**UNLAWFUL SEX** — A Lennox Island man, Joseph Patrick Labobe appeared on a charge of having unlawful sexual intercourse with a girl under 14 years of age and was remanded in custody without plea for one week.

The accused, a mother of two children, was also warned that if she appears before the court she will be given a jail term. She was also ordered to make restitution for the broken windows.

## Wayne And Shuster Arrive Here Sunday

It's good news for the host of fans of Johnny Wayne and Frank Shuster, two of Prince Edward Island's favorites and two of the Island's greatest international boosters.

The great comedians are expected to arrive by plane Sunday night and go into rehearsals the following day for the 1965 production of last season's great hit, "Wayne and Shuster in Charlottetown."

Already at Confederation Centre dance rehearsals for two featured artists, Don Gillies and Gayle Lepine, are underway. Mr. Gillies, one of this country's outstanding dancers and Miss Lepine, a vibrantly alive talent, not to mention beautiful, will be featured in the sprightly revue that opens at the Centre Tuesday, Aug. 17.

The large cast some of them already performing in one of two of Charlottetown Festival Productions, will get down to intensive work Monday, P.M.

Kligman, Tom Harvey, Drew Thompson, Jack Northmore, and Diane Stapley, are some of the other featured stars who will be in Charlottetown for the "Wayne and Shuster" show only.

Following its completion here the revue will be toured nationally from coast to coast.

Wayne and Shuster returned from London to their home this week. They completed during July, two special television spectaculars for the BBC where they are also great favorites.

**INVENT-NEW RADAR** — LONDON (Reuters) — A three-dimensional radar system for controlling dense air traffic has been invented by British scientists, it was reported Wednesday. The system shows all airplanes in color as spots of light moving in a box projected on a three-dimensional radar screen. It is designed as a foolproof method of preventing collisions on approaches to airports.
