

Reviews New Activities In Agriculture Dep't,

Following is the text of the address delivered at the opening of the Agriculture Council Conference this week by Mr. W. R. Shaw, Deputy Minister of Agriculture:

"The normal policies of the Provincial Department of Agriculture have been fully detailed in previous reports presented to this Conference, and it will not be necessary to deal at this time with these policies, other than to state that our Field Service, supplemented by temporary employees, has rendered a valuable contribution to our Extension Services. There has been a consistent build-up of existing policies in the production and organizational phases of work.

"During the year a number of new activities have been undertaken. The Department supplied financial assistance to grain growers during the period in which the crops were attacked by cutworms, and the prompt action taken in this respect undoubtedly offset serious losses that might have otherwise occurred.

"Junior activities were expanded through special features such as tours and Field Days, and a central Calf Club Competition held in September at the Exhibition Grounds was so successful that plans are now underway to make a centralized two-day event involving all Junior activities, an assured project for the year 1951.

"A remodelled Leadership Course, held during the present month, based on student participation and involving training in social activities, proved highly satisfactory, and pointed the way to distinctive improvements in future activities of this kind.

"The Department of Agriculture gave assistance during the year 1950 to students who attended the Graham Scientific School for Animal Breeding held at Newark, New Jersey. Great satisfaction was expressed regarding the value of this training by all participants, and the training thus received by young farmers selected from various parts of the Province should be of inestimable value to the livestock industry. Temporary assistance was also supplied in the work undertaken at the Provincial Agricultural Laboratory.

Grain Silage

"The Department has undertaken an aggressive practice regarding grass silage and about one hundred and twenty-five tons of grass were saved in a pit silo at Falkwood Farm. Feeding of this excellent roughage was started on the Falkwood herd in August and there will be a sufficient supply to last until the last of February or perhaps later. The experiment has indicated a successful departure in cattle nutrition, and has materially reduced operational costs.

In addition, pea, oat, and vetch, and corn silage, have been produced, and have added a large volume of acceptable feeding materials to the farm supplies. Improvement in pasture techniques have also been undertaken, along with the seeding of fall rye, which has been utilized as a soil cleaner and fertilizer. Plans are under way to expand our studies regarding all these developments.

Feed Seed Survey

"During the year a field seed survey was conducted and samples of grain were secured out of seed drills in actual practice. One hundred and fifty-four samples of oats, ninety-three of mixed grain, six of barley, and six of wheat were collected. These were properly recorded and tested for grade and germination.

The number of samples graded No. 1 were pitifully small. The great bulk went into the "Reject" class, chiefly because of weed seeds. It is rather singular that the bulk of the samples were either hand or power cleaned and the results would show that there is a general and unfortunate carelessness in the operation of seed cleaning equipment.

The question of better seed for Prince Edward Island farmers rests primarily with the farmer himself. This Council, however, in collaboration with both Federal and Provincial Departments of Agriculture, can do a job on educational work and the improvement of operational activities in cleaning plants. There would seem to be very little justification in this day and age why a farmer should be seeding out over one million weed seeds per acre in his seed grain. Nevertheless, that has been ascertained to be an actual fact in some cases.

Marketing Practices

An intensive study of marketing practices has been undertaken and distinctive improvements in the marketing of farm products has been established. Dairy producers have drawn closer together in a common attempt to sell butter and cheese on a cooperative basis. Cold storage facilities have been established at Charlottetown and the packaging of butter in an attractive one pound unit has received favourable market recognition. Strong educational programs have been conducted among the farm people, and a potato Marketing Board has been launched and is now operating. The trend is strongly in favour of further activities, aimed at improvement in quality and marketing practices. The application of inspection services, and the grading of fruits and vegetables on the domestic market, has favourably influenced the quality of farm products handled through retail channels.

"Aside from further needful developments in marketing practices there is obviously a great field of work in production that requires further investigation. The whole system of cattle breeding is calling for a drastic overhauling, while an improved field crops program is awaiting immediate action.

"These problems are on our doorstep and knocking for admission to these Councils. They are a challenge to this Conference, and to all who profess to be leaders in Agricultural and Extension Services in this Province."

