

P. E. Island Railway

On and after MONDAY, 4th January 1897, the trains of this Railway will run daily (Sundays excepted) as follows—

Trains Outward	Read down.	STATIONS.	Trains Inward	Read up.
6:10 P. M.		Charlottetown	6:10 A. M.	
6:30 P. M.		Royalton Junction	6:30 A. M.	
6:45 P. M.		North Wilshire	6:45 A. M.	
7:00 P. M.		Hunter River	7:00 A. M.	
7:15 P. M.		Bradshaw	7:15 A. M.	
7:30 P. M.		Emerald	7:30 A. M.	
7:45 P. M.		Freetown	7:45 A. M.	
8:00 P. M.		Kensington	8:00 A. M.	
8:15 P. M.		Ar. L.	8:15 A. M.	
8:30 P. M.		S' Side	8:30 A. M.	
8:45 P. M.		Ar.	8:45 A. M.	
9:00 P. M.		Wellsford	9:00 A. M.	
9:15 P. M.		Yon Hill	9:15 A. M.	
9:30 P. M.		O'Leary	9:30 A. M.	
9:45 P. M.		Bloomfield	9:45 A. M.	
10:00 P. M.		Albion	10:00 A. M.	
10:15 P. M.		Tignish	10:15 A. M.	
10:30 P. M.		Ar.	10:30 A. M.	
10:45 P. M.		Charlottetown	10:45 A. M.	
11:00 P. M.		Royalton Junction	11:00 A. M.	
11:15 P. M.		Bedford	11:15 A. M.	
11:30 P. M.		Ar.	11:30 A. M.	
11:45 P. M.		Missisquoi	11:45 A. M.	
12:00 P. M.		Ar.	12:00 A. M.	
12:15 P. M.		Morell	12:15 A. M.	
12:30 P. M.		St. Peter's	12:30 A. M.	
12:45 P. M.		Bear River	12:45 A. M.	
1:00 P. M.		Souris	1:00 A. M.	
1:15 P. M.		Ar.	1:15 A. M.	
1:30 P. M.		Mt. Stewart	1:30 A. M.	
1:45 P. M.		Cardigan	1:45 A. M.	
2:00 P. M.		Georgetown	2:00 A. M.	
2:15 P. M.		Ar.	2:15 A. M.	
2:30 P. M.		Emerald	2:30 A. M.	
2:45 P. M.		Cape Traverse	2:45 A. M.	
3:00 P. M.		Ar.	3:00 A. M.

It is a pleasure to meet people who are pleasant, able and kind; who do not seek to distinguish you with disdain or humiliate you with indifference. People can be over-pleasant as well as overbearing, but the former is infinitely preferable. Habit has something to do with a man's behavior, although disposition is the stronger element—certainly when men have contracted habits of pride and insolence that are almost brutal. Money enters into the life of some men and makes them haughty and overbearing, while, lacking it, would be kind and considerate. Jesus inveighed most strongly against pride and haughtiness, and said the publican was justified rather than the proud Pharisee, for all the lengthy prayers of the latter. In view of the shortness of life and its many unavoidable cares and troubles, we think it is a wise thing to cultivate a pleasant manner toward all. "Oh, why should the spirit of mortal be proud?" must be an inseparable puzzle from any true and just point of view. "Pride goeth before destruction, and a haughty spirit before a fall," is as true to-day as in the long ago when it was written. Pope calls pride "the never-falling vice of fools," and wisely says: "There is in pride and hauteur a disarming of men beyond computation. If pride is not vice, it can lay little pride to virtue. Why, then, so proud and haughty? Rich or poor, high or low, should shun its narrowing spirit, and learn to practice a pleasant manner, a courteous spirit of kindness toward all whom we may meet in this transitory world."—Alexander Macaulay.

