RELIGIOUS CELEBRATIONS TO MARK FRENCH ACADIAN BICENTENARY YEAR

—The French Acadians of the four Maritime Provinces, as well as those living in Quebec, in the New England States and Louisiana, plan to observe the bicentenary of their dispersion in the course of 1955. The dispersion took place at Grand Pre in 1755 affecting the Acadians of the mainland; the Prince Edward Island settlers were similarly dispersed three years later when General Wolfe was on his way to Quebec City.

The plans under consideration include observance of the "Bicentenary Year" extending from Aug. 15, 1954 to Aug. 15, 1955. Patriotic rallies are to be held in each Acadian sector — the apothosis of which will be celebrations at Moncton, Memramcook, Grand Pre and Port Royal respectively. The demonstrations planned include Pontifical Masses, pageants, floats, speeches by outstanding orators from Canada the United States, France and England.

The purpose behind these observances, which will be mostly religious in character, are outlined as an expression of thanksgiving to God and to His Holy Mother for the many blessings showered on the Acadian people during the past 200 years, thus underlining the wonderful progress achieved in all fields of social, cultural and religious life.

The central committee of bicentennial observances has these forthcoming commemorations as the greatest patriotic displays ever staged or attempted in the Maritime Provinces.

The chairman of the Island committee is Rev. Fr. J. F. Boute of Mt. Carmel, and the treasurer is Rev. Fr. O. Gallant, Egmont Bay.

THRILLING WESTERN AT CAPITOL, SUMMERSIDE Warner Bros.' "Riding Shotgun" reportedly a western action film with an unusual suspense twist, now at the Capitol Theatre starring Randolph Scott, with Joan Weldon and Wayne Morris co-starring. Filmed in Warner Color, the screenplay is said to emphasize action and thrills as Randolph Scott holds an entire town at bay with his guns.

"Riding Shotgun" shows Scott in the role of a stagecoach guard who rides alongside the driver to protect the passengers and cargo from the attack of bandits. During one such robbery, Scott is suspected of complicity in the crime and angry residents of the town of Deepwater form into an hysterical mob. Scott's friends are unable to help him as the mob becomes uncontrollable, and it remains for him to defend himself until the real criminals are captured. How Scott manages to protect himself during these dangerous minutes will, it is said, provide outdoor fans with many action-filled thrills.

Wayne Morris is seen in the role of Tub Murphy, unhappy deputy sheriff who calms his nerves by overeating. The role is a dramatic characterization rather than comic one since it is Tub Murphy who is responsible for stopping the angry lynch mob.

There are three kinds of dikes in Holland, the National Geographic Society says. Big ones standing in the sea, the "watchers," fend off the first assaults of the waves. If they crumble, the "sleepers" behind take over. Finally come the "dreamers," last-resort defenders of individual farms.

During the Civil War the Confederate States ran into many postal difficulties, says the National Geographic Society. Presses for printing stamps were inadequate, inks and paper poor. Often postmasters used rubber stamps or handwritten signatures to denote paid-up postage. Some stamps were printed in England and brought in by blockade runners. Envelopes were so scarce they were made of wrapping paper, sealed with molasses. Often correspondents turned envelopes inside out and used them again.