Let's Talk It Over

A Prince County Viewpoint

The "Stop-and-Go Boys" are one of the latest developments at Summerside High School. Motorists who two months ago drove with considerable trepidation down the sections of Summer and Green Streets which face the school, lest thoughtless urchins run directly into the path of their cars, have no such fear any more. Members of the Grade VIII classes have been organized into a Traffic Safety Patrol.

The patrol rigged out in bright yellow storm coats with "School Safety Patrol—A.A.A." prominently displayed on the back, carry out their duties with efficiency, and the rest of the student body cooperate splendidly, obeying without question every order signalled while the patrol is on duty.

Seven cardinal sins against traffic safety are impressed on the students: I Crossing against a patrol member's signal. II Crossing diagonally at an intersection. III Running across the street. IV Playing on the street. V "Hopping" a ride. VII Hitchhiking on while riding a bike.

The patrol captain has a record book where a careful record of operations is kept—attendance and performance record of each patrol member. The patrol records are inspected by the teacher-supervisor at the end of each month, and at the end of the semester the record is forwarded to the A.A.A. Motor Club which sponsors these patrols.

Another interesting feature of the traffic safety program developed by the A.A.A. Motor Club is the provision to give instruction to grades from I to IX on traffic safety principles. It is felt that students who receive this instruction year after year develop a "street sense" and instinctively do the right thing when confronted with the perils of the modern highway.

The instruction is made as interesting as possible with demonstrations and other activities when practicable. A guide book is furnished with bicycle, pedestrian safety, etc., are available and there is an interesting little playlet entitled "Bet You Don't Dare" which shows boys and girls the wisdom of the "safety first" principle and the folly of daredevil stunting.

Strange when you come to think of it that this type of instruction has not been given long before this. We attempt to give our students an appreciation for cultural values, to fit them for citizenship and for vocations they will follow in later life. We aim to give them tools with which they may fashion for themselves a full and satisfying life. Does it not seem reasonable and imperative that we give them also something that will tend to minimize the chances of their lives being embittered by crippling accidents or snuffed out in sudden tragedy in this modern age when a lethal weapon like the motor car has outstripped some of the engines of war.

These safety patrols should be organized in all schools, and instruction in the vital business of self-preservation on the public highway should have an important place on every curriculum.

IN MEMORIAM

BRENTON LEARD

There passed away at the Provincial Sanatorium on November 17th, 1950, of George Brenton Leard son of the late James and Mrs. Leard of Borden, P. E. I., at the age of fifty-four years. Brenton as he was well and favorably known was born in North Tryon, and moved to Borden in 1929 and entered the employment of the C. N. R. For a time he served as Town Councillor and later as Fire Chief for the Borden Fire Department.

He leaves to mourn besides his mother, two daughters, namely, Mrs. Kenneth Boulter, Mrs. John Boulter, both of Victoria and one son, Percy Delaney of North Tryon, besides a large number of relatives and friends.

The funeral service was held from the home of his brother-in-law Mr. Percy Delaney on Sunday, November 19th, and was largely attended. The service was conducted by Rev. D. M. Fraser, Bedeque, assisted by Mrs. Mary A. MacKenzie, Presbyterian Deaconess, North Tryon.

The hymns sung were "Asleep in Jesus, Shall We Gather at the River, O That Will be Glory for Me."

The pallbearers were Donald MacDonald, Leslie MacDonald, Clinton Whitley, Fred and Willard Leard. Interment in the North Tryon Presbyterian Church Cemetery.

The floral tributes were beautiful.

Card Of Thanks

Mrs. James Leard and Mrs. Percy Delaney wish to express their thanks to the many kind relatives and friends who assisted them during the illness and death of their son and brother. Also all who sent messages of sympathy, Doctors and Staff of the Provincial Sanatorium. Also Rev. D. M. Fraser.

WIDE ENOUGH

The minimum width of the Suez Canal is 196 feet 10 inches.

STATE EDUCATION

Education in Finland was transferred from the church to municipal authorities in 1866.

Alberton and Vicinity

Mrs. Anne McEwen is visiting in Montreal.

Friends of Mr. Craswell Weeks are sorry to know of his illness.

