MISS EDITH HILL,
Late of Anglo-French College, Upper Nor-
wood, England.

Desires Pupils for Pianoforte.
Terms: First week in September. Certain
days from South Kensington, England.
Acquire at BERG & GOFF'S Upper Store,
April—end of

J. H. AYERS, D. D. S.,
Graduate of the University of
Pennsylvania.

OFFICE—Rooms formerly occupied by Dr.
Robles, opposite St. Dunstan's Cathedral, Great
George St. est.
Office hours from 9 a. m. to 1 p. m., and from
2 to 5 p. m.

MR. H. L. HEARTZ,
Organist of St. Paul's Church,
WILL resume lessons on the Piano the first
week in September. Choice Music on sale
at lowest prices. For terms, etc., apply at Music
House, Prince Street.

Piano and Organ Tuning and
Repairing.

MR. VINNICOUBE has removed his office to
Messrs. Hazard & More's Bookstore,
where all orders and payments may be left. His
artistic Tuning and Repairing is widely known
among many of the leading musicians of Nova
Scotia as well as on the Island. Having an ex-
perience lasting over twenty years, his superior
knowledge of Piano construction, enables him to
repair or tune to a perfect finish. His instru-
ments are beautiful even tone, and delicate touch
is his speciality. He repairs and restores
damaged work, and also repairs and restores
stagnant, yellow keys, and other defects. Mr.
Vinnicoube knows at a glance what requires to
be done and does it. Estimates for repairing
carefully given. Strings and Piano Fittings
kept on hand. All orders punctually attended

PICKLING VINEGAR AND SPICES,
WHOLESALE AND RETAIL.

ENGLISH MALT VINEGAR.—We have on hand a large
stock of this excellent Vinegar, which is, without
doubt, the best Vinegar for keeping Pickles in the market
to-day. As we import this direct from England ourselves
we can guarantee the quality.

WHITE WINE VINEGAR.—We have also received another
consignment of XXX White Wine Vinegar, in Demi
johns and Casks, from the best manufactory in the Dominion,
which we can confidently recommend to be first-class.

PICKLING SPICES.—We have received another lot of
the same kind of Spice that we had last season, and which
gave such excellent satisfaction. Don't buy poor Spices and
thereby spoil your Pickles.

Whole Pepper, Allspice, Cinnamon, Ginger, Cloves, Mace,
Mustard Seed, etc., always kept on hand.

Note and Comments.

The depression in Great Britain just now, is, says the Empire, due to many causes. The McKinley Bill and protection in other countries is, of course, the main reason. It is the one which not only hampers present exports, but prevents future recuperation. Added to this are the echoes of the Argentine collapse; the financial and political troubles in Brazil; the bankruptcy of a large area in South America; the bad harvests at home, and the intense competition of foreign manufac- tures and cereals in the home market. The net result is a diminution of exports to the tune of over \$15,000,000 sterling during the first eight months of this year, actually accompanied by an increase in the imports of food amounting to \$7,000,000 and a decrease in the raw material imported for textile manufac- ture of over \$4,000,000. A London correspondent of the New York Sun adds that the state of trade, the decay in ship building, the diminution in money for new investments, and the growing poverty in large cities, a growing pro- nounced unemployment in business circles.

Emperor William has conferred the grand cordon of the Red Eagle upon the Khedive of Egypt.

A correspondent who visited the Provincial Exhibition writes:—

"I was much pleased with the show on the whole. The exhibits in some lines in the building could have been much better and should have been better too, but in others they were sub- b. I, for one, am sick and tired of dry goods displays at our exhibitions. Little as we manufacture, we ought to be able to replace them at our own work. If the producers of the soil and the handi- work of our soil and daughters won't do it, I'm sure if properly seen to, all the space would thus be filled up. And some super- vision should certainly be exercised in admitting exhibits. A notoriously bad article like that disgraceful dab of poor O'Connell, in the art department, ought not to be admitted. It demeaned the whole class. A proper supervision should be main- tained as to the keeping of exhibits in con- dition too. It is too bad to allow cut flowers to wither and fade on the first day for want of water. The show who come late much of the pleasure they pay for on this account. The association is doing well; but there are many holes yet to plug and many improve- ments to hope for. But, as I said, on the whole we may be proud of our Provincial Exhibition of this year. What became of the Government farm stock? That new bull is evidently a first. The cows they sent up here for sale were certainly a disgrace. It was an insult to wester- P. E. Island—old good-for- nothing thing. Looking at the exhibits fetched, one would say we didn't know the value of stock, but if you saw the cows and calves you'd say we were very generous indeed."

LETTERS TO THE EDITOR

The Wrong Kind of Rape.

Sta.—Some of the seedsmen of England have made a grave mistake in the rape seed which they sent to our seedsmen in the early part of the season. They have not seen it true to name; hence the larger portion of the rape grown during the present year in Ontario is a variety adapted to the production of seed for oil extraction, rather than to provide pasturage for sheep. The rape that has been grown in this country during previous years is known as the "Dwarf Essex." The order was given as usual for the "Dwarf Essex" by our Guelph seedsmen, and the package came labelled "Dwarf Essex," whereas it is another variety of rape which seems to be a hybrid. It is a summer rape, while the "Dwarf Essex" is a winter variety that will not produce seed the same season. It is the same variety as rape grown at this station in a small plot which came to us labelled as the "Broad-leaved Dwarf Essex."

