

# See Bahamas Strike Symptom Of Long-Simmering Unrest

By SEAGHAN MAYNES

LONDON (Reuters)—The general strike of Negro workers in the Bahamas, resort islands off the Florida coast, is seen here as an erupting symptom of long-simmering political unrest in the British colony.

The Negro population in the dollar-rich chain of islands outnumbered the white population by about 10 to 1 but has only token representation in the colony's government.

The Negroes want a bigger say in the administration and the removal of property restrictions which prevent many of them from voting.

Final authority at present rests with the governor and commander-in-chief of the islands, Sir Oswald Raynor Arthur. He was named to the post about a year ago after some 30 years in the British colonial administration.

**HAS VETO POWER**

The governor has the power to veto over any legislation presented to him. He is assisted by an all-white nominated executive council.

There is a legislative council—corresponding to the British House of Lords or the Canadian

Senate—made up of eight white members and one Negro member, appointed by the governor.

There are 29 members in the house of assembly, elected every seven years. Twenty-one of these are white and eight Negro.

Voting restrictions also are a cause of growing discontent among the island's 90,000 Negroes.

**NO FEMALE VOTE**

Male residents must own land worth at least £5 or occupy houses with an annual rental value of £2 8s to qualify as electors on the main island of New Providence, where Nassau is located. On the outer islands, the amounts are cut by half. Women have no vote.

Membership in the house of assembly also is restricted to men with real or personal property worth at least £200.

Adding to the discontent is the constant reminder to many of the poorly-paid Negro workers of the wealth around them. Wealthy tourists—most of them from the United States and Canada—live in luxury in ultra-modern beach hotels while most Negroes are crammed into dingy, dimly-lit homes.

# St. Peter's Cathedral Holds Congregational Meeting

A highlight of the annual meeting of the congregation of St. Peter's Cathedral on Monday night was the report on missionary work in addition to the assessment of \$1000 for the support of the Bishop Synod, and nearly 75 per cent of the debt incurred in the rebuilding of the west end of the Cathedral and other repairs to the fabric has already been paid off by the congregation. During the year the Women's Guild made fine contributions of \$1000 towards defraying this debt.

Messrs A. Cameron, Paul Kays, T. H. Morris and W. Shama were elected to join M. Blake, F. S. Carbone, G. R. Foster and A. H. Peake on the Vestry. Paul Kays succeeded A. C. R. Hayes as Treasurer. Delegates to Synod are H. B. Armstrong and T. E. MacNutt, with F. W. Hyndman and G. E. Sherren as substitutes. Delegates to the Diocesan Church Society are A. H. Peake, T. B. Peake, and G. E. Sherren.

**DIOCESAN SYNOD**

The congregation looks forward to its share in welcoming to Charlottetown on June 3rd, 5th, The Bishops, Clergy, and the Delegates of the Synod of the Diocese which will meet in this city for the first time.

The meeting was chaired by the Rector, the Rev. Canon G. E. Moffatt, who thanked the congregation for the genuine accomplishments of the past year and also asked them to consider certain aspects of parish life which needed revitalising.

Our meetings, and that the meetings be held on the second Monday of the month. Next meeting to be held at the home of Fred MacRae on December 9th. Roll call for next night to be answered by "What I would Like For Christmas." Ten members paid their dues for 1958. Members to study pages 3 to 9 of their handbook.

Bloyce and Eileen MacRae told the Club members about their trips to Toronto and Amherst.

The Wheatley River Calf Club met at the home of Fred MacRae on the 9th of December. Owing to the absence of the President, it was moved and seconded that Bloyce MacRae act as President for the evening.

The meeting opened by repeating the Club Pledge. The roll call was answered by six members and two visitors naming "What They Would Like For Christmas." The minutes of the last meeting were read and approved, after which Miss MacMillan gave an interesting talk on table manners. It was moved and seconded that our meetings be held at 8 p.m. and finish at 9:30 p.m.

Next meeting was held at the home of Sterling MacRae on January 13th, when roll call was answered by naming a table manner.

# MONTREAL AGRICULTURAL NEWS

**P.E.I. Department of Agriculture**

**LIVESTOCK OUTLOOK**

Output of livestock from Canadian farms in 1958 is expected to be greater than in 1957 by about eight per cent and may break the all-time record set in 1944. If this increase materializes, supplies of livestock and meat will probably outstrip the growth in domestic demand.