Mr. and Mrs. Sam Meyers, St. Louis, were recent visitors to Alberton.

Mr. and Mrs. Wallace Hogan have returned home after spending a month with their sons in Halifax.

Mr. and Mrs. Frank MacDougall, Bloomfield, were visitors to Alberton on Sunday.

Miss Iris MacDonald has accepted a position as switch board operator with the Island Telephone Company.

L/Cpl. Clarence MacDonald, who is stationed at Petawawa, Ontario, spent a pleasant two weeks with his parents, Mr. and Mrs. Edwin MacDonald.

The only dry cleaning plant west of Summerside was opened at Alberton on Monday, January 15th. The proprietor of West Prince Dry Cleaners is Carl H. Weeks, well known Alberton business man, and the operator is Albert Clarke. The plant is equipped with new, modern machinery and a two-day service is offered to customers.

The plant, which is located on north Main Street, is housed in a frame building, fifty by thirty feet, finished in asphalt brick siding. Most of the construction was by local workmen. Plumbing and electrical work was done by Arthur J. Bernard. Machinery was purchased from the Hoffman Machinery Company of Newmarket, Ontario.

Present at the January meeting of the Town Council were Mayor C. R. Profit, Couns. Moran, Currie, Corbett and Weeks. Bills amounting to \$182.40 were passed. A letter regarding vandalism in the Town was read and discussed but since the matter referred had already received attention no action was taken. In response to letters received from a committee of the Council, letters from Public Utilities and the Maritime Electric Co. Ltd. were read and filed. The Street Committee reported new culverts laid on Elder, Dufferin and Reid Streets. It was voted to accept and carry the cost of a notice being posted forbidding that cars be parked on streets in the town in such a way as to obstruct the streets or interfere with the snow plow. The Street Committee was instructed to have the policeman notify the proprietor of a garage to remove any cars under his control that are obstructing the street. It was decided to hold a special meeting on January 22nd to make arrangements for the election on February 6th.

The Christmas closing of Montrose School was held on December 22nd when the following programme was presented: Christmas Carols—All Pupils; Recitation—"Curious Ted"—Heather Fraser; Dialogue—"Boys' Rights"—Five Senior Boys; Recitation—"Evening Prayer"—Blair Barbour; Quartette—"Forever and Ever"—Recitation—"Women's Institute"—Hugie Morrison; Lullaby—"Hush, Dolly Darling"—Eight Little Girls; Recitation—"A Pound of Jumps"—Shirley Pridham; Dutch Carols—Melnie and Nellie Van Den Bor; Recitation—Allison Bonness; Intermersion and sale of candy; Dialogue—"An Official Visit"—Senior Pupils; Christmas March—"Jingle Bells"—Eight Little Girls; Song—"Silver Bell"—Senior Girls; Recitation—"Satisfaction Guaranteed"—Pauline Gordon; Nigger Comedy—Five Senior Boys; Goodnight Song and Drill—Eight Little Girls; Recitation—Arlene Dunbar; Closing Exercise—Judy Campbell and Judy Fraser. Santa Claus then arrived, bringing with him Mrs. Claus, and provided much merriment for young and old.

A special feature of the January meeting of Alberton Women's Institute was a colored film and a demonstration of the new colorizer paint. The difference between ordinary paints and colorizer paints is that the coloring matter for the latter comes in small tubes and the contents of these tubes are added to cans of white or gray base to give the desired color. The fascinating advantage of this method of color production is that by use of one tube, or a combination of two, one may obtain any one of 1322 tints and shades. Even small stores carrying this kind of paint will be able to supply any of these shades. Perhaps it sounds too good to be true, but "seeing is believing" and each member present at the meeting chose from the colorizer album the color of paint she would like to have in either interior gloss, semi-gloss, flat, velvet or enamel, and then and there the demonstrator mixed the color and finish of her choice and gave her the free sample can to take home. Each member also received a set of booklets illustrating many delightful color combinations for every room in the house.

