

THE DAILY EXAMINER.

JULY 6, 1896.

THE STRENGTH OF BRITAIN.

A CITIZEN of the United States—Hon. Mr. Taylor—has collected some statistics concerning Great Britain, and published them for the information of his fellow-countrymen. Mr. Taylor is full of admiration for Great Britain's wonderful success as a colonizing nation, her capacity for which, as well as the lowly origin of her power, he discovers in very far-flung sources. First surveying the British world, as it exists to-day, he summarizes the main facts of that vast aggregate. It embraces a total area of 11,257,128 square miles, inhabited by populations amounting to an estimated total of nearly 350,000,000. The merchant marine of the Empire includes 11,535 vessels, with an aggregate tonnage of 13,242,662—more than half the entire tonnage of the world; London, as the focus of its expanding commerce, has become a universal clearing house, in which British gold is the standard of value. Of that metal in the ten years, 1885-1894, the Imperial production was £101,742,000, as against £163,132,000 for all the rest of the globe. The Empire's exports and imports reached last fiscal year a total of £1,173,250,000, or \$3,866,450,000. The colonies, it is computed, import only 20 per cent. of their requirements from outside the Imperial domain. The banking system needed for Great Britain's trade is bewildering in its extent and ramifications. In the year ending December 31, 1894, the settlements made through the London clearing house covered a total of £6,337,000,000, or \$31,685,000,000. To defend this vast and diversified commerce, Great Britain is the necessary first of maritime powers, her navy at present comprising 235 vessels (besides torpedo boats, etc.) of a total tonnage of 616,307.

HORSES FOR THE BRITISH MARKET.

MR. ALEXANDER GALBRAITH, while in Great Britain lately, took special pains to note the outlook for Canadian horses in the British market. The result of his observations is set forth in a letter to the Farmer's Advocate. He says that there are only two kinds—perfectly distinct from each other—that the average Canadian farmer can hope to realize a profit from, viz., "carriage horses" and "heavy drafters." As to carriage horses he says there really seems no royal road to their production. They are occasionally bred in all manner of ways, and the most careful, intelligent and skillful breeders are often entirely at sea in their efforts to attain a success in this line. Many "points" are essential, but perhaps the chief ones in a 16-hand horse are style, quality and action, while in the 15 to 15.5 hand it is like Donosthenes' three rules of oratory—"Action, action, action." Yes, strange as it may seem, lofty, straight, all round action, will count about 90 per cent. of the whole. Color used to cut a good deal of a figure, but not so much now, although chestnuts, bays, and browns are preferred generally, and if accompanied by attractive white stockings all the better. The main criticisms lodged at our horses are lack of strength and stamina. Of course the British wagons and vehicles of all kinds are much heavier than with us, and consequently more strength is required in the horse so that the load may be drawn easily and without the straining and tugging incidental to a light horse struggling with a heavy load.

Mr. Galbraith was surprised to learn, on the authority of Prof. McCall, of the Glasgow Veterinary College—that whom none is in a better position to judge—that the Canadian horses used in Glasgow do not, as a rule, hold out or wear as well as the Scotch-bred horse of the same grade. Notwithstanding that the legs and feet of the Canadian horses when brought across are generally excellent, for some reason or other unknown, they don't seem to stand the wear and tear as they ought, but seem to "play out" altogether too soon. The only explanation offered for this, in addition to change of climate, is the fact that frequently young green horses are taken across and put into heavy, constant work in the city right away. These horses cannot be acclimated, and are in no sense fitted for such work until they are at least a year in the country. The same rule applies to European horses brought to this country, and it is unfair to condemn American and Canadian horses as "soft," when they are not really getting a fair chance to show their metal. It is needless to state that any green, unseasoned horse will give way when placed in heavy work alongside one whose bones and muscles are already hard and tough as whalebone. The increasing tendency of our farmers to market their stock early, especially in hard times, has thrown a great many four-year-old horses on the market, many of them being passed off as a year older than they are, and all users of horses know by experience that at this age they are in no condition for hard work either on farm or in the city.

In conclusion, Mr. Galbraith says to the Canadian farmer who wishes to raise horses for the British market: "Try to raise them just as good as you possibly can; use the best sires you can find; almost regardless of service fee; feed your colts generously, but give plenty of exercise; handle and break them carefully but thoroughly; if for draft purposes do not overlook the necessity of having them heavy; and for any purpose, try to raise only such as are absolutely sound in wind and limb." This is good advice.

