RECIPROCITY TREATY.—The fuss about the Reciprocity in the Federal Congress ended in the passage of a motion postponing consideration until the second Tuesday in November next. The unterrified attitude of the British Provinces, very truly says a Montreal paper, had much to do in producing this result. It became abundantly evident that not only could these Provinces survive the infliction with which they were threatened, but they could make it a source of union, strength, and wealth; and at the last moment the Federals fully appreciated the fact that if they heedlessly threw away the present Reciprocity Treaty, they could not depend on obtaining the consent of the Provinces to another as advantageous to American interests. Newfoundland, since the closing of Southern ports, was sick of a Treaty from which it obtained no benefit; New Brunswick and Nova Scotia were *indifferent*; Canada and Prince Edward Island desired its continuance, but were not prepared to make any unreasonable concession to that end. We are glad it has not been disturbed, and the sensible business men of the Federal States will rejoice also at this termination of the intrigue of the manufacturing and forwarding interests of the Eastern States.—*Halifax Reporter.*

SOUTHERN CREDIT IN EUROPE.—A Citizen of Wilmington, North Carolina, recently returned from Europe, informs the Havannah correspondent of the New York *World* that—There is no difficulty in obtaining any quantity of goods on Southern account in any of the commercial cities of either England or France. In spite of all that has been said to the contrary, the credit of the Confederacy is good in both of these countries; and goods can be purchased as readily for Confederate bonds as for gold. This is owing partly to the fact that large cargoes of cotton are frequently received at Liverpool; but chiefly to the conviction that is universally entertained among the best informed commercial men in both England and France, to the effect that the large amount of cotton known to be in the hands of the Confederate Government will all be available to secure these bonds, and to pay off the European loans. It will be remembered that these bonds are not delivered or placed in the market until a certain amount of the cotton on which they are based has actually arrived at Liverpool; and this fact gives them a certain degree of stability. The amount of cotton actually known to be in the possession of the Confederate Government in February last was more than half a million of bales. At the present prices of cotton, one third of this amount is sufficient to pay off and take up all the Confederate bonds now in the European money markets. This fact shows, in part, upon what the credit of the Confederate Government in Europe is based.

The same authority states:—"During the last three years the utmost exertions have been used by the South to promote the raising of sheep, and to increase the supply of wool. To show how successful these efforts have been, it may be stated that the number of sheep in Virginia alone has been increased from 113,000 head in '60 to 141,000 head in 1863, and over 700,000 head in 1864. These are the official figures of the Auditor of the State of Virginia, presented to the State Legislature, and they do not include any part of West Virginia. In Georgia the number of sheep have increased from 300,000 head in 1860, to 400,000 head in 1863, 600,000 head in 1864. And the increase of sheep in all Southern States has been proportionately great. During this year the Confederates expect to derive large supplies of wool from Texas. In that State there were 321,000 head of sheep in 1860, and there cannot be less than 800,000 head there now."

CAPT. HICKEY.—Our former townsman, Mr. Patrick Hickey, at present in Halifax, is maintaining his prestine reputation as a marksman in the sister Province, and seems in a fair way to become the possessor of a whole fleet of boats, as we learn from the Halifax *Express* of the 23d ult:—"A shooting match for a Whale boat came off at Point Pleasant range on Saturday afternoon last, in which the crack shots of the 16th Regt. and a number of our Volunteers competed for the prize. The arrangements were 5 rounds at 200 yards, and the match resulted in favor of Mr Patrick Hickey, of the Irish Volunteers, he scoring 16 hits and points. This is the second boat won by him during the past year."

Last summer Bay Chaleur was visited by large numbers of white porpoises, which appeared as far up the bay as Dalhousie. This spring they have again appeared. A person writing from New Richmond on the 15th ult., says:—"They are now passing up the bay in myriads; our fishermen say 'the water is alive with them.' They follow the herring close to the shore amongst the nets, and in some instances have carried the nets away. They have been fired at with balls from small guns, a quantity of blood would be seen on the surface of the water, but the monsters had disappeared. Last summer several were found dead floating down the Bay, which, no doubt, died from the effects of the balls fired into them. They are very large, and judging from the quantity of oil got from those picked up last summer, the average will be about one hundred gallons from each porpoise, which is worth a dollar per gallon, the skin is also valuable." If this information is at all to be depended on, there would seem to be a fair chance to make money out of these monsters by any one who understands the business of capturing them. It is feared that the fisheries of the Bay, particularly the salmon fishery, will be injured by them.

The New York *World* says of the Western crops:—"The wheat crop of Northern Ohio was seriously damaged by the extreme cold weather of last winter. The Columbus (Ohio) *Crisis* of the 25th ult. says: 'It is folly to disguise any longer the unwelcome fact that the wheat crop of the entire West *is a failure*. Thousands of acres of wheat sown land are being ploughed up to plant in corn. It is the opinion of some of our best judges that there will be very little, if any, more wheat gathered than was sown last fall.'"

