**NANSEN.**  
 To drift with thee, not strive against thy tide,  
 All-powerful Nature! to pursue thy law.  
 Attentive,—with devout and childlike awe  
 Hark'ning unto thy voice, and none beside:  
 To drift with thee! With thee for friend and guide,  
 In fragile bark, careless of cold or thaw,  
 To brav: the ice-pack and the dread sea-maw!  
 So are man's conquests won, so glorified.  
 The truest compass is the seeing soul.  
 Oh, wondrous Earth! did not thy spirit glow,  
 Calling to mind the deathless Genere,  
 As Nansen, pilot of the frozen Pole,  
 Like a young Viking rode the icy fl e,  
 Wrestling their secret from the Arctic Seas?  
 —Florence Earle Coates, in Harper's Magazine for November.

The New York Sun, in connection with the Laurier-Davies visit to Washington, renews its old advice to Canada, that if it wants the benefit of the United States market it must take the disadvantages of United States Government. Not even Sir Wilfrid Laurier will buy at that price.

The British officials have accepted the submission of the Maddakbels, on the surrender of the property and rifles looted at Malzar, and on the payment for such property that is not forthcoming. This tribe also has to pay a fine of 10,000 rubees and to surrender 20 hostages for their future good conduct.

Richard Raddatz, of Oshkosh, Wisconsin, has invented a submarine boat. On Monday last with a companion named William H. Eglebright, he went down in eleven feet of water, remaining three hours. The boat rose and sank at will by the movement of a level. The inventor says they could easily have remained down six hours. The air was good, but their feet got somewhat numb.

The Dominion Cotton Mills company have decided to abolish the use of steam for power purpose, and have given a contract to the Lachine Rapids Hydraulic and Land Company, by which the latter will supply electricity for power for a period of twenty years. The contract represents an expenditure of over half a million dollars and is one of the biggest deals of the kind ever put through in Canada.

Health and strength carry us through dangers and make us safe in the presence of peril. A perfectly strong man with rich, pure blood has nothing to fear from germs. He may breathe in the bacilli of consumption with impunity. If there is a weak spot where the germs may find an entrance to the tissues, then 'tis trouble begins. Disease germs propagate with lightning-like rapidity. Once in the blood the only way to get rid of them is to kill them. This is what Dr. Pierce's Golden Medical Discovery is for. It purifies the blood. That means that it kills the germs, but that is only part of what it does. It assists digestion by stimulating the secretion of digestive fluids, so promoting assimilation and nutrition; purifies and enriches the blood and so supplies the tissues with the food they need. It builds up strong, healthy flesh and puts the whole body into a disease-resisting state. Send 31 one-cent stamps to cover cost of mailing only, and get this great book. **HERR ANDREE'S VENTURE.**

What was Supposed to be Andree's Balloon Was a Dead Whale.

LONDON, Nov 18.—Reuter's Agency is informed, with reference to the mysterious cries reported by Norwegian captains to have been heard on Spitzbergen, and the relief expedition which has left Tromsø on the assumption that they may have come from Andree, that the opinion held by Arctic travellers in England, and by those who have recently returned from the far North, is that the suggestion of Andree being anywhere near Spitzbergen is not worth a moment's consideration. Among geographers it is felt that the relief expedition may be productive of good, as it is possible that some one may have been left on Spitzbergen. The place is now crowded with tourists and sportsmen in summer, and last year a visitor was nearly stranded there, but the general opinion is that the cries emanated from birds, and that the object which was supposed to be Andree's balloon was a dead whale. With regard to Andree himself, the chief reason for confidence in his safety lies in the fact that he, like Nansen, knew well what he was doing, and had carefully studied the subject. Arctic authorities express the opinion that Andree may have reached land somewhere on the north coast of America or of Asia, and, after wintering there, may make his way back next spring. He was well provided with clothes, and would be able to live on bears, seals, etc., during the winter months. This idea is considered all the more likely as this has been the most open year on record in that part of the Arctic. If, however, Andree has come down in the middle of the ice anywhere between 83 degrees north and the Pole the highest authorities are of opinion that it would be practically impossible for him to get out.

**WITHIN REACH NOW.**

On the first of November a change in the price of The Daily Globe, Toronto, was made, which should greatly increase its circulation.

In the announcement of the change it is stated that the great reduction in the price of paper and the introduction of the typesetting machines have made this possible, but, considering the great expense that will incur in their efforts to secure all the news everyday and the exceedingly full reports that they will give of all important events, \$5 a year was not too much to pay. At \$4 per year their circulation should soon reach the 50,000 mark, especially as all the departments, including their excellent Saturday illustrated edition, are to be kept up to their present high standard.

**A SURE CURE FOR CONSUMPTION.**

There is no such thing. Scott's Emulsion comes the nearest to it, but even that will not cure advanced cases, but taken in time it will cure this disease.

Capt. Dreyfus, disgraced and imprisoned for treason in the French army, is said to have been permitted to escape, and the story is now so well authenticated that it will be made the subject of inquiry in the Chamber of Deputies. It is believed that the disgraced soldier was the victim of a plot.
