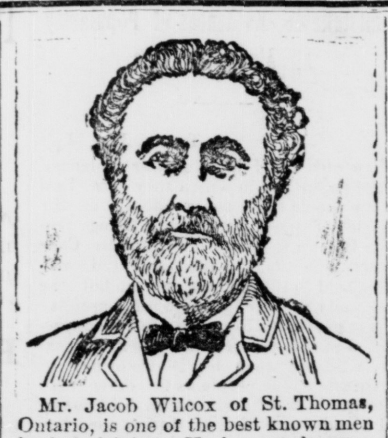
Granby Rubbers
Are out again this season in new styles and in all the new Shoe shapes, right up to date, but with the same old "wear like iron" quality that has always characterized them, because they are honestly made of pure Rubber. Be sure you get Granbys this year.
nov27—135 & wky

NOTICE
To Shoemakers and others. We have now on hand and to arrive a full stock Leathers and Shoe Findings, comprising Sole Leather, best grades; French and oth Kips, Calf, Dongola, French Kid, Pebble, Neats, Tan, Calf, Lining Skins.
In Findings we have Lasts, all styles, Crimps, Screws., Leather and Rubber Cements, Thread, Wax, Hairs, Shoe Nails and Tacks all kinds, Pegs, Awls and Hafts, Sand and Emery Paper, Shoe and Welt Knives, Rasps, pinchers, Machine Linens and Silks, Heel Balls, Boot and Gaiter Web, Sole and Heel Plates, Elastic Web, also closed Uppers, all kinds and grades, &c.
All of which we will sell at the lowest possible prices.
J. H. BELL,
The Reliable Boot and Shoe Dealer



Mr. Jacob Wilcox of St. Thomas, Ontario, is one of the best known men in that vicinity. He is now, he says, an old man, but Hood's Sarsaparilla has made him feel young again.

"About a year ago I had a very severe attack of the grip, which resulted in my not having a well day for several months afterwards. I was completely run down and my system was in a

Terrible Condition.

I lost flesh and became depressed in spirits. Finally a friend who had been benefited by Hood's Sarsaparilla advised me to try it and I did so. I continued taking it until I used twelve bottles and today I can honestly say Hood's Sarsaparilla has restored me to my former health." JACOB WILCOX, St. Thomas, Ontario.

Hood's Sarsaparilla Is the Only True Blood Purifier
Prominently in the public eye today. It cures when all other preparations fail.
Hood's Pills the after-dinner pill and family cathartic. 25c.

TWO MILES DOWN.

A Strange Fish, Never Before Seen, Secured at That Depth.

One of the most important and interesting cruises ever made by the United States ship Albatross has recently been completed. Since May last she has cruised in far north western waters, engaged in deep-sea fishing, and the fish she has taken are packed away in boxes for shipment to the Smithsonian Institution, from San Francisco.

Some of the crustaceans taken are from a mile or more deep in the sea, and one fish of a kind never before known to exist is from the great depth of 1,700 fathoms, or almost two miles. It resembles the macrurus, or the family known as grenadiers, but is yet so curious in appearance that it is evidently a new thing. There is nothing in the books like it. The vessel in her cruise was in charge of N. B. Miller, of the United States Fish Commission. "Leaving in May last, we went to Port Townsend, Wash., and then proceeded to the Commander Islands," he said. "From there we cruised about in various waters of that region. For a time we fished in the cod and halibut banks, but most of our time we were fishing in far greater depths than those frequented by the cod and halibut.

"It was at these great depths that our most interesting specimens were taken. We took them in the great dredge that went to the floor of the ocean, and scraped up the denizens of those dark caverns. The dredge is a great rope-like sack, seventeen feet long and eleven feet wide. In order to fish to any depth desired this dredge was attached to a gigantic reel containing four miles of three-eighths inch steel wire. When we let the dredge down and scraped the bottom of the ocean we would bring up as much as a ton in weight of mud, starfish, worms, anemones, fish, shrimps and other shells of various kinds. Oftentimes we would have two or three dozen different kinds of fish in the dredge.

"The queer fish that we got, the like of which has never been seen before, was twenty-six inches long and weighed between eight and nine pounds. It was taken at a point about 100 miles southwest of the Prybilof Islands, at a depth of 1,700 fathoms. It resembles the fish known as the macrurus, but still was essentially different from anything before discovered. Its head was peculiarly flat in appearance, its eyes very large, and its tail dwindling to a point and being curled in action, something like that of a snake.

"It was physically constructed so that it could only live at this great depth in the ocean, where the weight of the water was so great that it would kill all other animal life. When the fish was drawn up its stomach was crushed up out of its mouth, and its eyes were puffed out. It could not live in the upper waters. In its native depths the darkness was so dense that no other fish could see anything. It is a fish perfectly contented in the darkness and intense cold of the deep ocean depths. There in its normal state it probably had many companions, though science had not till now ever found any of them.