The Hon. George Brown has intimated his intention to retire from the Canadian Parliament at the first convenient opportunity—whether temporarily or permanently is not stated. The retirement of a politician of Mr Brown's standing will probably lead to new political combinations in Canada.

The Steamer *Princess of Wales*, left for Summerside and Shediac this morning. The Steamer *Heather Bell* arrived from Pictou this morning at six a.m., and at once proceeded up the Hillsborough River, to Mount Stewart Bridge. It is the intention of the owners of the *Heather Bell* that she shall, for the future, proceed to Mount Stewart once each week.—*Islander of Friday.*

The Brigt. *Helen Davies*, Campbell, from Barbadoes, with Sugar, Molasses, and Rum, to the Hon. D. Davies, arrived here on Thursday.

The Volunteer Band has, we understand, consented to perform on Hillsborough Square, every alternate Thursday evening, from 7 to 8 p.m., for the delectation of our citizens, provided that the City Amateur Band also consent to perform fortnightly, at the same place. Should the amateur Band consent to this proposal—and we hope they will—the Volunteer Band will commence their performances on Thursday evening next.—*Monitor.*

DARCY.—This notorious swindler, since his "skedaddle" from this colony last summer, has, we learn, exercised his rascally propensities with his usual success and on a most gigantic scale in the neighboring Republic. Boston was the theatre of his first operations and success; and after having swindled some unfortunate persons in that city out of many thousands of dollars, he removed to Richmond, Virginia. All his former rascalities dwindle into insignificance when compared with those which he perpetrated in the rebel capital. By the cunning display of his gold and the apparent honesty of his first transactions, as also by his plausible representations as to his being the agent of some prominent firms in England, he succeeded in gaining the confidence of cotton dealers in Richmond, and obtaining $1,000,000 worth of that article. Darcy paid his dupes in bogus bills on his imaginary employers in Europe, and before the swindle was discovered, both he and the cotton had safely run the blockade. Such, we are informed, is the statement of the case, as contained in one of the Richmond papers. The disclosures of Cornelius O'Dowd are tame in the presence of the enormous frauds of this deep-dyed villain, who, we hope, will soon grace the gallows which he so richly merits.—*Vin.*

The highest price ever paid for a portrait by an English painter, of an Englishman's head, was paid by the late Sir Robert Peel for the portrait of Dr. Johnson by Reynolds, namely, four hundred and ninety-three guineas. The present Sir Robert Peel could obtain for it to-morrow, under Christie's inevitable hammer, one thousand guineas.

A French Canadian girl is now on exhibition in Montreal who has been swallowing needles for amusement ever since she was eight years old—Thousands of needle points are seen sticking under the skin of her throat, arms, &c. If the greedy thing had used these needles on her father's old coat instead of the coats of her stomach, she would have shown more sense.—She ought to have a stitch in her side the whole time.

The entire railway business of France is done by six companies; the largest of which is the Paris, Lyons & Mediterranean, whose length, including trunk line and branches, is 3,609 miles, at an estimated cost of $251,000,000. The working expenses for 1862 were some 44 per cent of the gross receipts. The dividend paid was 15 per cent, and a dividend of 15 per cent has just been declared from profits of 1863.

THE WEALTH OF CRŒSUS.—In our jottings of millionnaries, it would seem as though those pages were incomplete without some data concerning him whose name has for centuries and generations—fresh down to the present day—furnished the standard representative of vast wealth. Crœsus flourished about the middle of the sixth century B. C. The prodigious wealth which he had inherited had been increased by the tribute of conquered nations, by the confiscation of great estates, and by the golden sands of Pactolus.—Perhaps some idea of the extent of his wealth may be formed from the rich votive offerings which he is known to have deposited in the temples of the gods. Herodotus himself saw the ingots of solid gold, six palms long, three broad, and one deep, which to the number of one hundred and seventeen were laid up in the treasury at Delphi. He also saw, in various parts of Greece, the following offerings, all in gold, which had been deposited in the temples by the same opulent man; a figure of a lion, probably of the natural size; a wine bowl of about the same weight as the lion; a lustral vase; a statute of a female, said to be Crœsus's baking woman, four and one-half feet high; a shield and a spear; a tripod; some figures of cows; and a number of pillars; a second shield in a different place from the first, and of greater size.

In consequence of the projected sale of the Battery and adjacent property, a flag-staff has been erected on the Colonial Building, by means of which our citizens will be informed of the approach of all vessels from sea, during the day.

EARLY EDITIONS OF SHAKESPEARE.—Some very rare Shakspearean and other books were sold on Monday by Messrs. Sotheby, Wilkinson, and Hodge, which realized very high prices. The grand feature in the sale was the first four editions of Shakspeare's Plays, the first edition printed in 1823, having Ben Jonson's verses in fac-simile, producing 260 guineas; the second, in 1632, 52 guineas; the third, in 1664, 41 guineas; the fourth, in 1685, £23; the single play of "King Lear," printed in 1608, £34; a very beautiful copy of the minor poems, printed in 1640, £20; and a most charming little volume, being an uncut copy of "Venus and Adonis," printed at Edinburgh in 1627, £115.