Fortunately for Canadian producers, production in the United States is expected to show no increase and the demand for meat in the United States is likely to increase at least as fast as population. Increased imports of livestock and meat into the United States are not likely to satisfy this deficit and the general price level of these commodities in the U.S. is expected to rise above 1957 levels. This points to increased competition from U.S. buyers on the Canadian livestock and meat market.

**CATTLE**

According to the Dominion Bureau of Statistics there were 2.2 million beef steers and heifers on farms at June 1, 1957, almost eight per cent more than a year earlier. Although slaughtering of female stock have increased more rapidly than total numbers in the past few years, and the cyclic downturn in numbers is historically a year overdue, there is still no conclusive evidence of an inventory reduction. However, a prolonged winter or widespread drought could encourage liquidation of breeding stock.

It is estimated that net marketings of cattle during 1953 will be approximately 2.2 million head, up about five per cent from the estimated 1957 figure, and a new record. This volume of marketings, coupled with lower prices for work, should keep prices of Canadian cattle at export levels except perhaps, during the early part of the year when supplies of high quality beef are likely to be short. Prices during that period may be above U.S. levels.

Since beef production in the United States during 1958 is expected to be lower than in 1957, and a new record in total meat production, the outlook for the country is for cattle prices to be higher than a year earlier. This increase is likely to be reflected in Canada, particularly during the latter half of the year. Consequently, per capita domestic disappearance of beef in Canada will likely decline for the first time since 1950.

**HOGS**

Surveys of hog numbers on farms and production intentions of farmers, carried out by the Dominion Bureau of Statistics, indicate that hogs marketings during the first nine months of 1958 will be roughly 4.6 million hogs, representing an increase of 16 per cent in each quarter over marketings a year earlier. Prospects for the last quarter are more uncertain but there is very little evidence to suggest any decline during the 1.6 million expected during the last quarter of 1957. In fact, total marketings in 1958 are forecast at 6.2 million, up 11 per cent over 1957 and the highest number since 1952 when marketings reached 6.7 million. If this forecast materializes, prices will remain substantially below 1957 levels throughout the first nine or ten months of the year. How much they fall will depend partly on hog prices in the U.S. A. where, fortunately for Canadian producers, no comparable increase in production is in prospect.

Prices of Canadian hogs are expected to remain above prices of comparable grades in the U.S.A., the margin exceeding the normal quality margin, so long as Health of Animals regulations

# More Than 800 City Children Are Inoculated

Over 800 city school children were inoculated during the past week, Dr. L.M. Bonnell, provincial Minister of Health announced yesterday. Dr. Bonnell noted that these inoculations gave protection against one or more of three diseases: diphtheria, tetanus or polio. The Minister also stated that the re-vaccinations were carried out in grade eight only, and that all the city schools had been visited.

The Minister went on to say that this is an annual service of the Department of Health to the City schools. The clinics are operated by Dr. Burton Howatt, Health Officer, and the Misses Bessie Beer and Alice Trainor, Public Health Nurses. This was the first of three clinics to be held at four week intervals.

Most of the 800 children received reinforcing injections but in a few cases initial doses were administered, he said.

Dr. Bonnell added that parents of children who are to attend school next year should have their vaccinations against smallpox now. This is to ensure that the children will have a successful last October Convair. Also, children receiving the vaccination in the summer may be curtailed from such activities as swimming and other sports for a short period. Immunization clinics are held every Friday afternoon at the Health Centre on Prince Street and advertisements will appear from time to time in this paper publicizing these clinics.

**Regional clinics in rural areas will begin in the spring.**

# Well Backed Effort Can Put Vehicle on Moon in 10 Years

WASHINGTON (AP)—A well-backed effort can put a U.S. space vehicle on the moon in 10 years or so, rocket expert Kraft Ebericke told senators Thursday.

From the moon, he predicted, reconnaissance trips can be made to Mars and Venus.

(The moon is an average of 238,862 miles from the earth. Venus is 26,000,000 miles away in its nearest conjunction and Mars 48,600,000.)