"We would begin fishing every day at 7 or 8 o'clock in the morning, and keep it up till 6 and sometimes as late as 8 o'clock in the evening. It was very interesting work, because there was all the time a mystery as to what we would bring up. Notwithstanding we fished a great deal at great depths, most of our catch was made at from 20 to 400 fathoms. South and north of the Alaska peninsula, in the Behring Sea, we came in contact with extensive cod and halibut banks. The cod are found all over Behring Sea in shallow water. In all we secured about 2,500 pounds of the various kinds, which we preserved for the Smithsonian Institution."

The Electrician at Play.

"An electrician who amuses himself by devising odd applications of electricity, which may or may not have practical value, tells chemists that he has a much better plan for removing the glass stopper from a bottle than the usual holding of the bottle neck for awhile over a Bunsen burner. This method is open to the drawback that the bottle must be held in a horizontal position, and the fluid may easily be spilled out of the bottle. The up-to-date improvement is an adjustable clamp with coils of plantinum wire embedded in a strip of asbestos attached. The clamp which is connected to a battery, is put on the neck of the bottle, the current is turned on, and the glass is brought to any desired heat. This is, in fact, an adaptation of the electrotherm, or heating pad, which is now used in hospitals in lieu of hot water pads formerly in vogue. Another novelty of this resourceful electrical trifler is an electric annihilater of moths, flies and mosquitoes. It consists of an incondescent electric lamp placed inside a large globe, which is coated externally with a mixture of honey and wine, or any other seductive sticky mass. The windows and doors are to be closed, the blinds pulled down, and the room is to be made as dark as possible. The current is then turned on and in an hour the insect life of the room will be found sticking to the glass globe. The final instructions are to "remove the victims with hot water and set the trap afresh."

The Beetle and the Grasshopper.

A Beetle and a Grasshopper Met in a Path one day and although there was Plenty of Room for both, neither would turn aside.

"Come, now, but why don't you give Way?" demanded the Beetle.

"Who are you that I must give up my Rights?" replied the Hopper.

"Be careful of your Language, sir!"

"And don't you rub against me!"

And they were on the point of combat when a Turkey coming along the Path Espied them and Gobbled up both.

MORAL:

Men who go to law for their rights become the victims of the Lawyer.

Needing a Rest.

A Scottish congregation presented their minister with a sum of money and sent him off to the continent for a holiday. A gentleman just back from the continent met a prominent member of the church and said to him: "Oh, by the bye, I met your minister in Germany. He was looking very well; he didn't look as though he needed a rest." "No," said the church member, very calmly, "it was na him; it was the congregation that was needing a rest."

Silenced.

Wife.—What in the world do you want with a trombone? You know that the man next door has driven us nearly wild by his performance on that awful instrument.

Hubby.—Calm yourself, my dear. That's the one I've bought.—Harper's Bazar.

ODDS AND ENDS.

A non-advertising merchant may worry about the poor business he does, but the clerks are not likely to lose any sleep over it.

Science Triumphant at Last.

Miller's Emulsisn of Cod Liver Oil is the outcome of the latest scientific researches. There was always a prejudice against taking cod liver oil on account of its disagreeable taste, but Miller's Emulsion is agreeable to the palate, and that is one reason why it has become so popular with the medical fraternity, the hospitals of the country and the households wherever consumption or lung troubles prevail. Miller's Emulsion is the great nerve strengthener and blood maker, and cures Coughs, Colds, Bronchitis, Scrofula and all Lung affections. In big bottles, 50c. and $1, at all drug stores.

The Prince of Wales is a great newspaper reader, and will skim through a lot of papers and get the gist of each one with the rapidity and accuracy of a trained newspaper man.

Counterfeits

A few years ago a great discovery was made.

Unprincipled persons are trying to prey upon and dupe people who are led to ask for kidney treatment.

Some of the methods adopted by imitators are as follows:

First—To imitate the size, color and shape of Dodd's Kidney Pills and sell them by count.

Second—To put them up to appear very nearly the same and to be offered at the same price.

Third—To hook on the word "kidney" in naming cathortic pills so as to increase sales of mere physic.

Fourth—To give a name so near to Dodd's that unwary people may be deceived and think they are getting Dodd's.

Look out for such dodges. When you want kidney medicine you want the best. And ought not to be the subject for any trick.

So beware.

The Irish mail boats receive $455,000 a year subsidy. This is $20,000 less than is paid for all the North American mails from Queenstown to New York.

As GENTLE AS WINE.—To drink inferior whiskey is heroic treatment for human ill. Try "Good Scotch Kilty." There is nothing harsh or biting about it. It has that liqueur quality so much desired and so hard to get.