The Women's Institute met at the home of Mrs. Gordon Coffin. Business was conducted by the president, Mrs. C. H. Weeks. Minutes were read by the secretary, Mrs. Don Campbell and approved. In the absence of the treasurer her report was read by Mrs. Clayton Travers. Balance on hand is \$6.91. Bills were ordered paid. Mrs. Clayton Travers and Mrs. C. H. Weeks were appointed to the Visiting Committee. Hall and School Committees were reappointed for another month. The School Committee was authorized to spend a limited sum of money to have the extra room at the school fixed up for a playground. Among the correspondence was a very fine letter from the Social Welfare Convener, Mrs. MacKinnon. The Institute, which sponsors the local Scout Troop, was asked by the assistant Scoutmaster to have the Group Committee reorganized. The matter was left to the executive. The collection am-

WESTERN GUARDIAN

—SKATING CRYSTAL PINK this afternoon, 3.00 to 5.00. Hockey tonight 9.15.

Certificates will be presented to the students from the Sunday School who took the examinations in the Temperance Course. Oleary at 7.30 P. M. O'Leary Sunday School, 8.00 A. M. Everybody welcome at all services.

O'Leary United Church Holds Annual Meeting

On Thursday afternoon, Jan. 11th the annual meeting of the O'Leary United Church congregation was held in the Sunday School room of the Church with the Minister, Rev. W. G. Dickson, presiding and conducting preliminary worship. Reports showed that the year 1950 was a most successful one, both financially and spiritually. The Baby Band report was presented by Mrs. John Matthews. They raised \$22.75. Mrs. Lewis Bernard presented the report of the Mission Band. They took in the fine total of \$63. The Canadian Girls in Training report was presented by Mrs. W. G. Dickson and this active and eager group of twenty teen aged girls had an interesting and successful year. They made contributions to the Manitoba Flood Relief Fund, the Missionary and Maintenance Fund of the Church, the W. M. S., etc.

The Church has one of the largest Sunday Schools in the district with an enrollment of one hundred students. For over half a century the active and indefatigable superintendent has been Mr. A. J. Matheson who has taught the Young Peoples Bible Class. In addition Mrs. A. J. Matheson has been the Sunday School teacher of the Girls class for almost as long as her husband. The meeting was held at the end of May, because of advancing age, Mr. and Mrs. A. J. Matheson would be compelled to leave the work which is very dear to their hearts—the Sunday School work. Tribute was expressed by the Minister for the unselfish devotion and faithfulness of Mr. and Mrs. Matheson for over fifty years and the great gratitude that the Church owed to them. A fine financial report was read by Mrs. Herbert Vatcher. The Sunday School agreed to donate one hundred dollars to the Mount Allison University Fund campaign. They previously donated fifty dollars to that worthy project.

Mrs. A. J. Matheson reported that the W. M. S. and its affiliated groups, the Evening Auxiliary, the Mission Circle, the Baby and the Mission Bands had raised the magnificent total of five hundred and thirty-eight dollars for missionary purposes. This is the largest amount given for many, many years. The report of the Evening Auxiliary was given by Mrs. Lewis Bernard.

The Minister gave a most encouraging report of the Young Peoples Union who had a splendid year. They contributed to all worthy projects such as the Manitoba Flood Relief etc. They donated fifty dollars for the Missionary and Maintenance Fund of the Church. They paid \$20.00 for the O'Leary community projector and purchased twenty-five hymnaries for the church. The active President is Miss Hester Boates. The Ladies Aid report was presented by Mrs. John Matthews. This active group of ladies had a splendid year and made a number of improvements on the manse.

The report of the congregational finances was presented by Mrs. Vatcher and it was a very encouraging one from every standpoint. The Minister thanked Mrs. Vatcher and Mrs. John Matthews for their work as the joint treasurers of the congregation. He thanked the choir leader, Mrs. J. M. MacWilliam and the members of the choir for their fine service, also the trustees, stewards etc. and all who had contributed to the very successful year. He spoke of the fine Church Vacation School conducted in July by Miss Anna MacLeod of Glace Bay, N.S. and Miss Evelyn Underhay of Bay Fortune, P. E. I. The meeting hoped that these talented young ladies could return this year for another Vacation School. The Missionary and Maintenance Fund raised the allocation of \$360 and had \$22.00 over-subscribed. The pastoral charge will send away this year over \$500. to the M. and M. Fund. The meeting closed by the Benediction. — O

Farm Prices & Market Report

Supplied by the Provincial Department of Agriculture:

The following is the report on Egg production on Prince Edward Island continues to show a general over all increase. In some sections this increase is more pronounced, while in others, gains are slow. Sales are orderly and there is no apparent accumulation of stocks on dealers' floors. All shipments are moving to other Maritime points and Newfoundland. Reduced prices are expected to stimulate retail sales which have been steady.

