Total Sales: Industrials 127,300, mines and oils 670,400.

TORONTO

TORONTO (CP)—All sections but golds closed higher in moderate Toronto Stock Exchange trading Wednesday.

Jaye Exploration which holds mining claims in the Vangorda area of the Yukon, traded 934,400 shares and lost 30 cents to 55 cents in industrials.

Company officials were unable to say why the stock took the plunge. William Paterson, secretary-treasurer of Jaye, issued a statement Wednesday afternoon in which he said work was progressing satisfactorily on drilling started last Sunday on Jaye's property.

Banks made significant gains after Finance Minister Sharp's statement Tuesday about proposed changes to the Bank Act.

Mr. Sharp said the amendments would raise the six-per-cent ceiling on interest rates on bank loans now, and would remove the ceiling when credit conditions become easier.

NOVA SCOTIA UP 2

Among banks, Bank of Nova Scotia rose 2 to 71½, Royal 1¾ to 75, Montreal 1¼ to 60, Imperial Commerce ⅞ to 63⅞ and Toronto-Dominion ¾ to 63¾.

In senior base metals, Denison gained 1 to a high of 56¼ while its subsidiary, Roman Corp. closed unchanged at 13⅞. Falconbridge lost ⅜ to 93⅞ while Inco gained ¼ to 95¼ in other senior base metals.

In senior western oils, Scurry-Rainbow gained 1⅜ to 30⅜, Canadian Superior ½ to 19¾ and Dome Petroleum ¼ to 15¼.

In speculative oils, Provo gained 17 cents to $2.65 on volume of 38,439 shares.

Dome fell 1⅛ to 47¾ in dull gold trading.

On index, industrials gained .46 to 162.72, base metals .21 to 93.98, Western oils .31 to 104.06 and the exchange index .41 to 154.60. Golds lost 1.21 to 174.69. Volume was 3,398,000 shares compared with 2,502,000 Tuesday.

Colorado potato beetle larvae and other foliage insects retard plant growth and development, help spread disease. One low-cost Endrin application controls all major pests for up to two weeks

POTATO GROWERS:

Powerful Shell ENDRIN cuts spray costs two ways: (1) controls all foliage insects; (2) lasts longer than other insecticides.

You need no longer switch from one costly insecticide to another for control of major potato insects. Remarkable Shell Endrin 20 emulsible concentrate controls them all—effectively and economically.

One application lasts up to *two weeks*. As fewer sprays are required, you save both time and money. Read how Shell Endrin can boost your crop income.

MORE AND MORE Maritime potato growers are using Shell Endrin to control foliage insects. Reason: powerful Endrin controls flea beetles, leaf-hoppers, aphids, Colorado potato beetles and all other major destructive pests. And Endrin does the job *economically*.

Prolonged killing power

Endrin not only controls more insects than other insecticides—*it also protects longer*.

A single Endrin application protects plants from profit-robbing insects for 7 to 10 days—sometimes longer. Foliage growth is more vigorous. Plants are healthier. You get potatoes of the highest grade—and the biggest crop yield possible.

You save money two ways

Two major features make Endrin more economical than other recommended potato insecticides:

1. You make fewer applications. Since Endrin protects longer than other insecticides, you don't have to make as many applications. Result: you save time and labour—as well as the cost of extra insecticide.

Only one pint of Shell Endrin concentrate per acre will help yield you bigger crops, higher-grade potatoes and more profits.

2. Low per-acre dosages do the job. Shell Endrin is so powerful you need as little as *one pint* of concentrate per acre. Application after application, Endrin costs less than most other potato insecticides.

Shell Endrin comes as an emulsible concentrate, containing two pounds of active material per gallon.

For dependable, neighbourly service and a complete line of modern Shell farm products, see your Shell or White Rose farm dealer.

CAUTION: When using any insecticide, always read and follow label instructions carefully.