Lawrence A. Wilson & Co.
Sole Agents for Canada, and officially appointed sole Purveyors for all Wines and Spirits to the British Empire Expositions.
Montreal.

Strange bed warmers are used by Chilian women. In cold weather, when in bed, they keep their feet warm by placing them on a dog.

Bad Blood Between Them.

The ever-slaving farmer's wife, her delicate sister in the city, suffer more than they care to tell. The dark rings around the eyes, headaches, dizziness, palpitation or rheumatic twinges, betoken a run-down system. The blood is poor, and is a bar to enjoyment of life Scott's Sarsaprilla purifies the blood, strengthens and vitalizes the system, and speedily restores the bloom of health to the cheeks. It cures when all others fail.

Mary French Field, eldest daughter of the late Eugenie Field, is preparing herself to read in public the poems of her illustrious father. She is a handsome young woman of noble presence and will make a striking appearance on the platform.

Wore Greased Gloves Seven Years.

John Siron, mason, Aultsville, Ont., had Salt Rheum so severe that for seven years he wore greased gloves. He writes: "I used a quarter of a box of Chase's Ointment. It cured me. No trace of Salt Rheum now." Chase's Ointment cures every irritant disease of the skin, allays itching instantly, and is a sterling remedy for piles. Avoid imitations. 60c. a box

A Prominent Lawyer says:

"I have eight children, every one in good health, not one of whom but has taken Scott's Emulsion, in which my wife has boundless confidence."

A Great Deal in a Few Words.

"I paid a Toronto specialist on catarrh a large sum of money, but I got no benefit. I tried them all, but finally, almost in despair, and assurredly without any faith, I tried Chase's Catarrh Cure. It is all that it is recommended, which is saying a good deal in a few words." Joel Rogers, clerk, Division Court, Beeton. Improved blower in each 25c. box.

Paderewski's total receipts for twenty-eight performances have reached the enormous sum of $80,431, the greatest amount probably ever received by a musician. The twenty-eighth performance in Cleveland, O., showed receipts of $4,710.

Money No Object.

The amount of money sufferers from catarrh will spend in attempting to cure that foul and disagreeable disease is almost incredible. J. W. Jennings, of Gilford, Ont., says: "I spent between $200 and $300 consulting doctors; I tried all the 'treatments' without benefit. One box of Chase's Catarrh Cure did me more good than all the remedies. A 25c. box cured me." Don't waste money. Chase's Cure, with improved blower, 25c. It cures.

HAD INDIGESTION!

For a Matter of Some Forty Years or More.

Joseph Gardner, stove dealer, of Bath, Ontario, is a great believer in Dr. Chase's Kidney-Liver Pills for indigestion, constipation, dyspepsia, Bright's disease, rheumatism, and kidney, liver and stomach troubles generally.

"I was troubled for over forty years with indigestion and constipation," he writes. "At intervals I suffered from severe headache. I spent dollars and dollars without result until Mr. Bail, our druggist, advised me to try Chase's Kidney-Liver Pills. I did so, and must say that they are the only remedy that gave me relief. I would not be without them for anything."

Many people suffer from rheumatism. Bad blood and diseased kidneys bring it on. Dr. Chase's Kidney-Liver Pills will remedy all this and cure rheumatism, sciatica and all kindred complaints. Here is a sample case:

"My boy was all crippled up and suffered awfully with rheumatism," writes Mrs. H. Wills, of Chesley, Ont. "He also had a touch of diabetes. The doctors could do him no good, but Dr. Chase's Kidney-Liver Pills completely cured him."

Sold by all dealers and Edmanson, Bates & Co., Toronto. 25c.

When all other remedies fail Dr. Chase's Linseed and Turpentine will cure the worst chronic cold. 25 cents.

AN INDIAN TIGER STORY.

In This Case Quite True and Somewhat Out of the Common.

Our Mysore correspondent writes: "There was considerable excitement here recently. One of the Maharajah's tigers got loose and was not re-captured for over forty eight hours. Allowing tigers and other wild animals to escape out of confinement seems a common event in Mysore. During the time of the late Maharajah, one got out of his cage in the menagerie, and also during his father's reign a tiger loafed all over the fort a whole day, going in and out of people's houses, but, strange to say, on none of these occasions has any one been injured. The tiger in the present instance is one which is kept in his Highness' dairy to keep away the 'evil eye' from the cattle. He was netted for Lord Lansdowne to shoot when his Excellency visited Mysore a few years ago, and is a splendid brute. The dairy is a very large yard, with open sheds all round in which the cattle are tied, the tiger's cage being close to one end and a fountain near the other. The tiger got out about 7 p.m. and calmly strolled around, the place being full of cattle and people at the time, but, fortunately, he had no desire whatever to taste stall-fed beef or Hindu either, although he passed within a few feet of the cows and men, and, after examining them all quietly, lay down by the fountain.

