

THE DAILY EXAMINER.

OCTOBER 18, 1883.

Editorial Notes.

A scheme is on foot in Winnipeg which if carried out the promoters think will cause another big boom. The scheme is to have the Winnipeg and Hudson Bay Railway Company locate their terminus there, which they are willing to do if the city council grants a bonus of \$250,000. Prominent Winnipeg citizens are enthusiastic over the scheme.

The nomination of candidates for the representation of Levis in the House of Commons, rendered vacant by the appointment of Hon. Mr. Blanchet to the Collectorship of Customs at Quebec, takes place Thursday. Mr. Belleau has been selected as the Conservative candidate, and information from Quebec is to the effect that he will be elected by acclamation, a survey of the field convincing the Opposition that his election by a large majority is certain, and they have wisely resolved not to put the county to the expense and trouble of a useless contest.

There seems to be something rotten in the Civic management of New York City. The New York World says that Comptroller Grant discovered in an examination of the bureau of city revenue and markets that the enormous sum of \$609,000 is unpaid or unaccounted for, much of this being for rents from corporations and others for city property. The Sun reports that the city library in the City Hall is in a shocking condition. Rare books half ruined and everything is in disorder. It says the city librarians are hack politicians. The Citizens Committee are investigating these matters, and have decided, for the forthcoming Civic Elections, to devote their energies to secure the election of honest men for Aldermen.

Mr. Dewar, one of the firm who built the Hospital for the Insane on this Island, has established a high character as a contractor away out in Winnipeg. A Winnipeg paper has a review of his career from which we clip the following: "His first contract was that for the erection of Selkirk hall, for St. Andrew's church, of which Rev. C. B. Pitblado is pastor. It may also be noted that the architect for this building was W. C. Harris (brother of the artist; so well known in eastern Canada) who had only just arrived from Halifax. The contract price was about \$20,000. The work of both architect and builder gave every satisfaction, and at once gave them a reputation which has been steadily increasing ever since."

Is it not strange, that after publishing to the world, in largest type, that Sir John Macdonald was unseated for bribery in his Lennox Election, the Grit papers have with a singular unanimity refrained from touching on that part of the evidence convicting Grit agents of the very same offence. In their indignant and honest condemnation of the Premier, they seem to lose sight of the fact, that four witnesses sworn, they had been bribed to vote for the Grit ticket, and that one stated he had received \$8 to make an affidavit, to the effect that Mr. Roe, a Conservative agent, had bribed him. Sir John Macdonald, on the other hand, was told by the judge that, though the election was voided, his conduct was so clear of imputation of impropriety that a statement by himself on his own behalf was altogether unnecessary.

A prominent St. John Physician sent to the St. John Telegraph the following in reference to the treatment of diphtheria: Observing the frequency and fatality of diphtheria, I would suggest the following remedy, that I have now used in nine consecutive cases, with uniform good results. The remedy can be kept in every house, and, in suitable doses, can be given to children of any age without injury. I might say that, in connexion with this medicine, I have always used a cold water pad around the throat from ear to ear. In the cases mentioned above no gargle or topical application was used.—Solution of Chlorine; Liquor Chlori or Chlorine Water, are the names it is known by at the druggists. The dose is from ten to twenty drops in sweetened water, every two, three or four hours.

An Englishman who desires to succeed Marwood, the deceased hangman, has invented a method of execution which he thinks entitles him to the position. It consists of a rope of the ordinary half-inch white hemp, passed double through a brass clamp, forming a loop which can be adjusted to the exact thickness of the neck of the criminal. Immediately before the clamp is fitted a brass crescent measuring nine inches from tip to tip, and projecting eight inches from the rope. This brass crescent is so adjusted as to tie on the shoulder of the condemned, while the double rope is looped on one side so as to allow a drop of from two to four feet. The principle of the invention is that the moment the criminal is swung off the crescent presses against the side of the head while the rope pulls the neck sharply in the opposite direction, snapping the spinal column like a stick of sealing-wax and occasioning instant death.

