THE DAILY EXAMINER.

TERMS: Four Dollars a Year — "This is true Liberty, when Free Born Men, having to advise the Public, may speak free."—Euripides. — Single Copies Two Cents

NEW SERIES — CHARLOTTETOWN, P. E. ISLAND, WEDNESDAY, OCTOBER 24, 1894. — VOL 34.—NO. 97

THE DAILY EXAMINER

THE LEADING DAILY NEWSPAPER OF P. E. ISLAND.

s issued every afternoon, from the office of the EXAMINER PUBLISHING COMPANY, in the London House Building, Queen Street.

RATES OF SUBSCRIPTION.
(IN ADVANCE)

ONE YEAR	$4.00
SIX MONTHS	2.00
THREE MONTHS	1.00
ONE MONTH	0.35

Sent post paid to any part of Canada or the United States

ADVERTISING RATES

For small advertisements which are ordered for only one or two weeks the charge is 50 cents per inch for the first insertion, and 20 cents for each continuation. Rate cards are furnished on application at the office. Special contract prices at a reduced rate are quoted for advertisements four inches in size or larger, which are to run for three months or longer.

No special notices inserted unless paid for at the rate of 10 cents per line, and under no circumstances will such paid notices appear in the local column.

Special discounts made on all advertisements connected with Church Fairs, Bazaars, Picnics, etc. No notices will be inserted with the same unless the regular rate of 10 cents per line is paid.

That THE EXAMINER is considered by our Merchants and Manufacturers to be the leading newspaper in P. E. Island, and consequently the most valuable advertising medium through which to make their announcements public, is abundantly proved by the fact that in order to accommodate our advertisers we have been compelled to enlarge the paper to its present size.

THE DAILY EXAMINER is for sale by the following agents:—
R. H. Mason, Post Office, Charlottetown.
J. McIntyre, Malpeque Road, "
C. Paul, Lower Spring Park Road, "
W. M. Coffin, Grafton Street, "
S. Grey, cor. Water and Prince St. "
D. Chappell, Prince Street, "
Bazaar Store, Queen Street, "
Geo. Carter & Co., Queen Street. "
S. Gray, News Stall, P. E. I. Railway and on the trains.
J R Woods, upper Euston St.
R K Brace, Cor, Euston and Hillsboro St.
C C Henry, Gt. George St.
Evans & Son, Cor. of Prince and Richmond St.
M. & T. J. Walsh, Eclectic Bookstore, Summerside.
D. Sutherland, Souris.
Hon. D. Gordon, Georgetown.
D. A. Egan, Mt. Stewart.
G. M. Clarke, Alberton.
A. J. McNeil Stanley Bridge.

The Weekly Examiner

s issued every Friday morning from the publishers' office. It is made up of matter which has appeared in the Daily editions, and is a first-class weekly newspaper—interesting and full of the latest news.

The subscription for THE WEEKLY EXAMINER, post paid to any part of Canada or the United States, is one dollar per year.

Advertising rates on the same scale as given bove for THE DAILY EXAMINER.

ELECTRICAL PROGRESS.

INDUCEMENTS OFFERED BY FRENCH EXPOSITION AUTHORITIES.

The Transmission of Energy the Great Problem to be Solved—A New and Wonderful Scheme Proposed for Consideration—The Alternative.

A general programme is already being outlined for the French Exposition of 1900, in which particular attention will, of course, be given to electrical development.

M. Armengood, jr., asks that prizes of value be offered for three things, viz.: (1) Seeing at a distance; (2) Photography in colors on paper; (3) Electric light without heat. It will be admitted that all these three things, accomplished practically, would add greatly to the eclat of the Exposition; and the actual success already attained along each line affords encouragement. M. Trouve, ever fertile and ready, has also suggested an electric light cascade falling from the third platform of the Eiffel Tower. It would certainly be a brilliant night spectacle.

We venture, however, to propose a scheme, of which we have seen no note thus far, but which would certainly interest not only all classes of engineers, but all concerned in railways, and the public at large. It is a familiar fact that among the most pressing problems of the day are those that relate to the electrical transmission of energy, and that at this hour some most important work is being done. Up to this time, however, the energy transmitted has been that of waterfalls, and all the plants under construction, such as that for Niagara, deal with water power. Now, a great deal has been said about burning the coal at the mine and transmitting its energy electrically instead of the fuel itself; and in England two well-known engineers, Messrs. B. H. Thwaite and James Swinburne, have worked out carefully the details of an electric transmission to London of the energy of the coal fields of the Midlands and Yorkshire. What we propose is that the Paris Exposition shall, in like manner, have all its power generated at coal mines now supplying Paris, and that this power shall be transmitted electrically.