The Newfoundland Government papers are of opinion that Mr. Laurier will open negotiations for Confederation.

NOTES AND COMMENTS.

—Halifax Herald: If the announcements of the Grit papers are to be taken as true, Canada is to have government entirely by commission. Apparently, the Laurier combination will not have the manliness to assume any responsibility, but a commission is to be appointed to deal with the Manitoba School Question, another commission to deal with the tariff question, and so on; and thus instead of having to work by results, we shall have a Grit combination, shirking their promises and declarations, and sheltering themselves behind the reports of commissions. This is the glorious victory of the suffragers.

—The Farmer's Advocate remarks, "As we all know, it is not the quantity of food a man eats that does him good, but the amount he digests. The same may be said of labor. It is not the man who does the most hard work, but the man whose work is most wisely directed that succeeds. Intelligence must direct the efforts of those who succeed. In other words, intelligent purpose must be embodied in our labor. The man who simply grows wheat another farmer does, and here the same way, without taking into consideration his tastes, capabilities, the soil or the market, deserves to, as he invariably will, meet with discouragement and disappointment."

—While Liberal orators at this end of Canada were posing as the exponent of a policy of economy and reduced taxation, in the Far West the directly opposite tack was taken. The following are some of the reasons urged upon the electors of New Westminster, B. C., for supporting the Liberal candidate:—
Vote for Morrison and larger appropriations for the Fraser river.
Vote for Morrison and Government assistance for a bridge across the Fraser at Westminster.
Vote for Morrison and prevent the Tory Government from putting farm produce on the free list as they have agreed to do.
Vote for Morrison and be on the winning side.

—The London Daily News (Liberal) discussing the belief that the arrest of Mr. Harrison, crown surveyor of British Guiana, by Venezuelan agents, is a settlement of the boundary dispute, since it will open the eyes of our friends in the United States to the nature of the problem with which we have so long had to deal. "It will be good for the Venezuelans," the Daily News continues, "to experience the irritation of the United States, and the latter having taken a certain amount of responsibility for the Venezuelan government will begin to realize that there are reasons for Great Britain's apparent stubbornness. When Great Britain, the pioneer of international arbitration, declines to limit it, she is likely to be in the right, and strongly requires time to prove this to the friends of the United States."

—The Toronto Globe has high authority for saying that "nobody proposes to apply the principle of free trade to our tariff." It would appear, remarks the St. John Sun, that the campaign committee who awarded the prize for the Liberal war song were not in the secrets of the party. The chorus:—
Joined together hand in hand,
Liberals for free trade shall stand.
Has been sung through the campaign without the additional line proposed by this paper, but the authoritative declaration our rendering is singularly appropriate:—
Joined together hand in hand,
Liberals for free trade shall stand.
Or something else to suit demand.

Still for a post election song a chorus like this would please us better:—
After office we will follow,
High protection we will swallow,
Our stomachs being very hollow.

RESULTS OF THE ELECTIONS.

From Different Points of View
L'Electeur: Never since the French-Canadian race was abandoned on the banks of the St. Lawrence has a more glorious day dawned upon our people. For the first time we have one of ourselves at the head of the country's affairs. We French Catholics, yesterday huffed and despised, are to-day—in spite of cowards and traitors—the masters of the administration.

Boston Citizen (organ of the A. P. A.): The Citizen sends its heartiest congratulations to the P. P. A. of Canada (the Dominion P. P. A.) on its great victory in the elections of Tuesday, defeating the Tupper-Papal calumny which attempted to thrust British schools on Manitoba. Laurier, the Cavour of Canada, the man who has stood like a wall against the hierarchy of his own church, has made a gallant fight. Canada goes Liberal for the first time for a score of years.

Boston Post: There ought to be profit for the United States in the substitution of Laurier for Tupper at the head of the Dominion Government, and the displacement of the Tory majority by Liberals in control of the Parliament.

Boston Globe: "Laurier is not a man who, as leader of the Dominion Government, will do ought to hinder the cause of commercial union between Canada and the United States."

Boston Standard: "Nothing will bring about political union sooner between Canada and the United States than a commercial union, and as many on this continent, on both sides of the line, desire the former, it is likely to be best reached by the latter plan."

