**UNITED STATES.**

The steamship **Adriatic**, now being built for the Collins line of steamers, will be, when completed, one of the largest and most magnificent vessels afloat. She will measure five thousand six hundred tons; her length will be three hundred and forty-five feet on the broad line; depth of hold thirty-three feet; breadth of beam fifty feet.  
 There is quite a curiosity in Bangor, in the form of a bed-room made from the sinews of a whale. It was brought into this country in 1640, and has been in possession of Uncle Tom. Colby, forty-seven years, in constant use, and never worn broken. It is as good as ever, and has been in the possession of the Colby family for two hundred years.  
 A man who was recently digging a cellar at Portage Lake, Michigan, found a mass of copper weighing 1,276 pounds, which bears evident traces of having been beaten and worked, until the rock was entirely separated, leaving the pure mass of copper. There are no indications of copper in the vicinity where the mass was found, and it is believed that the copper was brought from the Pennsylvania Prohibitory Liquor Law went into force on the 1st instant. The Law does not entirely stop the sale of liquor, but its force is chiefly directed against grog shops and other places where liquor is sold. It does not, however, interfere with the manufacture of liquors, nor with their sale or use within certain restrictions. Licenses to sell liquor by the quart may be issued to citizens of the United States, provided they are not the keepers of any hotel, tavern, restaurant, eating house, oyster house or cellar, theatre or other place of entertainment. Every person receiving a license enters into a bond of \$1000.

**COLONIAL.**  
 A private of the 17th Hussars, English, who was in all the battles in the Crimea, and who took a part in the attack on the Redan, has arrived at Montreal, he having got his discharge, with a pension of about 25 per day. This hero was wounded in several battles.  
 A vessel, providing £1000 of encouragement emigration to the islands passed the House of Assembly of Bermuda, on the 25th. All foreign steam mail packets in the regular employment of their respective governments, are exempted by decree from the large tonnage duties of the Act of 1841, on payment of the following tolls: For every such packet not exceeding hundred tons the sum of £3; packets not exceeding that measurement, £1 4s., for each time of the service.  
 A few nights since, Benjamin Lyon McKenzie was pelted with rotten eggs by the citizens of Brampton, Canada, while advocating a dissolution of the Union between the two Canadian provinces.  
**CANADA SEAT OF GOVERNMENT.**—On the 31st inst. at four o'clock, P. M., the Hon. Charles Buller, Governor of Canada, from Quebec to Toronto, was officially accompanied. His Excellency Sir Edmund Head Governor General of the Province took the cars of the Quebec and Richmond Railway, by the station of the former city, attended by a number of honours and saluted by the guns of the royal artillery, at Durham Terrace. Previous to his departure from Government House the judges, magistrates, city corporation and others waited upon and took leave of his Excellency.

**CRUOUS FACT IN SCIENCE.**—It is a curious fact in science that glass resists the action of all acids, except the fluoric. It loses nothing in weight by use, or by contact with any substance other than all other substances of receiving the biggest degree of polish if melted several times and afterwards incorporated in the furnace, receiving a yellow tinge, which is due to the brilliancy of the blue for ages. Most of our cut glass is bedded in glass, can be made to retain for ever their original purity and appearance.

Mr Carmichael, the celebrated marine painter, who was present and sketched the scene on the 25th inst., intends to paint a large picture of the event, which is to be afterwards engraved.  
 It is reported that the demoralization of the Russian Army is complete, and such was the confusion from the first moment of the assault of the Allies upon Sebastopol, that the soldiers became exhausted with fatigue, having remained in the trenches for several days without rest. The loss of the Russians during the bombardment and assault is estimated at 18,000 men. On the 25th inst. the Russian Government issued three days and a half. The victory was not altogether one over the Russian stronghold, but it annihilates the long running naval power of the Russians in the New Orleans receiving a fearful tempest had occurred at Sebastopol, followed by heavy rains. Sebastopol is to be razed and the basins filled up.

**PRICE OF LAND IN LAKE SUPERIOR COUNTRY.**—A piece of land containing about 150 acres, situated in the town of New Orleans, Durol Superior, was recently sold at public auction, under an order of the Judge of Probate, for the most sum of money. The land was a very fine piece of land was located by a coloured man, now deceased, a few years since, and purchased by him from the government for \$1 25 per acre. The lot is sold for the benefit of his wife and children.

**RETURNS OF PROPERTY IN NEW ORLEANS.**—The returns of property in New Orleans, Durol Superior, we never remember to have seen such confidence and cheerfulness amongst the business men of the city at the close of the most important and successful campaign for those interested in cotton, sugar, molasses, dry-goods, and newspapers, and we would not be astonished to see the New Orleans receiving a fresh ahead this winter, such as has not been witnessed since '51 and '52.

**THE BIRD HUNTER.**  
 Lieutenant Gibson's explorations in the valley of the Amazon, present to the reader many interesting features. We clip the following in relation to the bird-hunter.  
 There are a few individuals among the Creoles of Santa Cruz who understand the art of collecting and preserving the skins of birds and mammals. They are distinguished by stuffing birds with cotton, to be boxed up and exported. The bird-collector differs from the burg-thatcher; he is found on the plains as well as in the mountains. In the former is good powder, in small tin canisters, different sized shot, and a small quantity of quicksilver. In the latter is a tin of powder, a few drops of quicksilver in a small piece of paper, and loads his gun with it instead of shot. The quicksilver knocks the humming birds and other small birds in the air, besides the plumage; it stuns, and before the bird recovers, the sportsman has him in hand. After the bird is shot, the hunter takes the bird kind, he then becomes difficult to please; he wants the beautiful songster who sits at the base of the Andes, and sends forth his music in a single note, and he is very desirous to see the feet by night sleep in daylight; some steal the eggs of their neighbours; others drive away the parents, feed and rear their young, or take the eggs in their own nests, and be a faithful owner. All these birds we see around us have their regular hours for feeding, singing, bathing, roosting, and sleeping.  
 We met a lady hunter on Trinidad; he had been at two years collecting near six hundred different kinds. He was of opinion there are over a hundred species of night and day birds to be found in the Maricao Park, besides snakes, lizards, and any quantity of insects. Trinidad was his headquarters, from which he branched his various excursions during the dry season. His room was a perfect curiosity shop. The birds were rolled up in paper after they had been properly cured, and stowed away in boxes and drawers. He was out at different hours, he went to the field; after days of labour, he would be seen returning with a single bird, differing from any in his collection. He procured his snakes by striking the end of a stick to form a fork, which he places over the neck of the snake, and holds him till a good quantity of blood is drawn. He then loosens his fork and the snake crawls into the cavity. He then corks the cork and puts it into his pocket. After the snake starves to death or suffocates, he is preserved in alcohol, or preserved, and stuffed, ready for transportation to the museums of the civilized world.

During the rainy season, the bird-hunter enters a cave, and traps a number of the various animals are collected together. He obtains many species there, which would require a length of time to follow up, and fill us cause with venison and deer skins.