How Nansen crossed a Throat.
From his childhood Dr. Nansen, the Arctic explorer, has been an athlete, a hunter and an expert skier, or so we are told. He is more than six feet tall, with muscles like iron, and the medals he won in his youth, long ago, as a champion of sport in Norway. He has the courage and endurance that imply, besides skill in kayak and ski travel, and ability to live as the Eskimoes do, have had no small part in making his success. He has the grip of a giant, as a mischievous trickster I am told to his sorrow when he toyed with the Norwegian's watch-chain. Nansen had just arrived in London to tell the story of his Arctic expedition. As he waved his hat with the crowd he felt a twitch at his chain, and grasped the wrist of the too familiar person. His chain I saw, and the medals he had won in his youth, long ago, as a champion of sport in Norway. He has the courage and endurance that imply, besides skill in kayak and ski travel, and ability to live as the Eskimoes do, have had no small part in making his success. He has the grip of a giant, as a mischievous trickster I am told to his sorrow when he toyed with the Norwegian's watch-chain. For a Few Days

We will call your attention to our line of Flatware, Spoons, Forks, Knives, Butter Knives, and Sugar Spoons, at very low prices. Please call, and we will try hard to please you.

G. F. HUTCHESON

To All Our Customers

We would most respectfully wish you a Happy New Year, and also remind you that we have a large and well assorted stock of Lumber that we want to dispose of during the winter, comprised of the following, viz:

1, 2 and 3 inch Pine, good quality.
1, 2 and 3 inch Spruce, do.
1, 2 and 3 inch Hemlock.
Surface planed Spruce and Hemlock boards.
Scantling and Studding, all sizes, from 2x2 to 2x6.
4000 Cedar Posts, 7, 8 and 9 ft long.
11 and 12 inch Flooring.
1, 2 and 3 inch White oak.
Pallies, Laths, Fencing, 20 ft long 1x5 500 M Sear Shingles, split and sawn.
Spruce Shingles, imported and Island.
Pine Sheathing—Clasmaric.
Line in casks and barrels—best St. John—etc., etc.
All of which we will sell at lowest possible prices.

POOLE & LEWIS

5—day 1 aw .3, & w. 4.

The Marquis of Arzpeguia, the leader of the constitutional party in Cuba, in an interview says that it is doubtful whether the scheme of the Cuban reforms will survive to terminate the insurrection. He adds that Captain General Weyler should not be instructed with their execution.

VIM, VIGOR, VITALITY RESTORED IN 30 DAYS GOOD EFFECTS AT ONCE. CATON'S VITALIZER.

Cures general or special debility, weakness, spermatorrhea, emissions, impotency, paresis, etc. Corrects functional disorders, caused by errors or excesses, quickly restoring Lost Manhood, in old or young, giving vigor and strength where former weakness prevailed. Convenient package, simple, effectual, and legitimate.

Don't be deceived by imitations. Insist on CATON'S VITALIZER. Sent sealed if you prefer. Druggist does not have it. Price \$1 per package, \$6 for \$5, with written guarantee of complete cure. Information, references, etc. free and confidential. Send us statement of case and age for a week's trial treatment. One only sent to each person.

CATON MED. CO., BOSTON, MASS.

TENDERS.

Tenders will be received by the undersigned up to Thursday, Feb 25th for the erection and finishing of a dwelling house. The lowest or any tender not necessarily accepted. Plans and specifications can be seen at office of C. E. Clappin, Architect.

City Hardware Store

R. B. NORTON & CO

A GOOD MANY KNOW IT.

SOME DON'T

There are a few people yet who don't know that our Mr. J. McDonald is the best cutter who has been on P.E.I. for some years; all our customers know it if you don't know it you can find out by leaving your order for full dress suit, D. B. Overcoat, Fly Front Overcoat, Chesterfield Overcoat, Covert Overcoat, Inverness, or the Surtout do.

WE ARE HAVING

A Good trade notwithstanding this is the tailors' dull season We don't have to cut prices; good tailoring always commands good prices, our prices are very low considering the quality of work turned out. We are making an elegant serge suit for \$15.00; a beautiful worsted suit for \$17.50, guaranteed to wear and hold its color; nothing like it in the city. This goods we import direct from Glasgow, Scotland.

Our wonderful double and twisted Bannockburn tweed suit at \$16.00, is still a favorite with customers who know a good thing when they see it. The same goods are sold every day in the city at \$18.00 a suit. Just opened, 2 cases new spring cloths, Worsteds, Serges, Tyke, Belwarp, and other good makes.

McKAY WOOLEN COMPANY,

THE GREAT BARGAIN GIVERS.

He wanted to know.

Little Clarence—"There, my son; stop right where you are! I do not know who Cain's wife was, nor why Monday does not come on Friday, nor why some people can wiggle their ears and others cannot, nor anything of the kind."