Three fourths of the knowledge in the world is impracticable for the masses. What matters it to John Brown, who drives a cart, that Lord Rosse's telescope has penetrated space a distance so inconceivable, that light, which travels at the rate of 200,000 miles in one second, would require a period of 250,000,000 of solar years, each year containing about 32,000,000, of seconds, to pass the intervening gulf between this earth and the remotest point to which this telescope has reached? John don't believe it.

EASY AGAIN.
EASY AGAIN.
EASY AGAIN.

"Thank God, I am easy again," said Mr. Freely, who had suffered for nine months with Rheumatism. The first application of Radway's Ready Relief relieved him from pain, the following day he was able to walk, in a week's time he resumed his business as engineer. Radway's Ready Relief will cure Rheumatism, Neuralgia, Gout, Strains, Sprains, Burns, Scalds, Sore Throat, Head-ache, and all other pains. Relief is afforded in a few minutes.

Every house should be supplied with a bottle. With this remedy to use in case of accidents or sudden attacks of disease life may be saved. Price 25 cts. per bottle. Sold by Druggists.

SENSIBILITIES.—Fine sensibilities are like woodbines, delightful luxuries of beauty to twine round a solid upright stem of understanding; but very poor things if they are left to creep along the ground.

SCOTCH PRUDENCE.—About sixty or seventy years ago, when the manufacturing trade was in its infancy, several poor Scotchmen settled in Manchester, who ultimately became millionaries, and whose descendents are still connected with the city. We were speaking a short time ago with a very old woman, who knew one of those men in his early struggles. His landlady thought he paid too little for his room, and was determined to raise his rent from 1s 6d to 1s 8d a week. This the Scotchman stoutly resisted, and was resolved to pack up his baggage and be gone, rather than pay a fraction more than eighteenpence. After gaining this point, he concluded the dispute with this axiom, which ought to be remembered by our young men:—"It isn't that I mind so muckle for the odd tuppence; but, ye ken, Betty, it's the breaking into a fresh piece o' siller."

Holloway's Ointment.—Soundness renewed.—Any indolent ulcer or chronic sore should immediately have this excellent unguent applied to it in the manner pointed out in its accompanying directions. For thoroughly cleansing a diseased or broken skin, and for rousing its poisoned vessels or depressed nerves to healthy action, nothing can surpass Holloway's well-known Ointment. It strikingly shows its power when applied to the "old man's ulcer," which settles in the leg and often becomes most intractable under the ordinary treatment, though no case has yet withstood this cooling and healing salve. The troublesome swellings preparatory to most ulcerations of the legs are likewise reduced by the diligent application of Holloway's unguent, by giving strength to the weakened circulation through the capillaries.

AN ARTIFICIAL TONGUE.—M. Maisonneuve, surgeon of the Hotel Dieu, describes in *Cosmos* how he removed from a patient the whole of a tongue afflicted with cancer, by means of what he terms *cauterisation en fleches.* He perforated the tongue with eight of his cauterising arrows (*fleches*) so as to cause all the affected portions to slough off in one mass. His patient, after the removal of the tongue, could neither swallow nor speak, but performed both these functions on being supplied with a gutta percha tongue of the natural size.

"MOTHERS TAKE HEED."

Thousands of Children perish annually from one cause, and that is worms. Why will you neglect the first symptoms of these pests of humanity and wait until it is too late before you administer the remedy. JUDSON'S WORM TEA is the only PURELY VEGETALE remedy in existence. If there are no worms it only acts as a gentle purgative and cannot harm an infant. IF WORMS EXIST it kills them. Every family should have a package of JUDSON'S MOUNTAIN HERB WORM TEA in the house.

Great Attraction!!
Rare opportunity for purchasing Building Sites.

22 LOTS.

THE PUBLIC are respectfully informed that an opportunity now offers such as seldom occurs. That valuable piece of ground heretofore known as the Barrack Square, will be sold on the spot by PUBLIC AUCTION, on

Tuesday, 14th June next.

Great care has been taken to lay out the various sites in the most judicious manner, so as to combine the useful with the ornamental. A handsome esplanade, sixty feet wide on the entire sea face, has been reserved as a Promenade and carriage drive for the beauty and fashion of the city, and the spot, which embraces one of the most enchanting and picturesque panoramas, bids fair to become the favorite resort of all.

Now that a noble line of steamers connects our city with the neighboring continent, the time has arrived when an HOTEL must be built;—here then is the spot upon which to raise a building suitable to the requirements of the numerous visitors who visit our shores in pursuit of health, business and recreation.

Hour of Sale—11 o'clock, a. m.

☞ A plan of the premises, with conditions, to be seen at the office of the undersigned.