The Chicago Fair made no demonstration of this kind. In fact, none has ever yet been made. The nearest approach to it was the remarkable waterpower transmission of 100 miles, under the patronage of the Emperor of Germany, from Lauffen to the Frankfort Electrical Exhibition in 1891. Some idea of what is involved as to expense may be formed from the Thwaite-Swinburne plan of a 100 miles transmission of 10,000 h.p. of energy from coal, at a cost not to exceed, all told, £340,000; on which basis, according to C.E.L. Brown, small users of power in London could get 1 h. p. per annum for $20. This plan contemplated the use of large gas engines at the generating points and a line potential of 30,000 volts. It is evident that all the apparatus, including line, would have considerable value after the close of the exposition. The Chicago plant for power reached about 20,000 h. p., and it is not likely that Paris would much exceed, if it equaled, this; so that taking the figures already cited, the initial total cost would not exceed £680,000 or $3,400,000, and the investment in gas engines, generators, transformers and motors would certainly be a largely recoverable quantity, to say nothing of the value of the copper in the line, costing about $500,000. Indeed, if the demonstration proved successful, the plant could be left intact for the daily supply of power to the various large and small industries of the city, it being safe to assume that such a quantity could very easily be marketed. We have no data at hand as to cost of power in Paris, but is is probable that the ordinary selling price of 1 h. p. is not below $40 or $50.

If such a plan as this be not carried out, the exposition will still have to be furnished with its power in some way, and if resort be made to the ordinary methods there would be required for the 20,000 h.p. a large outfit of coal sidings, boilers, engines, shafting, machinery rooms, etc. By 1900 such methods will seem more dirty and antiquated even than now, but it might not perhaps be a bad idea as a compromise, to divide the power plant into two contrasting 10,000 h. p. units, one long distance transmission and the other that of generation in situ. The longer, bolder plan is that which appeals more to the engineering imagination, and one in the execution of which the authorities of the exposition would probably enjoy very hearty advice, assistance and cooperation from French electrical engineering concerns, as well as from others in America, England, Switzerland and elsewhere. If it be resolved to stick to water power, possibly the Exposition might be run by energy from the little sister Republic of the Alps, although by 1900 we shall all know a good deal about the working of such a plan, from the results obtained with Niagara.—Philadelphia Record.

Ingenious Smuggling in Russia.

One of the most ingenious devices for smuggling was detected in Russia not long ago. A great number of false bank notes had been put into circulation within the dominions of the czar. They could only have been imported, and although the strictest search was made habitually over every vessel entering a Russian port, no trace of the smuggling of false notes was discovered. Accident, however, at last brought the mystery to light. It happened that several cases of lead pencils arrived one day from England, and while being examined one of them fell out from a package and the custom house officer, picking it up, cut it to a point and used it to sign the order which delivered up the pencils to the consignee. He kept the loose pencil for his own use and a few days afterwards, because it needed a new point, he cut it again and found that there was no more lead. He cut still further and was surprised to find a thin roll of paper pasted in the hollow place where the lead was supposed to be. The paper was one of the false notes and in this way they had been smuggled into the country.

DR. J. P. MURRAY,
Office, 145 Queen St.,
oct6 — Charlottetown, P. E. I.

KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 75c. bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

Grateful—Comforting.

Epps's Cocoa.

BREAKFAST—SUPPER.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the properties of well-selected Cocoa, Mr. Epps has provided for breakfast and supper a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified by pure blood and a properly nourished frame."—Civil Service Gazette.

Made simply with boiling water or milk. Sold only in packets, by Grocers, labelled thus,

JAMES EPPS & CO., Ltd, Homœopathic Chemists, London, England.

CLEVER WORK OF AN OCULIST.

How a Damage Suit Was Defeated Through a Little Knowledge of Optics.

Here is an interesting account of a very clever bit of detective work by an oculist. It appears that in a large factory, in which were employed several hundred persons, one of the workmen, in wielding his hammer, carelessly allowed it to slip from his hand. It flew half way across the room and struck a fellow workingman in the left eye. The man averred that his sight was blinded by the blow, although a careful examination failed to reveal an injury, there being not a scratch visible. He brought a suit in the courts for compensation for the loss of half of his eyesight, and refused all offers of compromise.

Under the law, says the Sheffield (England) Telegraph, the owner of the factory was responsible for an injury resulting from an accident of this kind, and although he believed that the man was shamming and that the whole case was an attempt at swindling, he had about made up his mind that he would be compelled to pay the claim. The day of the trial arrived, and in open court an eminent oculist retained for the defense examined the alleged injured member and gave it as his opinion that it was as good as the right eye. Upon the plaintiff's loud protest of his inability to see with his left eye, the oculist proved him a perjurer and satisfied the court and jury of the falsity of his claim.

And how do you suppose he did it? Why, simply by knowing that the colors green and red combined make black. He procured a black card on which a few words were written with green ink. Then the plaintiff was ordered to put on a pair of spectacles with two different glasses, the one for the right eye being red and the one for the left eye consisting of ordinary glass. Then the card was handed him and he was ordered to read the writing on it. This he did without hesitation, and the cheat was at once exposed. The sound right eye, fitted with the red glass, was unable to distinguish the green writing on the black surface of the card, while the left eye, which he pretended was sightless, was the one with which the reading had to be done.