The New York Mail and Express: "The Liberal victory in Canada is a sore subject in Great Britain just now. The defeat of the Canadian Conservatives is regarded in London as a cowardly and probably fatal desertion and betrayal of the interest which the mother country has at stake in the result of the great political contest now waging in the United States. The average Englishman is by nature, as well as by education, incapable of conceiving that this recent Conservative disaster was the direct result of such a change in sentiment as enabled the Canadian masses to turn to their best interests as identified with American rather than with British policies. Having reached that point of enlightened discernment, it was inevitable that the Canadian masses should turn to the Liberals for leadership. The subservience of the Canadian people to Imperial dictation and exaction has been noticeably declining for the past decade and more. There have been constantly growing more American in spirit, sympathy and ambition, and consequently becoming less strong in their British tastes, interests and attachments. They have learned that their future is vitally involved in that development and destiny of the American people, and that if they are to make sure of a career of honor, progress and thrift they must establish a firm footing of reciprocal fraternity, political and commercially, with the United States. This view of the Canadian situation unquestionably affords an explanation of at least one of the most important and potent factors that operated in effecting the great Liberal victory."

NEWS NOTES.

The date of the Toronto Exposition is fixed for August 31 to September 12.
France's sugar bounties are to amount to 15,000,000 francs, foreign sugar to be taxed to raise it.
Dr. Bouffé, of Paris, claims that he has discovered a positive cure for leprosy, which loathsome disease has recently been on the increase in Europe.

—Records have been asked for in Two Mountains and Yamaska, where Mr. J. A. C. Ethier and Dr. Mignault, respectively, were returned by majorities of 18 and 43.
A lot of five jobbers were taken from Halifax for British Columbia last week. It is hoped to propagate the species in the Pacific. Several attempts at transportation hitherto have failed.

—Exhaustive statistics have been compiled in Berlin to prove the success of the serum treatment of diphtheria, which has been followed in one of the largest Berlin hospitals for the past two years.
The Chamber of Mines and Commerce at Baltimore are organizing a mass meeting there to petition the British South Africa Company to re-instate Cecil Rhodes, whose resignation was accepted last week.

—Rev. N. K. McLennan, pastor of the First United Presbyterian Church of Boston, is dead at Concord, Mass. Deceased was a Canadian, a native of Middle River, C. B., and the body will be taken there to burial.

—Godfrey P. Payzant, president of the Commercial Bank of Windsor, N. S., died on Wednesday last after a short illness. He was 84 years old, and was considered one of the wealthiest men in Nova Scotia.

—A Montreal despatch reports that Edward Farrer will soon return to one of his early loves. The famous journalist has returned to Toronto and will at once become an editorial writer on the Toronto Globe.

—Underground Ireland is almost unknown. M. Martel, the French cave explorer, proposes to hunt for Irish caves, and to examine those he finds thoroughly. He has devised a system of portable ladders, telephones, and electric lights for cave exploration.

—The funeral of Mrs. Harriet Beeler Stone was held at her late home in Hartford, Conn., on Thursday afternoon. The services were of the simplest character. The body reposed in a casket covered with gray broadcloth, which rested in a bank of ferns and a few flowers. The casket had recovered much of Mrs. Stone's younger look.

—The most closely united, powerful and wealthy trade union in America is the United States Brewers' Association. Within the control of the membership of this association there is at least the sum of three hundred millions of dollars, which is practically united in one immense capital for the growth, advancement and protection of the brewing interests of the country.

—A plan for a \$2,500,000 town hall on a 4,000,000 site is now before the London County Council. The site proposed lies in Spring Gardens, between Trafalgar Square and St. James' Park, on both of which open spaces the new building would face. It would finish a continuous line of public buildings from the Parliament houses to the Nelson monument.

—Major General Barateri has been acquitted by the members of the court-martial appointed to try him for being unsuccessful in Abyssinia, but a rider is added to the verdict deploring the fact that the command of the Italian troops should have been confined to an incompetent leader. To a man who always appears to have done best, this appears to be about as bitter a dose as can be imagined.

—At Sierra Leone, early last month, two "human leopards," who, dressed in leopard's skins, had attacked travellers and devoured them, were captured and sentenced to death. It appears that game laws are strictly enforced, and men and women must not be eaten in certain months. They say, moreover, that a true epicure in West Africa will not indulge himself in saurpaustris, except in December and January.