Registered grading stations are now quoting for ungraded eggs AL 35, AM 31, AP & B 28, C 19. Dealers are paying for the graded pack fob station AL 37, AM 35, AP & B 32, C 26. Wholesalers are quoting retailers for AL 40-2, AM 38-40, AP 35-36, B 36, C 30. Consumers are paying for Grade A Large 55-7, A Medium 53, A Pullet 43 (these are cartoned egg prices) and for Grade B loose 43-5. Poultry receipts are very light. All prices remain unchanged from last week.

Dairying

There has been no change in the price of butter on the Nova Scotia markets during the past week and factory prices are quoted at 59c f.o.b. Halifax, with Local Jobbing at 61c.

In New Brunswick the supply of butter is quite limited but creameries and distributors are doing a good job in supplying the trade without injurious effects. All wholesalers and distributors favoured continuing last week's butter prices, which are creamery to wholesalers, one and two pound flats, 58 1-2c; wholesale to retail stores, 60c.

The price of butter has not changed during the past week on the Charlottetown markets and the wholesale price is quoted at 59 1-2c f.o.b. Charlottetown, with Local Jobbing at 61c. The demand for Island butter is very strong and stocks are clearing very rapidly. A preliminary figure of Island butter stock, January 1st, 1951, is placed at 271,000 lbs. including the stock held by the Board; however this figure may be reduced when the revision is complete. The stock of butter within the Province, January 1st, 1950, was 534,000 lbs. including that held by the Dairy Products Board. At the beginning of business, January 1st, 1951, the stock of creamery butter on hand in Canada amounted to 39,721,000 lbs. This total was lower than last year by 16.4 million pounds. The five year average stocks are 43,520,000 lbs. The December, 1950, out-of-storage movement was 13.1 million pounds, compared with a similar movement of 10.3 million

pounds last year.

The production of butter in Canada for November and December of 1950, was 18% below that of 1949 and there was a total decrease for the year of 6%, representing approximately 15 million pounds. It would be observed, however, from these figures that there will be a great shortage of butter in Canada before the next production season, even though there are 4 1-2 million pounds ordered from New Zealand, to be delivered about the middle of February. It may also be observed from these figures that the stock of butter is considerably lower in this Province than last year.

"If there should come a shortage in butter supplies," states Deputy Minister W. R. Shaw in his report, "there might be an argument in this Province for the opening of our markets to substitutes. I would urge upon our producers and creamery operators the importance of increasing if at all possible our production of butter. We are, no doubt, running under normal demand. As long as we are able to satisfy that demand and possibly produce a little surplus there will not be very much difficulty regarding our dairy position.

"If, however, there should come a shortage and butter supplies not be available, the consequences might be dangerous to the position of dairying in this Province. I am again rather alarmed regarding the exodus of dairy cattle and weifers and beef calves from the Province. What will be the position in two year's time in our dairy and beef production? Is this a penny wise, a pound foolish policy? It is true young animals are in keen demand and at good prices but there is no evidence that meat prices are going to collapse. Farming is always a long term policy and we must look ahead to our requirements and our position in future years rather than just at the moment. The lowering of our livestock population by the abnormal disposition of breeding females is not good in distance, judgement and practise.

It may seem a little early to mention this commodity but I would like to throw out a warning and a suggestion. What were your wool prices in 1950? It is true that advances took place at the latter part of the season when wool was out of farmers' hands. It is also true that itinerant buyers, from mainland points particularly, roamed up and down this Province and bought wool at less than half of its value at the time. If you have wool for sale why not sell it through established local mills or where it will be used to develop provincial industry, or through the Prince Edward Island Sheep Breeders' Association where you will receive at least the top market price at the time the wool is sold. The market for 1951, in view of world conditions, should be strong. Take good care of your sheep and your wool clip this year and do not let the product slip out of your hands at a lower than market value."

