Recording Secretary.

JAMES D. IRVING, President.

Ch'town, July 18, 1890—dy m w f wy

DOMINION OF CANADA,

Province of Prince Edward Island,

CITY OF CHARLOTTETOWN.

IN THE CITY COURT, before Rowan Robert Fitzgerald, Esq., the Stipendiary Magistrate for the City of Charlottetown.

Take notice that His Honor the Stipendiary Magistrate for the said City of Charlottetown has, by virtue of the power and authority in him invested by the statute of the General Assembly of the said Island, intituled "An Act to consolidate and amend the several Acts Incorporating the City of Charlottetown," ordered and appointed that MONDAY, the 4th day of August next, be the day set down for hearing all appeals made to him from the last preceding valuations, assessments, or rates imposed or authorized by the City Council of the said City, and that on such day and daily thereafter until all such appeals have been heard, at the hour of eleven o'clock, forenoon, in the said City Court, in Charlottetown aforesaid, all such appeals will be heard and finally determined by him.

Dated this 22nd day of July, A. D. 1890.

By order,
ROBERT VANIDERSTINE,
Collector for said City.

THE DAILY EXAMINER.

AUGUST 8, 1890.

The Trade of Montreal.

Somehow or other, says the Montreal *Witness*, people have been remarking of late that the trade of the Montreal harbor was anything but prosperous. This is erroneous. So far this season the exports have been very large. In fact, when the end of the season comes it is generally expected that the result will be the most satisfactory in the history of Montreal shipping. On the other hand, during the former part of the season the imports were low; but now they show signs of activity. The number of vessels of all classes which have arrived in port up to date is 339, compared with 327 for the same period of last year. The large exports have made a substantial increase in the ocean tonnage, and at the end of June it was 16 per cent. greater than for the same period last year.

The cattle shipping industry is enhancing very substantially the trade of the port. Up to last Friday there were over 14,000 more cattle shipped from Montreal than last year in the same time. Last week saw the largest consignment ever shipped at one time. Up to Friday last the figures were: 44,910 cattle and 16,225 sheep, as compared with 32,482 cattle and 17,881 sheep, for the tame period of last year. The cattle shipping trade, which was in its infancy a few years ago, stands now at the top of the export list, Each successive year shows an increase over its predecessor, and should this continue it will be found necessary to add to the present well equipped cattle steamers running to Montreal. Cheese exports are making a good development. The exports this year have been very large. The same may be said of grain and deals. The pilotage dues show a good increase, while during the month of July there was a falling off about $1,000 out of a total of about $40,000 wharfage dues.

Interesting and Useful Books.

Several years ago the writer, travelling abroad, visited a monastery, and among other curiosities shown him was a series of bound volumes, the sides of which were made of polished boards from the forests of the country, showing the grain of the woods.

At first sight, the volumes presented the aspect of bundles of wood. But after a more careful examination it was found that they contain a detailed account of the trees that they represent. On the back, the bark had been detached in order to describe the title of the book by its scientific and its common names.

One of the pages is formed by a broken piece of the wood of the tree, showing its fibres and natural fractures, the other shows the wood when it has been polished and varnished. At one of the ends the fibres are seen as they remain after the passage of the saw, and at the other, the wood finely polished. Upon opening the book, the fruit, the grain, the leafage and other productions of the tree, the moss which generally grows on the trunk, and the insects which live on the different parts are seen. Added to this is a well printed description of the habits of the tree, the places where it grows, and its method of growth.

News Notes.

A strong crusade is about to be commenced in Montreal against tax emptions. The amount of exempted property there is $19,745,210.

Reliable information shows that a crop of 17,000,000 bushels of wheat will be secured in the Northwest this year, of this quantity the amount exported will probably reach 12,000,000 bushels.

Valuable phosphate leads in the Wakefield district, about twenty miles from Ottawa, have just been discovered by a Californian miner named Dollar.

Again there is such terrible distress in Dakota that Canadian settlers deluded there by Grit fictions are appealing to Canada for aid to return. Yet Grit journals persist in their efforts to persuade settlers to go to Dakota rather than Manitoba and our Western Territories in the hope that by luring a few victims to their ruin they may manufacture an "exodus" to wail over.

The extraordinary improvement in the beet root sugar industry of Germany gives hope that this sugar will yet become a very profitable staple on our own continent. In 1868 it took 12½ cwt. of beets to make 1 cwt, of sugar. The improvement in the quality of the beet and in methods of manufacture have since been so great that a cwt. of sugar is now obtained from only 9 cwt. of the roots.

NEW NOVELS.—The Smuggler's Secret, by Frank Barratt; The Moment After, by Robert Buchanan; The Great Will Mystery, by Adeline Sergeant, etc., at the Diamond Bookstore.

SOME RHUBARB.—Mr, John A. McKay, of Graham's Road, informs the *Farmer* that he has grown in his garden a stalk of rheubarb the stalk of which measures 39 inches across. The stalk is two feet long and very large, while the leaf from the stalk to the tip is 34 inches.

