

Before you vote on your future...

CANADA'S ECONOMY is moving to new heights of prosperity. In the past month, about 250,000 new jobs for Canadians—the largest employment increase in Canada's history!

Canada's shipyards are booming; lumber exports are reaching record highs; farm prices are up and markets expanding; our wheat is once again moving from the elevators to feed a hungry world.

Canada's economy today is stronger, healthier than any in North America. Government action, courage and confidence brought Canada through the crisis of the Liberal recession, despite the voices of "gloom and doom" who were so eager to sell Canada short.

For the first time in years, Canada is selling more goods abroad than she is importing. Credit has been expanded, inflation has been checked.

The veteran, our older citizens, the weak and afflicted—the forgotten men and women of Canada five years ago—are today enjoying higher standards of well-being and achievement.

Every Canadian Province has benefited from a national program for expansion and development; the long-neglected Atlantic Provinces have been given new measures of equality and opportunity from a Government that believes in *one* Canada, united and strong.

And Parliament has been restored as an instrument of the people's will. Arrogant Liberalism and entrenched bureaucracy are now but a nightmare of the past.

For five years, the Government of John Diefenbaker has served Canada well. It has fulfilled its pledges, honoured your trust and kept faith with the Canadian people.

There is more to do, more to build, more to challenge and achieve. The Government of John Diefenbaker will do it, in your service and in your trust.

It is worthy of a further mandate which your personal ballot can help bring about by voting for your Progressive Conservative Candidate on June 18th.

Progressive Conservative Party of Canada
