THE ONE STOP MARKET

It was a worrying time... when it should have been a happy one. The stork was flying our way, but we didn't have the money needed to welcome our new baby. After going over our finances for the umpteenth time, we decided there was nothing for it but to cash our bonds. There had been too many 'surprise' expenses.

Luckily for us, our B of M manager had other ideas. "Here's a real chance for you to save, and you're missing it," he smiled.

"Save? At a time like this?" we nearly shouted.

"It's not as hard as you think," he said, "... quite a few of my customers do it.

"First, you have to plan yourself a budget... You need a road map, if you're to know where you're going with your money. Here's a little booklet called 'Personal Planning'. Read it carefully. It shows you how to work out your own way of getting ahead, financially—and how to save regularly from now on."

"But how can we save in our present pickle?" I asked him.

"Borrow against your bonds," he said. "You've got a steady job. After all, if you cash your bonds now, you'll have the money you need, but you won't have any savings left. If you use your bonds to borrow, you get them back by paying off your loan instalments. In other words, you're saving your savings. This is one of the times when borrowing is really saving."

Our story has a happy ending, because our financial worries went out of the window before the stork flew in. Yes, our baby had a happy welcome. We paid back the loan. Now, we still have our bonds, we're living on a budget suited to our needs and aims, AND we're saving regularly.

Saving is the only way to move ahead of your worries, and stay ahead. And—sometimes—borrowing at the B of M is the best way to save. Find out how to save, despite today's high prices. Ask for your copy of "Personal Planning" at your neighborhood B of M branch. It's yours for the asking.
