## Ask For Ayer's

Sarsaparilla, and be sure you get it, when you want the best blood-purifier. With its forty years of unexampled success in the cure of Blood Diseases, you can make no mistake in preferring Ayer's

Sarsaparilla to any other. The fore-runner of modern blood medicines, Ayer's Sarsaparilla is still the most popular, being in greater demand than all others combined.

"Ayer's Sarsaparilla is selling faster than ever before. I never hesitate to recommend it."—George W. Whitman, Druggist, Albany, Ind.

"I am safe in saying that my sales of Ayer's Sarsaparilla far exceed those of any other, and it gives thorough satisfaction."—L. H. Bush, Des Moines, Iowa.

"Ayer's Sarsaparilla and Ayer's Pills are the best selling medicines in my store. I can recommend them conscientiously."—C. Bickhaus, Pharmacist, Roseland, Ill.

"We have sold Ayer's Sarsaparilla here for over thirty years and always recommend it when asked to name the best blood-purifier."—W. T. McLean, Druggist, Augusta, Ohio.

"I have sold your medicines for the last seventeen years, and always keep them in stock, as they are staples. 'There is nothing so good for the youthful blood' as Ayer's Sarsaparilla."—R. L. Parker, Fox Lake, Wis.

"Ayer's Sarsaparilla gives the best satisfaction of any medicine I have in stock. I recommend it, or, as the Doctors say, 'I prescribe it over the counter.' It never fails to meet the cases for which I recommend it, even where the doctors' prescriptions have been of no avail."—C. F. Calhoun, Monmouth, Kansas.

## CARD.

Catarth is in the blood. No cure for this loathsome and dangerous disease is possible until the poison is thoroughly eradicated from the system. For this purpose Ayer's Sarsaparilla is the best and most economical medicine. Price \$1. Six bottles, \$5. Worth \$5 a bottle.

CUTTING and FITTING a specialty. Cutting done by the "Ladies' Delight System." Ladies wishing to learn the above system will be taught on reasonable terms. 2w—sept21

Large stock of Mens', Boys' and Girls' Caps, Very cheap.—Perkins & Sterns.

## The United States Navy.

Following up the apparently sound idea of heavily armored monitors of large tonnage, carrying few but heavy guns, and of a high rate of speed, plans are now in preparation for two single turreted monitors of 3,500 tons displacement, designed for speed of 18 knots, and to carry a 16-inch rifled gun, throwing a shell of a ton weight calculated to pierce 30 inches of wrought iron. These tonnage ought to furnish a strong hint to the British Admiralty, to which we would also commend a consideration of what we conceive to be a very important point—the reduction of draft by expansion of beam. In this connection we particularly point out the dimensions of the new armor battle-ship Texas, to be built at Norfolk. Her displacement is 6,300 tons, length 230 ft., beam 64 ft., draught 22½ ft., speed 17 knots; her armament is to be two 10-inch, six 6-inch, and 25 machine guns.

The Maine a similar ship, has dimensions and armament slightly different. Her tonnage is 6,000 tons, length 310 ft., breadth 57 ft., draught 21½ ft., with an armament of two 12-inch, six 6-inch, and 21 machine guns, and also with the estimated speed of 17 knots. These two are the only armored ships as yet designed apart from the monitors, but they will be very powerful vessels, and fitted with every possible modern scientific appliance. Their heavy guns will have an extreme range of about nine miles, with a 500 lb. projectile and a charge of 250 lbs. They are turreted and will have 11 inches of armor, but no sail power.

The next largest vessels are the unarmored steel cruisers Chicago (nearly completed) Baltimore and Philadelphia (both building). These are of 4,500 tons, 354 ft. length, 48 ft. beam, 19 ft. depth, 16 knots speed, and 12 guns.

Next in order the Newark and San Francisco (both building) of 4,100 tons, 328 ft. length, 49 ft. beam, 19 ft. draught, and an estimated speed of 18 and 19 knots. They will carry twelve 6-inch rifled guns, eleven machine guns, and six torpedo tubes.

The Charleston is of 3,700 tons displacement, length, 320 ft., breadth, 46 ft., depth, 18 ft., speed, 19 knots, armament, six 6-inch, two 8-inch, and fourteen machine guns. She was launched in July, and was built after the plans of a Japanese cruiser, constructed by the firm of Armstrong, in England.

The Boston and Atlanta are 500 tons smaller, displacing 3,200. They are sister ships, with a length of 283 feet, breadth of 42, and depth of 17 feet, and carry an armament similar to that of the Charleston. The Boston is nearly completed, but the Atlanta has made several cruises, and given satisfaction in every respect, being a good sea boat, and furnishing a good gun platform. Her maximum speed is 16 knots, and it may be here remarked, that no ship ever yet launched, especially men-of-war, ever came within a knot or two, and often more, of the speed expected of them.

The Yorktown, Beaufort and Concord are smaller sister ships; of 1,700 tons, 226 feet in length, 36 ft. beam, 14 feet draught, and estimated for 18 knots. All the smaller ships are looked upon by the Americans as "commerce destroyers," and both these and the larger ones stow a supply of coal which would enable them to steam from 5,000 to 9,000 miles and keep the sea for from three to five weeks.

The armament of these three ships is six 6 inch, six machine guns, and eight torpedo tubes.

The Dolphin, 1,500 tons, is a despatch boat, armed with one 6-inch, and six Hotchkiss guns, 3 and 4 pounders.

