FOOTBALL.—At the meeting of the Abegweit Football Club, held last evening, it was decided to accept the challenge of the Pictou Club to play a match game, Rugby Union rules, on the Pictou grounds, on the 24th May next. The team has been selected, and will go into training at once.

HIRAM WOODRUFF says: "Breed to the best." Performances are the best test of pedigree. An opportunity will be offered to breeders who wish to patronize a horse which has the lowest record in the Maritime Provinces, which defeated such horses as Harry Hamilton's Unknown, 2.23, and others, and whose stock in style, size and trotting action, are giving such general satisfaction. By calling at the stables of H. J. Kennedy, Kent Street, to-morrow (and every two weeks after) you can see this horse.

WE learn that a person giving the name of Wm. Taylor, a travelling watchmaker, is sailing around the country under false pretences. This "party" represents that he is a relation of the well-known watchmaker, Mr. E. W. Taylor, of this city, and that he is connected with his business. We are requested to state that these representations are false in every particular; and that as many complaints have reached Mr. E. W. Taylor from parties who have employed the itinerant jobber, it would be well for the public to be on their guard against possible imposition or fraud.

ST. MARTINS, N. B., is greatly disturbed over the reported elopement, last Saturday, of a sweet young maiden of seventeen and a hitherto steady-going resident, who leaves a wife and four children behind him. When last seen they were serenely sailing past Salmon river, some time after sunrise Sunday morning, in a small boat.

THE Myrtle Navy tobacco is not burdened with the usual costs which swell the price of most articles to the consumer; the firm employ no travellers whatever, their orders come to them instead of being sought by them. The merchant does not require to keep a large stock on hand swelling its price with interest, for the factory is an immediate source of supply to him, at the cost of a postal card, or at most a telegram. He loses nothing, therefore, from being overstocked. The article is a staple one, for which there is as constant a demand as for wheat or flour, and the merchant can therefore, sell it at a minimum rate of profit

THE steamer Carroll arrived here at three o'clock this afternoon. She left Boston on the 24th ult., and arrived at Halifax on the 26th, where she remained till Saturday at noon, when she left for Hawksbury, arriving there at six o'clock Sunday evening, and leaving again for Pictou on Wednesday morning, arriving same evening. After coaling up the steamer left for this port, steaming slow, and arrived here as above stated. Lots of heavy ice is reported all the way from Canso to Cape George, and about forty sail in the Strait. There are no changes to note in the *personnel* of the steamer's officers, all the old hands, including the popular purser, Mr. Nickerson, being at their posts—ready and willing, as usual, to attend to the every want of all who patronize the route.

QUITE a sensation was created in the House of Assembly last evening, by the sudden extinguishing of the gas, while the hon. member from Summerside was discussing the budget. On investigation it was discovered that the sudden darkness was caused by the turning off of the gas, owing to a serious leak in the pipe in the Legislative Library, the escaping gas from which had taken fire and threatened serious damage to the building. Some of the members of the Opposition, ever ready to censure the Government, asserted that this was another deliberate attempt to keep them still further in the dark. Whether or not Mr. Speaker noted the objection we cannot say, but at any rate several lighted candles were brought in, the lion's share of which were captured by the Opposition. The leak in the pipe was temporarily attended to and the gas again lit; while a message was sent to the Gas Works for a man to repair the damage. About a quarter past eleven he arrived and in searching for the leak he set fire to the escaping gas and the destruction of the building was again threatened. The gas was turned off at the metre and the House once more plunged into darkness in the midst of which an adjournment was carried. All the members of the House, the reporters, and others present repaired to the Library. Here the scene was certainly somewhat ludicrous. Many staid old politicians, whose hats had been put on backwards and sideways in the darkness and attendant excitement, rushed hither and thither in the endeavour to find out the cause of all the trouble. Here and there might be seen a messenger or other *attache* of the House, armed with a lighted candle and a terribly scared countenance, vainly endeavoring to explain the matter to some inquisitive M. P. P., while the "irrepressible" A. J., from Murray Harbor, and the redoubtable Stephen G. discussed the matter from a comparatively "safe" standpoint. Thus ended the most serious "gas" explosion we have had in our Legislative Hall for several years.
