REMEMBER YOUR DELIGHT when you first baked a cake with a mix? What a grand, time-saving joy it was — and so delicious. Now come to more big cake-making news. If you use a mix that calls for milk, I know a way that you can definitely get a higher cake. Yes, a lighter, more tender cake, every time. Carnation Evaporated Milk performs this magic...

With any cake mix that calls for milk do this — Instead of ordinary milk, use an equal amount of liquid consisting of 2 parts of Carnation Evaporated Milk and 1 part water.

Right now at your grocer's there's probably a special display of Carnation Milk and cake mix. There you can get an interesting FREE leaflet giving you recipes for icings that you'll want to use again and again. Get your leaflet — get some Carnation and some cake mix — and treat your family to a super cake.

Never run cold water on hot cake pans. Sudden temperature changes may cause warping.

WHAT MAKES CARNATION SUCH A PRACTICAL MILK? First, it's the fact that Carnation is double-concentrated. In each cup of Carnation, you have the food values of 2 cups of pasteurized whole milk. So you can use Carnation mixed with an equal amount of water, to fill every whole milk purpose. Or you can use Carnation undiluted, in almost every way you use cream. Second, because it is specially heat-refined, Carnation gives foods a creamy consistency and flavor that ordinary bottled milk never could. For tempting color and delicious flavor, you should be enjoying the creamier consistency and richer taste that you get with Carnation Evaporated Milk. Remember — every drop in every can of Carnation is the same, and unconditionally guaranteed.

LISTEN to the delightful Saturday radio show, "Stars Over Hollywood" — a complete half-hour play every week — specially written for this entertaining programme. See your newspaper for time and stations.
