them to exclaim—My Stoves are worth TEN DOLLARS MORE than the same kind made by other foundries. The trade and retail purchasers will please bear in mind the fact that although a great advantage is claimed for my own Oven above all others, they cost no more, and being the sole manufacturer and patentee, no other foundry can supply. Enquire for Fawcett's Patent Telescope Oven, and if your dealer has none on hand send direct to the Sackville Stove Foundry.  
I am adding several new and handsome Patterns this season, which, with my former large variety of One Hundred Different Patterns and Sizes of Cooking, Parlor, Office and Hall Stoves, also Farmers Boilers, Hollowware, Ploughs, Stove Pipes and Tinware, comprise the most complete assortment offered by any manufacturer in the Lower Provinces. Terms and prices will be found as favorable as can be obtained elsewhere.