When we think of the wretched little gunboats like the Ready, of 450 tons, it is significant to find the Peterel of 870 tons, 175 feet length, 31 ft. beam, and 12 feet draught, spoken of by the American writers as a "small gunboat."

The Americans are well satisfied with their guns, and it will be seen that in a year or so they will possess a fleet which, though, as Lt. Fullam says, is only about one-tenth the effective force of England or France, will yet be of very superior ships of their respective classes, which the skill and dash of American naval officers would make formidable enough.

The completion of all the ships now building will give the United States seven ironclads and fourteen unarmored ships of different sizes.—Exchange.

Celery is an article of food that is coming more into favor as its medicinal properties come to light. Are you nervous, irritable, or out of sorts? Do not, I pray you, fly to quack mixtures, or destroy the nervous system by a too liberal use of the pipe or cigar. "Come, let us reason together." Throw your medicine to the dogs; the loss of a stray canine or two would not be missed in our now over-populated dog life. Are you a smoker? Throw your black poisonous saturated pipe in a tub to soak, and for one month bid good-bye to medicine and pipe, and try a judicious, systematic use of Gay's pure white celery, (unadulterated, as nature provides), and if you are not benefited by the experiment there must be something radically wrong in your composition. A fine retail supply on hand at our stalls, Market House, Charlottetown. Orders taken now for winter supplies. Address, JAMES J. GAY & SON, Pownal, sep 13 mon & thur tf

According to the Roman Catholic returns for 1888, there are in England and Wales 2,314 priests, as against 1,728 in 1875 serving 1,304 churches, chapels and missionary stations. In Scotland there are five bishops and 334 priests, serving 327 chapels, churches and stations. The estimated Catholic population in England and Wales is 1,354,000; in Scotland, 328,000; in Ireland, 3,961,000; total, 5,641,000.

Hall's Hair Renewer eradicates and prevents the formation of dandruff, thickens the growth, and beautifies the hair as no other preparation will.

## The Public Debt of France.

An elaborate article recently appeared in the *Economiste Français* on the public debt of France. The most usual estimate of the capital of the debt is said to be £1,300,000,000 English money, but the most moderate estimate places it at a few millions lower. M. Paul Leroy-Beaulieu places it at £1,250,000,000; but M. Stroum, the writer in the *Economiste* puts it at £1,180,000,000. The latter, however, omits £26,000,000 of life annuities economist have treated as part of the capital of the debt. The annual charge for interest and sinking fund on the entire debt, including the life annuities, is £51,630,000. Of the funded debt, about £330,000,000 are perpetual three per cents, £271,500,000 perpetual four and a half per cents, and £193,000,000 redeemable bonds of various descriptions. Annuities to divers companies and corporations of £95,000,000 and £40,000,000 of floating debt make up the balance of Mr. Stroum's total. This is by far the heaviest burden borne by any nation on the globe. The nearest approach to it is the debt of Russia, which is stated at £721,000,000. England is next with a national debt proper of £713,000,000, and Italy next among European nations with £445,000,000. The debt of Austria is about £370,000,000, and of Hungary, £127,000,000. The debt of Spain is, in round numbers, £241,500,000 and that of Prussia £200,000,000. England and Prussia are the only nations which raise sufficient revenue to guarantee a permanent equilibrium of the budget.

## Wheat from Seed 5,000 Years Old.

A most interesting experiment culminated to-day in the raising of some wheat grown from wheat as old as the exodus. The experimenter is David Drew, who last year received from a friend in Alexandria, Egypt, some grains of wheat taken from a mummy exhumed near the ruins of Memphis, and belonging, it is believed, to the period of the ninth dynasty, which would make it grown about 5,000 years B. C., or nearly 5,000 years old. He planted the seed early in the spring, and carefully nursed it. It grew rapidly, and at the time of cutting measured from six and a half to seven feet high. The leaves alternate on the stock like common wheat, but the product of the plant is the most singular part of it, for, instead of growing in an ear like modern corn, there is a heavy cluster of small twigs in place of the spindle which hangs downward from its weight, and each twig is thickly studded with kernels, each of which is in a separate husk. From what is thrashed a larger crop will be grown next year, as the result proves this to exceed in quality anything modern grain can grow.—Cincinnati Enquirer.

## Dundas Notes.

The harvest this season is about double that of last year, and has been gathered in pretty fair condition.

Shipping has commenced. Matthew, McLean & Co. are now loading a large schooner with potatoes.

The repairs to the Grand River Bridge are being completed, not, however, without interfering with traffic.

Messrs. Nicholson and Pope are diligently employed in enforcing the Scott Act in this place.

Mr. McPherson, Merchant Tailor is doing a rushing business.

The carriage factory here is very quiet, imported waggons being preferred to home made ones.

We learn that Samuel McDonald, Esq., Westville Farm, has imported a farmer from Scotland.

Mr. Wm. Nicholson Sunnyside Farm, is busily engaged in grading a field for a trotting park.

The school in this place, under the guidance of Miss Smith, is making fair progress.

A ferry is needed between Bridgetown and Cumberland Hill. The attention of the Government is directed to this particular.

October 11, 1888. POPE.

## Piles! Piles! Itching Piles!

SYMPTOMS.—Moisture; intense itching and stinging; moist at night; worse by scratching. If allowed to continue tumors form, which often bleed and ulcerate, becoming very sore. SWAYNE'S OINTMENT stops the itching and bleeding, heals ulcerations, and in most cases remove the tumors. All druggists, or by mail, for 50 cents. Dr. Swayne & Son, Philadelphia. oct12 6m dw