Nerve Enough for Anything.

Dr. McTavish of Edinburgh was something of a ventriloquist, and it befell that he wanted a lad to assist in the surgery, who must necessarily be of strong nerve. He received several applications, and when telling a lad what the duties were, in order to test his nerves, he would say, while pointing to a grinning skeleton standing upright in a corner, "Part of your work will be to feed the skeleton there, and while you are here you may as well have a try to do so."

A few lads would consent to a trial, and received a basin of hot gruel and a spoon. While they were pouring out the hot mess into the skull, the doctor would throw his voice so as to make it appear to proceed from the jaws of the bony customer, and gurgle out "Br-r-r gr-h-uh! that's hot!"

This was too much, and, without exception, the lads dropped the basin and bolted. The doctor began to despair of ever getting a suitable helpmate, until a small boy came and was given the gruel and spoon.

After the first spoonful the skeleton appeared to say, "Gr-r-r-uh-r-br! that's hot!"

Shoveling in the scalding gruel as fast as ever, the lad rapped the skull and impatiently retorted, "Well, blow it, carn, t yer, yer ould bony?"

The doctor sat down in his chair and fairly roared, but when he came to he engaged the lad on the spot.—Tit-Bits.

Best Novels.

The following is an excellent though limited list of the best books for one to read:

The best historical novel—"Ivanhoe."
The best dramatic novel—"The Count of Monte Cristo."
The best domestic novel—"The Vicar of Wakefield."
The best marine novel—"Mr. Midshipman Easy."
The best country life novel—"Adam Bede."
The best military novel—"Charles O'Malley."
The best religious novel—"Ben Hur."
The best sporting novel—"Sarchedon."
The best political novel—"Lothair."
The best novel written for a purpose—"Uncle Tom's Cabin."
The best imaginative novel—"She."
The best pathetic novel—"The Old Curiosity Shop."
The best humorous novel—"The Pickwick Papers."
The best Irish novel—"Handy Andy."
The best Scotch novel—"The Heart of Midlothian."
The best English novel—"Vanity Fair."
The best American novel—"The Scarlet Letter."
The best sensational novel—"The Woman in White."
The best novel of all—"Vanity Fair."—Germantown Telegraph.

Modern Gold Mining.

The quartz is taken from the mine, sorted and then hauled to the stamping machine. Here the ore is crushed and pounded as fine as flour. It is then run through a sluice-box that contains quicksilver. As the water carries the ore over the "quick" it is taken up and held by the mercury and forms an amalgam. The quicksilver is then placed in a retort and brought to the boiling point. The "quick" passes out of the retort through a tube and is collected in a basin of water, and hardly a bit has been lost, while the gold remains in the retort in the shape of gold dust and is now ready for market. Only about 50 per centum of the gold is saved by this means, and those who can or have ore rich enough to justify it send it to the smelters, where 95 per centum is saved.

Novel Guest Cards.

A pretty guest card seen at a dinner where the flowers were all pink roses was a single good-sized rose leaf made of watercolor paper and tinted pink. The leaves of many other flowers could be used in the same way or split peapods, cabbages, etc.

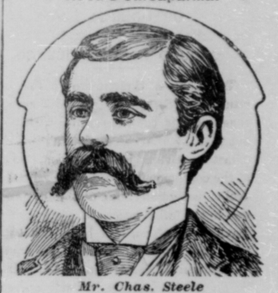
For Over Fifty Years.

AN OLD AND WELL TRIED REMEDY.—Mrs. Winslow's Soothing Syrup has been used for over fifty years by millions of mothers for their children while teething, with perfect success. It soothes the child, softens the gums, allays the pain, cures the colic, and is the best remedy for Diarrhœa. Is pleasant to the taste. Sold by Druggists in every part of the world. Twenty-five cents a bottle. Its value is incalculable. Be sure and ask for Mrs. Winslow's Soothing Syrup, and take no other kind.—m. w. f. wkly—1 y

Broken in Health

That Tired Feeling, Constipation and Pain in the Back

Appetite and Health Restored by Hood's Sarsaparilla.



Mr. Chas. Steele
St. Catherine's, Ont.

"C. I. Hood & Co., Lowell, Mass.:

"For a number of years I have been troubled with a general tired feeling, shortness of breath, pain in the back, and constipation. I could get only little rest at night on account of the pain and had no appetite whatever. I was that tired in my limbs that I gave out before half the day was gone. I tried a great number of medicines but did not get any permanent relief from any source until, upon recommendation of a friend, I purchased a bottle of Hood's Sarsaparilla, which made me feel better at once. I have continued its use, having taken three bottles, and

I Feel Like a New Man.

I have a good appetite, feel as strong as ever I did, and enjoy perfect rest at night. I have much pleasure in recommending Hood's Sarsaparilla." CHARLES STEELE, with Erie Preserving Co., St. Catherine's, Ontario.

Hood's Sarsaparilla Cures

Hood's Pills are prompt and efficient, yet easy in action. Sold by all druggists. 25c.