Ebericke, a German-born rocket expert, now is chief space and satellite planner for the Convair division of General Dynamics Corporation. He expounded his ideas before the Senate preparedness subcommittee.

Ebericke testified that when Russia put its first satellite into orbit last October Convair "had a well thought-out plan for space operational capability."

Proposals have been submitted to the air force, he said, which call for:

1. Putting into orbit within a short time an earth satellite carrying a heavier load than Sputnik II. The Russian's second satellite was reported to weigh half a ton.
2. Putting a man into orbit in a recovery vehicle to set up reconnaissance stations in space. This would come within five or six years.
3. Shooting for the moon in about 10 years and reaching out to Mars and Venus.
4. Ebericke said the satellite program can get under way with missile and rocket equipment already developed. The Vanguard missile and a modified Jupiter-C rocket developed by the army are being used in present efforts to launch light satellites.
5. The Russian race of activity, Ebericke said, "is so much greater than ours we would have to do extraordinary things to catch up."

# 159 Attend Polio Clinic

Monday evening, 159 individuals received inoculations of Salk Vaccine at a general public clinic held at the Y.M.C.A. of the total number 30 were initial inoculations, 126 second and 3 thirds.

In charge of the clinic was Doctor P. Stewart, assisted by Mrs. Helen MacLeod, R. N. The administrative work was handled by Mrs. Rose Savage and Mrs. J. P. Gill.

The next clinic will be held in the Legislative Chambers of the Provincial Building Wednesday morning January 22 from 9 till 12. This will be the last scheduled clinic in the Charlottetown area.

Following this other clinics will be held in the Spring Park, Parkdale and Central Royalty areas. After the outlying districts have been completed a special clean-up clinic will be held in Charlottetown to enable those who have missed a previous clinic.

Abegevit Firefly 742927 (GP), bred by Hon. J. Walter Jones and owned by his estate at Charlottetown, P. E. I. has 847 lbs. fat from 15,823 lbs. of 5.35 per cent milk at 9 years on 2X. She has previous records up to 857 lbs. fat on 2X and 923 lbs. on 3X. Her 6-lactation average is 758 lbs. Sired by Abegevit Jack Pot (V.G.), she is from Abegevit Starburst (VG), Canada's second highest 3X fat producer with 1517 lbs. Crown Point Colleen, 962504 (V.G.), bred and owned by Cyril Jones, Charlottetown, P. E. I., has 5-year 2X record of 22,282 lbs. milk, 3.64 percent, 810 lbs. fat on Plan B. She made 18,223 milk, 675 fat at 3 years on 3X and 14,783 milk, 500 fat at 2 yrs. on 2X. Three times a winner at Charlottetown, she was reserve grand champion and Hon. Mention All-Canadian as a 2-year-old. She is Bargate Regal Matchmaker from Crown Point Posch Camay (VG), with 20,607 milk, 4.28 per cent, 881 fat in 305 days on 2X.

Diamond Hill Viny 850247 (V.G.), owned by O. J. Newson and Son, Clyde River, P.E.I., a seven year old cow, produced 10,375 lbs. of 871 lbs. milk, 649 lbs. butter with a test of 4.09.

# Three Island Holsteins Listed Top Producers

The following Island Holsteins are listed among the top producers in Canada during the month of January.

Abegevit Firefly 742927 (GP), bred by Hon. J. Walter Jones and owned by his estate at Charlottetown, P. E. I. has 847 lbs. fat from 15,823 lbs. of 5.35 per cent milk at 9 years on 2X. She has previous records up to 857 lbs. fat on 2X and 923 lbs. on 3X. Her 6-lactation average is 758 lbs. Sired by Abegevit Jack Pot (V.G.), she is from Abegevit Starburst (VG), Canada's second highest 3X fat producer with 1517 lbs. # Civil Case In Supreme Court

The Queen's Assizes of the Supreme Court opened yesterday morning before Mr. Justice Mark R. McGuigan with only one civil trial to be heard. The case involves claims for damages resulting from an automobile accident which occurred about two miles west of Cornwall on the Trans-Canada Highway on Saturday, October 12, 1957.