Livestock

There were no major changes in the price of livestock in the Maritime this week. Sow prices at Charlottetown were down \$1.00 and there was a slight upward revision in certain classes of beef cattle.

Montreal cattle prices were slow and at lower levels. Bulls were strong at 23.00 to 26.00. Calves were easier with hogs reasonably steady.

The following is the detail:

At Moncton: Hogs: Grade A 31-25; B1 30.85; No. 1 sows 27.00; No. 2 26.00 hot dressed weight delivered. Cattle: F. o. b. country points. Steers: Choice 27.00; good 26.50; medium 25.00; common 18.00 to 23.00. Heifers: Choice 26.00; good 25.00; medium 23.50; common 18.00 to 22.00. Cows: Good 19.00; medium 18.00; common 17.00; canners and cutters 15.50 to 15.00. Bulls: Good 21.00; medium 19.50; common 18.00.

Calves: F. o. b. country points. Choice 27.00; good veal 25.00; medium 23.00; common 20.00; grassers 18.00 to 19.00.

Sheep: F. o. b. Good 15.00; down to 8.00 for common. Rail Grade 36.00 for A Grade.

Lambs: F. o. b. Good and choice, alive, 27.50. Rail Grade 65.00 delivered for Grade A.

At Charlottetown: Hogs: F. o. b. country points. Grade A 30.25; B1 29.65. No. 1 sows 25.00; No. 2 24.00. Cattle: Delivered.

Stears: Choice 25.00; good 24.00; medium 23.00; common 17.00 to 20.00. Heifers: Choice 24.50; good 23.50; medium 22.50; common 17.00 to 20.00. Cows: Good 20.00; medium 18.50; common 15.00 to 17.00; canners and cutters 11.00 to 14.00. Bulls: Good 20.00; medium 18.00; common 16.00 to 17.00.

Calves: Delivered. Choice veal 24.00; good 23.00; medium 22.00; common 19.00; grassers 16.00 to 17.00.

Lambs: Delivered, good and choice alive 24.00. Rail Grade 57.00 Grade A.

Sheep: Good and choice 11.00 alive. Rail Grade 24.00. Grade A up to 70 lbs.

Potatoes

The following are the market quotations at various points in the Province:

Wellington: Light movement in seed. 45c per bus. at car for Katahdins, Mountains, and Sebagoes. Tablestock 50c per 75 lbs. at car.

Summerside: Light movement in tablestock. All varieties 50c per 75 lbs. at car. Sebago seed 40c per bus. at car. Heavy movement to boats at Halifax.

Borden Line: Light movement in tablestock. 50c per 75 lbs. Heavy movement in seed — 45c per bus. at car.

Colville and Wiltshire: Considerable seed moving at 40c—45c per bus. at car. Light movement in tablestock—45c per 75 lbs. at car. No turnips loading.

Charlottetown: Seed — all varieties — 45c per bus. Tablestock all varieties, 50c per 75 lbs. Turnips 32c per bus.

Murray Harbour: Several cars Cobler seed moving at 45c per bus. at car. Tablestock 47c per 75 lbs. at car. Normal movement.

Vernon River: Sebago seed 42c per bus. at farmers' yard. Tablestock Mountains 50c per 75 lbs. at car. Tablestock Sebagoes 45c per 75 lbs. at car. Turnips 35c per bus. at car. Reasonable movement in seed, tablestock and turnips.

Cardigan: Sebago seed 40c per bus. at car. Tablestock 45c per 75 lbs. at car. Considerable stock moving to Georgetown for boat.

Morell: Fairly good movement in Cobler and Sebago seed. 45c per bus. at car. No tablestock or turnips moving.

Souris: Small boat loaded tablestock at 45c per 75 lbs. Katahdin and Sebago seed 40c—42c per bus. at car.

Elmira: Steady movement of seed. F. A. Katahdin No. 1 — 42c per bus. at car. F. A. Cobblers No. 1 45c per bus. at car.