—Lord Wolsey is rapidly reforming the British army. In the cavalry and artillery hereafter the stable jacket will be called the mess jacket, and will be worn in mess dress only. In the infantry the mess jacket will be trimmed with white piped. Whenever gold-laced trousers or overalls are directed to be worn on state occasions, at levees, and in mess dress, obsolete garments may be worn for two years longer.

—The following oriental advices have been received at Vancouver per steamer Empress of China: "The Hong Kong Telegraph has published the startling telegram that Russia has intimated to Japan that she must withdraw from Formosa. Whether this be true or not, it is a remarkable fact that Russia has massed at Vladivostok a strong fleet and 100,000 men and vast stores of war material. The Eastern World says that Russia has practically turned Japan out of Corea. It is reported that Russia has built a fort on Getsa-Pio Island, Corea, and that a gun is mounted upon the Russian legation at Seoul pointed toward the Japanese consulate. This makes the ignorant Koreans afraid of Russia and contemptuous of Japan."

—An Old And Well Tried Remedy.—Mrs. Winslow's Soothing Syrup has been used for over fifty years by millions of mothers for their children while teething with perfect success. It soothes the child, softens the gums, allays all pain, cures wind colic, and is the best remedy for Diarrhoea. Is pleasant to the taste. Sold by Druggists in every part of the world. Twenty-five cents a bottle. Its value is incalculable. Be sure and ask for Mrs. Winslow's Soothing Syrup, and take no other kind. 513 W.

PICNIC.—St. Paul's Sunday School picnic will be held at Red Point on Wednesday, July 8th. Visitors' table will be abundantly supplied with all the delicacies of the season. See advt.

THE POLITICAL SITUATION.
Gossip in and About Montreal.

Reconstruction of Nova Scotia's Government.
—MONTREAL, July 6.
—Mr. Laurier arrived here on Saturday, and it is now announced that Hon. Mr. Fielding of Nova Scotia will go in the new Government, although not as finance minister as first reported. Mr. Haley, M. P. for Hants, is to be promised a seat in the senate and will, it is rumored, give place to Mr. Fielding in that county. Mr. Fraser, of Guysboro, it is said will be the other Nova Scotia minister, and Dr. Borden, of Kings, will be a member without portfolio.

—Mr. Blair will be New Brunswick's one minister. If so, Colonel Donville promises to be a thorn in his side. Mr. Davies will be Minister of Railways and Canals, and Mr. Tarte Secretary of State.
—F. Laugel will be the other French minister from Quebec, although Gedron will be in without portfolio.
It is further stated that George H. Murray, the oft defeated, will be Mr. Fielding's successor in the Nova Scotia provincial government.

NOTES FROM THE CAPITAL.
Mr. Laurier is Worried and Anxious.
Representation of Irish-Catholics.

OTTAWA, July 6.
The Cabinet had a lengthy session on Saturday, and is called to meet again this morning.
According to a reliable authority, Mr. Laurier is greatly worried over the political situation. He recognizes that the Government is not exceeding its constitutional prerogative in taking time to wind up its business. But the sooner Sir Charles Tupper and his Ministers retire the better pleased will be the Grit Leader. Not that Mr. Laurier is impatient for the cares and responsibilities of office, but he recognizes the inconvenience and hardships to which the thousands of well-deserving citizens all over the country are likely to be put through the Grit hindering of last session, and desires to make amends therefor, as early a date as possible.

The Irish Catholic representation in Mr. Laurier's Cabinet is bound to be a source of trouble to the Grit leader. Mr. Fitzpatrick, of Quebec, Mr. Devlin, of Wright, and Mr. Colne, of Port Arthur, are aspirants to a Cabinet position, but the better class of Liberals concede that Hon. R. W. Scott should be the man.
Politics is an ungrateful game, and after toiling and working for the party for twenty years it looks as if Mr. Scott is to be dumped.

Sir A. P. Caron will be the Conservative leader from Quebec in the House of Commons.
The Irish Catholic representation in Mr. Laurier's Cabinet is bound to be a source of trouble to the Grit leader. Mr. Fitzpatrick, of Quebec, Mr. Devlin, of Wright, and Mr. Colne, of Port Arthur, are aspirants to a Cabinet position, but the better class of Liberals concede that Hon. R. W. Scott should be the man.