The plaintiffs, William G. Barnhill of Truro and his wife Alice C. Barnhill are represented by Mr. J. O. C. Campbell, Q.C., and the defendant James MacPhail of Argyle Shore is represented by Mr. R. R. Bell, Q.C., and Mr. Gilbert Gaudet.

Members of the Civil Jury are: George Dunsford, foreman; Preston Senter; John Grimes Jr.; Michael Murphy; Leith Reid; Leo M. Doyle and Andrew Murghan.

# Hanna Permit Is Extended

OTTAWA (CP)—The permit allowing George Christian Hanna to remain in Canada has been extended six months to June 16, Acting Immigration Minister David Fulton said Wednesday.

Hanna was allowed entry to Canada a year ago at Vancouver after spending months on a freighter. He said he had no citizenship papers.

Mr. Fulton, replying in the Commons to J. W. Pickersgill, former Liberal immigration minister, said the extension has been granted to determine whether Hanna will be a "good Canadian for the future."

# WANTED MANAGING DIRECTOR

for the P. E. I. CREDIT UNION LEAGUE

Details of employment, salary, etc., may be obtained by phone, writing, or calling at LEAGUE OFFICE — ROOM 10 Currie Building — Charlottetown P. O. Box 562 not later than January 28th, 1958

# Many Students Receiving Aid

OTTAWA (CP)—More than one-third of 9,922 students questioned in 28 Canadian universities during a survey of statistics students survey indicated they received some form of financial aid for the 1956-57 term.

The bureau said advance figures from the education survey indicate 32 per cent of students in the survey group had scholarships, bursaries or Reserve Officer Training Program help.

A small percentage studies on leaves of absence with all or part pay, or received money for service, research grants and similar sources of income.

Of the 3,174 students receiving assistance, 22 per cent received scholarships or bursaries and six per cent received ROTP aid.

Scholarships ranged from an average value of \$1,000 for graduate students to \$127 for classical students while bursaries averaged from \$759 to \$325 for graduates and classics.

Under the ROTP plan, engineering students received the largest average grants—\$1,264 while students in education averaged grants of \$55.

The average student shelled out \$1,225 for the university year, although some made it on \$944 and it cost others \$1,587 or more.

Costs of the year varied with faculty and groups, ranging from an average of \$902 in classical colleges to \$1,640 and \$1,734 in law and medicine faculties.

The studying away from home generally spent from \$200 to \$300 more than those living at home. Summer earnings averaged \$449 and 88 per cent of the survey group worked during the summer.

# Theatre Guild Held Meeting

The regular meeting of the Little Theatre Guild met at the home of Mrs. Fred Ranahan, Monday evening. It has been decided that due to the illness of the director of "The Middle Watch," which was to be held in February the play will be postponed indefinitely.

The executive has been fortunate in retaining this by a three act Comedy, "See How They Run", produced by Montague Dramatic Club.

This play was being prepared for entry in the Regional Drama Festival.

The L. T. G. felt since the Regional Festival had been cancelled it would take advantage of this opening to present this excellent play to Charlottetown "theatre-goers."

A production for March and the annual Children's play in April will bring the season to a close.

**AUSTRALIAN CITY**

Melbourne, capital of the Australian state of Victoria, was founded in 1835.

# NEW YORK

**NEW YORK (AP)**—The stock market went through a mixed session Tuesday with most changes narrow.

The blue chips performed differently, but a host of the lesser-known and cheaper issues got some play and moved ahead as trading interest spread to them.

The Associated Press average of 60 stocks was off 40 cents at \$160.60 with industrials down 20 cents, rails down 90 cents and utilities down 20 cents.

Avco was the most active stock up 3/4 at 7, at 74,600 shares. Second was Royal Dutch unchanged at 38 3/4 on 56,200 shares. Third was Thompson Products up 2 at 49 1/4 on 37,900 shares.

International Nickel led an active Canadian section on the New York exchange, gaining 5/8. Other gainers were Distillers-Seagrams and Canadian Pacific, up 1/4 each; and Aluminium Ltd. and Granby Mining, 1/2 each. McIntyre Porcupine lost 1/4, Hudson Bay Mining 1/4 and Dome Mines 1/4.

Most Canadian issues on the American exchange, Brazilian Traction and Preston East Dome each gained 1/4. Richwell lost 1-1/8.