A Furniture Mystery.

Mrs. Wiggy—"That family who have moved in next door must be either very rich or very poor."

Wiggy—"Why so?"

Mrs. Wiggy—"Their furniture was all done up carefully in sheets and blankets, and I don't know whether it was done in his or her name, or to protect its beauty."—New York Tribune.

No More Trouble.

"This is pretty stout butter," declared Mr. Newby, with a frown that was deep for a man who had been married but a month.

"Don't look so queer," urged his pretty little wife, "it'll not occur again. I have bought a churn and ordered butter-milk to be delivered regularly. Hereafter, we'll have sweet, fresh butter."

The Spin Case.

Druggist—Yes, ma'am, I remember very well your using a stamp.

Lady—Well, I put it on a very important letter and post it. It has not been received. I want you to understand that I shall buy my stamps elsewhere if this occurs again.—Tit-Bits.

Low I Worked.

"That woman getting her purse snatched out of her hand saved money for me."

"How was that?"

"My wife went shopping and put her purse in her pocket; when she got downtown she couldn't find her pocket."

The Thin Fast.

Professor de (triple)—Oxygen, gentlemen, is essential to all animal existence, there could be no life without it. Strange to say, it was not discovered until a century ago, when—

Student—What did they do before it was discovered, professor?—Household Words.

His trouble alone.

First Tramp—"If you had to work—my wife went shopping and put her purse in her pocket; when she got downtown she couldn't find her pocket."

Second Tramp—"Well, I think I could be a judge of a dog show. I've had experience of all the different kinds of dogs there is."—Puck.

AT STITTVILLE!

Rheumatism in various forms is one of the most common diseases there is. It arises generally from impure blood and a broken down system. In the limbs it is painful; in most of the internal organs dangerous, and in the heart usually fatal.

The experience of Mr. S. Mann, the well known merchant of Stittville, is interesting:

"Last winter I was badly afflicted with rheumatism. I decided to try Dr. Chase's Pills. To my surprise, I got immediate relief, and before I had used one box my ailment was gone."

"I was also troubled with biliousness for years, and at intervals of three or four weeks would be laid up with a severe headache and sick stomach. Since using Chase's Pills I have not had an attack of either."

"I may add that Dr. Chase's Ointment for piles and skin diseases is just as effective as Dr. Chase's Pills for blood troubles. I have a clerk who suffered terribly from itching piles. He tried Chase's Ointment and in a few days was completely cured."

All dealers and Edmondson, Bates & Co., manufacturers, Toronto, 25c.

Chase's Lensed and Turpentine for colds, bronchitis and consumption. See cure, 25c.

THE FOE OF TYPHOID.

RECENT GERM DISCOVERIES OF PROFESSORS PFEIFER AND WIDAL.

Value of the Discovery—Germicide in the Blood—Description of the Method Employed to Detect the Disease—Every Experiment in New York Successful.

To the names of Pasteur and Koch must be added those of Pfeifer and Widal, and Widal of Paris, for those eminent bacteriologists have jointly perfected a discovery that promises to kill the fear of typhoid fever in human minds.

The value of the discovery is in finding out before the patient has taken to his bed and the malady is on him with its full force and virulence, the true nature of the trouble. For the first week or ten days in typhoid fever the diagnostic symptoms do not appear, and the symptoms that do appear are common to a great many diseases and not peculiar to any of them. If the disease can be recognized during its earlier stages the dangerous symptoms can be averted by resorting to the regular treatment. The patient will thus be spared much suffering and will be able to be about in a very few days.

The method employed in detecting the disease is as follows: A culture of typhoid fever germs is prepared for the microscope. Then a few drops of blood are taken from the patient, and the patient suspected of having typhoid fever. A drop of this fresh blood is mixed with the fever germs, and the result is watched for a certain time. If typhoid in the blood the fever germs will be seen swimming over the microscopic field, showing the usual energy. If there is typhoid in the blood the germs shake it at once by their apparent desire to escape from it. They fly in all directions, or, as the scientists describe it, they stand on their heads. This is the substance that is formed into groups, as if for mutual protection, like cattle or sheep huddling at a time of danger.