PUT IN FOR SHELTER.—The *Journal* says: Last Sunday a party of Shediac people, including a large representation of children, went out for a sail in the pilot boat. So hard did it blow after they started that they were forced to run to Summerside for shelter. The party returned Monday morning by the steamer Princess of Waies, and the pilot boat left for Point du Chene the same morning.

A PROJECTED EXCURSION.—The *Journal* understands that a movement is on foot here to secure the Heather Belle at an early date to convey a party from Summerside to Tidnish, N. S., on a visit to the ship railway. The idea is a good one, and we hope to see it carried out. But why cannot a similiar excursion from Charlottetown be organized?

Kemmler Executed.

THE FIRST LEGAL EXECUTION BY ELECTRICITY.

AUBURN, N. Y., Aug. 5, 1490.—Kemmler was brought into the execntion room at 6.38 by Warden Durston, followed by Dr. Houghton and Chaplain Yales. He was dressed in a new suit, and was by far the coolest man in the party. He sat down composedly in a chair beside the execution chair, and was introduced to those present by the warden, who then announced that he had warned the convicted man that he must die, and asked Kemmler if he had anything to say. Kemmler spoke up without any hesitation as though he had prepared his remarks, and said: "Well, I wish every one good luck in this world, and I think I am going to a good place, and the papers have been saying a lot of stuff that is not so. That is all I have to say." He then turned his back on the jury, took off his coat and handed it to the warden. At the conclusion of this speech he removed his coat, calmly arranged his necktie and sat down in the electric chair quietly as sitting down to dinner. Straps were adjusted around his body, his arms fastened down and his feet placed close to the legs of the chair. While this was being done Kemmler repeatedly cautioned the warden "not to hurry and to be sure everything was all right." It was not through fear that Kemmler thus spoke, but rather through a certain pride in the exactness of the experiment. The head piece was clamped in place and the leather harness adjusted to the head and face. During this time Kemmler maintained the same unruffled demeanor, and talked calmly to the warden about the adjustment of various parts of the electrical chair. The door leading into the room where switches were arranged was partly open and a man standing in the door. Beyond him were two other man. Which of these was to touch the lever and make connection with the ch[illegible] was not known, and Warden Durston says never will be known. Everything was now in readiness, and at a signal from the warden at 6.43½ the electric current was turned on. There was sudden convulsion of the form in the chair. A spasm went over it from head to foot, confined by the straps and springs that held it firmly so that no limb or other portion of the body stirred more than a small fraction of an inch from the resting place. The twitching that the muscles of the face underwent gave to it for a moment an expression of pain, but no cry escaped from the lips, which were free to move at will, and no sound came forth to suggest that consciousness lasted more than an infinitely small fraction of a second. The body remained in this rigid position 17 seconds. There was no movement of the body beyond the first convulsion. At the expiration of ten seconds the current was switched off. There was a slight relaxation of the body in the chair, but the straps held it so firmly that there was not a quarter of an inch variation in the position of any part of the frame. There was no question in the minds of any present that the form before them was lifeless. Preparations for a post mortem were being discussed when Dr. Bach suddenly noticed a red spot on the hand resting on the right arm of the chair, and from which blood was dropping. Instantly the order was given to again turn on the current. The dynamo was almost at a standstill, and although the engineer quickly responded to the command, it was not quick enough to anticipate the signs of what may or may not have been reviving consciousness. As the group of horror-stricken witnesses stood helplessly by, all eyes were fixed on the chair. Kemmler's lips began to drop saliva, and in a moment more his chest moved, and from his mouth came a heavy, stentorian sound, quickening and increasing with every respiration. The wheezing sound—half groan—which forced itself past the tightly-closed lips sounded through the still chamber with ghastly distinctness. Some of the witnesses had to turn away from the sight, and one of them lay down faint and sick. In 73 seconds after the order was given for the second current the response came, and the sound that had horrified the listners about the chair was cut off sharply as the body once more became rigid. The dynamo was run up to its highest speed, and again and again the full current of 2,000 was sent through the body on the chair. As the anxious group stood silently by it was seen that the body was burning, and a pungent, sickening odor permeated the atmosphere. The current was shut off and there was a relaxation of the body. Kemmler was dead. Dr. Spitza says the scientific uncertainty of the new execution law leads him to believe that this method will not be adopted in other States, and that this will be the first and last electrical execution. Dr. Shrady said the execution was brutal, worse than hanging, probably not so painful, but the failure to kill at the first application was barbarous. Expert Huntley said no one can depict in words the apparent horrible sufferings of the man in the interval between the the first and second application of the electrical current.

AUBURN, N. Y., Aug. 6.—An examination of Kemmler's brain showed that the brain hardened directly under the spot where the electric current came into contact with the skull. The blood at that spot was hardened, showing the current had direct action on the brain.

Decreasing the Death Rate.

The mortality among consumptives has been materially decreased of late years by the use of Scott's Emulsion of Cod Liver Oil with Hypophosphites of Lime and Soda. Phthisis, Bronchitis, Abscess of the Lungs, Pneumonia and Throat affections are completely subjugated by a timely use of this excellent pulmonic. Palatable as milk. Sold by all druggists at 50c and $1.

Great bargains in new Boots. Forty-five cases opened this week at the Dominion Boot and Shoe Store.
