He is survived by his wife, the former Mable Lee of Summerside, and by one son.

Aubin Wedge Night Proves Huge Success

"Aubin Wedge night" in O'Leary was a huge success with a large number of hockey fans crowding into the rink to watch a fast and rugged game between the O'Leary Maroons and the Moncton R.C.A.F. Veteran player Aubin, with over twenty years of outstanding performance on the Maroons' lineup, and in whose honour the benefit game was held.

The first period ended 4-0 for O'Leary, W. Harris getting a pair and MacGregor, Rodgerson, Baglione and Schurman singletons, with a large number of penalties being handed out. In a hard fought sandwich session the teams split a pair, G. Bernard tallying for the home team and LeClair for the R.C.A.F. Again in the final frame each side scored a single, Lamotte for the R.C.A.F. and G. Bernard getting his second marker for O'Leary to end the contest 2-2 for the Maroons.

Penalties went to MacGregor, Rodgerson, Burke, MacDonald, Campbell, Deschene, Chamberlain and Schurman. Sixteen-year-old Blair Bernard, subbing for G. Gamble in the O'Leary cage put up a good game.

Referees were L. Dunning and L. Silliker. Lineups: Moncton: Goal: Dion; defence: Deschene, Dupuis, Patterson and Leach; forwards: Campbell, Burke, LeClair, Dennings, Marsh, Chamberlain, King, Furlott, Lamotte. O'Leary: Goal: B. Bernard; defence: Schurman, MacDonald, Rodgerson, W. Harris, V. Bernard, J. Baglione, Alton Silliker, Alty Silliker, A. MacGregor, A. Harris.

In cases where speech is impaired, a speech therapist can do much to help them learn to speak correctly. Then, they must be educated so a teacher is needed, preferably one who has experience with children of this type and last, but not least, they should be under the supervision of a doctor.

men's Institute in here asking for more staff and for a dormitory at Prince of Wales College. This was promised in 1947 but I don't see anything in the budget for it."

That Nova Scotia had established 50 or 60 young men on farms during the past year was noted by Mr. Bell, who went on to say that in Quebec through their farm bureau, \$130,000 was loaned to young men to settle them on farms. Of these loans, which were granted at four per cent interest, \$31,000 has been repaid and the loss to date has been only three cents on \$10,000. Quebec, said Mr. Bell, has become the foremost dairy Province in Canada.

Mr. Bell criticized the Rural Electrification Program. He felt that the cost was too high and that there was little or no supervision of construction lines. "The company puts in a bill and the Government pays for it," he said. "Because of the high cost many people are fearful that they will not be able to get electricity. We still feel that every encouragement should be given young students to enter the teaching profession," said Mr. Bell. "But the salaries are far too small. He said that more emphasis should be placed on getting qualified teachers. Many students are saying, why should I take a Teacher Training course, I can get a permit and teach just the same." Mr. Bell said he would like to see more emphasis placed upon conversational French rather than French grammar. Many students who have been studying French for five or six years are not able to speak a word of it, although they may be able to read or write it fairly well.

Speaking for his own district, the Second District of Queens, Mr. Bell said they were fairly well looked after but that was as it should be since there was more traffic and more money spent on gasoline in that district than in any other. He asked the Minister of Highways to give consideration to a half a mile of highway connecting Rustico with the North Shore road through the Park. He also requested that the curve be taken out of the road at Brookfield since it was not only unsightly but presented a hazard to driving.

Speaking of the Cotton Memorial Nursery, Mr. Bell was pleased to see the progress that had been made. He cautioned farmers about cutting too many pit-props and at the same time asked the Department of Industry and Resources to look into the matter of re-forestation and to investigate the presence of budworm in the province, which he had heard was prevalent in certain sections of the Province. Speaking on trade, Mr. Bell said that a serious situation existed in so far as Newfoundland was concerned. "It is an important market and it has to be dealt with because we need to afford to lose it." He hoped that a renewal of service with that Province would take place when the shipping season opened.

try and think of something that could keep them employed." He stated he was still petitioning the harbor authority to make the harbor suitable for dragger fishing and he thought that the condition of the harbor was a detriment to the development of one of the best fishing centres in the Province.

Continuation—

The leader of the Opposition stated that there were number of conscientious fishermen who wanted to get into the dragger business but they were turned down by the Government when they sought aid. He added that there had been complaints about a fellow coming over from Nova Scotia and getting a loan of \$43,000 while some Island fishermen could not get any assistance. In reply to a question by Mr. William Acorn he stated that this person had bought some land near Souris was not an Islander, but that he had noted that there was a good development in the Souris area. He doubted if the Industrial Development Committee were right in placing more than one loan in the fish meal plants as he did not think there was enough volume for two such plants in the Souris area.

He thought that the erection of a fish meal plant was good business and would prove of great benefit to the farmers as cattle and livestock could thrive on it. "We still feel that every encouragement should be given young students to enter the teaching profession," said Mr. Bell. "But the salaries are far too small. As the debate resumed for the night session Mr. Bell launched into a discussion on the fisheries situation with particular reference to North Rustico. He stated he would like to see a new industrial promotion at North Rustico and that he would like to see the people employed year round. "North Rustico is a hive of activity from May 1 to October 1 but when the fall comes there is nothing to do," he stated. "The people would much sooner work in the States on unemployment funds. They need employment all the time. I have racked my brain year in and year out to find something to do for them."