It is soon noticed that the vitality of the germs is abating, and their energy finally ceases altogether, and they lie like little rods, inactive and dead. This, then, depends on the amount administered, and also the diseased condition of the blood. If the poison in it is weak the germs may simply be paralyzed or stupefied, and when put in culture again they revive. But, where the blood is heavily charged, and the poison is strong, the bacilli die.

Dr. Pfeifer, bacteriologist to the Health Department of the city of Berlin, and first assistant to Dr. Koch, made the first discovery of the fatal nature of the blood of the typhoid fever patient has for the typhoid germ. He found there was a substance in the blood that had all the effect of a germicide, but what this substance is, is not known. It is known not to be an antiseptic in the usual meaning of the word. Pfeifer made experiments on animals, and found their blood containing this bacteriostatic substance and quickly killed the fever germs.

Dr. Widal of Paris took this valuable discovery and turned it about. He discovered that if a certain amount of blood was taken from a patient to be discovered its presence in the blood with certainty as it saved harmless all other germs, with the exception of typhoid fever, from the stomach. He began the experiments that have now been brought to the attention of the bacteriologists of two continents, and have established a theory that has yet to be found to fail.

It is no new theory that the white corpuscles are the soldiers of the blood. They are the body atoms that have the power of moving about, hugging the walls of the veins and arteries and refusing to travel as fast as the current caused by the heart's beats. They are the body atoms that are only when the soldiers are wasted by disease and fatigue that they are vanquished and overcome, and that the poisonous march over them to herald the death of their victim.

The method of the white corpuscles is to eat their victims, at the same time discharging a germicide substance. This germicide substance kills the intruders and restores the blood to health.

The Pfeifer test is not of equal importance in all cases, owing to constitutional differences in patients. Some persons have typhoid fever without knowing it, or walking typhoid, as it is called. In such cases the diagnostic stage is reached they are removed from the peril and never go to bed at all. In such patients the blood does not, till late, show the presence that is destructive to the fever germs. But in most instances the blood is poison laden after the second or third day.

The typhoid fever germ is a queer looking little beast being likened in shape to a policeman's club. Under a microscope measuring seven hundred times its length is as long as a tiny rod, eight of an inch long. A man under such a microscope would be about the size of Mount Vesuvius. This cheerful active fellow is known as a motile bacillus, from the fact that he is able to move about at will. At either end of his elongated body he has processes that act as steering apparatus for his travels, as do the fins and tails of fishes. These flagellae are not observable under a glass of 700 power until they have been stained.

Typhoid fever germs are very prolific. Reproduction is accomplished by the rod breaking itself in two, which process can be observed under the glass. Each part moves about with all the agility of the original bacillus. They grow to their normal size in a very few minutes, so that every separate germ repeats itself in twenty minutes.

The New York Board of Health laboratory connects with the Whitaker Hospital is the scene of bustling work these days. Dr. Parke examined twenty samples of blood from the New York Hospital, besides many more from physicians with private practices. Blood from patients suffering with many other diseases was included. Without any exception, however, Dr. Parke discovered the two patients suffering from typhoid fever.

In both cases the disease was so far advanced that no mistake could be possible on the part of the hospital doctors. This is the most convincing proof to which the theory has been put in America, says the New York Journal.

When a child, Alexander Ross, of New York, accidentally swallowed a needle. The other day, at the age of fifty, the needle was taken out of the fleshy part of his arm.

Rich Red Blood is the foundation of good health. That is why Hood's Sarsaparilla, the One True Blood Purifier, gives HEALTH.

Boils

It's often difficult to convince people their blood is impure, until dreadful carbuncles, abscesses, boils, scrofula on salt rheum, are painful proof of the fact. It is wisdom now, or whenever there is any indication of

Impure

blood, to take Hood's Sarsaparilla, and prevent such eruptions and suffering.

"I had a dreadful carbuncle abscess, red, fiery, fierce and sore. The doctor attended me over seven weeks. When the abscess broke, the pain was terrible, and I thought I should not live through it. I heard and read so much about Hood's Sarsaparilla, that I decided to take it, and my husband, who was suffering with boils, took it also. It soon purified our

Blood

built me up and restored my health so that, although the doctor said I would not be able to work hard, I have since done the work for 20 people. Hood's Sarsaparilla cured my wonderful medicine." Mrs. ANNA PETERSON, Latimer, Kansas.

H
