## McKINLEY'S ACCEPTANCE.

IN HIS LETTER THE PRESIDENT DEALS BRIEFLY WITH SOUTH AFRICAN WAR AND CHINESE SITUATION.

President McKinley's letter accepting the nomination for President by the Republican party and addressed to the chairman of the notification committee says in relation to the attitude of the administration against the South African war:

"In the unfortunate contest between Great Britain and the Boer states of South Africa, the United States has maintained an attitude of neutrality in accordance with its well known traditional policy. It did not hesitate, however, when requested by the Governments of the South African Republics, to exercise its good offices for a cessation of hostilities. It is to be observed that while the South African Republics made like request of other powers, the United States is the only one which complied. The British Government declined to accept the intervention of any power."

Regarding the Chinese he says: "The country has been fully advised of the purposes of the United States in China, and they will be faithfully adhered to as already defined."

"The nation is filled with gratitude that the little band, among them many of our own blood, who for two months have been subjected to privations and peril by the attacks of pitiless hordes at the Chinese capital, exhibiting supreme courage in the face of despair, have been able, by God's favour, to greet their rescuers and find shelter under their own flag."

"The people, not alone of this land, but of all lands, have watched and prayed through the terrible stress and protracted agony of the helpless sufferers in Pekin, and while at times the dark tidings seemed to make all hope vain, the rescuers never faltered in the heroic fulfilment of their noble task."

"We are grateful to our own soldiers and sailors and marines, and to all the brave men, though assembled under many standards, representing peoples and races, strangers in country and speech, were yet united in the sacred mission of carrying succor to the besieged, with a success that is now the cause of a world's rejoicing."

In conclusion he says: "Not only have we reason for thanksgiving for our material blessings, but we should rejoice in the complete unification of the people of all sections of our country, that has so happily developed in the last few years and made for us a more perfect union."

"The obliteration of old differences, the common devotion to the flag and the common sacrifices for its honour, so conspicuously shown by the men of the North and South in the Spanish war, have so strengthened the ties of friendship and mutual respect that nothing can ever again divide us. The nation faces the new century gratefully and hopefully with increasing love of country, with firm faith in its free institutions, and with high resolve that they 'Shall not perish from the earth.'"

## CONDITIONS IN THE STATES.

Henry Clews, the New York financier, says that conditions in the United States are generally favorable. A good harvest is practically assured, and farmers are making more profits, better in fact on the average than for many years. This is true of cotton as well as of wheat, corn and many other agricultural products. A striking fact is that while there are fewer "booms" in progress than a year ago, and some lines of business are making very moderate profits compared with 1899, yet prosperity is more evenly distributed and all classes are receiving a more equitable share than then. It is many years since the country has witnessed so little discontent: this is demonstrated by the apathy regarding the anti-trust issue, which in times of depression would prove an inexhaustible source of campaign rhetoric. Today it is almost a lost issue; much to the satisfaction of the large holders of the

industrials. Good harvests mean a good demand for all sorts of merchandise this coming Fall and Winter; this in turn means a good westbound traffic for the railroads and continued employment for our mills and furnaces. Now that iron products are coming down to more reasonable figures, enterprises which have been checked by high prices are being pushed forward, confidence is again reviving, and, as the process of readjustment to the new level becomes more complete, the country is gliding together for a fresh step forward. Happily the old hindrance to industrial growth, overproduction, is a lessened menace now that foreign markets are being eager purchasers of American manufactures. Were it not for this outlet our energy in developing American resources would quickly bring the present era of prosperity to a close, and it should be instantly precipitated into another period of overproduction with all its evil consequences. No such contingency is now in sight, and there is every likelihood that in future the foreign demand will play an important part in preventing industrial distress at home. The importance of preserving these outlets should therefore not be overlooked even from a Wall Street standpoint. The latest evidences of our international development are the large foreign demand for American coal, and the reports that Sweden has been seeking to place a loan in this market.

## INCREASE OVER ELEVEN MILLIONS.

"The Liberal party, if in power, could at once reduce the public expenditure, and effect other savings to the extent of five million dollars per annum, without impairing the efficiency of the service."—John Charlton. "If we get into power we will follow the example of Mr. MacKenzie; and I say that, although we may not be able to bring the expenditures to what they were under him, we can reduce the amount two, yes, three millions of dollars per year."—Wilfrid Laurier. In his speech at Halifax on the 6th of September, Hon. Mr. Fielding stated that the expenditure on account of Consolidated Fund for the fiscal year ending June 30, 1900, was \$42,987,549 and the total expenditure \$52,713,810.

We are now able to compare the years during which Mr. Fielding has been Finance Minister with the last five years of Conservative rule when Mr. Foster was Minister of Finance. The figures are as follows:

CONSOLIDATED FUND EXPENDITURE	
(Under Conservatives.)	
1892.....	\$36,795,864
1893.....	36,814,052
1894.....	37,585,025
1895.....	38,132,005
1896.....	36,949,142
(Under Liberals.)	
1897.....	38,349,759
1898.....	38,832,525
1899.....	41,903,500
1900.....	42,987,549
TOTAL EXPENDITURE	
(Under Conservatives.)	
1892.....	\$42,272,136
1893.....	40,833,727
1894.....	43,008,233
1895.....	42,872,338
1896.....	41,702,383
(Under Liberals.)	
1897.....	\$42,972,755
1898.....	45,334,281
1899.....	51,542,635
1900.....	52,713,810

Thus it will be seen that the Liberals who promised to reduce the expenditure by from three to five million dollars annually have increased the expenditure on Consolidated Fund alone by over six million dollars and the total annual expenditure by over eleven million dollars.

**DOMESTIC ECONOMY**

Said Brown unto his wife one day,  
"We've nothing left to eat;  
If things go on in this queer way,  
We can't make both ends meet."  
His wife replied in words discreet,  
"Oh, we won't be badly fed;  
If you can make but one end meat,  
I'll make the other bread."  
Chicago News.

**BUT GOOD WIFE!**

You can't make good Bread, if you don't use good Flour. It's a mistake many people make in buying Flour as well as other things, in thinking they are using economy by buying a cheap grade but it generally proves the dearest in the end. When in want of Flour give us a call; we keep most of the standard brands and can quote as low prices as anyone in the trade.