I do not regard it as being anything like so valuable for pasture as the Dwarf Essex. It pushes up a flower stock about six to eight weeks after it is sown; hence it grows less of leaf and much more of woody matter than the real Dwarf Essex. It grows tall rather than spreading, in the form of a bush rather than that of a fodder plant; and at the present time the fields containing it are one mass of yellow bloom.

Letters have reached me from several directions expressing the fear that if the seed or a portion of it were allowed to fall upon the ground it would be troublesome to get rid of, and asking what had better be done with it in the meantime. In the absence of previous experience with this plant, I can only express an opinion on this point. I do not apprehend that trouble would arise to any serious extent if some of the seed should ripen and fall upon the ground, but it is better not to run any risk on this score. There is no necessity that we should do so. We have more than 30 acres of this stuff, and we find that when our lambs are turned in upon it they strip off the blossoms and seed pods before they eat the lower portions. Owing to the upright habit of the growth of the plant the lambs can easily get to every portion of the field. A number of our farmers are ploughing it under rather than run any risk, but in the light of what has been said, there is no real necessity that this should be done except in instances where the lambs had not been turned in upon it before the stalk has become woody.

It is very unfortunate that such a mistake should have occurred, and at such a time, as many were trying to grow rape this year for the first time. There will naturally look upon it as of but little value. But they should not again, as a mistake of this nature is not likely to occur again. Indeed we will have to take steps that it shall not be repeated. To that end I would venture the suggestion to our seedsmen to lay in their supplies of rape seed this fall, and to test it by growing some plants in the green house. In the work of rendering some service in this field, the seedsmen of Ontario see fit to send some of the seeds to our depart- ment, we will carry on duplicate tests and report to them in due time. It would then be impossible that a mistake could be made next year.

THOS. SHAW,
Ontario Agricultural College,
24th Sept., 1892.

Another Authority.

SIR,—Your correspondent "Historicus" in Saturday's EXAMINER asks questions in this regard, the statement made in THE EXAMINER of the 28th ult., touching the commemorative feature of the Montreal Exhibition recently held in that city. "Historicus" denies that Capt John Macdonald, Glenora, of the 84th Highlanders, declined the governorship of this Island, because, as he states, no "great offer was ever made." In defence of the statement in question, the accuracy of which is challenged by your correspondent, we refer him to a lecture "A Chapter in Our Island History," delivered in the Market Hall, Char- lottetown, during the winter of 1881, by the late Rev. Dr. D. Macdonald, familiarly known as "Father Dan," than whom no better authority on the life and times of the early Highland emigrants of this Island could be given. In this able lecture it is stated that in proof of the estimation in which Capt. John Macdonald, of Glenora, stood with the government of Great Britain it may be here mentioned that the government of this Island was offered him, but as a consistent Catholic he was obliged to decline, owing to the oath required to be taken at that time.

Oct. 3, 1892.

Seventy-seven per cent. of the master cotton spinners of England have decided to enforce a reduction of 5 per cent. in the wages of their employes. The men stubbornly refuse to accept the proposed re- duction and intend to strike. It is generally admitted in Manchester that a stoppage of work will not be a bad thing for trade, as it will enable the spinners to reduce the present heavy stocks.

CHILDREN ENJOY the pleasant flavor, gentle action and soothing effects of Syrup of Figs, when in need of a laxative; and if the father or mother be constive or bilious, no more satisfying results follow its use, so that it is the best family remedy known and every family should have a bottle.

NO MAN ever smoked "Myrtle Navy" tobacco for a fortnight and then took to any brand in preference to it. It bears its own testimony of its quality, and it is testimony which is always convincing. The smoker who uses it is never annoyed by getting it sometimes of good quality and sometimes of inferior quality. The arrangements of the manufacturer for keeping its quality equal are very elaborate and complete, and are the result of many years of experience and close obser- vation.

FRANK C. MORAN.

"I Itched Intensely!"

A TERRIBLE SKIN DISEASE

Of Eight Years' Standing

"PERFECTLY CURED"

BY

Skoda's Ointment and Discovery.

Lewiston, Me.

GENTS—I wish to inform the suffering through you that SKODA'S GERMAN OINTMENT AND SKODA'S DISCOVERY will cure the worst skin disease to be found. This statement may seem strange, but I think a true statement of my own case, will convince the most skeptical.

For some eight years I have had a terrible skin disease from which I have suffered untold misery. I have tried physicians of repute and about all the so-called "skin cures," but the result was failure.

My body was covered with white scales, it itched intensely, and when I would rub or scratch the scales off, the itching would return with renewed force. I was so afflicted as I was unable to work, and my skin was so dry that my elbows, knees, hands, etc., would crack open so badly that they would bleed freely. My scalp was so that I could not comb my hair, and it kept