"By nine o'clock a couple of elephants brought down nets, and a cordon was run round the place, preventing the tiger escaping or getting at the cattle, when two rather amusing incidents occurred. A cow managed to get into the yard, and after skipping about for some time rushed into a part of the net close to the tiger, and for some time struggled most frantically to get loose. Everyone fully expected the cow would have been killed. Finally, however, a number of men went out and held the wretched animal down and removed the net. Hardly was this over when a splendid stud bull got over a part of the net which had fallen down, and, after careering about the yard just as the cow had done, rushed right up to the fountain and dipped his nose in the water. Evidently he had no idea the tiger was there, or he would never have gone up in the style he did. However, after drinking, he looked up, when the tiger, who could not have been more than a few feet away, 'woughed' in his face, and the way that bull went away after that did one's heart good to see. These were two grand opportunities for witnessing 'how the tiger seizes his prey,' particularly as there were several sportsmen about, but unfortunately it was not to be.

"After worrying the poor brute for two days and two nights, during which time he got into the net once, he quietly walked into his cage and was shut up. The cool and indifferent way in which Mr. Bassapali Urs' fossilized hunters, with their fearfully and wonderfully made bundooks, walked up and down past the tiger was most amusing. What they would have done in the event of the tiger making for one of them it is hard to tell. The claws have grown into the pads of the tiger, and the wretched animal seems to be suffering great pain. Had it not been for this, there would doubtless have been a very different tale to tell."—The Asian

What Destroys our Streets.

Without doubt the heavy cartage and drayage of modern times have much to do with the perishableness of modern pavements. The hardest rock itself cannot long withstand the continuous grind of heavy loads supported upon narrow tires. To this foolish and destructive fashion of building carts and drays designed for the transportation of great weights, the failure in modern pavements is due. It must be remembered that the celebrated roads of antiquity were never subjected to similar tests, and that the smaller the surface called upon to sustain the great weight the less natural will be the resistance power offered, and the greater will be the pressure upon the point of contact. If anyone will take the trouble to ascertain the weight of an average load hauled by hundreds through all our chief cities daily, measure the width of the tire and then figure the pressure per square inch to which a pavement is exposed, based upon the fraction of a circle which touches a straight line, he will have a better idea of what road builders of the present day have to contend with. This width of cart wheels and tires should be regulated by law with a view to municipal economy, and each Commonwealth should endeavor by legislation to enforce honesty in the laying of foundations for every foot of pavement used.—Lippincott's Magazine.

Queer Facts About a Watch.

Open your watch and look at the little wheels, springs and screws, each an indispensable part of the whole wonderful machine. Notice the busy little balance wheel, as it flies to and fro unceasingly, day and night, year in and year out. This wonderful little machine is the result of hundreds of years of study and experiment. The watch carried by the average man is composed of ninety-eight pieces, and its manufacture embraces more than 2,000 distinct and separate operations. Some of the smallest screws are so minute that the unaided eyes cannot distinguish them from steel filings or specks of dirt. Under a powerful magnifying glass a perfect screw is revealed. The slit in the head is two one-thousandths of an inch wide. It takes 308,000 of these screws to weigh a pound, and a pound is worth $1,585. The hair-spring is a strip of the finest steel, about nine and one-half inches long, one and one-hundredth of an inch wide, and twenty-seven ten-thousandths of an inch thick. It is coiled up in spiral form, and finely tempered. The process of tempering these springs was long held as a secret by the few fortunate ones possessing it, and even now it is not generally known. Their manufacture requires great skill and care. The strip is gauged to twenty one-thousandths of an inch, but no measuring instrument has yet been devised capable of fine enough gauging to determine beforehand by the size of the strip what the strength of the finished spring will be. A twenty one-thousandth part of an inch difference in the thickness of the strip makes a difference in the running of a watch of about six minutes an hour.

The value of these springs, when finished and placed in watches, is enormous in proportion to the material from which they are made. A comparison will give a good idea: A ton of steel made up into hair springs, when in watches, is worth more than twelve and a half times the value of the same weight in pure gold.

POOR DIGESTION leads to nervousness, chronic dyspepsia and great misery. The best remedy is **HOOD'S SARSAPARILLA.**

Church Vezique is a recent French invention, suited for religious circles and for Lent. It is played with cards, like ordinary vezique, but from the mouths of the king, queen and knave on the face cards issued a scroll on which is printed a short prayer, which the players repeat when counting up their cards.

FURNESS LINE.

Regular Fortnightly Sailings between LONDON and HALIFAX. Under special contract with the Dominion Government.
