

# Memorial Hall Should Have Better Facilities

For the past few months or more realistically years, the guys that live in Memorial Hall have been beefing about the poor living conditions we are subjected to. This past week things have come to a head as a result of two meetings held in Memorial's Lounge, the first on Wed. evening with Marion Morrison and Pat Donahoe of Student Services; and the second, a house meeting on Thursday evening to try and decide what measures we could draw up to try and improve our "sweet home".

The first meeting was intended to discuss residence life in general, and to try and define what we the students feel the unive-

rsities responsibilities are to us concerning residence life. The latter part of the meeting dealt with the physical conditions of Memorial Hall and this discussion paved the way for the House meeting the next evening.

The House got together Thursday, and as a group drew up a list of priorities concerning, things that should be changed. In descending order these were:

- 1/ Get the Student Union out of Memorial's basement by Sept. 75
- 2/ Install laundry facilities
- 3/ Install a kitchen
- 4/ Install public telephones

fix the showers and have electrical outlets installed near the mirrors

5/ Change the location of the TV room, move the mailboxes from Main to Memorial and repair 3rd floor's heating. All of these recommendations were voted on and carried. We want the Student Union offices relocated elsewhere to open up badly needed space for study, laundry facilities etc. The university should be responsible for relocating the union.

The other recommendations are designed to try and bring us closer to par with Bernadine and Marian's living standards. We pay just as much as they do and it stands to reason that we should expect just as much as they get. Equality is our beef and on Monday at 3:00 pm we meet with Jim Griffith, Director of Student Services, to discuss our demands. There is not one reason why our recommendations should not be met quickly and efficiently. We'll see what happens!?

## More than an Engineer.

Our Military Engineers are very specialised people. They design and build bridges, airstrips, base facilities, supervise and maintain all kinds of equipment on our bases around the world.

It's a very special job. One that involves working with men. Guiding them. Training them. A job where you can apply your knowledge in all kinds of challenging situations.

If you're into engineering, we can get you into something more than just an office job. An Officer's job, where you can develop your full potential.

Give it some thought. We can give you plenty of opportunities to use your specialised knowledge in some very unusual ways.