The following is the personnel of the new Spanish Cabinet:—Posado Herrera, President of the Council; Ruiz Gomez, Minister of Foreign Affairs; Calvo, Minister of Finance; Mureu,

Minister of the Interior; Lenares Rivas, Minister of Justice; Sardoal, Minister of Commerce; Lopez Dominguez, Minister of War; Valcarlos, Minister of Marine; Suarez Inclan, Minister of Colonies. The appointment of Valcarlos as minister of Marine, was strenuously opposed by Sagasta. It is doubtful whether the majority of the members of the Cortes will unconditionally support the new Cabinet, especially in its policy on the question of universal suffrage and constitutional reform. The general inclination of the new Cabinet is to maintain good relations with the French. Moret, the new Minister of the Interior, says on economic trade questions the past attests the desire of Spain to approach England and America with friendly feelings, if we meet with a disposition to grant fair concessions to our wine and colonial produce. Of France we express the same cordial feelings that will dictate our attitude, now that the difference between the two nations is settled.

On the same day, before the same, Wm. A. Jenkins for an assault on the person of Wm. L. Acorn. Each to pay their own costs.

On the same day before the same, John McLain for an assault on the person of W. L. Acorn, each to pay their own costs. Mill View, Oct. 17, 1883.

British News Items.

Sir Charles Tupper has left for Paris, where he will represent Canada at the conference relative to submarine cables.

The Sun's London special says:—The Parnellite leaders already show signs of a change of front in Ulster. Their game of crushing the Whigs with the assistance of the Tories, is transformed into the policy of crushing the Tories by an alliance with the Whigs.

Another horrible agrarian outrage is reported from Ireland. Three men armed with knives were arrested near Kilarney for attacking a boycotted farmer named John Dineen. The crime was perpetrated between the town of Millstreet and Macroom, and so savage was the assault that the victim was completely disembowelled and otherwise mutilated, almost beyond recognition. When the would-be murderers were caught they still had done the bloody knives with which they had done their work in their possession. Dineen is dying.

Advice received at the Admiralty state that the natives of the Amboina Island, in Malay Archipelago, recently became troublesome and insolent to the officers and crews of British vessels calling at the chief port in the island. The British man-of-war Dart sent on shore a strong party of marines and seamen to chastise the natives for their conduct. The natives at first offered a stubborn resistance, but were put to flight after a short fight, in which an officer and several seamen were wounded, and one seaman killed. Many of the natives were killed, and a large number wounded.

The Times' London special says:—The Queen will provide a large dowry for her grand-daughter, Princess Victoria of Hesse, who is about to marry Prince Louis of Battenburg, who has no fortune. She will give them rooms at Kensington. She has also appointed Prince Louis captain of the Royal yacht Victoria and Albert, which position will be sinecure. The Radical members will protest in Parliament against the appointment, as a scandalous waste of money. There will be a general gathering of the royal family in London next week to bid good-bye to the Duke and Duchess of Connaught, who are going to Meerut.

Foreign News Items.

A Madrid despatch states that the Government is satisfied with the friendly assurances and cordial explanations made to the Spanish Ambassador at Paris by M. Ferry, and has issued a circular to its representatives abroad announcing the fact.

A Paris despatch states that M. Ferry, speaking at a banquet at Rouen this evening, alluded to the Alfonso affair, and said Grey had shown with what serene majesty the chief of a republic can repair the errors of an unthinking crowd. He dwelt upon the advantages enjoyed by a practical, sensible, and prudent, but not blustering republic.

The Dutch are fond of reclaiming land from the sea. The latest proposition in this direction is the draining of the Zuyder-Zee. We have it on the excellent authority of Bon Gaultier that Phairson's son would have succeeded in spoiling the flood "Had ta mixture been only half Ghienlat," and if a fair proportion of S-hiedam could only be mingled with the waters of the Zuyder-Zee the Dutch engineers would have easy work before them.

The anniversary of the discovery of America was celebrated a few evenings ago in Madrid by a splendid banquet in the Opera house. The building was brilliantly illuminated with flags and coats of arms of Spain and the Republics of North and

South America. All the representatives of the American Republics were present. The company included statesmen, politicians, literary men, artists and diplomats. The boxes were crowded with the elite of Madrid society. Speeches in several languages were delivered, interspersed with music. The festivities ended with the unveiling of the Statue of Columbus, which stood on the stage.

DOMINION SAFETY FUND.

THE following acknowledgments for payments death claims show the promptitude with which such claims are paid by the Dominion Safety Fund Life Association:—

As insurances are effected in this Association at actual cost, with a small fixed charge for office commission, there cannot possibly be a more equitable and cheap system of life insurance.

No delay—no heavy premiums, no enormous profits at the expense of the insured!

This company having made the deposit of \$50,000 at Ottawa, as required by law, offers this further guarantee as to the prompt payment of its obligations.

Every policy in this Association for \$1,000 is secured by the obligations of its members representing upwards of \$2,000,000 and rapidly increasing.
